SEC. 2. (a) The provisions in paragraph (a)(2) of section 15, section 24(a), and section 29 of the Poultry Products Inspection Act shall not apply with respect to domesticated rabbits or the carcasses of such rabbits, or parts or products thereof. The two-year period specified in paragraph (c)(1) of section 5 of such Act and the periods contemplated by paragraph (c)(4) of such section shall commence upon the date of enactment hereof, with respect to domesticated rabbits and the carcasses of such rabbits, and parts and products thereof; and in applying the volume provisions in paragraphs (c)(3) and (c)(4) of section 15 of such Act, the volume restrictions applicable to poultry shall apply to domesticated rabbits.

(b) For purposes of this Act—

(1) wherever the term "poultry" is used in the Poultry Products Inspection Act, such term shall be deemed to refer to domesticated rabbits;

(2) wherever the term "poultry product" is used in the Poultry Products Inspection Act, such term shall be deemed to refer to domesticated rabbit products; and

(3) the reference to "domesticated bird" in section 4(e) of the Poultry Products Inspection Act shall be deemed to refer to domesticated rabbit.

(4) the reference to "feathers" in section 9(a)(4) shall be deemed to be "pelt".

SEC. 3. This Act shall become effective on October 1, 1977.

SEC. 4. The provisions hereof shall not in any way affect the application of the Poultry Products Inspection Act in relation to poultry, poultry carcasses, and parts and products thereof.

The SPEAKER pro tempore. Is a second demanded?

Mr. SEBELIUS. Madam Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. WEAVER. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, the Committee on Agriculture has favorably reported H.R. 2521, a bill calling for mandatory inspection of rabbit meat by the Federal Government. The bill was ordered reported to the House on March 17, 1977, by a unanimous voice vote in the presence of a quorum.

This legislation would extend the Department of Agriculture inspection services to the processors of domesticated rabbit meat who slaughter in excess of 20,000 rabbits annually. This inspection service would be identical to that currently provided for poultry, beef, pork, and other widely consumed meats.

Presently, all meats with the exception of rabbit meat are required to be inspected by the Federal Government. Since rabbit meat is a high-quality nutritious meat that is gaining in popularity with American consumers, the Committee on Agricultrue sees no reason that the Federal Government should not take action to assure its wholesomeness. This bill will provide for such inspection beginning on October 1, 1977.

At this time, I yield to the gentleman from Kansas (Mr. SEBELIUS) who is the sponsor of this legislation, so that he may describe in further detail the merits of the legislation.

Mr. SEBELIUS. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I appreciate this opportunity to discuss H.R. 2521, legislation to amend the Meat and Poultry Products Inspection Act to include inspection of domesticated rabbits slaughtered for human consumption.

This legislation would extend USDA inspection services to the producer of domesticated rabbit meat who market over 20,000 rabbits a year. This inspection service would be identical to that currently provided for all other competing types of meat. The USDA stamp of approval provides the consumer a reassuring guarantee of product wholesomeness which makes the expense of inspection an investment rather than a cost. Furthermore, it will insure a steady and dependable supply of top-quality rabbit meat to consumers.

The Federal-State meat inspection program has been quite successful in its basic objective of protecting the consumer from dangerous and unwholesome meat products. As a result, consumers have responded to USDA inspection by demonstrating a growing preference for reliable meat and meat byproducts.

In 1906, when the first Wholesome Meat Act was passed, beef consumption was 71.3 pounds per capita and in 1909, the first year when poultry consumption figures were calculated, 14.7 pounds of chicken were consumed per person. By 1974, beef consumption reached 116.8 pounds per capita, and chicken consumption was 41.1 pounds per capita.

Of course, other variables such as income and demand influence these figures, but the protection afforded by inspection has contributed significantly to consumption of meat. Consumers of domesticated rabbit meat should have the assurance that it is wholesome, unadul-

terated, and properly labeled, as they presently do for other meat and poultry products.

At the present time inspection is available for rabbit processing under a voluntary program in which processors pay for the services. This bill would require mandatory inspection of rabbit processing and assure the uniform certification of the wholesomeness of domesticated rabbits. This would relieve an unfair and inequitable burden to a struggling marginally profitable industry.

In view of the well-documented need for high quality protein in the human diet, I believe that USDA-inspected rabbit meat and rabbit products can help satisfy this demand and in a most nutritious and efficient manner.

Rabbit meat is similar to the white meat or the breast of chicken. In fact, rabbit meat is higher in protein and much lower in fat and cholesterol than other red meats. This underscores its dietary importance in our health-conscious society. Rabbit meat is recommended for heart patients and approved by Weight Watchers.

The rabbit has a feed conversion efficiency of about 4 to 1—4 pounds feed per 1 pound gain. The meat has a high meat-to-bone dressing percentage with the meat being 85 percent digestible.

Three domestic rabbit does and one buck can produce more meat in a year than one cow, at less cost per pound of meat gained. In fact, the domestic rabbit has the genetic capacity to produce about 25 times its weight in fryer offspring each year.

Rabbit byproducts are important in the production of certain pharmaceuticals. For example, rabbit blood is reduced to plasma for diagnostic purposes while rabbit brains are used to produce thermo plastin for testing and coagulation of human blood in the laboratory.

I feel that to date, rabbit consumption has been limited, in part, due to the back of consumer guarantees of wholesomeness and the retail price of rabbit which is inflated by the cost of inspection. The competitive disadvantage of absence of quality guarantees has overshadowed the dietary and economic benefits of rabbit consumption.

Federal inspection as required by this bill would accelerate consumer acceptance, would create stability and provide economic incentive for expansion of the rabbit processing industry.

There has been some concern that mandatory Federal inspection will eliminate the small rabbit processors. This is not the case. There are liberal exemptions for small processors and they would stand to gain more than large processors since inspection fees as high as $14 per hour represents a greater percentage of their production costs.

There is ample evidence that a significant percentage of the domesticated rabbit meat retailed in this country is imported, without USDA inspection, from the Peoples Republic of China, and is produced under questionable sanitary conditions. This bill would authorize spot checks of imports and require foreign plants to comply with sanitation standards that are required for other meat imports.

A stable rabbit processing industry could create economic opportunity for many unemployed or underemployed citizens in rural and small-town areas. Rabbit production as a source of supplemental income appeals to hobbyists, senior citizens, young people, handicapped, the disadvantaged, and various ethnic and minority groups.

Raising domesticated rabbits requires a limited investment and operating capital as well as minimum labor requirements. This makes rabbit production a promising source of income and meat production in the future.

In short, the time has come to include rabbit processing under the mandatory inspection provisions of the Meat and Poultry Inspection Acts. This would stabilize the rabbit processing industry without forcing undue costs on the small processor who could be exempt. This act would open new doors of opportunity for senior citizens, youth, handicapped, and others in search of gainful employment and economic returns and could offer our rural and small-town areas additional economic activity, an important consideration during these times of high unemployment.

More importantly, the consumer would be guaranteed wholesomeness and an increasing supply of a most nutritious and healthful food which is high in protein and low in fat. This bill would also give the rabbit producer and consumer some measure of protection from cut-rate, low-quality imports.

I am hopeful that we will take prompt and favorable action on this proposal.

Mr. BAUMAN. Madam Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Maryland.

Mr. BAUMAN. Madam Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Maryland.

Mr. BAUMAN. I thank the gentleman for yielding.

I was very interested to read this legislation, and I am informed by learned minority counsel on the Committee on Agriculture that it has already been the subject of a Harvard Law Review article. That is so, because this is another case in which apparently the Congress is attempting to repeal the laws of nature. As I read page 3, it actually defines a domesticated bird as a domesticated rabbit.

As the gentleman knows, I come from the Eastern Shore of Maryland where the broiler industry began. Some of the best chickens in the world are raised on the Delmarva Peninsula. I was not aware that anyone ever had any trouble with rabbit production. They seem to know what to do without Congress giving advice. As a matter of fact, from my experience with the hedgerows at my place where I live in the country, there is a bit of a rabbit surplus.

But one thing worries me most about this act of repealing the laws of nature. I notice on page 2 it says that this act shall apply to any "persons who perform any act relating to domesticated rabbits." I know there are criminal penalties provided in this inspection law. Would it be proper for the gentleman to explain on the floor of the House what acts this makes illegal?

Mr. SEBELIUS. What we have done is take the Poultry Inspection Act and changed the word "feathers" to "pelt." "Bird" is the equivalent of "rabbit." We have used that act to simplify it. Many rabbits today are processed in a chicken processing plant.

I would commend the gentleman from Maryland and his area for a very, very fine product. I had fried chicken last night and I hope to have it again soon. As far as the penalties are concerned, they are the same as those which apply to the chicken grower. I think the gentleman from Maryland can understand that these provisions apply to the domesticated rabbit grower.

We want to give the people who choose rabbit the same privileges as those who chose chicken, in other words to rely on USDA inspection.

Mr. BAUMAN. I thank the gentleman. I think it is marvelous. Only the Congress of the United States can change a rabbit into a bird and fur into feathers. I commend the gentleman for being able to produce such esoteric legislation.

Mr. WEAVER. Madam Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Madam Speaker, I rise in support of the bill. I think, as my colleague, the gentleman from Kansas, has indicated, once more we have furnished a new type of food item, and we want to make sure that it is safe for consumption.

I want to take a second, as long as I have the floor, to comment about the arm band my colleague, the gentleman from Kansas, has on his arm. Many of my colleagues in the House have received a loaf of bread from Mr. SEBELIUS. While this does not have anything to do with rabbits, I would note that we have a farm bill coming up which deals with perhaps the single largest export food production item that we have, and that is wheat. I hope that the Members of this House will look at the farm bill, particularly as is relates to wheat, with the same amount of thoroughness and rapport as we have just done in authorizing over $6 billion of funds for CETA, because both are critically important to the nature of this economy.

Mr. WEAVER. I would assume that the gentleman would not call wheat rabbit feed.

Mr. HAMMERSCHMIDT. Madam Speaker, my interest in and support for this legislation to provide for mandatory rabbit meat inspection are strong, in that the Third District of Arkansas which I represent is fortunate in having a major segment of the domestic rabbit industry within its boundaries. H.R. 2521 addresses itself in a very direct and positive way to the very survival of the domestic industry, which has been struggling since

the late 1960's and early 1970's for its continued existence.

The bill provides for the adequate inspection of rabbit meat imported into the United States and processed in this country. Heretofore, the Food and Drug Administration has not even made cursory inspection of all rabbit meat imports. H.R. 2521 calls for such inspection regulations, to be administered by the U.S. Department of Agriculture, as is the case for other meat. Continued increases in the cost of the voluntary inspection program make the program a luxury which the rabbit processors cannot afford and remain competitive with other meat in the marketplace.

Similar legislation was passed by the House in the closing hours of the 94th Congress, H.R. 10073, but was pocket vetoed by the President. I urge favorable action on the bill we have before us today, so as not to delay final congressional action any longer. The cost of such inspection will be far less than was estimated by OMB during the last Congress, at which time an error was made on the part of the Budget Office by assuming that far more processing plants would require inspection than is the actual count. The error was made, I might point out, because no actual industry survey has ever been made by the Government.

Another very important feature of H.R. 2521 is that its provides for the exemption of the very smallest plants, thus giving the rabbit processors equal protection with other poultry as specified in the Poultry Products Inspection Act. The inspection of domesticated rabbits is also governed under that act.

Madam Speaker, H.R. 2521 is clearly a consumer protection measure. From 6 to 20 million American consumers buy rabbit meat and through enactment of this legislation they will be assured that the meat they are buying in retail stores is wholesome, whether or not it has been imported or processed in the United States. Unfortunately, there is some rabbit meat being sold in a number of large U.S. cities which cannot meet that criterion. Currently, no inspection of this meat is required.

I have some very graphic and explicit evidence of the need for mandatory inspection which has been provided to me by the rabbit meat industry in my district. The meat that does not meet the specifications of wholesomeness must not be allowed to reach American consumers.

Madam Speaker, significant economic conditions, as well as a clear need for protection of consumers, call for our affirmative action on H.R. 2521 and I urge my colleagues to act accordingly.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. WEAVER), that the House suspend the rules and pass the bill H.R. 2521, as amended.

The question was taken; and (two-thirds having voted in favor thereof), the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WEAVER. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oregon?

There was no objection.

LEASING OF FLUE-CURED TOBACCO QUOTAS

Mr. JONES of North Carolina. Madam Speaker, I move to suspend the rules and pass the bill (H.R. 3416) to amend section 316(c) of the Agricultural Adjustment Act of 1938 to provide that leasing of Flue-cured tobacco acreage-poundage marketing quotas after June 15 of any year be permitted only between farms on which at least 80 percent of the farm acreage allotment was planted for such year.

The Clerk read as follows:

H.R. 3416

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 316(c) of the Agricultural Adjustment Act of 1938 is amended by striking out the second sentence and inserting in lieu thereof "Any lease of Flue-cured tobacco acreage-poundage marketing quotas from any farm with an acreage-poundage marketing quota in excess of two thousand pounds filed on or after June 15 in any year shall not be effective unless the acreage planted on both the lessor and the lessee farms during the current marketing year was as much as 80 per centum of the farm acreage allotment in effect for such year.".

The SPEAKER pro tempore. Is a second demanded?

Mr. WAMPLER. Madam Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. JONES of North Carolina. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, I am pleased to bring up H.R. 3416, a bill to amend the law controlling the requirements for leasing Flue-cured tobacco acreage-poundage allotments.

For those of my colleagues who are not familiar with the production of Flue-cured tobacco, let me briefly give some background information.

The Federal Government assigns to each farmer an acreage allotment of how much land he can plant in tobacco, and a poundage quota of how much leaf he can sell in the market. A farmer can lease his rights to grow and sell tobacco to another producer. Most leasing occurs in the spring, before planting takes place.

However, there is some leasing that takes place after June 15 of the year. We call this "fall" or "late" leasing.

This allows a producer who for whatever reason was unable to grow his full quota to lease it to a second farmer who overproduced. Thus, late leasing helps both producers out of a bind, but it was intended to be used only when there is a genuine need. To be eligible for late leasing, both farmers in the transaction must have planted at least 50 percent of their allotments, according to present law.

H.R. 3416 amends the Agricultural Adjustment Act of 1938 to change the eligibility requirements for late leasing. Simply stated, it would change the law to require both farmers to have planted 80 percent of their allotments. The bill is needed to prevent some speculation that allegedly is occurring. Apparently a few people are obtaining tobacco leases without any good faith intention of planting and producing leaf. Then they turn around and lease the quota after June 15 for higher prices. This speculation only contributes to higher costs for the true tobacco farmer. Raising the eligibility requirement to 80 percent should stop some of the speculation.

This bill has the full support of everyone associated with tobacco to whom I have talked. It has the backing of the major farm groups and the USDA. The Tobacco Subcommittee and the full Agriculture Committee both approved the bill unanimously.

May I point out that passage of the bill will not cost the Government 1 cent, nor will it permit any more tobacco to be grown than it presently allows. USDA has testified that there would be no added expense, because it must certify that the growers have planted at least 50 percent of their allotments. Changing the requirement to 80 percent does not add to the cost of the certification.

Mr. DAN DANIEL. Madam Speaker, will the gentleman yield?

Mr. JONES of North Carolina. I yield to the gentleman from Virginia.

Mr. DAN DANIEL. Madam Speaker, I rise in support of H.R. 3416 which has as its purpose improving the orderly handling of leases and transfers of Flue-cured tobacco.

I have the privilege of representing a district in which a great deal of Flue-cured tobacco is grown and many of my constituents have contacted me in recent months expressing concern over the present lack of strong controls on the fall leasing program. It is no secret that the Department of Agriculture, in order to save money and for other reasons, has not been rigidly enforcing the present controls on fall leasing. In some places in North Carolina, we are told that the cost of leasing has exceeded 50 cents per pound and this tendency has crept into Virginia to the extent that the cost is likewise spiraling.

As long as the planting does not exceed the national allotment, there is, of course, no legal barrier to such leasing or increased cost. But those of us who are concerned about the stability of the tobacco program feel that the change proposed by Congressman JONES is a wise one and should be approved. The Department of Agriculture has also indicated its intention of tightening re-

strictions and improving enforcement and these, together with the provision of the Jones bill, will go a long way toward providing that stability.

I urge passage of the bill.

Mr. WHITLEY. Madam Speaker, will the gentleman yield?

Mr. JONES of North Carolina. I yield to the gentleman from North Carolina.

Mr. WHITLEY. Madam Speaker, I rise in support of H.R. 3416 and ask unanimous consent to revise and extend my remarks.

There was more Flue-cured tobacco sold from my district last year than from any other congressional district in the United States, both in terms of pounds and in terms of dollars. Obviously, a sound tobacco marketing program is vital to the economic well-being of the people I represent.

There are several things which should be said about this bill. First, it does not involve a dime of cost to the Federal taxpayer.

Second, it cannot possibly increase the production of tobacco and may in fact, reduce it.

Third, it is an initiative which came from the growers themselves in an effort to help solve some of their own problems instead of looking to someone else to solve their problems for them.

Under present law, if one producer has a short crop, he can transfer to another producer who has a surplus the right to sell the number of pounds of tobacco the first producer is short, and there is no restriction as to the number of pounds which can be so transferred or on how much of a total allotment which can be so transferred. The only limitation is that such transfers can only be made by producers who have planted at least 50 percent of their crop for the current year.

Under the provisions of H.R. 3416, both the transferor and the transferee must have planted at least 80 percent of their crop. The economics of the situation are such that this will eliminate the speculators who in the past have merely gone through the motions of planting a crop with the idea that they will speculate in the fall with the poundage allotment instead of selling their own crop.

The bill will not affect, in any way, the normal leasing procedures which take place in the fall and early spring and which relate to the crop to be sold in the fall of the ensuing year. It will affect only those leases which are entered into after June 15 of a given year for the crop which is already planted for that year and which will be sold in the fall of that year.

In short, it is intended to restrict this so-called fall leasing to legitimate tobacco producers and eliminate the possibility of speculating with poundage or brokers or third parties involving themselves in it.

It is a good bill and I urge its passage.

Mr. WAMPLER. Madam Speaker, I yield myself such time as I may consume.

I rise in support of H.R. 3416, the bill introduced by my friend and colleague, the gentleman from North Carolina (Mr. JONES), who serves as chairman of the Tobacco Subcommittee.

H.R. 3416 would amend section 316(c) of the Agricultural Adjustment Act of 1938 to provide that leasing of flue-cured tobacco acreage-poundage of marketing quotas after June 15 of any year be permitted only between farms on which at least 80 percent of the farm acreage allotment was planted for such year.

Under present law, the lessor farm must have an acreage-poundage marketing of more than 2,000 pounds filed with the county Agricultural Stabilization and Conservation Service committee and both the lessor and lessee farms must plant at least 50 percent of the acreage allotment in effect for that year. Boiled down to its simplest terms, the bill merely changes "50 percent to 80 percent" in section 316(c).

Flue-cured tobacco planting is starting now, and will be complete in mid-April. Many leases of acreage-poundage marketing quotas to transfer production from one farm to another will be transacted before June 15, and leases effected after June 15 will transfer marketing quotas to allow marketing of tobacco already in production. In cases where production exceeds marketing quotas, leases of additional quotas will be necessary. Marketing quotas command a higher price during the marketing season than prior to planting, and thus by planting only 50 percent, lessor farmers can release one-half of their quotas in the fall. The 80-percent planting requirement should discourage the profiteering fall releasing could conduce.

The bill will not cost the taxpayers any more money as it is just an administrative change in the leasing program and does not affect price support activity.

The Subcommittee on Tobacco and the full Committee on Agriculture have approved H.R. 3416, and I urge the Members of the House to do the same.

Mr. FOUNTAIN. Madam Speaker, I speak in support of H.R. 3416, a bill to amend section 316(c) of the Agricultural Adjustment Act of 1938 to provide that leasing of Flue-cured tobacco acreage-poundage marketing quotas after June 15 of any year be permitted only between farms on which at least 80 percent of the farm acreage allotment for tobacco was planted for such year.

The bill—designed to drastically cut down on speculation in tobacco allotment leasing—is extremely important to thousands of small farmers. Tobacco is one of the few cash crops that a farmer can raise with profit on a more limited acreage than many other crops.

Many of my colleagues have from time to time expressed concern over the demise of the small, family operated farm. Family farmers who grow cotton, corn, wheat, or soybeans may sometimes be driven out of business by large corporate operations, but the small tobacco farmer is here to stay even if he owns only 2 or 3 acres of tobacco, if he can lease, at at reasonable price, a few more acres from another tobacco farm owner. Also, the crop is labor intensive, and large-scale mechanization is not as possible for tobacco as it is for wheat or corn.

For those who may be less familiar with the tobacco program, let me explain briefly how the allotment system works and why H.R. 3416 is important.

To regulate the production and marketing of tobacco, the United States has established a quota and allotment system. Each year the Department of Agriculture determines the quantity of Flue-cured tobacco needed for adequate normal supplies. This quantity is translated into the national acreage that must be planted and harvested, and the national acreage total is allotted among tobacco-producing States, counties, and individual farms. Individual allotments are based on the farm's share of the quantity marketed in the United States during the preceding years. The quotas take effect only after their approval by a two-thirds majority of producers voting in a referendum. The U.S. price support program for tobacco covers only the allotted acreage, and there is a penalty for marketing production in excess of the allotment.

For Flue-cured tobacco, acreage and poundage quotas have been in effect since 1965. Producers voted last December in a referendum to approve marketing quotas for the 1977, 1978, and 1979 crops.

Far less than half of Flue-cured tobacco farmers own the entire allotment that they actually farm. The ownership rate is highest among those with the smallest acreages. About a fourth of the farmers rent all their allotment. But, most tobacco growers combine owning and renting—or leasing—allotments.

One month ago, the Department of Agriculture announced that it is considering changes in the regulations for Flue-cured tobacco because of abuses that have been reported by farmers and farm groups. One of the abuses cited has been speculation in the leasing of allotments. The current regulation allows a farmer to lease the portion of the quota equal to the difference between expected production on his total allotment and the actual production on his acres planted.

The Department of Agriculture is considering two changes to reduce speculation: First, a farmer could lease only the quantity of quota equal to the difference between the expected production on the acres actually planted and the production on those acres; and second, the lease would be disapproved if the quantity stipulated in the lease exceeded the difference between the receiving farm's quota and the amount of tobacco it has on hand to sell.

H.R. 3416, as favorably reported by the Committee on Agriculture, would help reduce speculation in leasing allotments. It would limit leasing to those farms seriously engaged in Flue-cured tobacco production. Only farmers who planted at least 80 percent of their allotments could lease acreage and poundage quotas. This type of legal limitation will strengthen the tobacco program, help the small farmer who depends on tobacco for his income, and keep leasing costs reasonable by eliminating the speculators.

There are other improvements that may be needed, or may become necessary from time to time. However, for the moment, the particular changes provided for in the legislation before are very timely and essential to the preservation of a tobacco program which has worked well down through the years.

I, therefore, urge my colleagues in the House to consider the needs of the small farmer and to support the limitation on allotment leasing embodied in H.R. 3416.

Mr. JONES of North Carolina. Madam Speaker, I have no further requests for time.

Mr. WAMPLER. Madam Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES) that the House suspend the rules and pass the bill H.R. 3416.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill H.R. 3416, just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

CALL OF THE HOUSE

Mr. NATCHER. Madam Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 105]

Abdnor	Florio	Pike
Alexander	Harsha	Poage
Anderson, Ill.	Holland	Quayle
Andrews, N.C.	Huckaby	Railsback
Archer	Jeffords	Roberts
Bowen	Johnson, Colo.	Roe
Burton, Phillip	Kemp	Ruppe
Cederberg	Long, Md.	Russo
Chappell	Lundine	Staggers
Clay	McKay	Steed
Conyers	McKinney	Symms
Diggs	Milford	Teague
Dornan	Miller, Calif.	Tsongas
Drinan	Moakley	Wilson, Tex.
Eckhardt	Moss	Zeferetti
Edwards, Ala.	Murphy, N.Y.	

The SPEAKER pro tempore. On this rollcall 385 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PERMISSION FOR COMMITTEE ON HOUSE ADMINISTRATION TO FILE CERTAIN REPORTS ACCOMPANYING PRIVILEGED RESOLUTIONS

Mr. THOMPSON. Madam Speaker, I ask unanimous consent that the Committee on House Administration may have until midnight tonight to file certain reports accompanying privileged resolutions so that these resolutions may be in order for the consideration of the House on tomorrow, Wednesday, March 30, 1977.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. BAUMAN. Madam Speaker, reserving the right to object, may I just ask the gentleman from New Jersey (Mr. THOMPSON) whether the gentleman from Alabama (Mr. DICKINSON) has agreed to this request.

Mr. THOMPSON. Madam Speaker, if the gentleman will yield, the answer is that the gentleman from Alabama (Mr. DICKINSON) was present during markup. The minority was present, and the gentleman from New Hampshire (Mr. CLEVELAND) was present this morning when the resolutions were reported out. They are money resolutions.

Mr. BAUMAN. There was no objection on the part of the minority; is that correct?

Mr. THOMPSON. There was no objection; that is correct.

Mr. BAUMAN. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONTINUATION OF SELECT COMMITTEE ON ASSASSINATIONS

Mr. BOLLING, from the Committee on Rules, submitted a privilege report (Rept. No. 95–129) on the resolution (H. Res. 433) to provide for the continuation of the Select Committee on Assassinations, which was referred to the House Calendar and ordered to be printed.

DISCHARGING COMMITTEE ON INTERNATIONAL RELATIONS FROM FURTHER CONSIDERATION OF H.R. 5497 AND REFERRAL TO COMMITTEE ON BANKING, FINANCE AND URBAN AFFAIRS

Mr. ZABLOCKI. Madam Speaker, I ask unanimous consent that the Committee on International Relations may be discharged from further consideration of the bill (H.R. 5497) to amend the African Development Fund Act to increase the U.S. subscription to the fund by $150 million and that it be rereferred to the Committee on Banking, Finance and Urban Affairs.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 5045, EXTENSION OF REORGANIZATION AUTHORITY OF THE PRESIDENT

Mr. BOLLING. Madam Speaker, by direction of the Committee on Rules, I call up House Resolution 441 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 441

Resolved, That upon the adoption of this resolution it shall be in order to move, clause 2(1)(5)(B) of rule XI to the contrary notwithstanding, that the House resolve itself the State of the Union for the consideration into the Committee of the Whole House on of the bill (H.R. 5045) to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Government Operations, the bill shall be read for amendment under the five-minute rule. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit. After the passage of H.R. 5045, the Committee on Government Operations shall be discharged from the further consideration of S. 626, and it shall then be in order in the House to move to strike out all after the enacting clause of said Senate bill and insert in lieu thereof the text of H.R. 5045 as passed by the House.

The SPEAKER pro tempore. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Madam Speaker, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Madam Speaker, I know of no objection to this resolution.

I understand that the resolution was completely agreed to by the Members who sought it for the Committee on Government Operations. There is no controversy that I know of in the Committee on Rules. There is ample time for debate on the Reorganization Act that it will bring to the floor.

Therefore, Madam Speaker, I reserve the balance of my time.

Mr. QUILLEN. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, the able gentleman from Missouri (Mr. BOLLING) has correctly described the provisions in the rule. There is no objection to the rule on this side of the aisle. The bill does give the President a 3 year authority to present his reorganization plans.

I would like to say now, Madam Speaker, that the American people are all in favor of the reorganization of the Federal Government in the executive branch and the various dictatorial agencies that are now in existence.

The rule itself provides for 1 hour of general debate. It is an open rule on the measure.

Madam Speaker, the bill does contain a provision that after 45 days any Member of either House can offer a motion to consider a motion of disapproval. That motion to consider must be voted on before that disapproval resolution is taken up in the House. The proposals of the President must be disapproved within 60 days or they are the law.

As I say, there is no objection at all to the rule and I urge the adoption of the rule.

Mr. BOLLING. Madam Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. BROOKS. Madam Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5045) to reestab-

lish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Missouri (Mr. BOLLING).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5045, with Mr. HANLEY in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Texas (Mr. BROOKS) will be recognized for 30 minutes, and the gentleman from New York (Mr. HORTON) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I want to first say that I appreciate the courtesy and the cooperation of the Committee on Rules. As usual, the members of that committee have acted in a manner to expedite important business before the House.

The bill that this rule relates to involves provisions incorporated in the rules of the House. The Committee on Rules has been most cooperative and understanding, and again I want to express my appreciation of their favorable action.

Mr. Chairman, the issue presented by this legislation is not the reorganization of the executive branch. I doubt that there is a single Member here who thinks the Government is now so perfectly organized, so smoothly running, that we can just sit back and admire it. Anything that can be done to improve the efficiency of the Government should be done. President Carter says he has ideas about what should be done, and we here in Congress are certainly ready to get to work on those.

The questions we have to consider here today are how much authority the President should have, and what role Congress should play in the reorganization process. Determination of the organizational structure of the executive branch is a legislative function. Make no mistake about that.

Throughout most of our history the reorganization of the Government has been accomplished through legislation. It was not until the 1930's that we began delegating that authority to the President. Over the years since then, as we have been asked to renew the authority, we have gradually cut back on the extent of legislative power we were willing to surrender. In 1973, we took it all back, and now we are considering delegating it again.

H.R. 5045, the bill before us, would extend for 3 years the basic authority similar to that granted in the past. It permits a President to submit reorganization plans to Congress that will go into effect after 60 days unless the House or Senate rejects them.

This bill adds a new provision that allows the President to make changes in a plan up to 30 days after he submits it. There still will be no opportunity for Congress to make any changes, but the committee thinks this new provision will allow a President to take notice of any objections to or maybe even suggestions for improvements in a plan that might arise in Congress, and act to meet them. We have also added a statement of congressional intent that the President provide for broad citizen participation in drawing up reorganization plans.

The bill contains a number of limitations on the use of reorganization authority that were not in the proposal submitted by the administration.

For example, it prohibits the use of this authority to abolish enforcement functions or statutory programs of any agency. The bill also prohibits the abolition of independent regulatory agencies or the transfer of all their functions to another regulatory agency. These things could have been done under the authority the President requested.

This bill continues the provision that a plan has to deal with only one logically consistent subject, and provides that no more than three plans can be pending at any one time. The administration wanted no limit on the number of plans it could submit or on the subject matter with which they could deal.

The bill requires that each plan contain an estimate of any savings it is likely to produce, a provision in existing law the President wanted to eliminate. And we add a requirement that plans also include an estimate of any increased costs that might result.

The most significant change made by this legislation is in the manner in which the House and Senate will consider reorganization plans. When a plan is submitted, resolutions of disapproval must be introduced immediately and referred to the House Government Operations Committee and the Senate Governmental Affairs Committee. If the resolution has not been reported after 45 days, the committee is automatically discharged and the resolution goes on the appropriate calendar in the respective House. Any Member can then move for its consideration. Under this procedure, it is highly unlikely that any plan will go into effect without the Congress having had a chance to vote on it.

It is a matter of concern, to me personally, that the vote will not be an affirmative one. The legislative veto provision of this bill presents a serious constitutional question as a number of witnesses at our hearings testified. I firmly believe it is possible to grant reorganization authority to a President that gives all the benefits of certain and expeditious congressional action, while at the same time preserving the legislative process prescribed by the Constitution. To allow a President to propose and, in effect, pass a law unless Congress vetoes it is to reverse that process and trample on the doctrine of separation of powers.

I introduced a reorganization bill that would have met both the objectives of the President and the requirements of the Constitution. Unfortunately, the bill before us today takes a slightly different approach. I have chosen to support it, however, because I believe the new voting procedure—which was taken from my bill—and the limitations on the use of reorganization authority to which the committee agreed, will provide Congress with far more control over reorganization than would have been the case if the President's proposals had gone through unchallenged.

I urge your support of this legislation which the Government Operations Committee approved by a vote of 40 to 3.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to my friend, the distinguished gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

I would like to take this opportunity to commend the distinguished chairman of our committee for his efforts in connection with this reorganization authority. I am well aware of the fact that the gentleman from Texas is completely in accord with the need for reorganization of the executive branch of the Federal Government and indeed will likely be one of the strongest proponents of the efforts to reorganize the Federal executive branch.

At the same time I recognize the sincere and conscientious disagreements that the chairman of our committee had with the proposal which the President initially sent over. I think it is a tribute to the gentleman's understanding of the need of this country to go forward with reorganization and a desire to work with the administration in accomplishing this purpose that made it possible for this legislation to come to the floor today.

I would like to add my word of congratulation and tribute to the chairman for the work he has done.

Mr. BROOKS. I thank my friend, the distinguished gentleman from Georgia.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to my friend, the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, I am for reorganization. I think we should have it and it is high time we did it. Government is just getting too big.

There are several things I am not sure of under this bill. First of all can the President reorganize several agencies, either put them together or separate functions or do whatever he wants to, but reorganize various agencies at one time under one package that he would submit to the Congress?

Mr. BROOKS. Yes.

Mr. KAZEN. All right.

My next question is: Suppose there are three reorganizations or three mergers that in the opinion of the House would be desirable but one merger that is not, all four of them are put in the same package. Will we then be able to sever those and have a vote on each or must we vote, as we do on a conference report, either up or down on the whole package?

Mr. BROOKS. Up or down. The House would not have an opportunity to amend a reorganization plan when it is submitted by the President. The President has the authority under this legislation to

submit amendments within 30 days or to withdraw the plan. For example, if Congress had such a uniform feeling that part 4 of the proposal was so bad that it might defeat the plan, the President might submit an amendment to delete that section and thereby insure passage of the remaining sections of the reorganization plan.

Mr. KAZEN. This disturbs me because four good mergers will carry one bad merger and the House would pass it.

Mr. BROOKS. The House will have an opportunity to vote on it in this instance.

Mr. KAZEN. That is right but the House would approve it under those conditions and let the bad merger go through. I would hope that there would be some way of amending this legislation to make it possible for us to vote on the individual mergers in that package. Would that be possible?

Mr. BROOKS. I would say it would be possible but I do not think we can get the votes for it.

I would say nobody in the committee seriously thought about offering an amendment to give Members of Congress a right to amend a reorganization plan. We did not do that to President Nixon when he had that authority temporarily. We did not do that to President Johnson nor to President Kennedy. And it is deemed by the administration to be particularly undesirable.

I would say that an amendment of that nature would seriously affect the possibility of the President's successfully submitting reorganization plans. He would be just about as wise to submit legislation as he has done with the Department of Energy. If any House Member could offer an amendment, we really could subject a reorganization plan to numerous amendments and it might jeopardize the program.

Mr. KAZEN. Certainly I do not want to do that.

Mr. HORTON. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman. The right of a President to reorganize the executive branch of the Federal Government is a right enjoyed by President after President since 1932. I have no basic quarrel with that right. In fact, I view it not only as a Presidential prerogative but one which is necessary to the effective and efficient management of the Federal bureaucracy. Like any other Member of the 95th Congress, though, while I may occasionally object to the President's methods of reorganization in the months ahead, I will forever defend his right to attempt reorganization.

I am pleased to report that H.R. 5045 has the overwhelming support of the Committee on Government Operations. I would caution my colleagues, however, not to interpret the committee vote of 40 to 3 as a sign that there was little interest in or discussion of this particular bill. Anyone with access to newspapers, radio, television, or any other dispenser of the news can surely vouch for the fact that we did, indeed, have some interesting discussions on the strengths and weaknesses of the bill. And I dare say that few news conscious Americans would fail to recognize the name or face of our distinguished committee chairman, Mr. BROOKS, and his timely review of the constitutionality of certain aspects of H.R. 5045. While I do not share his particular assessment of the legislative veto provisions of the bill, I must say that he brought the subject of Government reorganization out of the legislative closet and thrust it into full view of the American people and the Congress.

That is a meaningful contribution in my view and I commend the gentleman for the effective and thorough presentation of his views on the subject.

H.R. 5045 basically gives the President the authority to submit reorganization plans to the Congress with the understanding that those plans will become effective within 60 days unless either the House or the Senate rejects them. What makes this bill different from reorganization bills of the past is a provision that allows any Members of the Congress to exercise the right to move that a disapproval resolution be considered. H.R. 5045 actually requires the chairman of the House Committee on Government Operations and the Senate Committee on Government Affairs to introduce resolutions of disapproval in their respective House when a reorganization plan is presented to the Congress. If after 45 days either committee has not made their recommendations officially known, the resolution will automatically be placed on the appropriate calendar of the House involved and any Member of that body may move for consideration of the resolution.

That is a unique feature. It provides a mechanism by which Members of Congress can be reasonably assured of participation in the reorganization process. I, of course, recognize the objection of some that it provides only for a very limited participation by the Congress, but my point is that it does provide for some degree of participation. For those of us who feel strongly that Congress should not forfeit its constitutional role on the question of reorganization, that is an important and meaningful provision.

The opportunity to object and force the issue is there and I feel sure that some of my colleagues will exercise that right during this Congress.

Another feature I like is a requirement that the reorganization plan contain an explanation of just how much money will be saved by that particular reorganization. It also requires a statement on the improvements we can expect in the management, efficiency, and delivery of the Federal services. That, after all, is what reorganization should be all about. If we cannot save money or offer some tangible improvements in the existing system, why bother to shuffle agencies around in the first place?

As for the need for Government reorganization itself, I do not think we need to look any further than our respective constituencies. The American people are literally crying for effective reorganization of their Government. In the 14 years that I have had the privilege of serving in this House, the Federal Government has grown by leaps and bounds. Unfortunately, it has not always been an effective or logical growth. New Government programs have not always meant better lives for the American people. New or expanded Government programs do not always mean wiser use of our tax money.

Our Nation's taxpayers—our small businessmen, our farmers, our school teachers and administrators, our laborers as well as professionals—are all drowning in a veritable sea of Government regulations. And they resent it. It is human nature for free people to resent the instrusion of big government into their lives. And it is human nature for that resentment to reach the boiling point when Government intrusion brings with it an inefficient, ineffective, confusing bureaucratic monster. It is one thing to force a number of Government programs on a largely unwilling populace, but to unleash a number of ineffective Government programs is entirely too much to expect the people to gracefully accept.

The need for Government reorganization is there. There should be no question about it. I will not harbor an ounce of jealousy if the executive branch rather than the legislative formulates an effective reorganization plan. I strongly support the President's request that he be allowed the same kind of partnership with the Congress in the formulation and consideration of reorganization plan that his predecessors have enjoyed.

Mr. BROOKS. Mr. Chairman, I yield 4 minutes to the gentleman from North Carolina (Mr. FOUNTAIN).

Mr. FOUNTAIN. Mr. Chairman, I want to thank my colleague, the chairman of the Committee on Government Operations, for yielding me this time. I also want to commend the gentleman from Texas for raising the question which he did when the President's proposal was being discussed in the news media. I think the gentleman from Texas has done the country, the President and the Congress a great favor by raising these questions, because all of us who have been here for a number of years know that in many instances serious questions could have been raised as to whether or not certain reorganization plans truly complied with the spirit and intent of the then existing Reorganization Act.

While I thank the gentleman from Texas basically, in initially seeking approval of both branches of the Congress for reorganization plans, as a practical matter it would be extremely difficult for us to carry that procedure out. If we extended reorganization authority of the President by requiring that each plan be submitted in the traditional form of a legislative proposal, the President could too easily be blocked from accomplishing goals which are essential to more effective, efficient, economical and responsible operations of the executive agencies of Government. When some of us met, as the gentleman knows, with the President, I myself emphasized to the President that while I thought the suggestion made by the gentleman from Texas might be difficult to carry out in some cases—approval by both branches in the usual legislative manner—I thought that the Congress, either branch of it, ought

to have the right to participate, to engage in debate and to vote up or down on a disapproval resolution.

The President said, "Well, I have no objection to that. Don't you usually do that?"

That is an indication that even the President and those who work with him need the time to find out how we operate within this institution. But, the fact that both branches do not have to affirmatively approve, but that either branch will have a right to debate and act upon this legislation, disapproving it, if so desired, it seems to me, to go a long way toward complying with the spirit and the intent which the gentleman from Texas had in mind when he raised objections to this legislation. It may be unconstitutional, although I doubt it. One of these days, that question may be raised.

But, there are many ways in which this legislation is a vast improvement over previous reorganization plans. We have had a tendency, because each President has had it, to say, "Well, we have got to give it to this one." That is the way we have been acting, but now we have an opportunity, and the President, I think, has acted wisely in cooperation with the Congress and in agreement, to make provision for us to object if necessary, and to give him an opportunity to amend his own plan within 30 days, because of either his own or our objection. If we want to disapprove a proposal and he does not want to amend it, we can still disapprove it—either the House or the Senate can—and send it back to the President. And he can send it back to us without the provisions which the Congress, or either branch of the Congress, objects to; or if he desires he can send it back to us in the form of a legislative proposal—depending upon what may appear to be appropriate, under the circumstances.

With respect to the question which the gentleman from Texas (Mr. KAZEN) raised, concerning several agencies being consolidated, or where one part of a proposal may be bad and three parts good, there is no reason why the Congress has to avoid dissaproving a reorganization proposal of the President.

Mr. Chairman, I think the subcommittee headed by Chairman BROOKS and the full Committee on Government Operations, also chaired by the distinguished gentleman from Texas, have presented to this House a responsible compromise which the vast majority of this House can support.

As one of the cointroducers of the President's own initial plan, I am happy over the solution reached by the Committee. It is a vast improvement over previous plans in years gone by and it is approved by the President.

I therefore urge the passage of H.R. 5045. Again, it is a good bill.

We can disapprove it, send it back to the President, and hope that the President will still return his proposal to us by deleting that portion which we object to, and otherwise amending it. If he sees fit.

Again, in the many ways already explained I think this is a vast improvement, over the bill which I joined in introducing on behalf of the President.

The CHAIRMAN. The time of the gentleman from North Carolina (Mr. FOUNTAIN) has again expired.

Mr. HORTON. Mr. Chairman, I yield 1 additional minute to the gentleman from North Carolina (Mr. FOUNTAIN).

The CHAIRMAN. Will the gentleman yield?

Mr. FOUNTAIN. I yield to the gentleman from New York (Mr. HORTON).

Mr. HORTON. I thank the gentleman for yielding.

The point I would like to follow up is that in the past, an administration could not offer an amendment to a pending reorganization plan.

Under H.R. 5045 Members of Congress, who are opposed to a plan and have some disagreement with regard to some parts of the plan, they can testify before the committee, this gives the administration an opportunity to amend the plan prior to floor consideration for a vote on the final disapproval resolution.

So I think the opportunity for amendment by the administration is a good proposal, so far as this bill is concerned, because it does let us cure those kinds of defects which we could not cure with the other type of authority we have had in the past.

Mr. FOUNTAIN. The gentleman is correct, because of the cooperation which I hope and believe will exist between the President and the Congress on reorganization matters. If he sees that the Congress does seriously object to a portion of it, it would be my hope that the President would offer an appropriate amendment to his reorganization plan.

Mr. HORTON. Mr. Chairman, I yield such time as he may consume to the gentleman from Arkansas (Mr. HAMMERSCHMIDT).

Mr. HAMMERSCHMIDT. Mr. Chairman, yesterday the distinguished chairman of the Committee on Veterans' Affairs made a statement regarding H.R. 5045, the bill granting the President authority to transmit to the Congress plans for the reorganization of the agencies of the executive department of the Government. Chairman ROBERTS indicated in his statement that he had received the firm assurance of the administration, through Mr. Bert Lance, the Director of the Office of Management and Budget, that the Veterans' Administration would not be affected adversely by any Presidential reorganization plan.

As the ranking minority member of the Committee on Veterans' Affairs, I would like to thank Chairman ROBERTS for his initiative in seeking out Mr. Lance and clarifying this important matter with the administration. It was deeply reassuring to me to have received such a clear and definite commitment. All of the minority members of the Veterans' Affairs Committee, and I believe, the overwhelming percentage of Republicans in the House itself, feel very strongly about the right of the Veterans' Administration to exist separately from any other agency or department. It was reassuring to the notion of bipartisanship that Democratic Members seem to feel just as strongly about this issue, and that strong leaders such as Chairman ROBERTS are willing to take positive steps to straighten matters out before they become serious problems.

I feel satisfied with the administration's assurance, given through Mr. Lance, that any reorganization will not include the abolishment, consolidation, or transfer of functions away from the Veterans' Administration. It is logical and proper to maintain the VA's separate status, given its size and the truly national functions it performs. There can be no doubt that the needs and benefits of our more than 30 million veterans are entitled to the special protection and close scrutiny that comes from having an agency devoted exclusively to them. They earned this protection by honoring the judgments of our Government that it was necessary for them to interrupt their lives in its service. Many of them were required to face the blood and dread of battle. They honored our notion of government then, and it is the duty of government to honor their sacrifices now.

Mr. FISH. Mr. Chairman, it was the intent of Mr. RAY ROBERTS, chairman of the House Veterans' Affairs Committee; Mr. JOHN PAUL HAMMERSCHMIDT, ranking minority member of the committee, and myself to jointly offer an amendment to the legislation being considered today, H.R. 5045, the Executive Reorganization Act, specifically to exempt the Veterans' Administration from any proposed reorganization. We had planned to take this action because of the possibility their functions of the Veterans' Administration might be transferred to other agencies.

Mr. Chairman, it was not until 1930 that the United States finally established the VA by combining the various veteran programs that were scattered throughout the Federal Government. In establishing the VA, President Hoover, at the direction of Congress, took this action to eliminate the chaotic administrative situation that existed in delivering veteran programs.

Recent statements by members of the current administration, as well as statements of members of past administrations, indicated that there was a real possibility of the Federal Government returning to the chaotic pre-1930 period by spreading the veterans' programs throughout other Government departments.

It is for this reason that we had decided to offer our joint amendment to specifically exempt the VA from reorganization. However, as a result of a conversation between Mr. ROBERTS and Mr. Bert Lance, Director of the Office of Management and Budget, we have decided that no amendment is needed or advised.

On Thursday, March 24, Mr. Lance assured Mr. ROBERTS that if we did not offer our amendment, there would be no attempt at reorganizing the VA.

We feel that this commitment by the administration, was absolutely essential, especially in view of Secretary Califano's recently announced plan to include veteran's compensation and pension benefits as part of his welfare reform package.

This commitment guarantees that the Veterans' Administration will remain as the symbol of our Nation's dedication and gratitude to those that have served their country.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Chairman, I rise in support of this legislation. First of all, let me compliment the gentleman from Texas, the chairman of our committee. I am afraid that some of the stories in the newspapers may have given the impression that the gentleman from Texas was being an obstructionist, was giving the President a hard time. We who have served with the gentleman from Texas on the committee know that that is not true. He was expressing a long-held opinion concerning the constitutionality of this procedure. This is an opinion that I think he has expressed consistently since he has been a Member of Congress. So he raised the same objections as he would have whether the President who opposed the extension of this authority were Democrat or Republican, whether he were friend or foe. One thing the gentleman from Texas is not and never has been is an obstructionist. He did not throw any procedural stumbling blocks in the way of the President or those of us on the committee who supported the President's request. Just as in the last Congress, when the gentleman had a deep-seated opposition to the extension of the Federal revenue sharing, he did not utilize his position to throw any procedural stumbling blocks in the way of those of us on the committee who supported that extension of Federal revenue sharing.

I think, as a result of questions raised by the gentleman from Texas, we have some very good amendments to the basic authority of the President contained in the bill before us, in the limitation of the number of plans that can be pending at any one time. A somewhat different limitation was added in the last Presidential authority when we said the President could submit no more than one plan every 30 days. So that we would not be inundated with too many plans at one time, I think it is good to have some limitation on the frequency with which these plans are sent to the Congress.

I think, also, the procedure which makes it certain that we will have an opportunity as a body to vote on these questions, should any Member decide to have a vote, is a step forward.

It certainly is in tune with what our committee as the parent committee of the Freedom of Information Act and of the Sunshine in Government Act has promulgated. It is certainly in line with the philosophy that our committee has imposed on the executive branch through various pieces of legislation. The same theory will apply here. We are going to have an open legislative process.

I think that may, by the way, be somewhat in contrast with the frequency with which we are getting legislation on the floor with rules from the Committee on Rules that are closed rules and do not give us opportunity for the kind of open legislative performance that I think should be the rule rather than the exception. I would hope that the members of the Committee on Rules, the Speaker, and the members of the majority party of the Committee on Rules would take a page from the book of the gentleman from Texas (Mr. BROOKS) and give us open rules on legislation so that when legislation comes out here, we can have votes on the various amendments that Members would like to offer.

So, Mr. Chairman, I again compliment the gentleman from Texas (Mr. BROOKS) for being a leader, and I hope that his leadership will have an impact on the Speaker and on the majority members of the Committee on Rules.

I do support this legislation. I join with the gentleman from New York (Mr. HORTON), the gentleman from Arizona (Mr. RHODES), and other Republican members of the committee in sponsoring this bill for the President at a time when it appeared he was having difficulty finding majority members to sponsor it for him. I was pleased to be able to do that.

I think we ought to make it clear that the President can get help from the minority party in this Congress when we agree with his objectives. His objective of reorganizing the executive branch is one of the areas in which we would like to help him fulfill his campaign promise. The next one we would like to remind him of is his promise of balancing the budget. We would like to give him all the help we can in that regard as well.

Wherever the President has made promises during his campaign that fit in with the objectives sought by the minority party, he can count on our help. This is the first of several instances where we will be happy to help him fulfill his campaign promises.

Mr. Chairman, I hope that this legislation will pass.

Mr. BROOKS. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. FASCELL).

Mr. FASCELL. Mr. Chairman, as one of the original sponsors of the President's program, I rise in strong support of the pending legislation.

As contrasted with the original legislation, I would like to point out that this bill is a very happy and welcome compromise brought about primarily because of the willingness of the chairman of the full committee. This not only makes his point clear with respect to his position on the legislation but also to be very willing to work out differences of opinion that existed between many of us on the committee and the chairman of the committee.

In that same spirit, Mr. Chairman, I would like to compliment the ranking minority member, the gentleman from New York (Mr. HORTON), for working so effectively with both the committee chairman and the rest of us who were interested in the President's program to accomplish this objective in the best spirit of a cooperative effort between the legislative branch of Government and the executive branch of Government.

Mr. Chairman, the extension of the reorganization authority represents that kind of best effort, and I compliment the chairman of the committee, the ranking minority member of the committee, and my distinguished colleague, the gentleman from Georgia (Mr. LEVITAS), who played a very important part in bringing this all about.

Mr. Chairman, I am in support of H.R. 5045, the extension of reorganization authority of the President for 3 years. I think we can all agree on the need for renewing this reorganization authority. Increased Government efficiency is a worthwhile and much-needed goal, and President Carter has made this one of the major aims of his administration. Yet the last extension of authority expired in April of 1973. Certainly there is a current need for expeditious action on this matter.

It is important to remember that the reorganization legislation which was introduced in 1949 was proposed in an attempt to effectively deal with the increasing complexity of the American political system. H.R. 5045 retains a number of the provisions of that law, for we recognize those same basic needs today. All of us are aware of examples of bureaucratic inefficiency, overlapping jurisdictions, unnecessary expenditures, and duplication of efforts. It is becoming more and more difficult for the average citizen to fight his way through this hodgepodge of Government inefficiency. Simple, coherent organizational structure will enable appointed officials and civil servants to carry out their responsibilities more easily and expeditiously, and, further, will facilitate the performance of our congressional oversight functions.

Necessarily, some of our traditional processes must be altered to enable us to deal more efficiently with our own political complexities. It has become apparent once again that our executive branch must be reorganized so that it may more readily respond to the needs of the American public. H.R. 5045 acts upon those needs. The bill, in fact, adds a new congressional intent that appropriate means be provided by the President for citizen advice, and for participation in executive reorganization.

This proposed legislation makes adjustments in the area of Presidential and congressional reorganization authority. The President is permitted to submit amendments to plans during the first 30 days after such a plan is sent to the Congress. One prevalent criticism of past reorganization plans has been the restrictive "no amendment" feature. A plan may have had general support with the exception of one provision. Thus, since no mechanism existed for the President to modify or amend that one provision, the entire plan had to be rejected. If the President submits a basically sound plan, he should have the opportunity to correct a relatively minor but unacceptable provision or to withdraw the plan if it would be difficult to accomplish the necessary change by amendment. The plan does, in fact, permit the President to withdraw a plan at any time within the 60-day period Congress has to act. In addition, the President is not permitted to have more than three plans pend-

ing before the Congress at any one time. Such a change as this provides a more flexible structure for the President, and at the same time shields the Congress from an onslaught of reorganization plans.

As changes in Presidential functions are mandated by an ever-changing political environment, so, too, do congressional functions require alterations. Under the provisions of this bill, disapproval resolutions are required to be introduced in both Houses at such time as a plan is transmitted. The two committees, House Government Operations and Senate Government Affairs, would then have 45 days in which to make their recommendations to their respective Houses. After that time, the committee would be deemed to be discharged if neither House has reported the resolution. The resolution would then be highly privileged and any Member of the respective House may then move for consideration. In this way, there exists an opportunity for a vote by Congress on each plan, an opportunity not available under the previous plan. Additionally, the provisions permitting the President to submit amendments functions as a two-way street, in that it also gives Congress the opportunity, if during the course of the consideration of the plan a change gathers consensus, to prevail upon the President to consider such a change. This provision is a substantial compromise to those who take the position that Congress ought to have more input in reorganization plans.

We are all very much aware of the controversy that has been raised as a result of the provision dealing with the one-House legislative veto. Despite the difficulties, I know we all agree that there must be a workable balance among the three branches of our Government, and those who have questioned the constitutionality of this provision have done so in an attempt to maintain the viability of our legislative system. The new voting procedure, previously mentioned, serves to alleviate what some view as a problem in the law.

Additionally, under the previous law, there was no provision to prevent the Executive from eliminating functions and programs which were initially established by the Congress. In an attempt to protect congressional prerogatives in this process, H.R. 5045 prohibits the abolition of enforcement functions or statutory programs by the President, if Congress believes they should not be subject to that particular authority. These limitations on the use of Presidential reorganization authority serve to lessen the threat of a too broad delegation of legislative authority to the President. The bill assures the fullest participation by Congress in this crucial reorganization process.

The process of developing an effective, efficent legislative reorganization plan is long and involved. Necessarily, such a vital aspect of our governmental procedure requires detailed and meticulous analysis. The view and ideas of the many are needed in order to insure the best possible result. It is by enabling these many varied opinions to be hashed and rehashed, that our system has been able to maintain its legislative effectiveness, and to continue to serve the needs of the American people. H.R. 5045 is a result of such intense consideration, and I believe it to be an effective compromise. I strongly urge your support of this bill.

Mr. HORTON. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Mr. Chairman, back in 1946, when my predecessor in the Congress, who was also my father, authored the first Hoover Commission legislation, the Commission on the Reorganization of the Executive Branch of Government, and created in that legislation later the Committee on Government Operations, this procedure for providing that the President could ask for reorganization of the executive branch of Government had already been in effect for about 14 years, because the first authority was given to Franklin Roosevelt in the depression era. Now we come to a further revision of the legislation which will now provide an automatic review by the Congress.

I personally do not think that automatic review is absolutely necessary, although there are some on the committee, including our chairman of the Committee on Government Operations, who feel very strongly about it. I honor their concern about the constitutionality of the method, but I rise in support of the legislation because of the need for this kind of authority in the hands of the President, not to change functions of the executive branch, but, rather, to reorganize them in such a way that they can be most effectively expedited.

Mr. Chairman, people at home want a more efficient, a leaner, and a more effective Government. Some of the things which Government does are not done well, but this legislation will help them meet what should be the objective of all of us: a more efficient, a quicker, and a more effectively operating Government.

Mr. BROOKS. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Chairman, I thank the chairman of the committee for yielding this time to me.

I would like also to congratulate him for his outstanding work in this matter, and I would like also to congratulate the ranking minority member, the gentleman from New York (Mr. HORTON) for the substantial, significant input that he has given in performing a real service to the committee and to the Nation in helping this legislation to come to the floor.

Mr. Chairman, finally I would like to thank and commend the gentleman from Florida (Mr. FASCELL), who, along with me and several others, was one of the original sponsors of the President's request for this authority.

Mr. Chairman, I rise in strong support of this bill now pending because I believe that it will give to the President every tool that he needs to bring about an effective reorganization of the Federal Government.

There is a definite, a crying need for this legislation. The American people have sensed this for years, and it is only recently that it has become so demanding that Congress is prepared to act.

Therefore, Mr. Chairman, I believe the new President and this Congress will respond to these demands. The Government needs to be reorganized.

As the priorities and needs of the Nation change, so must the institutions which implement them.

Mr. Chairman, we must seek simplicity and openness, competence and coordination, efficiency and economy.

Civil servants and political officials can do their work better when their responsibilities are clearly delineated and do not overlap. Members of the Congress can perform more effective oversight of Government functions and programs when they are arranged in simple and coherent organizational patterns.

Mr. Chairman, the people benefit from a Government which is less complicated, which can be understood, and which can respond to their priorities and to their problems.

Let us not misunderstand this, Mr. Chairman. Government reorganization authority or, indeed, Government reorganization itself is no solution to the problem; but it is a beginning point. It is a point where we can take all of the duplicative, overlapping functions that are spread throughout Government and bring them together in one place so that these programs can serve the people they are designed to serve and so that we in the Congress can make certain that these programs are doing what they are intended to do instead of having a bloated hodgepodge of agencies and bureaus now trying to carry out a somewhat muddled and ineffectively operated series of programs and functions.

Mr. Chairman, there will be substantial congressional control over reorganization. Not only will the President have to submit each plan to the Congress, and only three at one time can be pending, but either House of the Congress will be able to reject any plan that the President submits.

Mr. Chairman, I suggest to the Members that this is substantial congressional control.

During the hearings on these plans as they come into either House, there will be deficiencies from time to time that will be pointed out. Under the excellent proposal made by the gentleman from Texas (Mr. BROOKS), the President will be empowered to make changes in these plans and amend them in order to respond to the congressional input into this process.

In addition to that, Mr. Chairman, the fact that there is a guaranteed vote, a vote on the motion to consider any plan pending before the committee, assures that nothing can happen without the American people's knowing the position of the Members of this House. There can be no pay raise type of legislation by inaction because the matter will have to come before this House for a vote.

Mr. Chairman, there has been a great deal said about the constitutionality of this legislation.

Mr. Chairman, I think it was Samuel Johnson who said, "Patriotism is the last refuge of scoundrels."

I would suggest that it is also true that arguments and questions about the constitutionality of matters may be the last refuge for some people who are not really in favor of the substantive legislation.

I suggest that the constitutional issue here is one that will be decided ultimately by the Supreme Court of the United States.

I wish I were as certain and as positive of the outcome of the constitutional questions as some of my colleagues appear to be, but let me say that during the 40 years in which one-House vetoes have been incorporated into legislation time after time, there has never been a successful suit brought which has held that to be unconstitutional. Indeed the decisions of the courts up to this point in their opinions have indicated that it is fair, right and constitutional and this indicates that the constitutionality of one-House vetoes will be upheld.

This Congress has, for years, delegated to the executive branch of the Government the right to make proposals and to send them back to the Congress, and the right to make decisions.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BROOKS. I yield 1 additional minute to the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding me the additional time.

So, Mr. Chairman, the delegation of authority is not a new matter. Indeed, we have delegated to many agencies of the Government the power to rewrite laws we call rules. I suggest that it is absolutely fitting and necessary that we begin exercising our one-House vetoes.

The arguments we sometimes hear against the constitutionality of this bill are the following:

The opponents say it delegates too much authority to the President.

The power to reorganize the Government is not an inherent power of the President. Chairman BROOKS pointed out in his opening statement that—

> No President should assume that this authority is his automatically because other Presidents had it.

This is indeed true, and for the last 2 years of his term, President Nixon did not have it, and we never gave this authority to President Ford.

Therefore, this "power" becomes the President's only because the Congress grants it—and for a strictly limited time period and with strict limitations as to the extent of this authority. Without this legislative mandate, the President is powerless to make any changes in the structure of the Government except through the time-consuming legislative process. We are mandating the President to propose plans to reorganize which we can reject or approve. The legislative passage of this bill with the consent of the President is the legislative charter for reorganization.

Some opponents argue that the congressional veto violates the "presentation clause" of the Constitution, article I, section 7, clause 3, which requires that—

> Every Order, Resolution, or vote to which the Concurrence of the Senate and House of Representatives may be necessary . . . shall be presented to the President of the United States . . .

The second major argument is that the device violates the separation of powers between the executive and legislative branches of Government.

Opponents of the congressional veto argue that a congressional veto device violates the "Presentation clause" in that the congressional disapproval of the proposed Executive action, however that disapproval may be formally expressed, is not itself presented to the President as required by the Constitution. This failure to present the congressional disapproval of the proposed action to the President also, opponents would argue, subverts the President's constitutional veto authority.

The "presentation clause" has been complied with in that the underlying enabling statute is presented to the President. The passage of a resolution, order, or vote signifying congressional disapproval of the proposed Executive action need not be presented to the President because it is not legislation which requires a new submission to the President within the meaning of the "presentation clause." This argument is supported by reference to Justice White's concurring opinion in Buckley versus Valeo. In Buckley, Justice White strongly supported the constitutionality of the congressional veto. Justice White, in strongly worded dicta, stated:

> I would not view the power of either House to disapprove as equivalent to legislation or to an order, resolution or vote requiring the concurrence of both Houses . . . [t]he provision for congressional disapproval of agency regulations does not appear to transgress the constitutional design, at least where the President has agreed to legislation establishing the disapproval procedure or the legislation has been passed over his veto. It would be considerably different if Congress itself purported to adopt and propound regulations by the action of both Houses. But here no action of either House is required for the agency rule to go into effect and the veto power of the President does not appear to be implicated.

The "presentation clause" does not apply in any case because the retention of a congressional veto over the exercise of authority granted to the Executive is merely a condition subsequent, the lack of congressional disapproval constituting the event which must be satisfied in order for the terms of the enabling statute to become legally effective. A congressional "veto" to review executive action pursuant to a delegation of legislative powers to the Executive is simply conditional legislation well within the constitutional power of Congress to enact.

Congress may condition delegations of power any way short of actual violation of an express provision of the Constitution—and that the legislative veto does not do so. Further they point to the "necessary and proper" clause of article I, under which Congress has power to make laws necessary and proper to carry into effect both its own "and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof." The President is an "officer" of the United States; and if the clause is taken to mean what it says, then the ultimate power rests in Congress—and the legislative veto is valid. Proponents of this view, accordingly, wish to continue the blending of powers under the Constitution—the system of "checks and balances."

Our views gain support from *Pressler* v. *Simon*, decided by a three-judge Federal court in October 1976. The court rules that Pressler's challenge to a congressional salary statute could not stand, relying in part on the "necessary and proper' clause. Said the court: "The Constitution is not to be parsed in the narrow, rigid, pedantic manner of a statute. It must remain flexible and adaptable," preserving "a flexible approach to government that would facilitate accommodation to changing conditions and experience."

The congressional veto is a means by which, in Madison's words, the Government can be "obliged to control itself." A necessary pragmatic adjustment to complex problems of Government, it enables urgent tasks to be accomplished with a measure of accountability.

The case of *Currin* v. *Wallace*, 306 U.S. 1 (1939), would appear to support this argument. The case concerned the validity of the Tobacco Inspection Act of 1935, 49 Stat. 731, which, in pertinent part, authorized the Secretary of Agriculture to designate markets where tobacco was to be bought and sold at auction. The Secretary could only authorize such a market if two-thirds of the tobacco growers, voting at a prescribed referendum, favored it. The Supreme Court upheld the act, holding that the provision for a referendum was simply a condition upon the effectiveness of the regulation, and did not involve an unconstitutional delegation of legislative power.

If the action of the Secretary of Agriculture could be conditioned upon the vote of tobacco growers, then actions by other officers of the Executive could likewise be conditioned upon the subsequent vote of the Congress or one of its committees. This reasoning was employed by supporters of the legislative veto provision contained in the Executive Reorganization Act of 1939 (53 Stat. 562). The House report on the bill stated:

> The failure of Congress to pass such a concurrent resolution is the contingency upon which the reorganizations take effect. Their taking effect is not because the President orders them. That the taking effect of action legislative in character may be dependent upon conditions or contingencies is well recognized. The latest pronouncement of the Supreme Court on the subject is in [*Currin* v. *Wallace*, 306 U.S. I (1939)]. That case upheld the validity of a referendum of farmers which determined whether the Secretary of

Agriculture could exercise the authority given him by the statute to designate a market as one at which tobacco was required to be inspected and certified by Department representatives prior to its sale. It seems difficult to believe that the effectiveness of action legislative in character may be conditioned on a vote of the two legislative bodies of the Congress.

Another constitutional question which arose during the debate on this measure is one of veto power. It is argued that the President alone should have veto power over legislation passed by the Congress. Presidential veto power is effectively preserved because the President formulates the reorganization plan and will submit to Congress only a plan he approves; these considerations plus the President's prerogative to submit no plan at all represent the ultimate veto power. There is also a provision in this bill which allows the President to withdraw a plan within 30 days of its transmittal, surely an equivalent veto power.

As for the principle of bicameralism, by its very nature is a principle that does not go very far, for no one can seriously argue that either House has a constitutional duty to do anything. In other words, the principle of bicameralism, whatever it means, fails often when Congress is in session, whenever one House does not go along with something that the other has approved. Far from being unconstitutional, that is what was established by the Founding Fathers.

Under H.R. 5045, both Houses are given an equal opportunity to consider a plan, and then to approve or disapprove it. Neither House is dependent upon the other for confirmation or affirmation of its actions, which is as it should be and is. Since either House can veto a plan it does not like, bicameralism is preserved just as if one House failed to affirmatively pass a bill it would not become effective.

In the last instance, this bill will be constitutional when the Supreme Court says it is. Until then, all the so-called constitutional experts can only speculate. In 40 years of legislation with a legislative veto provision included, not one case has ever been won against it.

It would appear that I am not the only one in this Chamber who believe such one-House veto legislation to be constitutional. Last year, 265 Members of the House of Representatives voted for my administrative rulemaking reform bill, H.R. 12048, only two short of the two-thirds it needed to pass under suspension. That sort of support for this concept is being repeated this year. Since reintroducing administrative rulemaking reform legislation, over 125 of our colleagues have added their names to the list of cosponsors. As most of you know, this reform legislation embodies the principle of the legislative veto over the rules and regulations promulgated by the regulatory agencies.

Because it is Congress' constitutional responsibility to legislate the rules which govern the people who elect us, it is our responsibility to oversee the results of the authority we delegate, most particularly when that delegation of authority allows executive branch agencies and officials to promulgate rules and regulations which, when they go into effect, have the force of law. We have the constitutional directive to fashion our legislation as we see fit, and are well within our rights to demand conditions under which that legislation goes into effect.

Such a condition also guarantees us necessary oversight powers over the actions of the executive branch. It is a device which allows us to maintain control over the necessary delegations of authority which we allow. Just as this bill is constitutional so also is the bill to give Congress a one-House legislative veto over the rules and regulations adopted by the myriad of agencies under delegated authority.

I suggest this is legislation that the American people want. They want the Government reorganized and streamlined and they want it boiled down to a meaningful and effective implement of public policy. This is the opportunity for us to exercise our vote and carry out the wishes of the American people.

Mr. Chairman, I urge support for this legislation.

Mr. HORTON. Mr. Chairman, I yield 3 minutes to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, I rise in opposition to the bill H.R. 5045. My opposition is based upon constitutional grounds. The legislation we consider today is, in the opinion of many leading constitutional scholars and in the opinion of at least this legislator, unconstitutional.

There is little doubt that the American people wish to see the Federal Government reorganized. I certainly share their desire for a leaner, trimmer, more efficient executive bureaucracy. However, I seriously doubt if given the choice, the American people would opt for unconstitutional reorganization.

Why this House would consider taking an unconstitutional route to a desirable end is beyond my understanding. Article 1, section 1 of the Constitution clearly places all legislative power within the jurisdiction of the Congress. Article 1, section 7 of the Constitution clearly states that bills are to be passed by Congress and sent to the President for his approval or disapproval. In other words, under the Constitution, the President is empowered to propose legislation to Congress. But for a proposal to become law, it must be specifically approved by both the House and the Senate. This legislation we consider today, although attempting to satisfy these constitutional mandates fails to do so and the result is an unnecessary and unwise abdication of legislative prerogative and responsibility.

The distinguished chairman of the Government Operations Committee, the gentleman from Texas, told the committee as it cleared H.R. 5045 that it was "the best unconstitutional bill you could draw up."

Prof. Phillip Kurland, one of the Nation's leading constitutional scholars told the Legislation and National Security Subcommittee, "The question that I have been asked to address is whether Congress can authorize the President to write legislation which shall have the effect of law unless a majority of either House of Congress votes against accepting it as law. The plain and simple answer is that the Constitution does not provide for such a lawmaking procedure."

Another outstanding legal scholar, Prof. Lawrence Tribe of the Harvard Law School testified that the legislative veto procedure is unconstitutional.

And what reasons are we given for taking so questionable a course of action? First, we are told in the committee report that the risks are worth taking because the expected results are cost reduction, improved management and better services to the public. In other words, the Constitution should be sacrificed to efficiency. Not a very convincing argument. Professor Tribe put it well. He said that "the price of ignoring the Constitution when its structures seem inconvenient would be even higher than the price of making do with the Government's present organization, imperfect though it plainly is."

Second, we are told that the procedure is no different, except perhaps better, than the reorganization power granted to previous modern Presidents. And in some practical way that seems to be a partial answer to the constitutional question and is a stronger argument. But not strong enough. The models of the past on which H.R. 5045 is based were drafted in times less sensitive to the need to define congressional responsibilities and limit executive authority. When the Congress refused to extend the reorganization power in 1973, it did so in the belief that legislative prerogatives were being reasserted. Are we not to abandon that progress toward being more responsive representatives of the people?

It is obvious, however, the real argument for circumventing constitutional provisions in the matter of reorganization is a distrust of Congress' willingness and ability to act in a positive manner. Just as we were told when the pay raise came in through the back door and just as we have been told why we cannot have open rules on certain bills, we are not be be trusted to act responsibly. Entrenched interests would force us to thwart the public will. We must be spared the political discomfort of voting yea or nay. We must be protected from ourselves. Only the President knows what is best in the area of reorganization. To believe that is, in my opinion, to question each Member's reason for being here. If we cannot be expected to represent the people by doing what is right and what is responsible, then the Constitution has no real meaning.

But it does have meaning. And with what we do here today, we can breathe new life into that meaning. We can do so by assuring that the reorganization of Government is carried out in the straightforward manner prescribed in the Constitution.

There is a wholly practical reason for rejecting the unconstitutional approach offered by H.R. 5045. In a study of the legislative veto procedure released recently, the author, John R. Bolton, makes a point which cannot be ignored about the need to reject the methods adopted in the recent past for governmental reorganization. He states, "There is a substantial risk posed by the traditional formulation of the reorganization acts. Should the legislative veto be declared unconstitutional or should it be held that the delegation of power to the President were invalid, the entire reorganization plan would be in jeopardy. Since any decision would come only after significant rearrangement had likely already occurred, such a decision would have grave consequences, and it would perhaps cause serious impairment to the workings of many governmental agencies. Why such an immense risk should be incurred when the constitutionally safe alternative of following the normal legislative process—with considerable Presidential advice—is easily available has nowhere been explained."

Mr. Chairman, I believe there are other Members who share concerns about H.R. 5045 similar to my own. At an appropriate time I intend to offer an amendment in the form of a substitute to this legislation. That substitute will give this House an opportunity to proceed with reorganization but in a completely constitutional manner. We owe the country and our constituents no less.

Mr. BROOKS. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts (Mr. DRINAN).

Mr. DRINAN. Mr. Chairman, I commend the distinguished chairman, the gentleman from Texas (Mr. BROOKS), for the improvements that he has made in this bill. But I share some of the reservations of my colleague, the gentleman from Pennsylvania (Mr. WALKER). As a member of the Committee on Government Operations I did, in fact, vote for this bill but with a certain uneasiness, a certain reluctance. It seems to me, however, that its unconstitutionality is not as clear as the gentleman from Pennsylvania seems to suggest. This bill does protect the power of each Member of this House to require, if he so desires, a vote on the floor in a highly privileged motion. We are not, therefore, stating that a vote cannot be taken but that for 15 days each Member has a right and a duty to get a vote, if he so desires.

At the same time there are serious reservations which I have, Mr. Chairman, because bicameralism, that great compromise of 1787, does mean that one House is not enough, that legislation must be ratified by both Houses before it goes to the desk of the President.

Second, I wonder sadly why it was not possibly to undertake reorganization through the normal legislative process.

Third, I wonder why we must flirt with possibly unconstitutional laws and risk the possibility that they could be struck down by the courts on the basis that one House alone is able to veto the President. But with a certain sadness I vote for this legislation. However, I had hoped that we could have asserted more vigorously the power of this House to exercise supervision and oversight. I had hoped that we might have asserted that much more vigorously.

I had hoped that our right and duty to insist that the legislative objectives which we write into law be implemented by the executive branch of the Government could have been carried out in a more clear and forceful way. But let us hope that we have here not taken a constitutional short cut. In the future, however, the efficacy of this legislation will depend upon our vigilance in making certain that the Congress will not allow the power of this great body to be eroded in the name of efficiency or convenience or consistency.

Mr. Chairman, I continue to be troubled by this legislation. To be sure its purpose is beneficial and the results may well produce a sounder, more efficient Federal Government. Reorganization plans may even save the taxpayers some money, although I doubt whether the size of those economies will reach the proportions described by ardent advocates of restructuring. I, for one, would like to see any savings reinvested in needed programs which now are inadequately funded.

Nonetheless a certain uneasiness still lingers about the bill, largely because it gives to the executive branch so much legislative power without any real checks. The requirements for public input are, for the most part, hortatory. The congressional review process is truncated and operates under the severest of time binds. The one House veto provision is constitutionally suspect. Consequently the provisions in H.R. 5045 should make us all at least a little bit uneasy.

In the House report—No. 95–105—accompanying this bill, I have at some length set out my reservations about this legislation. See additional views at pages 39–43. It would serve no useful purpose to track here what was said there. But there are a few other matters barely explored in the report which are worthy of comment at this point.

First, the argument of the Attorney General that the one House veto preserves the "principle of bicameralism" is still unpersuasive. It assumes that merely giving each House the opportunity to disapprove a reorganization plan is constitutionally sufficient to satisfy the great compromise of 1787. It assumes further that the only values at stake are those inherent in the relationship between the Executive and Legislative Branches.

So long as the two branches are agreeable to this new arrangement, it appears the Attorney General would say it is constitutional. That is a rather curious view of the Constitution, it seems to me, as it has never been thought that concurrence of Congress and the President on any matter resolved entirely an issue of constitutional dimension. "Sweetheart" arrangements of this sort are not favored in labor law and I see no reason to favor them when questions of this magnitude hang in the balance.

To begin, the "principle of bicameralism" implicates at least two other parties: the States and the people. Ultimately, of course, the judicial branch may well declare the law unconstitutional and remove once and for all the one House veto provision. But in the interim we must take account of the impact of that device on the States and the people.

Once we recognize the Senate as the body representing the 50 States and the House as the body representing the people, it will immediately become apparent that legislative action requiring the approval or disapproval of only one House impairs the interests of one of those parties. If action may be taken by the Senate alone, the people suffer. Conversely if only House action is mandated, the States are adversely affected.

In either case, the important check exercised by one body against the other is lost and the States or the people become the ultimate losers. Even under the provisions of H.R. 5045, a reorganization plan may become effective without either body taking any action. In such cases, both the people and the States will be excluded from the governmental process. That is a result which makes me nervous.

This is not the first time these questions have arisen. In 1932 Congress gave the President reorganization authority with a one House veto provision. Within 6 months Attorney Gen. William Mitchell stated that it "raises a grave question as to the validity of the entire provision in the act of June 30, 1932, for Executive reorganization of governmental functions." 37 Op. A.G. 56, 63–64. Soon thereafter Congress repealed that section of the law, while continuing to give the President reorganization powers.

This history furnishes the administration with its final argument on constitutionality. Since Congress may validly delegate to the President the whole authority to reorganize the Federal agencies, it is said, then it surely can give the President part of that power while reserving a part for itself. That contention has some surface appeal. But it is simply not true that because Congress may validly exercise its powers in whole it may also exercise them in part.

For example, Congress may enact legislation providing funds for public schools. I do not think it could limit that aid only to institutions which practice racial discrimination. Under the Constitution, Congress may, in times of rebellion or invasion when the public safety requires it, suspend the privilege of the writ of habeas corpus. I doubt if it could be suspended only for Members of one political party.

Those who argue that what is given in whole is also given in part ignore a fundamental precept of the Constitution: powers that appear to be unrestricted in one clause are frequently limited by another. So it is with reorganization. It may be that Congress may delegate the entire reorganization authority to the President without running afoul of article I, section 1. But if it seeks to give only part of that power, it may abridge article I, section 7, unless it requires that the re-

served authority be exercised affirmatively by both Houses.

Unless the President abuses powers under H.R. 5045 or unless the courts declare it unconstitutional, I suspect Congress will not revisit these matters until reorganization authority expires once again. In the absence of a severability clause, and with the congressional recognition that if the one House veto clause fails, the whole act fails, it may be that we will be looking at the matter sooner than we think.

But that is idle speculation which only the future will accurately describe. For now we must be content with a thorough examination of the serious issues involved and an expression of congressional purpose that the legislative branch be a full partner in reorganization. If the power is abused, it will be time enough to withdraw it entirely and insist on a scrupulous adherence to every word of the Constitution, however it may affect the conduct of modern government.

Mr. HORTON. Mr. Chairman, I yield 4 minutes to the gentleman from Pennsylvania (Mr. GARY A. MYERS).

Mr. GARY A. MYERS. Mr. Chairman, I rise to ask a few questions of the chairman of the committee if I could have the attention of the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. The gentleman has it.

Mr. GARY A. MYERS. Mr. Chairman, with respect to this reorganization I have some concern about the application during reorganization of the so-called Sunshine Act that we passed last year. Is my understanding correct that any deliberations with respect to reorganization which an agency would be undertaking to advise the President on their positions would have to be done within the rules of the Sunshine Act, thereby requiring public meetings, whereas the meetings that the President holds within the White House at his own direction would not have to meet the confines of the Sunshine Act? Has that been addressed in the gentleman's committee?

Mr. BROOKS. I do not think there is any connection. The Sunshine Act applies to a collective body. This is not a collective body resolution. This is authorizing a delegation of certain powers to the President so he can submit reorganization plans.

Mr. GARY A. MYERS. But if in fact the agency normally regulated by that act was asked to submit to the President certain suggestions for reorganization, would its meetings have to be held in open discussion as required by the Sunshine Act?

Mr. BROOKS. The meetings were open and were widely publicized.

Mr. GARY A. MYERS. By the agencies? I am not asking about the congressional committee.

Mr. BROOKS. The door was open. The room was full.

Mr. GARY A. MYERS. I am not talking about the work of the committee. I am asking with respect to agencies.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I think the question the gentleman is asking has to do with the applicability of the sunshine law that we passed last year. That applies to collegial bodies where they are headed by two or more people. That is not applicable here, so the law would not be applicable to the question the gentleman is asking. As to whether or not the information that is derived from within the agency to be presented to the President would have to be done in the open, that law would not apply to that situation.

Mr. GARY A. MYERS. It was my understanding that the agencies had to hold their meetings in the open unless they are White House meetings. Is that correct?

Mr. FASCELL. Mr. Chairman, will the gentleman yield?

Mr. GARY A. MYERS. I yield to the gentleman from Florida.

Mr. FASCELL. Mr. Chairman, if an agency coming within the purview of the definition of the Sunshine bill actually holds an official meeting in order to arrive at an official position to answer a request of the President of the United States with respect to their official position, it is my understanding they would have to hold that meeting in the open, and they would.

Mr. GARY A. MYERS. It was my effort to get some understanding as to that.

Mr. HORTON. Mr. Chairman, if the gentleman will yield, that would not apply for example to the Department of HEW. It applies only to certain agencies which are included in that bill.

Mr. GARY A. MYERS. So there are cases in fact where the Sunshine Act is going to have to be complied with by the Administration, as the gentleman from Florida has indicated here.

Mr. FASCELL. Mr. Chairman, if the gentleman will yield further, I am sorry, I did not say that. I did not say there was any requirement under the Sunshine Act having to do with this reorganization.

Mr. GARY A. MYERS. I asked and the gentleman answered it would apply, and the gentleman I understood answered that the agency would have to comply.

Mr. FASCELL. If they hold a meeting for that purpose, yes.

Mr. HORTON. Mr. Chairman, if the gentleman will yield further, the Sunshine bill only applies to those agencies defined in that legislation. The point I am making is the agencies normally covered in the reorganization are not covered in that bill. If there is only one agency head, like EPA, the Environmental Protection Agency, then that agency is not required to comply with the Sunshine Act. It is only those agencies which have two or more directors, such as the FPC and the SEC.

Mr. GARY A. MYERS. Mr. Chairman, I would like to ask another question. Last year and this year we have attached to a number of authorization bills a government in sunshine and financial disclosure provisions. Is it my understanding if they are set in the law referring to certain authorizations, even if those authorizations are transferred between agencies or out of agencies of one kind or another, whoever handles those authorizations will have to comply with the requirements of those financial disclosure provisions?

Mr. HORTON. Mr. Chairman, let me answer the gentleman this way. The reorganization plan and authorization we present here today does not change any substantive law with regard to open meetings. If they are there now, they would have to comply with them.

Mr. GARY A. MYERS. I am speaking to another subject, that of conflict of interest.

Mr. HORTON. I would say the same statement I just made is applicable with any other law that governs financial disclosure.

Mr. GARY A. MYERS. It does not change the law?

Mr. HORTON. It does not change the law.

Mr. BOLAND. Mr. Chairman, I rise in support of H.R. 5045, the Executive Reorganization Act of 1977. I do so because I believe one of the things this country needs desperately right now is some sort of reorganization authority in the executive branch. All of us recognize that the Federal Government is not as efficient as it could be, not as organized as it could be, not as responsive as it must be. H.R. 5045 gives to the President the authority to take the initiative to change the situation. The bill goes no further than that.

I suspect there are few in this Chamber who would disargee with the need for some sort of reorganization authority in the Executive. Such authority has been missing in the Executive since 1973 when the 1949 Reorganization Act expired. the differences arise over the best form in which to grant that authority.

Mr. Chairman, I support this bill because it gives the President the authority he needs to carry out the tasks we elected him to do, the same authority Chief Executives since President Truman have enjoyed. This Congress has the opportunity to become partners with the President in the difficult task of overwhelming the bureaucracy. We must not miss that opportunity.

H.R. 5045 does not give the President a free reign. This bill is not a threat to our system of government by three separate branches. In addition to its provisions allowing Congress to disapprove any reorganization plans, the legislation contains restraints on the President's ability to affect executive departments, independent regulatory agencies, enforcement functions, or statutory authority. Even with this reorganization authority, the President cannot increase an agency's function or increase a term of office provided by law. This bill will give the President the authority to make government efficient—it will definitely not give him emperor-like power over all government. The Congress will be a full partner in any changes that are made.

Mr. Chairman, I intend to vote for this bill and I urge my fellow members to do likewise. During his campaign, the President expressed a great concern over the way Government operates.

Many of us in our own campaigns expressed that same concern. By approving this bill we put that concern into action. I urge this body to give the President the tools he needs to start this difficult job.

Mrs. HOLT. Mr. Chairman, President Carter deserves our support in his request for authority to reorganize Federal departments and agencies, subject to congressional veto. A major theme of his election campaign was the promise to achieve reorganization of Government for more efficient attention to national needs, and he won a mandate from the people to make this effort.

As members of Congress, we know the frustration of watching programs become stifled by overlapping jurisdictions of competing agencies. We know something of the waste that occurs when agencies have duplicate responsibilities. We should recognize the need for consolidation of similar functions and clear definitions of authority.

I will never forget my shock at seeing a chart that attempted to show the organization of the Department of Health, Education, and Welfare. It appeared as a giant web spun by a deranged spider, with hundreds of lines interconnected in odd ways.

I hope that President Carter can bring some order to the chaos that prevails in many functions of Government, and I certainly intend to give him the chance. I support H.R. 5045.

Mr. Chairman, I also hope the administration will get on with the establishment of zero-base budgeting, which would require every Federal activity to justify its existence, and its cost relative to its accomplishments.

For many years, Congress has promoted, or at least tolerated, a proliferation of programs and Federal bureaucracies, many of which achieve very little. Federal spending has soared incredibly, now equaling about $1 billion from every congressional district or $4,000 per taxpayer.

Frankly, I am most disturbed at that kind of impact on my congressional district and the taxpayers I represent, especially when I reflect on Federal outlays for programs of minimal value or programs that should be State and local responsibilities.

We have built an enormous governmental apparatus in Washington. The scope of it is beyond the control of Congress and Presidents, and it is costing our people a terrible price in direct taxation and the indirect tax of inflation.

I hope that President Carter can exercise at least some control over this octopus and its costs, and I am voting to give him that opportunity. I intend to assist him in every way possible to achieve efficient operation of Federal programs.

Mr. MIKVA. Mr. Chairman, I rise in strong support of H.R. 5045, the Executive Reorganization Act of 1977. Few issues have generated such widespread bipartisan support as Government reorganization. The Executive Reorganization Act is the first concrete effort to move the issue from debate to action.

Except for the last 4 years, every President since Harry Truman in 1949 has been provided the authority by Congress to reorganize certain executive agencies. Past executives have exercised this authority responsibly, and the Congress has been judicious in its analysis of proposed reorganization plans.

However, at no time in the past history of the Executive Reorganization Act has there been a Congress or a President who have gone on record so strongly with a public commitment to Government reorganization. H.R. 5045 represents a much more sophisticated method than past reorganization powers of assuring an orderly process for the submission of reorganization plans, and a thorough congressional review of such plans.

It is time to begin the arduous task of Government reorganization. The issue is too important, the depth of support too great, and the momentum for change too strong to delay.

I know some Members are concerned that the Congress has delegated too much authority over reorganization to the President. I am confident that the Congress will exhaustively consider any proposals—primarily because I have known Chairman JACK BROOKS of the Government Operations Committee for a long time, and there are few more resolute defenders of the prerogatives of this body. I look forward to receiving President Carter's reorganization plan, and I look forward with equal anticipation to Chairman BROOKS' analysis of the submitted plans. Anyone who knows them both knows that justice will triumph.

Mr. BROOKS. Mr. Chairman, I have no further requests for time.

Mr. HORTON. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, the Clerk will read.

The Clerk read as follows:

H.R. 5045

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Reorganization Act of 1977".

SEC. 2. Chapter 9 of title 5, United States Code, is amended to read as follows:

"Chapter 9.—EXECUTIVE REORGANIZATION

"Sec.
"901. Purpose.
"902. Definitions.
"903. Reorganization plans.
"904. Additional contents of reorganization plan.
"905. Limitations on powers.
"906. Effective date and publication of reorganization plans.
"907. Effective on other laws, pending legal proceedings, and unexpended appropriations.
"908. Rules of Senate and House of Representatives on reorganization plans.
"909. Terms of resolution.
"910. Introduction and reference of resolution.
"911. Discharge of committee considering resolution.
"912. Procedure after report or discharge of committee; debate; vote on final disapproval.

"§ 901. Purpose

"(a) The Congress declares that it is the policy of the United States—

"(1) to promote the better execution of the laws, the more effective management of the executive branch and of its agencies and functions, and the expeditious administration of the public business;

"(2) to reduce expenditures and promote economy to the fullest extent consistent with the efficient operation of the Government;

"(3) to increase the efficiency of the operations of the Government to the fullest extent practicable;

"(4) to group, coordinate, and consolidate agencies and functions of the Government, as nearly as may be, according to major purposes;

"(5) to reduce the number of agencies by consolidating those having similar functions under a single head, and to abolish such agencies or functions thereof as may not be necessary for the efficient conduct of the Government; and

"(6) to eliminate overlapping and duplication of effort.

"(b) Congress declares that the public interest demands the carrying out of the purposes of subsection (a) of this section and that the purposes may be accomplished in great measure by proceeding under this chapter, and can be accomplished more speedily thereby than by the enactment of specific legislation.

"(c) It is the intent of Congress that the President should provide appropriate means for broad citizen advice and participation in restructuring and recognizing the executive branch.

"(d) The President shall from time to time examine the organization of all agencies and shall determine what changes in such organization are necessary to carry out any policy set forth in subsection (a) of this section.

"§902. Definitions

"For the purpose of this chapter—

"(1) 'agency' means—

"(A) an Executive agency or part thereof; and

"(B) an office or officer in the executive branch;

but does not include the General Accounting Office or the Comptroller General of the United States;

"(2) 'reorganization' means a transfer, consolidation, coordination, authorization, or abolition, referred to in section 903 of this title; and

"(3) 'officer' is not limited by section 2104 of this title.

"§ 903. Reorganization plans

"(a) Whenever the President, after investigation, finds that changes in the organization of agencies are necessary to carry out any policy set forth in section 901(a) of this title, he shall prepare a reorganization plan specifying the reorganizations he finds are necessary. Any plan may provide for—

"(1) the transfer of the whole or a part of an agency, or of the whole or a part of the functions thereof, to the jurisdiction and control of another agency;

"(2) the abolition of all or a part of the functions of an agency, except that no enforcement function or statutory program shall be abolished by the plan;

"(3) the consolidation or coordination of the whole or a part of an agency, or of the whole or a part of the functions thereof, with the whole or a part of another agency or the functions thereof;

"(4) the consolidation or coordination of a part of an agency or the functions thereof with another part of the same agency or the functions thereof;

"(5) the authorization of an officer to delegate any of his functions; or

"(6) the abolition of the whole or a part

of an agency which agency or part does not have, or on the taking effect of the reorganization plan will not have, any functions.

The President shall transmit the plan (bearing an identification number) to the Congress together with a declaration that, with respect to each reorganization included in the plan, he has found that the reorganization is necessary to carry out any policy set forth in section 901(a) of this title.

"(b) The President shall have a reorganization plan delivered to both Houses on the same day and to each House while it is in session, except that no more than three plans may be pending before the Congress at one time. In his message transmitting a reorganization plan, the President shall specify with respect to each abolition of a function included in the plan the statutory authority for the exercise of the function. The message shall also estimate any reduction or increase in expenditures (itemized so far as practicable), and describe any improvements in management, delivery of Federal services, execution of the laws, and increases in efficiency of Government operations, which it is expected will be realized as a result of the reorganizations included in the plan.

"(c) Any time during the period of thirty calendar days of continuous session of Congress after the date on which the plan is transmitted to it, but before any resolution described in section 909 has been ordered in either House, the President may make amendments or modifications to the plan, consistent with sections 903–905 of this title, which modifications or revisions shall thereafter be treated as a part of the reorganization plan originally transmitted and shall not affect in any way the time limits otherwise provided for in this chapter. The President may withdraw the plan any time prior to the conclusion of sixty calendar days of continuous session of Congress following the date on which the plan is submitted to Congress.

"§ 904. Additional contents of reorganization plan

"A reorganization plan transmitted by the President under section 903 of this title—

"(1) may change, in such cases as the President considers necessary, the name of an agency affected by a reorganization and the title of its head, and shall designate the name of an agency resulting from a reorganization and the title of its head;

"(2) may provide for the appointment and pay of the head and one or more officers of any agency (including an agency resulting from a consolidation or other type of reorganization) if the President finds, and in his message transmitting the plan declares, that by reason of a reorganization made by the plan the provisions are necessary;

"(3) shall provide for the transfer or other disposition of the records, property, and personnel affected by a reorganization;

"(4) shall provide for the transfer of such unexpended balances of appropriations, and of other funds, available for use in connection with a function or agency affected by a reorganization, as the President considers necessary by reason of the reorganization for use in connection with the functions affected by the reorganization, or for the use of the agency which shall have the functions after the reorganization plan is effective; and

"(5) shall provide for terminating the affairs of an agency abolished.

A reorganization plan transmitted by the President containing provisions authorized by paragraph (2) of this section may provide that the head of an agency be an individual or a commission or board with more than one member. In the case of an appointment of the head of such an agency, the term of office may not be fixed at more than four years, the pay may not be at a rate in excess of that found by the President to be applicable to comparable officers in the executive branch, and if the appointment is not to a position in the competitive service, it shall be by the President, by and with the advice and consent of the Senate. Any reorganization plan transmitted by the President containing provisions required by paragraph (4) of this section shall provide for the transfer of unexpended balances only if such balances are used for the purposes for which the appropriation was originally made.

"§ 905. Limitations on powers

"(a) A reorganization plan may not provide for, and a reorganization under this chapter may not have the effect of—

"(1) creating a new executive department, abolishing or transferring an executive department or independent regulatory agency, or all the functions thereof, or consolidating two or more executive departments or two or more independent regulatory agencies, or all the functions thereof;

"(2) continuing an agency beyond the period authorized by law for its existence or beyond the time when it would have terminated if the reorganization had not been made;

"(3) continuing a function beyond the period authorized by law for its exercise or beyond the time when it would have terminated if the reorganization had not been made;

"(4) authorizing an agency to exercise a function which is not expressly authorized by law at the time the plan is transmitted to Congress;

"(5) increasing the term of an office beyond that provided by law for the office; or

"(6) dealing with more than one logically consistent subject matter.

"(b) A provision contained in a reorganization plan may take effect only if the plan is transmitted to Congress within three years of the date of enactment of the Reorganization Act of 1977.

"§ 906. Effective date and publication of reorganization plans

"(a) Except as otherwise provided under subsection (c) of this section, a reorganization plan is effective at the end of the first period of sixty calendar days of continuous session of Congress after the date on which the plan is transmitted to it unless, between the date of transmittal and the end of the sixty-day period, either House passes a resolution stating in substance that the House does not favor the reorganization plan.

"(b) For the purpose of this chapter—

"(1) continuity of session is broken only by an adjournment of Congress sine die; and

"(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of any period of time in which Congress is in continuous session.

"(c) Under provisions contained in a reorganization plan, any provision thereof may be effective at a time later than the date on which the plan otherwise is effective or, if both Houses of Congress have defeated a resolution of disapproval, may be effective at a time earlier than the expiration of the sixty-day period required by subsection (a).

"(d) A reorganization plan which is effective shall be printed (1) in the Statutes at Large in the same volume as the public laws and (2) in the Federal Register.

"§ 907. Effect on other laws, pending legal proceedings, and unexpended appropriations

"(a) A statute enacted, and a regulation or other action made, prescribed, issued, granted, or performed in respect of or by an agency or function affected by a reorganization under this chapter, before the effective date of the reorganization, has, except to the extent rescinded, modified, superseded, or made inapplicable by or under authority of law or by the abolition of a function, the same effect as if the reorganization had not been made. However, if the statute, regulation, or other action has vested the functions in the agency from which it is removed under the reorganization plan, the function, insofar as it is to be exercised after the plan becomes effective, shall be deemed as vested in the agency under which the function is placed by the plan.

"(b) For the purpose of subsection (a) of this section, 'regulation or other action' means a regulation, rule, order, policy, determination, directive, authorization, permit, privilege, requirement, designation, or other action.

"(c) A suit, action, or other proceeding lawfully commenced by or against the head of an agency or other officer of the United States, in his official capacity or in relation to the discharge of his official duties, does not abate by reason of the taking effect of a reorganization plan under this chapter. On motion or supplemental petition filed at any time within twelve months after the reorganization plan takes effect, showing a necessity for a survival of the suit, action, or other proceeding to obtain a settlement of the questions involved, the court may allow the suit, action, or other proceeding to be maintained by or against the successor of the head or officer under the reorganization effected by the plan or, if there is no successor, against such agency or officer as the President designates.

"(d) The appropriations or portions of appropriations unexpended by reason of the operation of the chapter may not be used for any purpose, but shall revert to the Treasury.

"§ 908. Rules of Senate and House of Representatives on reorganization plans

"Sections 909 through 912 of this title are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described by section 909 of this title; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"§ 909. Terms of resolution

"For the purpose of sections 908 through 912 of this title, 'resolution' means only a resolution of either House of Congress, the matter after the resolving clause of which is as follows: 'That the does not favor the reorganization plan numbered transmitted to the Congress by the President on , 19 .', and includes such modifications and revisions as are submitted by the President under section 903(d) of this chapter. The blank spaces therein are to be filled appropriately. The term does not include a resolution which specifies more than one reorganization plan.

"§ 910. Introduction and reference of resolution

"(a) No later than the first day of session following the day on which a reorganization plan is transmitted to the House of Representatives and the Senate under section 903, a resolution, as defined in section 909, shall be introduced (by request) in the House by the chairman of the Government Operations Committee of the House, or by a Member or Members of the House designated by such chairman; and shall be introduced (by re-

quest) in the Senate by the chairman of the Governmental Affairs Committee of the Senate, or by a Member or Members of the Senate designated by such chairman.

"(b) A resolution with respect to a reorganization plan shall be referred to the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House (and all resolutions with respect to the same plan shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be. The committee shall make its recommendations to the House of Representatives or the Senate, respectively, within 45 calendar days of continuous session of Congress following the date of such resolution's introduction.

"§ 911. Discharge of committee considering resolution

"If the committee to which a resolution with respect to a reorganization plan has been referred has not reported it at the end of 45 calendar days of continuous session of Congress after its introduction, such committee shall be deemed to be discharged from further consideration of such resolution and such resolution shall be placed on the appropriate calendar of the House involved.

"§ 912. Procedure after report or discharge of committee; debate; vote on final disapproval

"(a) When the committee has reported, or has been deemed to be discharged (under section 911) from further consideration of, a resolution with respect to a reorganization plan, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) for any Member of the respective House to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. The motion shall not be subject to amendment, or to a motion to postpone, or a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the resolution is agreed to, the resolution shall remain the unfinished business of the respective House until disposed of.

"(b) Debate on the resolution, and on all debatable motions and appeals in connection therewith, shall be limited to not more than ten hours, which shall be divided equally between individuals favoring and individuals opposing the resolution. A motion further to limit debate is in order and not debatable. An amendment to, or a motion to postpone, or a motion to proceed to the consideration of other business, or a motion to recommit the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disargeed to shall not be in order.

"(c) Immediately following the conclusion of the debate on the resolution with respect to a reorganization plan, and a single quorum call at the conclusion of the debate if requested in accordance with the rules of the appropriate House, the vote on final approval of the resolution shall occur.

"(d) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to a reorganization plan shall be decided without debate.".

Mr. WALKER. Mr. Chairman, I offer an amendment in the nature of a substitute.

PARLIAMENTARY INQUIRY

Mr. BROOKS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state the parliamentary inquiry.

Mr. BROOKS. Mr. Chairman, would the Clerk read the two committee amendments and get the committee amendments adopted before we go into other amendments from the floor?

The CHAIRMAN. That portion of the bill has not yet been read.

Mr. BROOKS. Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point and that we take up the two committee amendments and then at any point in the bill other amendments would be eligible for presentation.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: Page 13, line 3, strike out "903(d)" and insert in lieu thereof "903(c)".

Page 14, beginning on line 6, strike out "a resolution with respect to a reorganization plan has been referred has not reported it" and insert in lieu thereof the following: "is referred a resolution introduced pursuant to subsection (a) of section 910 (or, in the absence of such a resolution, the first resolution introduced with respect to the same reorganization plan) has not reported such resolution or an identical resolution."

The committee amendments were agreed to.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. WALKER: Strike out all after the enacting clause and insert in lieu thereof, the following:

That this Act may be cited as the "Reorganization Act Amendments of 1977".

POLICY AND PURPOSE

SEC. 2. (a) The Congress hereby finds and declares that—

(1) the Government of the United States has attained a size and complexity which makes it inaccessible to many of its citizens and unmanageable by their leaders;

(2) such size and complexity have reduced the efficiency and increased the costs and other burdens of the Government upon such citizens; and

(3) a thorough and exhaustive review of the structure and function of the Government and the preparation of comprehensive means to its improvement and required if that Government is to retain the loyalty and respect of those citizens.

(b) Congress declares that the public interest therefore requires that the preparation and submission of reorganization plans pursuant to the Reorganization Act of 1949 (5 U.S.C. 901 et seq.) be authorized immediately by enactment of legislation extending the authority of that Act.

EXTENSION OF AUTHORITY

SEC. 3. Subsection (b) of section 905 of title 5, United States Code, is amended by striking out "before April 1, 1973" and inserting in lieu thereof "before December 31, 1980".

METHOD OF TAKING EFFECT

SEC. 4. (a) Subsection (a) of section 906 of title 5, United States Code, is amended to read as follows:

"(a) Except as provided under subsection (c) of this section, a reorganization plan shall be effective upon approval by the President of a resolution (as defined in section 909) which has been adopted, within the first period of 60 calendar days of continuous session of Congress after the date on which the plan is transmitted to it, by the House of Representatives and the Senate. Failure of either House to act upon such resolution by the end of such period shall be the same as disapproval of the resolution.".

(b) Section 909 of title 5, United States Code, is amended to read as follows:

"§ 909. Terms of resolution

"For the purpose of sections 906 through 913 of this title, 'resolution' means a joint resolution, the matter after the resolving clause of which is as follows: 'That the Congress of the United States approves the reorganization plan numbered , transmitted by the President on 19 , including such changes as may have been subsequently proposed by the President in accordance with section 910 of title 5, United States Code', the blank spaces therein being appropriately filled; but does not include a resolution which specifies more than one reorganizational plan.".

SEC. 5. (a) Section 910 of title 5, United States Code, is amended to read as follows:

"§ 910. Introduction and reference of resolution

"(a) On the day on which a reorganization plan is transmitted to the House of Representatives and the Senate under section 903, a resolution, as defined in section 909, shall be introduced (by request) in the House by the chairman of the Government Operations Committee of the House, or by a Member or Members of the House designated by such chairman; and shall be introduced (by request) in the Senate by the chairman of the Government Operations Committee of the Senate, or by a Member or Members of the Senate designated by such chairman.

"(b) A resolution with respect to a reorganization plan shall be referred to a committee (and all resolutions with respect to the same plan shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be. The committee to which the resolution is referred shall consider the reorganization plan for 30 calendar days of continuous session of Congerss and shall make its recommendations to the House of Representatives or the Senate, respectively, within 45 such days following the date of such resolution's introduction. Any time wthin 30 such days after submission of a reorganization plan to the Congress, but before such resolution has been ordered reported in either House, the President may make modifications or revisions of the plan, consistent with the provisions of sections 903 through 905 of this title, which modifications or revisions shall thereafter be treated as a part of the reorganization plan originally transmitted and shall not affect in any way the time limits otherwise provided for in this chapter.".

(b) Section 911 of title 5, United States Code, is amended to read as follows:

"§ 911. Discharge of committee considering resolution

"If the committee to which a resolution with respect to a reorganization plan has been referred has not reported it at the end of 45 calendar days of continuous session of Congress after its introduction, such committee shall be deemed to be discharged from fur-

ther consideration of such resolution and such resolution shall be placed on the appropriate calendar of the House involved.".

(c) Subsection (a) of section 912 of title 5, United States Code, is amended to read as follows:

"(a) When the committee has reported, or has been deemed to be discharged (under section 911) from further consideration of, a resolution with respect to a reorganization plan, it is in order at any time thereafter (even though a previous motion to the same effect has been disagreed to) for any Member of the respective House to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.".

(d) Section 912 is further amended by adding at the end thereof the following new subsection:

"(c) If, prior to the passage by one House of a resolution of that House, that House receives a resolution with respect to the same reorganization plan from the other House, then—

"(1) the procedure in that House shall be the same as if no resolution had been received from the other House; but

"(2) the vote on final passage shall be on the resolution of the other House.".

(e)(1) Section 913(a) of title 5, United States Code, is amended to read as follows:

"(a) A motion to postpone, made with respect to the consideration of a resolution with respect to a reorganization plan, is not in order, and it is not in order to move to proceed to the consideration of other business.".

(2) The heading of section 913 is amended to read as follows:

"§ 913. Motions to postpone and proceed; decisions of the Chair".

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, my amendment in the form of a substitute provides this House with an opportunity to proceed with Federal reorganization, but do so in a wholly constitutional manner. The language is the same as contained in H.R. 3131, a reorganizational bill originally drafted and introduced by the distinguished chairman of the Government Operations Committee, the gentleman from Texas (Mr. BROOKS). It is language acknowledged in every quarter as completely consistent with the strictures of the Constitution.

The reason for and the need for this amendment rests in the strong body of opinion that H.R. 5045, as reported by the Government Operations Committee is wholly unconstitutional. The legislation before this House ignores both the specifics and the intent of article I, section I and article I, section 7 of the Constitution. In prior debate, I outlined in some detail the nature of this assault on the Constitution and given that evidence, the question arises of whether this House wishes to go on record in favor of unconstitutional reorganization or whether the American people will accept an action of this House which abdicates legislative rights and responsibilities.

The answer is that we need not assault the Constitution or unwisely give up legislative prerogatives. We can adopt a reorganization format that maintains separation of powers between the legislative and executive branches of government and recognizes the role of the Congress as an equal partner in the lawmaking function of restructuring the bureaucracy. For as important as reorganization is, the preservation of the constitutional processes on which our Republic is based is more important. The time has come to draw the line on the trend toward erosion of our checks-and-balance system, and no better issue exists than this one for making that stand. The real question before us is how much authority over the business of Federal management does a majority in this Congress want to wield.

The substitute I offer would give the Congress a considerable role in reorganization. The administration would be given the authority it needs to improve the efficiency of the Federal Government. But the requirement that we act affirmatively on the restructuring plans developed by the administration would assure that our proper legislative jurisdiction would be preserved.

Under this approach, we would not amend administration proposals, but the President would be able to make changes in his plan within 30 days after it is sent to Capitol Hill if substantial opposition arises to any of its various parts.

Committee action on the Executive proposals would have to occur within 45 days after submission, but Congress could kill any plan by taking no action within 60 days. However, any one Member could call the plan to the floor for a vote, assuring that the administration could get action if it desired action.

The fundamental change in this substitute is the elimination of the legislative veto concept. This is the necessary change to bring the reorganization formula in concert with the Constitution.

Prof. Philip B. Kurland, a renowned constitutional specialist, has stated:

It is for Congress to write the laws. I know of no way constitutionally to justify the legislative veto process. I am at a loss to understand why it is necessary to exclude Congress from formulating reorganization plans. Why should a President draft a plan secretly and spring it on Congress. I don't understand it. I fear it.

The difference between the two approaches we consider is not that one would permit reorganization and the other would sabotage it. It is that one would circumvent the legislative process of the Constitution and the other would follow it; that one would breach the separation of powers between the executive and legislative branches and the other would preserve it.

Adopt this substitute and there will be nothing to fear about compromising constitutional principle. The Congress will not give the President special and unique, but unwarranted, powers in reorganization. Rather, it will assure that this vital issue will be handled on Capitol Hill in the regular legislative channels. Sure, we will be required to vote yes or no on some controversial matters, but certainly we can handle that responsibility. And, it will be to our credit to adopt a method that allows positive action by a means other than disapproving a disapproval.

More Government efficiency is no reason for abandoning the Constitution. Unconstitutional practices wrongly enacted in the past are no justification for defacing the Constitution again. A concern about potential congressional irresponsibility is no cause for pushing the Constitution aside.

Accept this substitute and you accept the legislative role defined in the Constitution. You accept a continued movement toward restoration of the balance that should rightfully exist between the legislative and executive branches. You accept a methodology which will likely result in broader based and more comprehensive government reorganization.

Reject this substitute and you place the whole reorganization effort on the shakiest of constitutional platforms.

I urge your favorable consideration.

Mr. BROOKS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want to express my keen appreciation to the gentleman from Pennsylvania for agreeing with the position which I have taken with reference to reorganization legislation. The amendment today is most attractive and meritorious; it reflects good judgment and perceptiveness of the issues. I would say that at a very early stage in his career, the gentleman from Pennsylvania (Mr. WALKER) shows a keen understanding of how the legislative process should work. I have the highest regard for him, and I frankly feel that the approach taken by my original bill and by the amendment that the gentleman has offered is a correct one.

But, we have reached a compromise on this legislation in the form of H.R. 5045, and I have agreed to support it. I think it is a workable compromise. It makes a substantial improvement over the procedures in existing law. It does, in fact, guarantee an opportunity for either House to vote.

I therefore, with reluctance but with appreciation for his keen interest, oppose the gentleman's amendment, and could not wish that he had had a few more votes among our colleagues on the committee.

Mr. HORTON. Mr. Chairman, I rise in opposition to the substitute amendment.

As the chairman has indicated, the bill before us is a compromise. I personally feel that the bill before us is a better bill than the substitute for reasons other than just the constitutional question. One point to be made is the substitute provides for an extension of 4 years. The bill before us is for a 3-year period, which I think is a better limitation on the amount of time.

The committee bill permits three plans to be pending within a 60-day period. The substitute would restrict this to one plan within 30 days.

The committee bill also provides that each plan contain only one logically con-

sistent subject matter and is therefore, I believe, preferable to the substitute.

So, therefore, I rise in opposition and urge my colleagues to defeat the substitute.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is that portion of our activities of the day that the political scientists and government majors ought to take down. We have had—and I want to commend the chairman from the outset—a candid expression on his part that the substitute is probably a superior work product, even though he admits authorship of it originally. He convinced me from the beginning that we ought to correct the procedure that for some 40 years has existed in which we give to the executive branch this peculiar right to write their own reorganization. The part that our colleague from Pennsylvania may or may not appreciate is the simple fact that the administration can and usually does write legislation, anyway. What is the difference? If they wanted a reorganization bill, they would propose it; it would mysteriously get down here and somebody would introduce it, regardless of who is in the White House. That is the way things work.

And so I read a very interesting dissent from the distinguished gentleman from Massachusetts, who moved me to add a few remarks of my own. But to my surprise I find that he is not supporting this substitute.

The chairman of the Committee on Government Operations is the kind of person who fully appreciates the reservations that abound. If I choose to vote against the bill, since I was not a party to the compromise, or if any other member of the committee chooses to vote against the bill, or indeed if any Member in the House, upon reading the dissenting views that I presented on page 38, or the more detailed dissent presented by the gentleman from Massachusetts, the former dean of the Boston Law College, which begins on page 39, I am sure he fully understands this, because he originally raised the ideas which we press now.

I do not know if this is an unconstitutional piece of legislation or not. Let us assume that perhaps it is not. But there is another element that enters into this equation, and that is good commonsense as to how we ought to legislate, and, to me, that is overriding. So I will take my stand with those who believe the lawmaking process ought to be more fully exercised by the Legislature and less so by the Executive.

Mr. ERLENBORN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I think that this is a very important substitute pending before us, to put the House on record as to how we stand on the proposition of a one-House veto. There is conflicting legal opinion as to the constitutionality of the one-House veto. The one-House veto is exercised in more than just the instance of the presentation to the House of the Presidential Reorganization Plan. Rather consistently over the past 5 or 6 years this House has provided a one-House veto for regulations which are promulgated under the authority of legislation that the Congress has passed; and rather regularly both the House and the other body have either written this sort of one-House veto into pending legislation or have offered it and had it written in on the floor.

There has been leadership on both sides of the aisle in this effort to recapture the authority for the final determination of what will or what will not be the law of the land. So I think we want to consider this question very carefully.

We have as an example in the general education law the authority for a one-House veto of regulations to implement the education law. I think we all recall the regulations to implement title IX of the Education Act. Title IX is the one that provides for no discrimination based on sex in education programs.

There was a regulation that the Office of Education promulgated that said in effect—that Boy Scouts and Girl Scouts are sexist organizations and may not be countenanced in our schools. They also said that father and sons' dinners are sexist and may not be sponsored in our schools.

At least we had an opportunity when these title IX regulations were offered to exercise the one-House veto. They came here to the Congress, and we had a chance to review them and had a chance to vote in either this House or in the other body to veto them in whole or in part and stop these regulations before they became law.

Regulations promulgated by the executive branch have the full force and effect of law. That is the promulgation of law just as the promulgation by the President of the reorganization plan is the promulgation of law. We ought to have in both this instance and in that instance the opportunity to reject that which we think is not good law.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. Mr. Chairman, I would be happy to yield to the gentleman from Georgia (Mr. LEVITAS), who has given us outstanding leadership in this fight for the rights of Congress.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman from Illinois (Mr. ERLENBORN) for his comments and for the remarks he has made. I would like to associate myself with them.

I find it almost baffling to hear the gentleman from Pennsylvania (Mr. WALKER) say that we should not retain a veto once we have delegated the power. What do the Members think we have done when we gave the FTC and the EPA and all these other agencies of government the power and the right to pass laws? That is what we are doing. We have done it time and time again. If you do not think they are laws, even if called mere rules, just ask the businessman, taxpayer, and private citizen who is threatened with fine or jail or his money cut off for violation of an administrative rule or law.

What we are asking for in this instance, it seems to me, is the responsibility of exercising major legislative control over what is done. I think that if we were to accept the argument of the gentleman from Michigan (Mr. CONYERS) or the gentleman from Pennsylvania (Mr. WALKER), we might have to abolish all of these enabling laws and lawmaking provisions that we delegate to administrative agencies and give a blank legislative check to the administrative agencies which are not elected by anybody. The congressional veto is proper control over them. It is proper control over reorganization plans.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. Mr. Chairman, I would like first to thank the gentleman from Georgia (Mr. LEVITAS). I think he is absolutely right.

If we set a bad precedent here today, we may thereby be giving such a blank check to executive agencies to write regulations that have the full force and effect of law without any recourse to the veto power of the Congress.

Mr. STEIGER. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, I appreciate very much the gentleman's yielding.

I will say that my friend, the gentleman from Georgia (Mr. LEVITAS), and the gentleman in the well are both wrong. The argument indeed they are making is that because we have done it over the past 4 or 5 years with a lot of other agency laws and a lot of other laws we have passed, that makes it right. That does not make it right at all. It was wrong to start with, and it is still wrong today.

Then we have the argument concerning OSHA, the Occupational Safety and Health Act. I hate to use that word, but I must. You may think that is just a word for a small town in Wisconsin—Oshkosh—and you are in trouble if you do.

Then we have EPA, that most onerous of agencies, in the area of clean air and clean water, and we have got all these other agencies. They are not passing laws in the sense that we are asking for a law to be passed under this vehicle.

If we want to do it, then, doggone it, we should have the guts to stand up and write the regulations. What we have done in every one of these agency laws is to say that we cannot go ahead and do these things. And thus we authorize regulations to carry out our intent to be passed.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. ERLENBORN) has expired.

(On request of Mr. STEIGER and by unanimous consent, Mr. ERLENBORN was allowed to proceed for 3 additional minutes.)

Mr. STEIGER. Mr. Chairman, will the gentleman yield further?

Mr. ERLENBORN. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Chairman, what we have said is issue rules and regulations under a law passed by both Houses

of Congress, duly signed by the President, which is an appropriate constitutional separation-of-powers way in which to insure that there is implementation of that law.

It boggles the mind that this House or this Congress would assume that one can erect a jerry-built structure of a one-House legislative veto in an effort to control the agencies. It is not going to happen and it does not happen.

Mr. Chairman, I most respectfully say that I think this House would make a serious error if we do not adopt the Brooks-Walker substitute.

Mr. ERLENBORN. Mr. Chairman, I thank the gentleman for his comments.

They are wholly consistent with the position he has held for a long time, just as the gentleman from Texas (Mr. BROOKS) had been wholly consistent until he compromised with the President and the majority of the committee.

However, Mr. Chairman, I hope that the gentleman from Wisconsin (Mr. STEIGER) will amend his remarks so as to say that in his opinion the gentleman from Georgia and the gentleman from Illinois are wrong. Of course, I think there is always room for a legitimate difference of opinion. I will not even mention the fact that the gentlemen from Georgia and Illinois are lawyers, skilled in the law, who have a right to an opinion in this regard. I think we all have a right to an opinion, but I do think that it is important that this Congress maintain some control over the writing of the laws and regulations adopted by agencies to implement the laws that we pass which have the full force and effect of law. I think it is altogether proper that we maintain some control over that part of the lawwriting process.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. ERLENBORN. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, I would like to commend the gentleman in the well for precisely identifying what the vote is about. It is about the one-House veto, and we should point out clearly that we are not to confuse this with whatever we consider the Federal commissions or agencies may be doing. They are not writing laws as constitutionally prescribed, so I think we really should not suggest that a one-House veto of the Federal Power Commission's and other agencies' doing their work is comparable to the bicameral constitutional function of the Congress.

Mr. Chairman, I commend the gentleman for identifying the issue. I am sorry that we are not in agreement, but I think more and more Members are beginning to recognize at least the validity of opposition views that have been expressed.

Mr. ERLENBORN. Mr. Chairman, I thank the gentleman for his contribution.

I do oppose the amendment in the nature of a substitute and urge that it be defeated.

Mr. BENJAMIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the concept of the reorganization of the Federal Government and our President's desire and commitment to accomplish reorganization. Reorganization must take place if we are to make the Government more humane, responsive, and cost effective. It is a concept I have long supported.

As for the particular reorganization proposal before us today, embodied by H.R. 5045, I find myself in support of all but one of the major components of the bill. Those provisions I support include the right of the President to amend any plan submitted to Congress within 30 days of its introduction. I have no disagreement with the provision eliminating the restriction on the composition of plans or the frequency of submissions.

I cannot, however, support the provision of the proposed Reorganization Act of 1977 which would allow a particular reorganization plan to become effective without the affirmative approval of both Houses of Congress. That is why I now rise to add my voice in support of Mr. WALKER'S amendment.

It is my strong belief that the veto provisions, as drafted, is violative of more than one section of the Constitution. Article I, section I, commands that—

> All legislative powers herein granted shall be vested in a Congress of the United States.

And as Professor Kurland testified before the House Committee on Government Operations:

> It is for Congress, the legislative branch, to write the laws. A President is authorized to veto laws enacted by Congress and Congress is empowered to override any such Presidential veto by a two-thirds majority of each House.

Congress is this country's lawmaker.

Today, however, we have obfuscated this clear constitutional mandate with emotional arguments that do not recognize the legal reality.

The Attorney General offers that a proposal such as the one offered by the gentleman from Pennsylvania "shifts the balance of power to Congress (from the Executive) thus permitting the legislative branch to dominate the executive." I would disagree with his conclusion and suggest that unless the Walker amendment is adopted, the opposite conclusion would result.

We are further told that no "substantive power through which the Government affects the substantive rights and interests of the governed is involved here. How can this be when the bill we are now considering would allow the President to decree, among other things "the abolition of all or a part of the functions of an agency and the consolidation of the whole or a part of an agency," or "the consolidation of the whole or a part of an agency, or of the whole or a part of the functions thereof, with the whole or a part of another agency or the functions thereof"? Certainly, the peoples' substantive rights are going to be affected by our actions.

Finally, inefficiency is decried and we are asked to remove the impediments to the swift implementation of any proposal the President may make. When have we become more concerned about efficiency rather than abiding by the governing law of the land?

We talk of the responsibility of the Government to be accountable to the people. My dear friends, in this House, at this moment, we are the Government and as the representatives of the people it is our responsibility to act to insure that the legislature of this country will remain accountable to the people.

We must act to insure that all reorganization plans receive prompt attention. More importantly, we must insure that they are not hastily considered and that they are thoughtfully and positively examined.

Our Government is far from efficient. It will not be perfectly efficient after a reorganization. That is the nature of a democracy. It is also in the nature of a democracy to be governed by laws and we cannot circumvent the Constitution simply because not to do so would be inconvenient.

I do want to vote for H.R. 5045. However, unless the Walker amendment is adopted to make this bill patently constitutional, I will not be able to support final passage. While I am reluctant to disagree with our President, I must abide by my oath of office to support the Constitution of the United States. I am convinced that the Walker amendment will enable a swift, orderly and constitutionally acceptable reorganization of our Government under the President and with the support of the Congress and urge your support for this amendment which would require the expeditious adoption of reorganization plans by affirmative and public vote of Congress.

Mr. WYLIE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think the need for Government reorganization is indisputable.

As the Federal structure now stands, it is replete with unwieldly lines of authority, overlapping jurisdiction, and mismanaged bureaucracy, all of which leads to inefficiency and waste and also inhibits, to my way of thinking, new policy initiatives.

There is nothing very new in the bill now before us, I submit. As brought to our attention by the gentleman from Ohio (Mr. BROWN), who spoke a little earlier, the authority to use this type of reorganization has been in the law since 1932 when it was first granted to President Hoover and such authority has been renewed periodically since then. The approach has been pretty much the same for 45 years. The President may propose structural changes and the Congress may reject whatever reorganization is proposed by the President.

The last extension of that basic law, which expired on April 1, 1971, allowed disapproval by either of the bodies in the Congress, as was pointed out by the gentleman from Michigan (Mr. CONYERS) and by the gentleman from Illinois (Mr. ERLENBORN).

There has been ample precedent in the reorganization procedures over the past several years. I think, if nothing else, that precedent over the past 45 years

would render this procedure constitutional because of custom and usage.

I respect the argument of those as to the constitutionality of the bill.

The gentleman from Pennsylvania argues that the power of negative approval gives the Congress Presidential veto power and transfers its own legislative responsibility to the President. Then the gentleman argues further that the one-House veto violates the constitutional prescription that legislation must be acted on by both Houses of the Congress.

The Justice Department has concluded that the procedures involved here are not unconstitutional because the President's power to review legislation is preserved, the principle of bicameralism is maintained since either House may prevent enactment, the legislative power is not transferred to the President, since provisions define and limit his authority and the President is empowered to alter organizational structure but cannot alter or abolish the intent or authority of congressionally enacted programs and, lastly, the process does not allow Congress to assume control over administrative functions of the executive branch.

It strikes me that the Justice Department's view could be correct and that it is not up to us to decide the constitutionality of legislation, especially where different views can be supported.

Mr. Chairman, I think the committee has done a good job and I support the bill as reported from the committee.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. Certainly I yield to my friend the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I would ask the gentleman from Ohio if the gentleman is contending that the Justice Department's view of legislative veto is that it is a special kind of legislative procedure that has to be adopted because of the special powers of the President in this area?

Mr. WYLIE. I say there can be differing views on the constitutionality of it, nonetheless, there has been precedent established over a period of 45 years, and, if nothing else, custom, and usage, I suggest, would indicate the practice has been held to be constitutional.

Mr. WALKER. But, it seems to me that the Justice Department and the opinion of the Attorney General on this issue was based upon the fact that the President has some special prerogative to reorganize the executive branch, and that was the only justification for it. I submit that the American people have certain rights which could be ignored, and certain needs that could be ignored by reorganization plans which do not demand congressional affirmation. But, if nothing else, the opinion of the Justice Department in this case appears to me to be very, very weak.

Mr. WYLIE. I understand precisely the position of the gentleman. I think your positon is arguable and I understand the position of the gentleman from Indiana who spoke here a little earlier to the effect that just because custom and usage has esablished a precedent does not make a practice sanctimonious. That we do have the opportunity to do otherwise. But I do submit to the gentleman that in the past Congress has done the same thing we are doing here today, in my judgment, when we gave the various agencies rule and regulatory making powers.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. HORTON, and by unanimous consent, Mr. WYLIE was allowed to proceed for 2 additional minutes.)

Mr. WYLIE. Mr. Chairman, I would say that we could repeal an agency's authority if we think it has overstepped legislative bounds. As a matter of fact, I think it might be a good idea to modify blank check rulemaking power and establish by statute specifically what we want each agency to do. I have an amendment in a bill which will come to the floor in a couple of weeks which will do just that.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from New York.

Mr. HORTON. I thank the gentleman for yielding.

One thing I have heard on the floor that I want to point out is that the substitute is to give each House an opportunity to vote, and that if we do not take this, then we have the same system of procedure that we have had under other legislation.

Mr. WYLIE. Precisely.

Mr. HORTON. The bill before us is different because the bill that is before us, which is the compromise, provides that the chairman of the House Committee on Government Operations and the chairman of the Senate Committee on Government Affairs must either introduce or by direction have introduced by some other Member a resolution of disapproval, and then at the conclusion of 45 days if the committee has not acted, that resolution can be called up by any Member and it is a privileged resolution. So that practically guarantees that there is going to be a vote, which is different than procedures that we had before.

Mr. WYLIE. That is right. I understand the modifications of the procedures we have now, and I think that if the procedure which we have heretofore followed for 45 years is constitutional, then a fortiori the procedure provided in this bill is constitutional.

I thank the gentleman from New York for making that point.

Mr. DRINAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, when I first saw the Walker substitute, I had the hope that it would combine the best of both worlds. But I must reluctantly vote against it because it omits many very valuable things in H.R. 5045 which I think should be incorporated. The gentleman from Pennsylvania (Mr. WALKER) has gone back to the original bill of the Chairman's, the gentleman from Texas, Mr. BROOKS', H.R. 3131, and has proposed this as the substitute. If the substitute were adopted, here are just some of the very valuable things that would be lost.

In section 903 of H.R. 5045 there is a very careful definition of precisely what the President might do under a reorganization plan. It is stated, furthermore, that the President may at no time have more than three plans pending before the Congress. In addition, it is stated in section 904 precisely what the President may do when he wants to consolidate certain bureaucracies. It is also stipulated in this bill what happens to the appropriations that have already been designed for these agencies.

Another section, section 905, states that in any reorganization plan the President may not create an entirely new executive branch. Again there is a careful definition of precisely what he may do. Furthermore, there is a careful provision here in section 907(c) as to what happens with regard to any lawsuit brought by the head of an agency which is proposed for consolidation.

I could go on, Mr. Chairman, and enumerate many other very excellent improvements that have been made by the subcommittee of the gentleman from Texas (Mr. BROOKS) and by the entire Committee on Government Operations.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. DRINAN. I yield to the gentleman from Michigan.

Mr. CONYERS. I thank the gentleman for yielding.

I think the reason that the gentleman will find all of those wonderful new things added in the substitute is very simple to explain. They need to be added because they are not required in the original Brooks bill which restored the bicameral principle and allowed the Congress to legislate rather than have to exercise a one-House veto, which the gentleman from Massachusetts so admirably spoke to in his additional views. That is why all of those things are in there. So I think we should not confuse the situation by suggesting that if all those matters were now put into the original Brooks bill, we might then have a substitute which might be more in keeping with what the gentleman desires.

Mr. DRINAN. I appreciate the comments of my friend, the gentleman from Michigan. But I do suggest and insist that the Presidential resolution as proposed in the substitute by the gentleman from Pennsylvania (Mr. WALKER) does in fact carry a certain authority and weight because it comes from the President. I recognize also that under his bill there is a clear definition both Houses must vote on this bill. As I said originally, however, I am inclined to think that the constitutionality of the bill cannot be challenged successfully because it does give to every Member of both Houses the right to have an up or down vote on it. It seems to me that in effect what we are doing by H.R. 5045 is making a rule of the House that when the President of the United States sends a reorganizataion bill, if it is within the parameters of this bill, it will remain in committee for 45 days, and thereafter it is up to each Member to have a vote on it if he wants to have a vote on it.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. DRINAN. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

I read the gentleman's additional views in the committee report. Does it not seem to him that there is enough problem with constitutionality with this that we may have a time come when the whole reorganization concept could be thrown out by the courts and thereby take with it all of the reorganization that has been accomplished under it? Is not this a very practical fear on the part of the gentleman that what we might end up with is destroying the entire reorganization concept at some point in the near future?

Mr. DRINAN. I appreciate the comments of the gentleman and I do have that fear, as I tried to make clear. At the same time this bill is going to pass. It passed unanimously in the Senate. And at this moment in time I think we should take the language and the concepts that have been worked out elaborately by the Government Operations Committee. We should perfect the bill and make it the best we can, hoping that the constitutionality question has been resolved and that the bill will be acceptable.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

(On request of Mr. CONYERS, and by unanimous consent, Mr. DRINAN was allowed to proceed for 1 additional minute.)

Mr. CONYERS. Mr. Chairman, if the gentleman will yield, a further question to my distinguished colleague: Is it not true under the present so-called compromise that the Government reorganization plan can come from the White House and be passed into law without the Congress ever giving one indication in either body?

Mr. DRINAN: No, because every Member has the right to bring it up. Furthermore the acceptance of the reorganization plan will obviously be recorded either in the RECORD or somewhere else, just like a private bill is recorded. The proposal here is similar to the procedure by which a private bill which on the designated date comes here, and, unless somebody objects, becomes law.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not have any illusions we have put the constitutional discussion at rest. Therefore, I would like simply to state my own opinion with respect to the constitutional questions that have been raised. So I start out first to say that the argument has been going on ever since I have been here, which does not prove anything one way or the other, and it will continue long after I am gone if we are to use reorganization.

No one here, regardless of his background or whatever posture he takes on the constitutionality would deny the fact that the Congress has the right to pass a bill. That is what we are going to do here today. If that does not meet the constitutional test, I do not know what does. And when the other body acts on the bill and the President signs it, it will be a law, and that will meet the constitutional test.

If in that law we permit the President to do something, then tell me it is unconstitutional to permit the President to do that and we will have a discussion about it. In this law there is restraint on the delegation of that authority. We retain in this law the right of the House to veto whatever it is we have delegated to the President, tell me that is unconstitutional, and then we will have a discussion about it.

But that issue has not been raised. What has been raised has been the unconstitutionality of the one House veto, which I respectfully submit is not unconstitutional.

Mr. CONYERS. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I will yield as soon as I get through.

But the fact is that when we pass this bill, the passage of the bill is a constitutional act when it is signed by the President. We can get into an argument as to whether or not the one-House veto is a restraint and whether it is an effort by the Congress to retain power over the delegated authority, but it seems clear to me that it is.

The fact is that it is, in simple English, and we know it is.

The other question then is whether we have the right to delegate or whether we should delegate. Both are legitimate questions. We have delegated. We think we should delegate. It is important to get on with the reorganization aspects.

Is it unconstitutional? We can argue forever about that; but I submit that the record is clear that this is not an unlimited delegation of power to the President of the United States. The law that we are passing right now, which he will sign if he gets the chance, severely restricts what the President can do. There are clear areas in which we say we have not delegated to the President of the United States. This is a restrictive delegational authority to the President. I submit that because it is, it thus retains very strong constitutional features.

Finally, Mr. Chairman, for those of us who want to discuss and argue the constitutional issue, let me say that one of the foremost constitutional lawyers who came before the committee, who argued the other side of the constitutional question that I am arguing, answered in response to my question that there was no way that the matter could be a justiciable one for submission to the courts.

The fact is that in this case we do have to decide the constitutional issues for ourselves. The committee submits that we had sufficient constraints and congressional oversights which should decide the constitutional question favorably. There is no way to get the matter into the courts for the courts to decide the constitutionality of the question. The constitutionality of the whole issue has been decided by the Congress and will be decided by the Congress again.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, am I not correct that the legislative veto procedure is now being challenged in the courts as it is? There are at least two cases now before the courts challenging the constitutionality.

Mr. FASCELL. All I can say, we discussed that in the committee on that very point. A very clear distinction was drawn between those challenges in the reorganization act.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

(At the request of Mr. HORTON, and by unanimous consent, Mr. FASCELL was allowed to proceed for 2 additional minutes.)

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I want to commend the gentleman on the very excellent statement that the gentleman has made on the constitutional question. I tend to agree with the position that the gentleman from Florida has taken, especially with regard to the bill that we are acting upon now; that is the bill that gives the authority and that is constitutional.

I asked the question, I think it was of Mr. Kurland when he testified before, but I did ask the question, Can the Congress delegate to the President the right to reorganize without ever coming up to the Congress? and the answer was yes.

Mr. FASCELL. Absolutely; I remember the question and that was the answer.

Mr. HORTON. And in my judgment that is the answer, that in my judgment meets the constitutional test.

Mr. FASCELL. I agree with the gentleman from New York. That is why I was so careful to point out that in the bill under consideration now we do not have an unlimited delegational authority to the President. We have a restricted delegation of authority.

Mr. HORTON. That is correct.

Mr. FASCELL. With congressional oversight, and I cannot, for the life of me, follow a logic which says that because we have restrained the President because we have restricted the delegational authority and because we then provide the congressional oversight mechanism, that that in some way is unconstitutional. I just cannot buy the argument. I think it is illogical. I think it is illegal. I think it is unnecessary. I think we ought to go on and vote down the amendment.

Mr. STEIGER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment in the nature of a substitute.

Mr. Chairman, I hesitate to get into the debate because of the new stricture laid down, what I will call the Erlenborn-Levitas rule, that is, that one has to be a lawyer to understand the Constitution or to argue the case.

I am persuaded that the gentleman from Pennsylvania has done the House a very real service in offering a clear issue

on this bill, whether or not one thinks that the role of the Congress ought to be to sit back, authorize the President to reorganize, and then allow one or the other House of the legislative branch to veto what the President has proposed to us. I find that to be objectionable. I think it can be unconstitutional and I think, worst of all, it is a copout.

If one were to go back to the discussion that took place in the Separation of Powers Committee in the other body, there is a colloquy taking place between the late Prof. Alexander Bickel, professor of law, and Senator Sam Ervin. Professor Bickel says:

I know that [the approach of the reorganization act] has been in effect and it has entered the practice of the Constitution if not its theory for over a generation now. However, I cannot reconcile it with my view of the requirements of the separation of powers. . . .

Senator ERVIN. I have convinced myself to this point. If the principle of the Reorganization Acts is constitutional, then a comparable procedure allowing Congress to veto watershed projects conceived by the Executive is also constitutional.

Professor BICKEL. I quite agree.

Senator ERVIN. And if the latter is unconstitutional then the former is unconstitutional.

Professor BICKEL. I quite agree with that.

I do not think anybody has proposed that we do that; that is, we authorize a watershed project. We do not veto one proposed by the President of the United States. Those who are familiar with the legislation of 1932 will remember that in 1932 the Congress directed the Secretary of Commerce to consolidate the Steamboat Inspection Service and Bureau of Navigation into one agency; abolish the Personnel Training Board and transfer it to the Secretary of Commerce; abolish the Radio Division of the Department of Commerce and transfer it to the Federal Radio Commission. All those were positive acts by the legislative branch directing reorganization.

The gentleman from Indiana, I think, is correct. Any of us who would like to be for reorganization—and I would—are hard pressed to support the exercise of the one House veto as proposed in the bill before us.

I regret exceedingly that so few Members of the House have been willing to take their time to come and listen to those far better qualified than I to discuss this interesting, important and substantive issue. I will direct all who are intrigued by the constitutionality to read the excellent study by John Bolton, prepared by the American Enterprise Institute for Public Policy Research, "The Legislative Veto, Unseparating the Powers." If I may, let me simply read the conclusion of the Bolton study for the benefit of those who care about what our role is. He says.

The story of the legislative veto is a depressing story—depressing because, although the goals sought through the use of the device are commendable, the device itself, is almost necessarily, unconstitutional. Moreover, the goals—greater agency accountability and less arbitrary governmental interference in people's lives—might be harder to reach with the legislative veto than without it because it tends to give the false impression that the agencies are under control. In order for those worthy goals to be achieved, Congress must be willing (or be forced) to make difficult political choices. Statutory grants of discretion must be more carefully structured and periodically reviewed. More attention must be paid to specifics, closer scrutiny must be given to presidential nominees, and there needs to be greater resistance to calls for "immediate legislative action" from interested pressure groups.

That, it seems to me, answers the substance of the argument made by those who defend the legislative veto; that is, the failure on the part of this Congress, the failure on the part of this House, to be willing to stand up for itself on what it granted to agencies.

I hope the substitute amendment is adopted.

Mr. WYDLER. Mr. Chairman, will the gentleman yield ?

Mr. STEIGER. I yield to the gentleman from New York.

Mr. WYDLER. Mr. Chairman, I, too, hope the substitute amendment is adopted. I want to commend the gentleman from Wisconsin for the statement he has made, and also the author of the substitute amendment.

I did vote against this legislation in the committee. The vote there, I think, freely indicates that this matter is going to be passed by the House today, but in my own mind, after reading the testimony that was given before the committee, I can only conclude that this is indeed, under the circumstances that we are dealing with, an unconstitutional delegation of congressional authority. As a Member of Congress, it has always been my understanding that if we feel a measure is unconstitutional, we are supposed to vote against it. It seems to me that is one of our basic responsibilities as Members of this House. I would also add that the most important part of this whole discussion here today is:

All the talk we have heard over the last so many years about Congress regaining its power and taking back from the President the power that rightly belongs to the House and to the Senate, all we have heard on so many occasions in the last few years.

But here today we are taking one of those powers, which we did indeed take back in the House so many years ago, and returning it to the President. I just wonder why.

Mr. STEIGER. I think the gentleman is absolutely correct.

Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, first, I would like to respond to the last observation made by the gentleman from New York (Mr. WYDLER) about congressional power. I cannot imagine that there could be much more power given to the Congress or reserved by the Congress than the power for either body to reject any plan sent over by the President.

Indeed, one of the arguments we usually hear, arguments regarding the congressional veto, is that it gives too much power to the Congress. The Congress has under this bill all of the power in the world it will need to thwart any bad plan. So it is not a question of congressional power. There is ample congressional power.

As intrigued as I am with the constitutional issue which we have heard explained on several occasions, the fact of the matter is that each of us, I suppose, is his own constitutional lawyer on this matter. This bill is not going to be held unconstitutional became Mr. BROOKS or Mr. CONYERS or Mr. Kurland thinks it is. There are many others equally distinguished scholars who disagree. There is as much opinion on one side as there is on the other side. We all have taken our own oaths to uphold the Constitution as we understand and that is what we will do. But it is surprising to hear some of our colleagues assure us with certainty from on high the positive unconstitutionality of this bill. That is nonsense.

The fact of the matter is that in the 40 or 50 years in which congressional vetoes, one-House vetoes, have been in existence, there has never been a court case which says it is an unconstitutional exercise of power.

In fact, I think the truth of the matter is, Mr. Chairman, if anything, this Congress has been far too liberal or even sloppy in delegating authority without reserving the opportunity of exercising a congressional veto and being responsible for our actions which we have delegated.

In this legislation it is this Congress which is mandating the President of the United States, with certain strictures, to reorganize the executive branch of Government, and then he will have to get those plans passed in each House of the Congress, because either House of the Congress can veto any plan. This is substantial reservation of congressional power.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. I thank the gentleman for yielding.

Mr. Chairman, it seems to me passing strange that those who argue that the Congress ought to be retaining its authority, jealously guarding its authority, do not come before this Congress and ask us to pass legislation that would prohibit the departments and agencies from writing laws. That is what has been going on, and that is what is now going on. The law of the land is being written by departments and agenices under the law granted by the Congress to those departments and agencies. I would like to retain that process through the veto process, just as we are doing here. I think we are being wholly consistent in this position, whereas those who oppose this granting of authority to the President are not consistent unless they should also say we should not grant the departments and agencies the power to write rules and regulations.

Mr. LEVITAS. The gentleman is correct and his perception of the issue is of great benefit to all of us. If we want to

be consistent in retaining congressional control and congressional authority, this is the legislation which will do it.

But there is a more important reason, from a realistic point of view. The fact of the matter is, we will not get reorganization unless we adopt this procedure, because the coalition of special interest groups, who are going to gang up and oppose specific plans of reorganization, are going to thwart all reorganization unless we go the veto route.

Everybody is in favor of reorganization. I have not heard anybody speak against reorganization, but they are in favor of reorganization in the abstract until it comes to something they do not want to see reorganized. Every single special interest group in America will be able to team up, form a coalition, and trade their vote and thwart any effort. If we stop for a moment and think how long it has taken us to adopt any reorganization in Government under present procedures, we will adopt this procedure if we want to get the job done.

This is vital legislation if we are to carry out reorganization. It is a commitment made by the President of the United States in this campaign recently past, and I think we have to give him this authority, with congressional veto control, if this commitment is to be fulfilled.

This vote will be a crucial vote, and it will be one to determine whether or not we are just giving lip service to reorganization or whether we are seriously dedicated to the proposition of reorganization.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, do I understand correctly that the reason for adopting this kind of approach—if I understand the gentleman's statement correctly, and I hope I do—is that this House cannot stand up to the pressures from the outside or from special interests, and that we have to run roughshod over the Constitution simply because we fear that this House cannot stand up to the special interests groups?

Mr. LEVITAS. Mr. Chairman, while I am not a longtime veteran of this institution, it is my experience that when we get certain organized groups one at a time, such as school teachers, doctors, labor veterans, lawyers, environmentalists, educators, bankers, and all these other groups who come here one at a time, they are hard enough for us to deal with one at a time, but when we put them all together, we are not going to get anything done. That is why we need this legislation.

Mr. GARY A. MYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I find myself on probably one of those rare occasions when I am pretty much in agreement with the gentleman from Massachusetts in that I was hopeful that the Walker substitute would have included some of the committee's contributions to this legislation.

I strongly believe that the House should retain for itself the opportunity to vote positively for reorganization plans.

The impact of reorganization can have benefits, and it can also have undesirable effects on the broad objectives of our legislation. I think it is important to consider that today we have the opportunity either to retain or to essentially surrender some of that power.

It seems to me that because of the fact that the Walker substitute is not perfected as some of us would like to have it, perhaps the best route, if we could muster enough support, would be to recommit this bill to the committee so that a substitute which would encompass the two-House action as well as the good work that the committee has done in requiring the President to provide certain information in the broader text of the bill could be offered.

So I do find myself in a dilemma. I intend to support the Walker amendment, but I do hope that the gentleman will offer a motion to recommit and speak to our colleagues about its need. Because of the long-term impact this bill would have, I think this would be one of the rare occasions when we should in fact recommit a bill for good reason and then bring it back out on the floor for a more comprehensive substitute.

The CHAIRMAN. The question is on the amendment in the nature of a substitute offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 87, noes 329, not voting 16, as follows:

[Roll No. 106]

NOT VOTING—16

Alexander	Florio	Symms
Andrews, N.C.	Mikva	Teague
Bowen	Milford	Waggonner
Clay	Poage	Wilson, Tex.
Dornan	Roe	
Edwards, Ala.	Staggers	

Messrs. MOSS, YATES, GOLDWATER, JOHN L. BURTON, ABDNOR, and WAMPLER changed their vote from "nay" to "yea."

Messrs. MOLLOHAN and MOAKLEY changed their vote from "yea" to "nay."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. GARY A. MYERS

Mr. GARY A. MYERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARY A. MYERS: Section 903, subsection (b) is amended by adding immediately after the period on line 3, page 6, the following: "The message shall also estimate (so far as is practicable) the impact of a reorganization plan on local and regional economies and employment when the plan provides for the transfer of Federal Government facilities or employees from one location to another."

Mr. GARY A. MYERS. Mr. Chairman, the intent of this amendment is simply to require that along with the President's message on any reorganization package that he supply to the Congress the impact on a local and regional basis that the reorganization will have upon employment and the economic situation in those areas.

It is my hope that the reorganization will not cause great disruption in the regions; but I do think we ought to know and have an evaluation. If, in fact, they do. We should be able to measure them.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. GARY A. MYERS).

The amendment was rejected.

Mr. HARRIS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have a question for the chairman of the committee concerning the extent of the President's authority under section 904(2) as amended by the bill. The particular language in question appears on line 25, page 6, through line 1 of page 7, and provides that the plan "may provide for the appointment and pay of the head and one or more officers of an agency."

Mr. Chairman, my concern is that this language could be construed to authorize the President to create by reorganization plan any number of new positions which are established without regard to the provisions of title V relating to the classification and pay for civil service positions.

I have reviewed the legislative history. I know why the language appears the way it does; but I would like to ask my colleague if the gentleman understands that the only reason for this language is to make sure that we have included the District of Columbia and other regions and that this is in no way to give carte blanche authority to create as many supergrade positions as may be necessary under the reorganization.

Mr. BROOKS. Mr. Chairman, if the gentleman will yield, I would say to my distinguished friend, the gentleman from Virginia (Mr. HARRIS), that it is my understanding of the legislation that the provision the gentleman refers to is not intended to make any end run around the civil service laws. It has been in the law since 1949 and does not appear to have done any more than give the President certain limited flexibility in carrying out a reorganization plan once it has been approved by the Congress.

It is certainly not my intention, nor that of the Government Operations Committee to expand that provision in any way.

Mr. HARRIS. I thank the gentleman.

AMENDMENTS OFFERED BY MR. BROWN OF MICHIGAN

Mr. BROWN of Michigan. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. BROWN of Michigan: On page 2, immediately before line 2, insert the following:

"913. Provision with respect to judicial review"

Page 15, at the end of line 25, strike out the close quotation mark and the period immediately thereafter, and immediately after such line insert the following:

"§ 913. Provision with respect to judicial review

"If, in any civil action or other judicial proceeding brought with respect to a reorganization plan submitted pursuant to the provisions of this chapter, the court determines that this chapter or any provision thereof is unconstitutional, the relief granted by such court shall be restricted to relief, with respect to such plan and shall not affect the validity of plans previously adopted. This section does not create a cause of action or authorize any action or other proceeding to obtain judicial review of this chapter, or any provision thereof, or of any plan submitted thereunder.".

Mr. BROWN of Michigan. Mr. Chairman, technically I suppose these are two amendments, so I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. Yes, certainly I yield.

Mr. HORTON. Mr. Chairman, this is a matter that I think can be accepted, but it is not necessary. The amendment the gentleman is offering seeks to limit the scope of a judicial declaration of unconstitutionality. I support the goals which the gentleman's amendment seeks to accomplish. A Federal court would probably rule in this manner without the amendment, but its adoption will insure such a ruling.

Mr. BROWN of Michigan. I thank the gentleman for his comments. I trust that I will get the same response from the other side of the aisle.

Miss JORDAN. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentlewoman from Texas.

Miss JORDAN. This side cannot accept the gentleman's amendment, and if we are pressed, we will tell him why it is woefully defective.

Mr. BROWN of Michigan. I would be glad to have the gentlewoman tell me why it is woefully defective. I think there was a consensus in the committee that to the extent this bill poses a constitutional problem, we felt that if there had not been congressional objection raised to any plan previously adopted under the legislation, that we wanted the court to interpret the congressional intent as being an intent that plans that were already adopted, in existence and implemented, should not be affected by a decision, holding this legislation unconstitutional because of the one-House veto provision.

That is why the language says that the judicial decisions shall relate and be restricted to the plan before the court, and shall not affect the validity of others previously adopted. Of course, we know that we cannot determine the court's decision, but to the extent that we can indicate the congressional intent, which I thought was the unanimous position of the committee, we ought to do it.

I am not attempting to preempt or in any way infringe upon the right of the court to decide the constitutionality of previous plans, but I am saying that to the extent we can indicate a congressional intent, we would like to have those plans which have been already adopted and implemented, not have their validity challenged by a subsequent decision of unconstitutionality on the basic enabling statute.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Michigan. I yield to the gentleman from New York.

Mr. HORTON. As I understand it, the amendment which was read referred to page 15, at the end of line 25. It should refer to page 16, at the end of line 3.

I think if the gentleman would offer an amendment to change that, it would then be in proper order with regard to the matter before us.

Mr. BROWN of Michigan. If the gentleman is correct, I would be happy to accept his amendment. Legislative counsel prepared the amendment. I presume they have made the right references. I have not had time to check the references.

The CHAIRMAN. Is there objection to the modification of the amendment?

There was no objection.

Mr. BROWN of Michigan. Mr. Chairman, I will be glad to yield to the gentlewoman from Texas (Miss JORDAN).

Miss JORDAN. Mr. Chairman, I will oppose the amendment on my own time.

Mr. BROWN of Michigan. Mr. Chairman, I yield back the balance of my time.

Miss JORDAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment because, in the first place, it is unnecessary and it is unworkable. If I understand this amendment correctly, this amendment purports to limit the Court's authority to that single reorganization plan and no further. I know the gentleman stated that it was not his intent to try to restrict the judicial review discretion which the Court would have. But, in effect, to say that only this single instance which has been in controversy would be subjected to the Court's decision, is to in fact restrict the Court's discretion in moving on the judicial review or the justiciability of what has been proposed in the reorganization plan.

I appreciate the objectives of the gentleman who offers the amendment. But I do not believe he has given us an actionable remedy. It is not for the Congress to attempt to restrict the Court's discretion in determining the extent to which it applies its decision on constitutional issues. We had that experience with Court decisions in the past, and we know that the Court does exercise wise, judicious, reasonable, and sensible approaches in the decisions it makes.

We have had recent decisions wherein the Court said the Congress in some instances acted unconstitutionally and did not create an administrative morass about the decision of the acts lack of constitutionality, but instead gave the Congress time to remedy whatever it had done which was in the Court's view unconstitutional.

The Court has shown great judicial temperament in the past in restraining its own desire to move into areas which are not immediately before it.

It is not for us, Mr. Chairman, to say to the Court, in regard to the matter of constitutionality, that, "If you are going to find this particular instance unconstitutional, we are going to limit the effect of what you will find." We are, in effect, then saying: "Justices of the Court, we do not trust you to be able to provide a reasonable and rational solution to the unconstitutional problem that is before you, but we think you might throw us into great administrative chaos and, therefore, we are going to say to you, Mr. Justices, to limit the discretion to a single plan only."

I think that is inappropriate.

Mr. BROWN of Michigan. Mr. Chairman, will the gentlewoman yield?

Miss JORDAN. I yield to the gentleman from Michigan (Mr. BROWN).

Mr. BROWN of Michigan. I thank the gentlewoman for yielding.

The gentlewoman indicated, and I am sure she did not intend to, that legislative bodies have never dictated to the courts as to what they expected to be the interpretation. The gentlewoman, I am sure, is familiar with severability clauses where legislative bodies have said if any portion of a particular bill is unconstitutional, it shall not affect the constitutionality of other provisions. She is well aware of paragraphs dealing with congressional intent, which are attempts to, in effect, say what the congressional intent was if there is a court ruling saying such-and-such.

I think the gentlewoman's basic objection is valid, that is, that the amendment is probably unnecessary. I cannot argue that point with her, because the court has very sensibly in most cases applied the doctrine of nonretroactivity, and she is well aware of that.

The court in this case would probably apply the doctrine of nonretroactivity, as it did to the Federal Elections Commission case. However, I am saying that it does not hurt to put this language in, and to the extent that congressional intent is set forth in the bill, it amounts to an effective addition that I think is neither unnecessary, nor undesirable; I think it is desirable.

Miss JORDAN. Mr. Chairman, if I may recapture my time, I recognize that there is nothing untoward in an expression of legislative intent by the Congress, but this is more than that.

This bill itself expresses the legislative intent of the Congress, which is to give the President ample reorganization authority so that he can present logical, reasonable, and sensible plans to the Congress for the reorganization of the executive branch of the Government. There is no question about what we intend to do in this legislation.

The CHAIRMAN. The time of the gentlewoman from Texas (Ms. JORDAN) has expired.

(On request of Mr. BROWN of Michigan and by unanimous consent, Ms. JORDAN was allowed to proceed for 2 additional minutes.)

Miss JORDAN. Mr. Chairman, there is also no question whatsoever that we intend that a single house of the Congress would have the authority at any given time to vote to disapprove a single plan of the President. That intent is clear.

But what we would be doing in this unnecessary, unwarranted, unworkable step would be dictating to the court and saying, "Yes, this is what we want to do, but if you find one bit of what we have done to be unconstitutional, we want you to limit your discretion to that part and not go further into the act."

Mr. Chairman, I say that would be an unnecessary, untoward intrusion into the discretion of the court.

Mr. BROWN of Michigan. Mr. Chairman, will the gentlewoman yield?

Miss JORDAN. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, the issue that has been raised by this legislation and has been much discussed, is the constitutionality of the one-house veto. We have nevertheless in this legislation adopted the concept of a one-House veto. We are doing that, fully cognizant of the fact that it may be held unconstitutional.

Now, the language that I have in my amendment basically goes to that issue. There is nothing wrong with putting in language that which the court may find is unconstitutional. It may hold my amendment unconstitutional; it may hold the severability clause unconstitutional. But there is no difference, and it is no more unworkable than putting in a one-House veto. I think there is no justification for saying it is unworkable. It is a sense-of-the-Congress provision. Do we not agree with that?

Let me ask the gentlewoman this: Do we not agree that if the court holds that the one-House veto makes the legislation invalid, we still want left in place the other plans that have been adopted by the Congress where there has been no objection, that we want them to remain in effect? Would the gentlewoman give me a yes or no answer?

Miss JORDAN. Mr. Chairman, it is not my judgment in this instance that I would be reluctant to trust the justices of the court to decide the issues and do what is reasonable and sensible and logical.

The CHAIRMAN. The time of the gentlewoman from Texas (Miss JORDAN) has again expired.

Mr. BROWN of Michigan. Mr. Chairman, I ask unanimous consent that the gentlewoman from Texas (Miss JORDAN) may be permitted to proceed for 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

Mr. CARNEY. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. JOHN L. BURTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, let us read the amendment. The amendment says as follows:

> If, in any civil action or other judicial proceeding brought with respect to a reorganization plan submitted pursuant to the provisions of this chapter, the court determines that this chapter or any provision thereof is unconstitutional, the relief granted by such court shall be restricted to relief with respect to such plan.

So that means that if we have approved 27 reorganization plans, the word, "unconstitutional," means if the court makes a determination with regard to plan A, his ruling only goes to plan A and there would have to be 26 more suits on the other plans. That does not make any sense.

The basic constitutional issue will be on the one-House veto, and if it is unconstitutional in plan A, it is unconstitutional in plans B, C, D, and all the way up to Z.

This amendment would require, notwithstanding the court's finding, that the one-House veto is unconstitutional only as it applies to energy, and we would have to have a new suit on banking and housing, and we would have to have a new suit on plan X and a new suit on plan Y.

It does not make any sense.

The gentleman at the table nods. There is only one thing at issue in this reorganization plan and that is the one-House veto. They are not going to find the "whereas" clause unconstitutional.

Mr. Chairman, what this would do would be to create a myriad of litigation clogging the Federal courts, busting the budget of the Department of Justice, and not resolving the problem.

Therefore, Mr. Chairman, I ask for a "no" vote.

Mr. HAGEDORN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, while I am not fully in agreement with those who endorse the constitutionality of H.R. 5045, I am pleased that the distinguished gentleman from Michigan (Mr. BROWN) is offering this amendment. It is about time that this body began to give greater consideration to its powers under article III of the Constitution to limit and modify the authority of the Federal courts, including the appellate jurisdiction of the Supreme Court. While the amendment, as I understand it, would not limit the Supreme Court's ability to review the constitutionality of an individual reorganization plan, it would sharply limit its authority in fashioning relief where a plan is found to be unconstitutional. The Court would not be permitted to apply its determination to any reorganization plan other that that specifically before it.

While there are those who are undoubtedly concerned about the constitutionality of this amendment itself, there is a great deal of precedent for a congressionally approved limitation of this sort. It is essentially a neutral restriction upon the Court, not interfering in any way with its ability to hear cases or to dispose of them effectively. It simply tells the Court that it is not going to be able to use an individual case as justification for handing down an order which ranges far beyond that case, and begins, arguably, to interfere with the prerogatives of this body. If interested parties wish to challenge previous or subsequent reorganization proposals, they are free to do that, but they cannot expect these proposals to be stricken down in the course of unrelated proceedings. There is no question that a result will be increased litigation, but I believe that this is preferable to perpetuating the notion that the courts have a roving commission to strike down laws on their own initiative whenever they consider it proper.

I would like to suggest that Congress has substantially greater authority to restrict the jurisdiction of the courts than is evidenced by this amendment, although the authority given Congress to do this is itself limited. I would agree with advocates of a strong judiciary that the language in article III, section 2 does not invest in Congress potential authority to deny to the Court, in its entirety, jurisdiction given them by the same article. But, I do not believe, on the other hand, that the Court should be able to defend its assumption of jurisdiction simply by incanting that they are "interpreting the Constitution." No one contends that the Court should be deprived of its authority in defining the bounds of the Constitution, but simply that Congress ought to also fulfill its proper constitutional role in determining what are and what are not genuine constitutional issues. Simply because the Court says that it is defining the constitution does not necessarily mean that it is doing this. While Congress may not always have the final word in this matter, it certainly has the right to offer its input. At the very least, the more active exercise by Congress of its apparent authority under article III would require the Court to more clearly justify the grounds on which they find that a controversy is of a constitutional magnitude.

Mr. BROWN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. HAGEDORN. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Chairman, I think the gentleman from California (Mr. JOHN L. BURTON) must not have read the cases dealing with the doctrine of nonretroactivity which the court regularly applies.

The court did not set aside or did not make retroactive its decision with respect to the Federal Elections Commission and all the regulations it had adopted when it determined that that Commission was unconstitutionally constituted.

Mr. Chairman, the court automatically applied that which my amendment calls for. All that my amendment does is say that we would like to have the court apply the doctrine of nonretroactivity if it determines that the one-House veto is unconstitutional.

All I would do is ask the gentleman, Is that not the intent?

Mr. JOHN L. BURTON. No, it is not, obviously.

Mr. BROWN of Michigan. Mr. Chairman, I do not yield to the gentleman from California at this point.

Mr. JOHN L. BURTON. Mr. Chairman, would the gentleman allow me to answer the question?

Mr. BROWN of Michigan. No, not until I have asked it. Then the gentleman can answer it.

Mr. Chairman, I would like to know. Is it not the intent and would not everyone in this House agree that we want plans already adopted, to which there have been no objections, to be unaffected by a court decision? Where the procedure is clear and no objection is raised, the court could presume congressional approval under my amendment, thereby nullifying the significance of the one-House veto provision with respect to previously adopted plans.

Would not the gentleman from California (Mr. JOHN L. BURTON) want such reorganization plans to remain in effect?

The court can very well do it under its doctrine of nonretroactivity. All that the amendment does is to say that we want the court to apply the doctrine of nonretroactivity to the extent that Congress can indicate its intent in that regard.

Is there anyone who does not want these plans to remain in effect?

Mr. JOHN L. BURTON. Mr. Chairman, if the gentleman will yield, I do not find the term "doctrine of nonretroactivity" in the amendment.

I do find that they can find if the one-House veto is unconstitutional in the instance of the first plan and there were 26 plans similarly adopted, they all have to be brought up.

Mr. BROWN of Michigan. No. Such a decision need not affect the plans previously adopted and the court could so state. It is the doctrine of nonretroactivity.

Mr. JOHN L. BURTON. Nevertheless, the plan that will be before the court will be a previously adopted plan because there will be no cause of action for somebody to bring until a plan is adopted and implemented in a manner which some may think to be an unconstitutional manner.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Michigan (Mr. BROWN), as modified.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. BROWN of Michigan. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendments, as modified, were rejected.

The CHAIRMAN. There being no further amendments, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HANLEY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5045) to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes, pursuant to House Resolution 441, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. WALKER. I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WALKER moves to recommit the bill H.R. 5045 to the Committee on Government Operations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. HORTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic de-

vice and there were—yeas 395, nays 22, not voting 15, as follows:

[Roll No. 107]

NOT VOTING—15

Alexander	Dornan	Roe
Bowen	Edwards, Ala.	Staggers
Brademas	Florio	Symms
Clay	Milford	Teague
Coleman	Poage	Wilson, Tex.

The Clerk announced the following pairs:

Mr. Florio with Mr. Charles Wilson of Texas.

Mr. Clay with Mr. Brademas.

Mr. Milford with Mr. Dornan.

Mr. Staggers with Mr. Alexander.

Mr. Teague with Mr. Roe.

Mr. Bowen with Mr. Symms.

Mr. Pressler with Mr. Coleman.

Mr. PRESSLER changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER. Pursuant to the provisions of House Resolution 441, the Committee on Government Operations is discharged from the further consideration of the Senate bill (S. 626) to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. BROOKS

Mr. BROOKS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BROOKS moves to strike out all after the enacting clause of Senate bill S. 626 and insert in lieu thereof the provisions of the bill (H.R. 5045), as passed, as follows: That this Act may be cited as the "Reorganization Act of 1977".

SEC. 2. Chapter 9 of title 5, United States Code, is amended to read as follows:

"Chapter 9.—EXECUTIVE REORGANIZATION

"Sec.

"901. Purpose.
"902. Definitions.
"903. Reorganization plans.
"904. Additional contents of reorganization plans.
"905. Limitations on powers.
"906. Effective date and publication of reorganization plans.
"907. Effect on other laws, pending legal proceedings, and unexpended appropriations.
"908. Rules of Senate and House of Representatives on reorganization plans.
"909. Terms of resolution.
"910. Introduction and reference of resolution.
"911. Discharge of committee considering resolution.
"912. Procedure after report or discharge of committee; debate; vote on final disapproval.

"§ 901. Purpose

"(a) The Congress declares that it is the policy of the United States—

"(1) to promote the better execution of the laws, the more effective management of the executive branch and of its agencies and functions, and the expeditious administration of the public business;

"(2) to reduce expenditures and promote economy to the fullest extent consistent with the efficient operation of the Government;

"(3) to increase the efficiency of the operations of the Government to the fullest extent practicable;

"(4) to group, coordinate, and consolidate agencies and functions of the Government, as nearly as may be, according to major purposes;

"(5) to reduce the number of agencies by consolidating those having similar functions under a single head, and to abolish such agencies or functions thereof as may not be necessary for the efficient conduct of the Government; and

"(6) to eliminate overlapping and duplication of effort.

"(b) Congress declares that the public interest demands the carrying out of the purposes of subsection (a) of this section and that the purposes may be accomplished in great measure by proceeding under this chapter, and can be accomplished more speedily thereby than by the enactment of specific legislation.

"(c) It is the intent of Congress that the President should provide appropriate means for broad citizen advice and participation in restructuring and reorganizing the executive branch.

"(d) The President shall from time to time examine the organization of all agencies and shall determine what changes in such organization are necessary to carry out any policy set forth in subsection (a) of this section.

"§ 902. Definitions

"For the purpose of this chapter—

"(1) 'agency' means—

"(A) an Executive agency or part thereof; and

"(B) an office or officer in the executive branch;

but does not include the General Accounting Office or the Comptroller General of the United States;

"(2) 'reorganization' means a transfer, consolidation, coordination, authorization, or abolition, referred to in section 903 of this title; and

"(3) 'officer' is not limited by section 2104 of this title.

"§ 903. Reorganization plans

"(a) Whenever the President, after in-

vestigation, finds that changes in the organization of agencies are necessary to carry out any policy set forth in section 901(a) of this title, he shall prepare a reorganization plan specifying the reorganizations he finds are necessary. Any plan may provide for—

"(1) the transfer of the whole or a part of an agency, or of the whole or a part of the functions thereof, to the jurisdiction and control of another agency;

"(2) the abolition of all or a part of the functions of an agency, except that no enforcement function or statutory program shall be abolished by the plan;

"(3) the consolidation or coordination of the whole or a part of an agency, or of the whole or a part of the functions thereof, with the whole or a part of another agency or the functions thereof;

"(4) the consolidation or coordination of a part of an agency or the functions thereof with another part of the same agency or the functions thereof;

"(5) the authorization of an officer to delegate any of his functions; or

"(6) the abolition of the whole or a part of an agency which agency or part does not have, or on the taking effect of the reorganization plan will not have, any functions.

The President shall transmit the plan (bearing an identification number) to the Congress together with a declaration that, with respect to each reorganization included in the plan, he has found that the reorganization is necessary to carry out any policy set forth in section 901(a) of this title.

"(b) The President shall have a reorganization plan delivered to both Houses on the same day and to each House while it is in session, except that no more than three plans may be pending before the Congress at one time. In his message transmitting a reorganization plan, the President shall specify with respect to each abolition of a function included in the plan the statutory authority for the exercise of the function. The message shall also estimate any reduction or increase in expenditures (itemized so far as practicable), and describe any improvements in management, delivery of Federal services, execution of the laws, and increases in efficiency of Government operations, which it is expected will be realized as a result of the reorganizations included in the plan.

"(c) Any time during the period of thirty calendar days of continuous session of Congress after the date on which the plan is transmitted to it, but before any resolution described in section 909 has been ordered reported in either House, the President may make amendments or modifications to the plan, consistent with sections 903–905 of this title, which modifications or revisions shall thereafter be treated as a part of the reorganization plan originally transmitted and shall not affect in any way the time limits otherwise provided for in this chapter. The President may withdraw the plan any time prior to the conclusion of sixty calendar days of continuous session of Congress following the date on which the plan is submitted to Congress.

"§ 904. Additional contents of reorganization plan

"A reorganization plan transmitted by the President under section 903 of this title—

"(1) may change, in such cases as the President considers necessary, the name of an agency affected by a reorganization and the title of its head, and shall designate the name of an agency resulting from a reorganization and the title of its head;

"(2) may provide for the appointment and pay of the head and one or more officers of any agency (including an agency resulting from a consolidation or other type of reorganization) if the President finds, and in his message transmitting the plan declares, that by reason of a reorganization made by the plan the provisions are necessary.

"(3) shall provide for the transfer or other disposition of the records, property, and personnel affected by a reorganization;

"(4) shall provide for the transfer of such unexpended balances of appropriations, and of other funds, available for use in connection with a function or agency affected by a reorganization, as the President considers necessary by reason of the reorganization for use in connection with the functions affected by the reorganization, or for the use of the agency which shall have the functions after the reorganization plan is effective; and

"(5) shall provide for terminating the affairs of an agency abolished.

A reorganization plan transmitted by the President containing provisions authorized by paragraph (2) of this section may provide that the head of an agency be an individual or a commission or board with more than one member. In the case of an appointment of the head of such an agency, the term of office may not be fixed at more than four years, the pay may not be at a rate in excess of that found by the President to be applicable to comparable officers in the executive branch, and if the appointment is not a position in the competitive service, it shall be by the President, by and with the advice and consent of the Senate. Any reorganization plan transmitted by the President containing provisions required by paragraph (4) of this section shall provide for the transfer of unexpended balances only if such balances are used for the purposes for which the appropriation was originally made.

"§ 905. Limitations on powers

"(a) A reorganization plan may not provide for, and a reorganization under this chapter may not have the effect of—

"(1) creating a new executive department, abolishing or transferring an executive department or independent regulatory agency, or all the functions thereof, or consolidating two or more executive departments or two or more independent regulatory agencies, or all the functions thereof;

"(2) continuing an agency beyond the period authorized by law for its existence or beyond the time when it would have terminated if the reorganization had not been made;

"(3) continuing a function beyond the period authorized by law for its exercise or beyond the time when it would have terminated if the reorganization had not been made;

"(4) authorizing an agency to exercise a function which is not expressly authorized by law at the time the plan is transmitted to Congress;

"(5) increasing the term of an office beyond that provided by law for the office; or

"(6) dealing with more than one logically consistent subject matter.

"(b) A provision contained in a reorganization plan may take effect only if the plan is transmitted to Congress within three years of the date of enactment of the Reorganization Act of 1977.

"§ 906. Effective date and publication of reorganization plans

"(a) Except as otherwise provided under subsection (c) of this section, a reorganization plan is effective at the end of the first period of sixty calendar days of continuous session of Congress after the date on which the plan is transmitted to it unless, between the date of transmittal and the end of the sixty-day period, either House passes a resolution stating in substance that the House does not favor the reorganization plan.

"(b) For the purpose of this chapter—

"(1) continuity of session is broken only by an adjournment of Congress sine die; and

"(2) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of any period of time in which Congress is in continuous session.

"(c) Under provisions contained in a reorganization plan, any provision thereof may be effective at a time later than the date on which the plan otherwise is effective or, if both Houses of Congress have defeated a resolution of disapproval, may be effective at a time earlier than the expiration of the sixty-day period required by subsection (a).

"(d) A reorganization plan which is effective shall be printed (1) in the Statutes at Large in the same volume as the public laws and (2) in the Federal Register.

"§ 907. Effect on other laws, pending legal proceedings, and unexpended appropriations

"(a) A statute enacted, and a regulation or other action made, prescribed, issued, granted, or performed in respect of or by an agency or function affected by a reorganization under this chapter, before the effective date of the reorganization, has, except to the extent rescinded, modified, superseded, or made inapplicable by or under authority of law or by the abolition of a function, the same effect as if the reorganization had not been made. However, if the statute, regulation, or other action has vested the functions in the agency from which it is removed under the reorganization plan, the function, insofar as it is to be exercised after the plan becomes effective, shall be deemed as vested in the agency under which the function is placed by the plan.

"(b) For the purpose of subsection (a) of this section, 'regulation or other action' means a regulation, rule, order, policy, determination, directive, authorization, permit, privilege, requirement, designation, or other action.

"(c) A suit, action, or other proceeding lawfully commenced by or against the head of an agency or other officer of the United States, in his official capacity or in relation to the discharge of his official duties, does not abate by reason of the taking effect of a reorganization plan under this chapter. On motion or supplemental petition led at any time within twelve months after the reorganization plan takes effect, showing a necessity for a survival of the suit, action, or other proceeding to obtain a settlement of the questions involved, the court may allow the suit, action, or other proceeding to be maintained by or against the successor of the head or officer under the reorganization effected by the plan or, if there is no successor, against such agency or officer as the President designates.

"(d) The appropriations or portions of appropriations unexpended by reason of the operation of the chapter may not be used for any purpose, but shall revert to the Treasury.

"§ 908. Rules of Senate and House of Representatives on reorganization plans

"Sections 909 through 912 of this title are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described by section 909 of this title; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"§ 909. Terms of resolution

"For the purpose of sections 908 through 912 of this title, 'resolution' means only a resolution of either House of Congress, the matter after the resolving clause of which is as follows: 'That the does not favor the reorganization plan numbered trans-

mitted to the Congress by the President on , 19 .', and includes such modifications and revisions as are submitted by the President under section 903(d)(c) of this chapter. The blank spaces therein are to be filled appropriately. The term does not include a resolution which specifies more than one reorganization plan.

"§ 910. Introduction and reference of resolution

"(a) No later than the first day of session following the day on which a reorganization plan is transmitted to the House of Representatives and the Senate under section 903, a resolution, as defined in section 909, shall be introduced (by request) in the House by the chairman of the Government Operations Committee of the House, or by a Member or Members of the House designated by such chairman; and shall be introduced (by request) in the Senate by the chairman of the Governmental Affairs Committee of the Senate, or by a Member or Members of the Senate designated by such chairman.

"(b) A resolution with respect to a reorganization plan shall be referred to the Committee on Governmental Affairs of the Senate and the Committee on Government Operations of the House (and all resolutions with respect to the same plan shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be. The committee shall make its recommendations to the House of Representatives or the Senate, respectively, within 45 calendar days of continuous session of Congress following the date of such resolution's introduction.

"§ 911. Discharge of committee considering resolution

"If the committee to which is referred a resolution introduced pursuant to subsection (a) of section 910 (or, in the absence of such a resolution the first resolution introduced with respect to the same reorganization plan) has not reported such resolution or identical resolution at the end of 45 calendar days of continuous session of Congress after its introduction, such committee shall be deemed to be discharged from further consideration of such resolution and such resolution shall be placed on the appropriate calendar of the House involved.

"§ 912. Procedure after report or discharge of committee; debate; vote on final disapproval

"(a) When the committee has reported, or has been deemed to be discharged (under section 911) from further consideration of, a resolution with respect to a reorganization plan, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) for any Member of the respective House to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. The motion shall not be subject to amendment, or to a motion to postpone, or a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the resolution is agreed to, the resolution shall remain the unfinished business of the respective House until disposed of.

"(b) Debate on the resolution, and on all debatable motions and appeals in connection therewith, shall be limited to not more than ten hours, which shall be divided equally between individuals favoring and individuals opposing the resolution. A motion further to limit debate is in order and not debatable. An amendment to, or a motion to postpone, or a motion to proceed to the consideration of other business, or a motion to recommit the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed to shall not be in order.

"(c) Immediately following the conclusion of the debate on the resolution with respect to a reorganization plan, and a single quorum call at the conclusion of the debate if requested in accordance with the rules of the appropriate House, the vote on final approval of the resolution shall occur.

"(d) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to a reorganization plan shall be decided without debate.".

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. BROOKS).

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 5045) was laid on the table.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. ROSTENKOWSKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ROSTENKOWSKI. Mr. Speaker, at the conclusion of the special orders today, this will conclude the schedule for this afternoon. I have cleared this with the minority leader.

It is the intention of the leadership to ask that when the House adjourn this evening, that it reconvene tomorrow at noon, and that the first order of business will be reconstituting the Assassinations Committee. We will proceed into the schedule tomorrow, and adjourn at 5:30 p.m.

Mr. Speaker, I ask unanimous consent that when the House adjourn this evening, it adjourn to meet at noon tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, at the beginning of this year the Democratic Caucus, in response to recommendations of the Commission on Administrative Review, set a starting time of 3 o'clock on Wednesday. As a result of that established time, Members have scheduled and arranged their own personal schedules so that they would take advantage of this later starting time.

I am not going to object, because I understand the need for tomorrow, but I would hope that the leadership of this House would, having once established a schedule, attempt in its own best way to stick to it in so far as possible.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. LEVITAS. Mr. Speaker, reserving the right to object, I would like to join with the comments made by the gentleman from Minnesota. It seems to me that in order for the Members of this House to make plans, make decisions, we have to do it in reliance upon the program which was announced and formulated by the leadership.

I clearly recall at the beginning of this session that there was going to be a 3 p.m. starting time on Wednesdays, and that in the absence of some national emergency or other crisis, we were going to adhere to that. Many of us have scheduled programs for the first 3 months of this year. If it is not going to be the practice of this House to do that, then we would like to know that.

The SPEAKER. The Chair is aware of the situation. Does the gentleman object to the request?

Mr. LEVITAS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to announce that at the conclusion of the workweek, when we set up the program, we will ask that on Wednesday next we meet at 12 o'clock.

The Chair does appreciate the fact that earlier in the year he played a strong part in setting the schedule. But, the gentleman from the minority side is right and the gentleman from the majority side is also correct. The House faces unusual circumstances tomorrow, and the Chair takes the responsibility upon himself. He regrets that it has caused any inconvenience to the Members.

BIPARTISAN EFFORT SHOULD BE MADE TO IMPROVE ADMINISTRATION'S ATTITUDE TOWARD WHEAT PRODUCERS

(Mr. SEBELIUS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. SEBELIUS. Mr. Speaker, this morning I received several telephone calls from various farm wife organizations in Kansas. These ladies called to let me know the price of wheat at some of our country elevators in Kansas fell below $2 yesterday. This most recent drop in the wheat market price accelerates a decline that has seen the price fall more than 50 percent during the past 2 years to levels well below the cost of production.

Farmers in the High Plains are in the midst of a real financial crisis. It is now compounded by dry weather, high winds, and blowing dust. We are facing an agritragedy in wheat country, and if we do not get some form of assistance within

weeks, we stand to lose a generation of farmers.

It has been my belief that immediate action should be taken on several emergency proposals to stimulate the farmer's cash flow. Then we could proceed with deliberation in writing a good farm bill. I know the administration is familiar with this problem. Our former colleague and Secretary of Agriculture, the Honorable Bob Bergland, has had opportunity to discuss in full the situation with these same farm wives, various farm organizations, and individual farmers. It is my understanding President Carter had lunch with individual farmers just last week.

I had hopes the administration's farm policy recommendations would, at least in part, answer our needs.

However, the word that best describes my reaction to this proposed policy is disbelief. I am shocked that there is little in this program that provides any kind of assistance in regard to our short-term crisis or over the long-term as well.

Mr. Speaker, today in behalf of my wheat farmers, I sent every Member of this body a loaf of bread. I would like to point out the cost of wrapping a loaf of bread today is more than the farmer receives for the value of his wheat. That value is less than 3 cents and that return will simply now allow the wheat farmer to stay in business.

You will note that today I am also wearing an empty bread wrapper as an arm band in mourning for the wheat farmer until a bipartisan effort can be made to improve the administration's attitude toward the wheat producer. My point is this: If conditions do not improve throughout the High Plains, our surplus problems may be answered permanently. There may be a lot more bread wrappers than there are loaves of bread.

THE ADMINISTRATION REVIEW OF VIETNAM-ERA DISCHARGES

(Mr. HAMMERSCHMIDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HAMMERSCHMIDT. Mr. Speaker, I would like to express my deep disappointment in learning of the program just announced by the administration for the review of Vietnam-era discharges. It seems to me that, after toying with the dignity of our veterans throughout his campaign, President Carter has finally opened Pandora's box.

This program, as proposed, is one of the most confusing, arbitrary, and unbalanced Executive announcements I have ever been exposed to. It creates a multitude of new inconsistencies that can only be remedied by further grants of discharge reviews. It makes illusory distinctions for unknown reasons. It is both shocking and confusing.

For instance, although the discharge upgrading is supposedly designed to heal the political wounds of the Vietnam era, it has little to do with political dissenters. The focus of the discharge review is on "bad papers" issued after supposed administrative shortcomings, and speaks almost totally in terms of nonpolitical failings of individuals involved. Administrative discharges have always been issued for such reasons, before and since Vietnam. The percentages of such discharges for the decade prior to Vietnam and the decade of Vietnam are almost identical, which is a further indication that the politics of the war itself had little to do with bad discharges, and that an individual's inability to handle the requirements of the military was the overriding factor.

So why does President Carter provide such a windfall only to recipients of Vietnam-era discharges? I greatly fear that he has fallen squarely into the lap of those individuals and organizations who believe that the present military discharge system should be done away with. He has created an inequity that I fear may only be fully resolved by upgrading all administrative discharges ever issued.

On another point, the administration maintains that these discharges will be issued on an individual basis, and then sets up blanket criteria which allow "automatic upgrading" upon application. These automatic criteria are often arbitrary and hopelessly broad. I believe it will be essential for the administration to clarify and narrow them. For instance, if a deserter has received any military decoration other than a service medal, he will be automatically upgraded. This means that an individual who served 90 days in the Army, and qualified for a good conduct ribbon, and then deserted, would receive an automatic upgrade and full veterans' benefits.

There are numerous other inconsistencies under the "automatic" upgrading criteria that are equally disturbing. Between these automatic "giveaways" and the factors to be considered among those who will be left for individual review, there will be precious few left with a "bad paper" from Vietnam, and hundreds of thousands of deserters and malcontents, will be spending taxpayers' hard-earned money for veterans' benefits. If a person believes that the military system is unfair and arbitrary, I suppose he will feel consoled by that thought. But those of us who believe that certain minimum disciplinary standards must exist in order for a military system to function, and certain minimum performance take place before benefits accrue, can only be appalled.

I am especially upset because of the difficulties we had on the Veterans' Committee obtaining funding for programs devoted to those millions who have served our country honorably and well. We are at this moment facing a cut in our recommendations to the budget committee of almost a billion dollars. I can see no logical purpose in funding the implementation of this discharge upgrading program, and the additional veterans' benefits these men would demand, when we are so strapped for funding for those who performed honorable service. The Department of Defense estimates that if only 30,000 of these individuals apply—and I understand that there are more than 200,000 who received undesirable discharges during this period—if only 30,000 apply, it will cost DOD around $77 million. It is further estimated that these 30,000 would cost the Veterans' Administration somewhere around $100 million in veterans' benefits. This is only the tip of the iceberg. Full participation could mean close to a billion dollars. I cannot understand why the taxpayers of this country should be required to pay this kind of a fee to those who failed to perform satisfactory service. Our citizens certainly have incurred no debt to those who turned their backs, or did not perform up to the minimum standards of the service.

Finally, and most distressingly, this is yet another example of an administration that has persisted in creating excuses for the nonproducer while ignoring the men and women who have served honorably and well.

There has been no gesture of thanks extended to these others, who served in our most emotionally difficult war, and I personally believe that this is the straw that has broken the camel's back. President Carter has made a complete mockery out of the notion of honorable service. It is the duty of Congress to maintain the distinction that the administration has attempted to eliminate. For this reason, I have decided to join Senator STEVENS of Alaska in his effort to obtain a tax credit for those who served honorably in Vietnam. I will introduce a bill to that effect this week, and I invite those of my colleagues who feel strongly about the dignity of our Vietnam veterans to join me as cosponsors of this most needed legislation.

GEN. GEORGE S. BROWN: FIRST HE ATTACKED THE JEWS; NOW HE ATTACKS EVERY AMERICAN

(Mr. KOCH asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. KOCH. Mr. Speaker, Gen. George S. Brown, Chairman of the Joint Chiefs of Staff, has done it again in a speech to officers and high-ranking State Department officials. General Brown said:

> If any citizen of this country is so concerned about his mail being read or is concerned about his presence at a meeting being noted, I'd say we ought to read his mail and we ought to know what the hell he has done.

This is the third time the general has exhibited his antipathy to democratic procedures or his prejudice against Jews. On the first occasion he slandered American Jews, on the second occasion he showed his antipathy to Israel, and now on the third occasion he has displayed his zeal and support for the totalitarian dictum which takes as its premise that the state has all power and that citizens are pawns. Do we really want an individual of this type in the highest position of our military services? One who has no respect for the privacy of the citizens of this country and who believes that the Government can, without the courts' sanction, intercept a citizen's mail and read it without justifications required under our law, and who would record meetings that citizens attend and chill dissent. Are not these sentiments we would

expect from the "man on horseback" who believes that he is every country's savior?

If General Brown had been Chairman of the Joint Chiefs of Staff when former President Nixon was in the White House, is it possible that we might have had a coup d'etat to prevent Congress from undertaking the impeachment proceeding which resulted in Nixon's resignation? I am disappointed that President Carter is not distressed enough to direct the dismissal of Gen. George S. Brown. I am disturbed that we have allowed the general to continue in his exalted position after each of the prior two statements. And, I am reminded again of Pastor Niemoller's statement, looking back after the fall of Adolph Hitler and indicating regret that he had not spoken out on the first occasion of Hitler's infamous acts. Let me recall that statement for you:

I was not a Jew, therefore I was not concerned and when Hitler attacked the Catholics, I was not a Catholic and therefore was not concerned, when Hitler attacked the unions and the industrialists, I was not a member of the unions, and I was not concerned. Then Hitler attacked me and the Protestants, and there was nobody left to be concerned.

First, Gen. George S. Brown attacked the Jews; now he attacks every American. If he is not removed, the American public and democracy will have suffered a body blow. This is particularly disturbing since President Carter has exhibited such laudable concern for human rights throughout the world. Are not the human rights of American citizens, including the privacy of their mail and their freedom from unwarranted surveillances, also very important?

DIVESTITURE ISSUE FOR OIL COMPANIES

The SPEAKER. Under a previous order of the House, the gentleman from Vermont, Mr. JEFFORDS is recognized for 60 minutes.

Mr. JEFFORDS. Mr. Speaker, I am introducing today two bills regarding the divestiture issue for the oil industry. The House has not held hearings on this issue, and it seems to me that without thorough hearings it will be impossible for the Congress to plumb the merits of this question, which is so vital to our emerging energy policies. Therefore, introduction of these bills, which call for vertical divestiture of the major oil companies and draws special attention to the control of pipelines, should be viewed as a talking point for the committees to which it is referred to use to begin hearings. Similar legislation has been introduced in the Senate by Senator BIRCH BAYH, of Indiana.

By way of background, I here reproduce an article on the subject that I wrote and was published by the Sunday Rutland Herald and Times Argus, a Vermont newspaper:

BIG OIL: TOO MUCH CONTROL IN TOO FEW HANDS

(By U.S. Representative JAMES M. JEFFORDS)

The major oil companies, which have considerable resources at their disposal to convey their point of view to the American public, like to portray themselves as a large and varied group of firms competing with each other to provide the energy we need at the lowest possible prices.

In that self portrait, vertical integration—a single company's involvement in more than one phase of the oil industry—is painted in glowing tones. Vertical integration is described as essential if the oil companies are to remain truly competitive, hold down prices for consumers, and stand up to the Arab oil ogres. That view was articulately expressed on this page recently in an article by Michael Caynes of the American Petroleum Institute.

It would be reckless for me to state, flatly and absolutely, that Mr. Caynes is dead wrong. Frankly, the record of evidence on this extremely complicated issue is not complete.

But there is a very substantial body of evidence which leads me to believe that Mr. Caynes is probably wrong. The evidence is strong that vertical integration does create a lack of competition in the oil industry. The implications of this are very serious, because such lack of competition, particularly at the production end of the industry, is a threat to our national security, consumer prices, and our system of free enterprise.

Because of the gravity of these allegations, and because breaking up the big oil companies is hardly a step to be taken lightly, extensive congressional hearings are in order. The information gaps must be filled in, so that Congress can determine with certainty whether breaking up the oil companies is the appropriate course of action, and if so, how it could best be accomplished.

VERTICAL INTEGRATION: A THREAT TO NATIONAL SECURITY

Under the present system, it is common for one major company to be heavily involved in all stages of the petroleum business: control and production of the oil deposits, refining, transportation, and retail sales.

Therefore, if a major oil producer has interests in oil deposits located in an OPEC nation, and it works to protect those interests through various agreements with OPEC, those agreements will affect all stages of the business, from the refinery to the gas pump.

If a group of these big integrated oil companies act jointly in carrying out the wishes of OPEC, the implications are even more sweeping. Decisions can be made which vitally affect the supplies and prices of oil in this country—not only for our cars and homes, but for our national defense needs as well.

We would all like to think that American companies, regardless of their other motives, would never act in a way that would jeopardize our national defense. Unfortunately, the record to date is hardly reassuring.

During the 1973 Arab oil embargo, the American multinational oil companies, acting together through their partnership in ARAMCO, accepted directives from the Saudi Arabian government to cut off oil supplies to the U.S. military. This was substantiated by at least three congressional investigations: by the House Armed Services Committee and by Senate subcommittees on Multinational Corporations and on Investigations.

The public record shows that cooperation was very close between the Saudi government and the American companies during the embargo, to the detriment of American military preparedness at a time of U.S. military alert. The companies actualy provided data to the Saudis showing the quantities of petroleum products they provided to the U.S. military, from their various refineries around the world.

The Saudis then cut back production of crude oil by that amount, and the American companies enforced a freeze-out of the military, cutting back the military supplies by that amount.

The Saudis were so pleased with this cooperation—which was indispensible to their implementation of the embargo—that they highly praised and promised to reward the companies, which include Exxon, Mobil, Standard of California, and Texaco.

This joint action, as an agent of the Saudis government, clearly had an adverse effect on our military preparedness. We were forced to dip into our war reserves. And, according to a report by a House Armed Services subcommittee, the result was that "minimum readiness levels" of our military forces "were severely strained."

The cutback was "critical for the operations of the 6th and 7th Fleets in Europe and the Pacific Ocean areas," the report said. Although the breakdown of figures and specific instances of shortfalls are classified, the secretary of Defense indicated we would not have been able to withstand the situation for very long.

This incident demonstrates the cozy relationship between the multinational, vertically integrated oil companies and the Organization of Petroleum Exporting Countries (OPEC).

It is natural that an oil producing company would want a close relationship with the nations where the oil is located.

However, in this case, the companies were able to carry out the dictates of Saudi Arabia only because they have the tremendous power which comes with vertical integration. The producing companies had the ability to deny supplies to the U.S. military because they were also the refining, transportation, and marketing companies.

With vertical divestiture, the companies which produce oil would still have an incentive to maintain close relationships with OPEC countries. But the refiners would be separate corporations, whose chief incentive would be to obtain crude at the lowest possible cost. The transporters and marketers would also be separated, and their interests would be even further removed from OPEC's. Therefore, any effort to withhold supplies from the military would be far more difficult to carry out.

CONSUMER PRICES

Suppose that an integrated oil company gets 10 per cent of its crude from Venezuela, and that Venezuela, acting alone, raises its prices. Suppose that the other OPEC countries do not follow suit, so that Venezuelan oil becomes the highest priced crude in the world.

What would a big integrated oil company do in that case? Would it say "To heck with you, Venezuela, I'll go buy my crude from Iran, where prices are lower?" Not likely. The reason is that the company still has its economic interests in the Venezuelan oil fields. So it will still get 10 per cent of its oil from that country, despite the higher prices. Those higher prices will flow right through the pipeline and into your heating oil tank.

Again, the problem is that the producing companies also control all other stages of the industry. The refiners can't just shop around for the cheapest crude, because they are buying crude from themselves, from their own producing operations.

If the refiners were divested into separate corporations, their natural tendency would be to buy the lowest cost crude they could get. In the above hypothetical illustration, Venezuela's world market for oil would be likely to dry up rapidly.

In fact, OPEC itself is not a solid and totally unified block of nations. The nations making up the cartel are not always in agreement on oil prices. But the block is reinforced by the cooperation of the integrated oil companies. The companies create market

conditions which remove incentives for the oil producing countries to compete with each other.

Although I have used a hypothetical situation to illustrate this problem, the anti-competitive nature of the industry in its dealings with OPEC has been demonstrated in actual experience.

For example, when OPEC recently announced a two-tiered price increase, several of the major oil companies suddenly had an opportunity to buy very large amounts of the relatively lower priced oil from Saudi Arabia and the United Arab Emirates.

If there had been true competition, these companies would have taken advantage of the situation and produced petroleum products which could be sold to consumers at prices lower than those of their competitors.

But that's not what they did. Instead, they got together to work out a way to share the high-and-low-priced oil among all of the companies. They showed more concern about being equitable in their dealings with each other than about consumer prices.

JOINT VENTURES

Cooperative agreements and projects among the major oil companies are referred to as "joint ventures." This type of arrangement is so common that virtually every oil company has interlocking relationships with just about every other oil company.

For example, a spokesman for Mobil recently told a congressional committee that 85 per cent of his company's crude oil is produced through joint ventures.

This is a key to understanding the problem. The oil companies like to tell us that there are so many of them they must be competitive with each other, even if they are vertically integrated.

Actually, there is a great deal of concentration in the oil industry; there are relatively few major oil companies, and they are huge. But as the companies and their advocates are so anxious to point out, the concentration is not great enough, by itself, to constitute a monopoly.

However, that is almost beside the point. The advocates of divestiture have never, to my knowledge, based their case on the issue of concentration within the oil industry. The lack of competition comes about through the framework of the industry. The framework is made up of vertical integration of individual companies, and a massive web of joint venture agreements binding together the various components of those vertically integrated companies.

This anti-competitive framework exists at all levels of the industry, not just production. For example, if a group of companies jointly owns a pipeline, they may agree to freeze out another company, preventing it from using the pipeline, if that company is getting too competitive in another aspect of the industry, such as retailing.

The incentive, therefore, is to go along rather than to compete. And you don't have to be a Nobel laureate economist to see that this is a formula for high consumer prices.

HOW WOULD DIVESTITURE HELP?

The most sweeping of the vertical divestiture proposals would limit each company to one stage of the petroleum business: production, refining, transportation, or marketing. Other proposals would separate off portions of the industry—production or pipeline operations, for example—but allow integration of other aspects.

For the sake of illustration, suppose a complete vertical divestiture bill were passed. There would be separate production companies, refining companies, pipeline companies, and marketing companies.

There would be a true free market for crude oil. Refiners would have to bid competitively for crude, rather than buying it from themselves at an agreed-upon price, or through a sweetheart deal with OPEC.

Since OPEC would have to deal with a significant number of competing companies, the cartel itself would be weakened, and less able to set world prices. There could be no more simple with a unified organization of companies which shares many of OPEC's interests.

The pipelines would become true common carriers. The independent companies would have access to them, without fear of retribution if they have the gall to undercut the prices of the majors.

The dealers, the people who pump your gasoline and deliver your fuel oil, would be able to compete freely and openly. I believe the vast majority of dealers would welcome this. For the most part, they are small businessmen who are anxious to compete fairly for their profits, but who have been victimized by the anticompetitive nature of the industry.

BUT WON'T EFFICIENCIES BE LOST?

It should be made clear that if the vertical divestiture legislation is passed, the remaining companies will hardly be little "Mom and Pop" operations.

An Exxon crude oil producing company, divested of all other activities, would have assets of about $11 billion. That would make it the fourth largest industrial corporation in the U.S., behind General Motors, Ford, and IBM.

In fact, virtually every one of the divested companies would be among the top one quarter of one per cent of American industrial firms.

Would these companies have difficulty raising capital? If so, we may well wonder how the other 99.75 per cent of the industrial companies get along.

More to the point, can anybody suggest that the "efficiency" of vertical integration has given us low prices?

The fact is that the independent marketing and refining companies—the ones which are not vertically integrated—have been able to make a profit while benefiting consumers by charging less for their products.

That is particularly significant when you consider that the independent refiners have traditionally had to pay more for their crude oil. The president of Ashland Oil once testified before a Senate subcommittee that he could "spot the majors a dollar a barrel in the cost of crude and still compete with them."

ENERGY INDEPENDENCE

A brief glance at history indicates that the major oil companies are at least partly responsible for creating our present dependence upon OPEC. It also provides additional clues as to why the companies are so anxious to please OPEC; why they are so reluctant to exert bargaining power for lower crude oil prices.

For many years, the multinational oil companies made a point of shifting their drilling operations from this country to the nations which now make up OPEC, because by doing so they could increase profits. At the same time, they were working to prevent smaller U.S. competitors from building new refineries in the U.S.

Although many of the OPEC countries have since bought out the oil reserves within their borders, the companies still stand to make huge profits as the producing agents for those countries.

I have mentioned two reasons for the reluctance of the oil companies to bargain for low crude oil prices. The companies are anxious to protect their own interests in those countries, and with the anticompetitive framework of the industry, the incentive to seek low prices is diminished.

But there is another factor as well. Without competition, when the OPEC prices go up, the natural tendency is for the value of other crude oil supplies to rise to the same level. This tendency is dampened somewhat by federal price controls on domestic oil, but the general principle still applies. When OPEC raises prices, oil fields in other parts of the world—Alaska for example—also become more lucrative.

This is no small consideration. The OPEC price increases of recent years have raised the value of oil on Alaska's north slope by over $100 billion. This is a huge windfall for the companies owning the rights to that oil.

To sum up, the evidence is that the vertically integrated structure of the oil companies, and the set of incentives created by that structure, have helped to create our dependence upon OPEC, and have solidified and compounded OPEC's ability to wreak havoc on supplies and prices.

That is not to suggest that divestiture will bring us energy independence. Oil, after all, is a finite resource. Even OPEC is well aware of that—perhaps more so than our own government. A striking illustration of this is the funding which Saudi Arabia provided for an innovative new solar heating and cooling system in a public school in northern Virginia.

The Saudis gladly paid the bill for this project because they want the solar technology. They realize that no matter how lucrative their oil deposits are now, in the long run their plentiful sunshine will be a far more significant source of energy.

In the belief that we should be at least as farsighted as the Saudis, I have been devoting a great deal of time and effort to legislation which would vastly speed up our own programs to develop solar and other renewable energy sources. These sources, not oil and gas, are the key to any realistic hope for American energy independence.

But in the meantime, our dependence upon oil will continue into the immediate future. Given that fact, it is certainly not in our interest to have the supplies and prices of oil dictated by a foreign cartel and a small group of noncompetitive companies.

GOVERNMENT CONTROLS

So far, we have attempted to counter the lack of competition in the oil industry through a very complex set of laws including price controls, entitlement programs, and protections for the independent companies against abuses by the majors.

The big oil companies have screamed bloody murder against these controls and restrictions on their activities. They have conducted a very extensive public relations and media advertising campaign to tell us that all of these controls and restrictions are contrary to the spirit of free enterprise—that they are positively un-American.

On that score, I have to agree with the oil companies. The extensive government controls certainly do not seem consistent with the concept of free enterprise which we all learned about in seventh grade social studies.

But the present structure of the oil industry is even farther removed from the ideal social studies model, and one evil tends to beget another. If we were to lift the controls without altering the industry structure. Severe price increases would result, bringing on severe hardships.

By creating a free market, vertical divestiture would allow us to remove most of the artificial controls on the oil industry, because competition would provide a more effective price buffer.

MORE INFORMATION NEEDED—AND SOON

Large quantities of information on the divestiture issue have been accumulated by various congressional committees. The most comprehensive report is a thick volume entitled "The Structure of the U.S. Petroleum Industry" released last year by the Senate Interior Subcommittee on Integrated Oil Operations.

But even that 449-page report is far from complete, because it is based on a detailed

questionnaire distributed among 89 oil companies, which did not provide all of the data that was sought.

While it seems doubtful that the oil companies would withhold any data that would support their case against divestiture, I readily admit that my own conclusions, outlined in this article, must be considered tentative because they are based on incomplete information.

Progress has been severely hampered by the fact that Congress tends to get cold feet when considering any issue which is complex and politically sensitive. Extensive hearings are needed, and soon. Divestiture is a big step, which should be taken only from a very well informed perspective.

One other clarification: the subject of this article is limited to "vertical" rather than "horizontal" divestiture.

Horizontal divestiture is also a hot topic of debate. This would divest the oil companies of their holdings in other energy industries, such as coal, nuclear, and solar.

Presently, I tend to lean against horizontal divestiture. This is partly because of the fact that some of the big oil companies have been devoting considerable resources to development of solar and other alternative energy technologies, and it is crucially important to encourage—not slow down—progress in this area.

But information on this issue is also incomplete. Some people contend that the oil companies have dark motives for developing solar technology—that they will get all of the patents, then lock them up and throw away the key. This is a serious allegation, and while I have seen no recent evidence of it, Congress should investigate the situation thoroughly.

On both of these issues, the appropriate course is for Congress to roll up its sleeves and gather massive amounts of information, and then act accordingly. But there is little time to waste.

(Congressman JEFFORDS, first elected to the U.S. House in 1974 and re-elected to a second term in 1976, pledged in his first campaign to work for reform of the way big oil companies do business. He currently serves on the House Agriculture Committee, Education and Labor Committee, and the Environmental Study Conference.)

SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, yesterday I was permitted to address the House for an hour and, unfortunately, it required about that time to give a recital of the facts as I witnessed them and experienced them in connection with my experience with the so-called Select Committee on Assassinations. What it amounted to was sort of the bare bones. Today I would like to offer the flesh to this skeletal presentation.

In the course of the experiences and the occurrences, particularly since February 2, when the House adopted House Resolution 222, I found a set of circumstances that I had never quite confronted in many, many years since I have been privileged to serve in a public elective capacity. On April 7 next, it will be exactly 24 years. I was elected to the San Antonio City Council.

It is one which is reminiscent of some of the very harsh, very mean periods of turbulent political activity back on my home grounds in the city of San Antonio, where on the municipal level and in the city council things got quite complicated and turbulent, rather mean, and sometimes quite vicious.

Coming up the way I did, up the political ladder with no particular social position or money backing or organizational backing, I really have been compelled to think in terms of always discharging my oath of office to which the people have elected me in as sincere, as honest, and as efficient a manner as my human limitations would permit. I realize that in no other country and in no other society could I ever have had the great privilege of eventually appearing here as an elected Member of the House of Representatives of the United States from the 20th District of Texas. That could happen only in the atmosphere of freedom that we cherish and that I particularly adore and respect and revere, and I know this.

So it was not until this year that I had witnessed such a strange combination of events. I was not aware of the moment that turbulence developed, mostly because it was not until late in January, as I said yesterday, that I had corroboration of the deceitfulness, the dishonesty, and the sheer inefficiency—but particularly, the first two elements, deceit and dishonesty, and also bad faith—of the chief counsel and staff director of the Select Committee on Assassinations, Richard A. Sprague. These traits had appeared only as glimmerings, based on accusations that had appeared only in the course of some newspaper stories, but they had not been described other than in what the reporter in his by-line article was saying and regurgitating. This involved a period of Philadelphia political backwash activity going back at least a decade.

So it was not until about January 25 that I had fragmentary and then later, within a week or so, complete verification and documentation of the extent and the depth of the deceitfulness of this chief counsel. Even then I felt that was a judgmental matter, one that was not for me personally to resolve but for the committee. I felt that the fact that the counsel at no time had ever advised anybody on or off the congressional level here in Washington that he had a pending multimillion-dollar libel lawsuit against a Philadelphia paper was something that the committee should know and evaluate, because in effect it may have contributed at least one element to the sensitivity issue of retaining this chief counsel. But I did not raise that issue because I felt it was a committee matter.

What did disturb me was that I discovered and had corroborated through a faithful copy of the minutes of the transactions of staff meetings that the chief counsel had had, since December and the beginning part of January, and clearly revealed a contempt for the members of the committee, a general contempt for the Members of the Congress, and displayed an absolute arrogance in his remarks, which I will introduce into the RECORD in a few minutes. These conclusions were based on these minutes which he had at that time the penchant of maintaining. He would hold staff committee meetings that would begin at 9:00, and he would harangue all the staff members until about 11 or 11:30. He insisted that one of the stenographers take everything down verbatim. Thank goodness for that. He never dreamed that I would get a copy of them, but I am glad that he did have them taken down. I am somewhat reminded of that period of time during which Presidents saw fit to tape everything that went on in the White House.

Mr. Speaker, I have made very serious statements and what some people would consider to be very, very personal statements. I have likened the chief counsel to a rattlesnake.

I would only change that to say he is a rattlesnake that does not rattle, more like a copperhead. One does not know that they are there. They slither.

That is the only distinction I would make in that statement or assessment.

I have said that he is deceitful, that he is dishonest, that he holds those of us who happen to have elected position in contempt.

Mr. Speaker, I wish to offer the documentation. I have said that he padded the payroll with staffers that he obtained just between December 31 and January 1, six of the outgoing chairman's congressional staff of nine. I have stated that they had inflated salaries, but only after the first day I had officially been designated as chairman because this information was available to no member of the committee, on the strict orders of the counsel, and was available to no other Member of the House.

Let us see what that staffing indicates, after I finally got the listing, which was on February 3, the day after the House approved the resolution and the Speaker named me chairman.

There was Burton A. Chardak. Duties: Answers questions of the media relating to the committee. Spokesman for chief counsel in his absence; notifies press of all meetings; issues necessary releases after coordinating with press aides or members of the committee; works with press galleries in setting up coverage of official meetings; oversees gathering of press material; participates in writing and editing reports; is available to the chief counsel for any other assignment.

Position and salary: Public information officer, $34,000-plus. Actually, it amounts to about $36,000.

Previous employment and salary: Bulletin Co., assistant national editor, $24,000.

That is the PR man for whom? For the House? For the committee? No, for the chief counsel and staff director, that glorious twin combination.

Let us go down the line.

Richard J. Feeney. Duties: Operational; duties as assigned by the director of an investigative and administrative nature, as serious as office administrator, including assigning secretarial responsibility, procurance of files and similar duties.

Position and salary: Deputy director, operations, $30,000-plus.

Previous employment and salary: Con-

gressman Thomas N. Downing, special assistant, $16,000.

That is about an 87-percent increase. That is pretty good if one can get it.

Gaeton J, Fonzi. Duties: Investigation of organized crime involved in assassination and investigation of anti- and pro-Castro groups.

Position and salary: Staff investigator for the JFK site, $30,000-plus.

Previous employment and salary: Senator RICHARD S. SCHWEIKER, staff investigator, $37,000.

Mr. Speaker, that would be fine if that is all there was to that item. The fact is that Gaeton J. Fonzi has never reported to the Washington office of the committee. He has been down in Miami all the time. He is supposed to be working with the underworld somewhere, and he is supposed to be doing something; but nobody knows what, much less the chief counsel. The chief counsel has no ability to supervise Gaeton J. Fonzi at $30,000-plus.

I noticed that a member of the committee, the gentlewoman from California (Mrs. YVONNE BURKE), contributed one of her staffers. This staffer, named Laura J. Hope, is on the committee at $20,000.

Then we come to E. M. Hutton. His duties:

Assist chief counsel and staff director in his function as director of staff. Act as such in his absence. Position and salary: Deputy director, $36,000.

He was placed on the list on December 31, after he went off outgoing Chairman Downing's congressional personal staff.

And on down the line.

But, I give these only as examples. Should any Member want the rest of the list I will be glad to make the rest of the list available. I can assure the Members that I do not think anybody on the committee has this. They may say they have but I think a truthful followup would reveal they do not. The only way I got it is through the committee employee, who gave it to me while the chief counsel was basking at Acapulco. She was under the threat of Mr. Sprague's wrath since, as she confided:

We are not supposed to give anything to any Member of the Congress.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I thank the gentleman for yielding. I do not think that it has ever been quite clear with regard to the circumstances under which Mr. Sprague has been employed by the Select Committee on Assassinations. I have read press accounts where he wanted to continue his teaching of law at Temple University. I also read a press account saying he appeared about 10 days ago in court in Delaware County, Pa., as counsel in the Yablonski case arguing on the retrial motions. As I understand it, the Pennsylvania Supreme Court has ordered it for May.

Is it a fact that although we have rules that forbid staff employees from having outside staff employment, that he has been allowed to continue prosecution in this case and at the same time engage in other activities in the practice of law while he is supposed to be conducting this investigation? And, if so, what recommendation might the gentleman from Texas have regarding that status?

Mr. GONZALEZ. I was the first one to raise the issue but I could not properly until I was made chairman of the committee and the committee was reconstituted. I pointed to the fact that he was in violation of two basic rules and, third, that he had never complied with the Ethics Committee requirement that he stipulate holdings, income, and the like which, as the gentleman knows, we Members of the Congress have to file, also our chief aides, particularly anyone that earns over $30,000.

When I made that request remember that was when he then recapitulated, at the meeting of this staff, and said:

I have met with the Speaker. I have talked with the Speaker and I have powerful friends on both sides of the House.

He is not familiar with our jargon so he did not say on both sides of the aisle. He said—

on both sides of the House.

They have assured me they are all behind me and that none of them want me to quit at all. Nobody is calling upon you to quit, because only HENRY GONZALEZ is the only one giving you trouble. He is the only one. And he is making accusations of me, that I come to him, and I know about this deal, too, and I don't have to.

And he also told his staff—

I will tell you further that none of you has any contact with any Congressman unless you clear it with me.

But I have these assurances from powerful leaders from both sides of the House.

What about the issue itself? I have tried to do this from the beginning, but neither Chairman Downing nor any member of the committee ever gave any evidence that I thought that they thought I was anything but a coyote out in the brushwood howling to the Moon.

So then I insisted on that. The rest is history.

But the truth is that he did continue and he has had a full time law practice in Philadelphia. The telephone long distance vouchers that he asked me to sign for December, mind you, when I was not the chairman, and obviously there was no money but there were vouchers he asked me to sign in January, late in January.

The fact reflected in those vouchers was that the biggest single expense in the $9,900-plus—just for expenses; that was not salaries—was in long distance calls, and in those long distance calls enumerated, his long distance calls to Philadelphia were the biggest item.

Second, he ought to at least be made to answer what are the cases he is going all the way to Detroit to handle. He has gone to Detroit several times during the time he was on the payroll of the staff to defend cases. He had clients in Detroit. He went to New York. Did the committee pay for his stay at the hotel in New York? He went there twice in January. Nobody asked for an accounting. When I raised the issue, I had the malice of such men as the Delegate from the District of Columbia, Mr. FAUNTROY, who thought it obnoxious of me to raise the question, much less insinuate.

The House through indirection has OK'd this. It has not insisted that the mandate of House Resolution 222 be carried out, or learned why it is that that committee has exceeded its $84,333 limitation per month. As of right now I cannot answer that question because I do not know. I know that since I raised the issue, nobody on any level, even though this was the burden, the gravamen, of the specific charges that I raised, the specific allegations I raised—nobody, neither the leadership, nor any member of the committee, nor anybody in a position of authority in the other committee such as appropriations—in this case it would be House Administration—has ever said anything. Yet when we had the hearing before the Committee on Rules, the gentleman appeared on that occasion, and I appeared subsequently. Anybody would have thought that the committee was one individual—myself.

I wish to offer for the RECORD at this point the thrust of that questioning to reflect why I felt I had pledged to do something about it. Here is Mrs. CHISHOLM:

My conclusion, then, is this: My conclusion arises on two levels. First of all, it would seem to me that we do not throw out the baby with the bath water; that we clean up whatever needs to be cleaned up.

She ends up saying:

Number two: you may not want to answer this question, but I am going to pose it, however, and that is this investigation, this inquiry, whatever you want to term it, is a very, very serious, a very responsible matter, cannot be taken lightly at all, and if indeed there is any staff person who is really moving in the direction of possibly marring the integrity or the credibility or the reputation of the House of Representatives, and also causing a further criticism and fear on the part of the American people as to what we are about, would you and your committee be willing to consider the possible removal of any staff person that stands in this way?

I said:

Mrs. Chisholm, we are all expendable, staff and members of the committee. I feel that if I were to do anything that would bring discredit to myself as a Member or an individual, or on the committee, or the House. I would forfeit my right to belong on that committee, and I feel the same way about a staffer. I feel that if a staffer usurps his rightful place, he has no business being on the staff.

Right after Mrs. CHISHOLM, here is the other double dipper, a member of the House Assassinations Select Committee and a member of the Committee on Rules, the gentleman from Connecticut, Mr. DODD. Mr. DODD said:

Mr. Chairman, I would like to compliment you on your statement and your response to these questions that have been brought forth by the members of this committee. I feel, as Mrs. Chisholm does, and others on this committee, that the main thrust, the main purpose for which we are here today has been somehow sidetracked as a result of several questions which have been raised . . . .

He went on:

With regard to the budget, would you instruct your budget officer to begin a complete reevaluation of the entire budget . . . .

But he was on the committee. He

never asked for it, and, furthermore, he never asked for it after I demanded it.

And he would not sit still when I called an informal meeting of all the committee so I could present him what he had said he wanted me to do when he interrogated me before the Rules Committee, so I offer that for the RECORD at this point. That is testimony of the questioning period of Mr. DODD during the presentation on January 25 as reflected in the proceedings and the transcript of the proceedings of the House Rules Committee:

Mr. DODD: Thank you, Mr. Chairman.

Mr. Chairman, I would like to compliment you on your statement and your response to these questions that have been brought forth by the members of this committee. I feel, as Mrs. Chisholm does, and others on this committee, that the main thrust, the main purpose for which we are here today has been somehow sidetracked as a result of several questions which have been raised since the committee was constituted in the last Congress, and I would like, if I could, to try and synthesize, being the last person on this committee to have an opportunity to question you, to try to bring together some of these questions and ask you some direct questions in regard to these three or four areas that I think have really, in a sense, sidetracked our efforts to have this committee constituted.

I can't help but feel this is reminiscent of other committees that have been charged with similar responsibilities, who have seen their efforts sidetracked because of ancillary issues that have surfaced.

I feel, as I listened to my colleagues on this committee and in the House, that there is strong support for the constitution of this committee, albeit some problems may exist in the three or four areas I would like to ask you about.

One is the budget; the second is the techniques, certain techniques that have been raised; the third is staff; and the fourth I suppose would be the focus of the committee's attention with regard to certain agencies, specifically the F.B.I. and the C.I.A.

With regard to the budget, would you instruct your budget officer to begin a complete reevaluation of the entire budget with the view toward reductions in that budget? Are we wedded to any particular figure, the $6.5 million, or is there going to be an entirely new reevaluation process of our budget needs and demands?

Mr. GONZALEZ. There never has been a thought in my own individual mind that we were wedded to any figure and, as a matter of fact, as a suggestion, because really I know nothing; I have precisely asked for a reevaluation on the part of the professional staff, what really is the irreducible minimum without in any attempt trying to make that the main order of business now, but looking forward in case the committee is reestablished, to bring up for discussion with the committee and get a consensus of the committee.

I believe in traveling on consensus, where I have had the honor of being chairman of subcommittees and so forth; it is the only way I have of going, and I wouldn't want it any other way. So I would say that that would be an absolute need to reevaluate, to re-estimate, and to re-organize.

Mr. DODD. In conjunction with that, would you be willing to have written into the rules of the committee language to the effect that all major expenditures, particularly in the area of travel, purchases, and so forth, should be approved by the appropriate subcommittee or chairman of that committee so that we would have, or the committee would have, some sort of control over the budgetary process as we move through the investigation?

Mr. GONZALEZ. Yes, sir; I would favor that.

Mr. DODD. I wonder if in light of that, and I don't want to take up too much more of the committee's time with it, but I think it might be helpful for the members of this committee to have some idea if you could describe in broad detail the magnitude of the task we are undertaking in terms of documents, the possible number of people—just in broad figures—you may be wanting to talk to, so the committee might have some idea of how large this undertaking will be.

I said that Richard A. Sprague is dishonest and deceitful. Now let me be a little more specific. In a staff meeting on January 11, 1977—and certainly at that time nobody could say there was bad feeling between Mr. Sprague and anybody much less between me and Mr. Sprague, and this was January 11—I took his word for what he said had been all these scandals that had arisen in his past in Philadelphia. I went further. I was the only one of the members of the committee that even defended him. All of the other now defenders were not then anywhere in sight. So here is a staff meeting of January 11, 1977.

While speaking of the financial difficulties to the committee staff, Sprague stated:

What I thought would be the first wave, assuming we get to the continuing resolution without them throwing the committee out, instead of the 35-percent across-the-board decrease in pay, those on the lower level of income of $10,000 and under should not get any decrease whatever. Going in a prorated scale, it goes to $16,000, those people do not get a full decrease on that amount down, but those above $16,000 would be getting 40-percent decrease. The alternatives are 35-percent decrease across the board. With my commitment to you, you will get back the amount of that decrease back in your pay.

This is Mr. Sprague who was setting policy. He was usurping the select committee though he had no absolute authority at that time. There was no committee. There was no staff. It was waiting to see if the House would reestablish it. But he was speaking as if he were a member of that committee. What is more, he was speaking as if he were more than a member.

Here again on January 6, 1977, he was again addressing the staff about salary problems:

This is certainly a depressing problem, this outrageous delay in the payment of salaries to the committee staff. I have talked to Speaker O'NEILL about our salaries and he advised a special resolution would be passed to pay the staff in January. I have also talked with Congressman GONZALEZ, the chairman-designate, and with members of the committee to pass the bill. The subject of the pay cut was not discussed but they might throw that in. But they will try to get a bill just for the salaries and let the bill pass. I intend to spend the time to make sure that the bill is gotten in. Assuming that is done an affirmative vote next Tuesday before the Rules Committee will pass the resolution on to the floor of the House to be voted on Thursday rather than Wednesday. In the interim of time I have been on the receiving end of quite a bit of flak and have been appropriately speaking up again toward accepting a special bill to pay salaries for January. I am requesting all of you to continue to work this week between now and next Tuesday as you have been doing.

Did Mr. Sprague indeed and in fact talk to the Speaker? He was telling them he had and that he had assurances the Speaker had said or advised there was a special resolution. As a matter of fact he became so excited that he sent one of his legal staffers and two others who are still on the staff, both lawyers, while we were in caucus meeting here and they button-holed us out in the reception room and the staffers said:

Mr. Sprague says that there was a meeting between the Speaker and the ranking minority member SAM DEVINE at which the Speaker said, yes, there was a way to get these salaries if they only get a bill.

I reminded the lawyer that that was not possible, because we had to have a resolution reestablishing the committee first. They could not believe it.

At that time the Congressman, the gentleman from North Carolina (Mr. PREYER), came in. I got them all together and confronted the Speaker. The Speaker said that he knew of no such assurances.

On February 8, by then the pot got to boiling a little. Mr. Sprague had a staff meeting and in that meeting he said:

I met with the present chairman in the morning and the full committee in the afternoon. At both sessions I made it clear and unmistakable I will not fire one person presently on this staff regardless of the amount of cost.

He stated further:

The present chairman appeared with a list of staff to be fired before the committee. The committee asked if I had been told about this. I told them I had not and the present chairman had directed me to produce a list of people to be fired.

This is a whole fabricated lie. I never offered such a list. I never made such suggestions. The only thing I presented to the committee was the list for the first time of the staffers and what their functions were to be and what their salaries were and was trying to state how in the world the committee could demand we could make limitations in the funding resolution of $84,333.

Mr. PICKLE. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I will be delighted to yield.

Mr. PICKLE. Mr. Speaker, I want to ask the gentleman a question relating to the right of the committee or the counsel to take testimony under oath; but before I pose that question I want to say to the Members of this body that I have been privileged to know the gentleman from San Antonio for over 25 years. I do not know any man in public life who has been more courageous, who has been more dedicated in his advocacy of the truth than the gentleman from Texas, Mr. HENRY GONZALEZ. I have seen the gentleman in the well take on a lot of opponents in legislative matters in our State capital, as we have here, and I have seen that the gentleman's campaigns have been truthful and that the gentleman has been proven right. I dare say the gentleman is going to be proven right in this instance. There are some who would say that the gentleman from San Antonio "has gone off the deep end."

I do not think the gentleman from Texas, Mr. HENRY GONZALEZ, is off on any end at all. Perhaps others have gone off the deep end.

I hope that each Member will read the testimony the gentleman put in yesterday and again today to prove that the gentleman is trying to document the nefarious operations of the present counsel of the select committee.

Mr. Speaker, the House has got itself in an untenable position, in my judgment. We have allowed the gentleman from San Antonio to leave as the chairman of the committee and we have retained the counsel. That is an unthinkable position for the Congress to get itself into. That kind of precedent will haunt the Congress for years to come.

I trust that we will not allow this to continue, because the real issue with us here is not the intent of the members of the select committee and the type of job they would hope to do, but as long as we have the present counsel, this House, and I would dare say the American people, are always going to have doubts and worries and suspicions about whether the right thing was done or even whether the right conclusion might be reached. That is something for the House to express itself tomorrow.

Mr. Speaker, I want to ask the gentleman, however, if the present bill gives the legal counsel the right to take testimony under oath when they are not in the presence of the committee or members of the committee. Can he do this by himself, or members of his staff, wherever he may be?

Mr. GONZALEZ. I do not think that I can answer completely, because of the actions of the Committee on Rules yesterday.

I have not had any copy of the resolution approved by the Rules Committee yesterday, and I do not know if it retains the precise language of the previous resolution, of which the thrust was that it would have tended to bring that happening about.

Mr. PICKLE. It is my understanding that the previous resolution did allow this. I think there was discussion on this, on the resolution previously. It was not noticed by many Members of this body.

Mr. GONZALEZ. That was the Bolling resolution, as well as yesterday's. Mr. BOLLING—I said yesterday he was a rajah. I take it back. He is the maharajah of the Rules Committee. He dicatated the terms to the Speaker, and the Speaker said, "yes, sir."

Mr. PICKLE. Who is the gentleman talking about?

Mr. GONZALEZ. The maharajah of the Rule Committee, the Honorable DICK BOLLING from the State of Missouri—you know, "Show me," and he showed them. He dictated the terms of the resolution on the Monday preceding the Tuesday action on House Resolution 222, which is the number given the Bolling resolution.

He gave as his reason, as I said yesterday, his great subservience to the liberal limousine lawyer, Joe Rauh. Incidentally, Mr. Joseph Rauh—and it is brought out, if the gentleman wants any kind of affirmation of this fact—in a recently published book by author Armbrister, who relates the history and developments of the Yablonski proceedings, and quotes Rauh as saying:

> Had it not been for Richard Sprague tying in his prosecution of Boyle with my pressing the multimillion dollar civil suit against the United Mine Workers simultaneously, we could have never won that suit.

I will challenge the chief counsel and Mr. Rauh and the members of the select committee and the leadership of this House to ask and demand that Mr. Sprague show us his income tax returns for that year and for the years subsequent, and see whether maybe there was not a little splitting of fees there somewhere. It would be interesting.

Mr. Sprague has never had an FBI clearance. Why not almost every other professional staffer, particularly during the time of the impeachment proceedings and Watergate proceedings in the Senate, those committee staffers had to have an FBI clearance. Why not the chief counsel here? He is in an extremely sensitive position. The House is on a collision course with embarrassment down the line.

Mr. PICKLE. Is it the gentleman's feeling that counsel might have split fees in some other case?

Mr. GONZALEZ. Oh, I think that he has not been exactly not earning fees since he has been chief counsel.

I never did completely answer the gentleman from Maryland's question as to how he was hired. I do not know. There are all kinds of stories as to how he was hired and for what reason.

All I know is that after 1 week's time the then Chairman Downing had made the commitment to him and actually hired him. I was given the benefit of actually meeting him at that breakfast encounter, so all I can say to the gentleman is, why not request now? You and I have to account for any kind of outside income, and we had for several years to file our statement with the Ethics Committee, but not the chief counsel. Nobody senses that.

Mr. PICKLE. Well, I would hope that we look into this question about the right of legal counsel to take testimony under oath and not in the presence of the committee or members of the committee. I think that would give an extremely broad authority. I do not envision this committee as another Warren Committee, in that sense, and I think therefore this matter ought to be discussed, looked into, tomorrow. Possibly, there will be some amendment offered on that.

I say again to the gentleman, many of us are not familiar with the events that led up to the appointment of this gentleman, his retention, or even the conflict that the gentleman from San Antonio had with counsel, or the majority.

I assume that that will be discussed in detail tomorrow.

As one who had previously supported this committee, I want to say that I have come to the conclusion that I do not feel that the American people are going to have confidence in what will be found, if anything. This sudden flurry of activity seems to be for the purpose of reaching headlines more than establishing facts. I think these matters ought to be discussed tomorrow because we indeed have a question where the very integrity of the counsel is questioned. The Members ought to consider that we debate this tomorrow, the very untenable position we find ourselves in, in that we have retained counsel and the gentleman from Texas (Mr. GONZALEZ), one of the ablest gentlemen who ever served in this body, is now no longer the chairman of this committee.

Mr. GONZALEZ. I thank my esteemed colleague, the gentleman from Texas, for his kind words. I will say that I share his apprehension. I wish one of the members of the committee, just one, would even have asked this kind of question after February 2.

I agree. I think no matter what we do, the committee was tainted even by the time I was named chairman on February 2.

But I will proceed. I said that I had not encountered some of the things that all of a sudden I began to encounter. All of a sudden, there was an article by a Washington Star columnist, Mamasota Mafiosi Rosellini, otherwise known as Lynn. She was writing a scurrilous article which went all around the country by way of a column. And at this point, I would like to introduce for the RECORD an article from the San Antonio Express News of March 13, by Kemper Diehl, which will offer some elucidation on the Rosellini contribution. It will be very interesting to find the sequence of events that led all the way from the Washington level down to San Antonio. Can you imagine?

Mr. Speaker, the article is as follows:

HENRY B.'S FREE OF THAT MEATGRINDER

(By Kemper Diehl)

It's really not all that hard to understand the explosion of scorn with which U.S. Rep. Henry Gonzalez parted company with the House Select Committee on Assassinations.

If Speaker Tip O'Neill and Majority Leader Jim Wright wound up with red faces—and assuredly they did—they had it coming.

Take a look at the kind of abuse Gonzalez was asked to take because he went to work with typical honesty to carry out policies which had been voiced clearly by the leadership.

There is no question but that the leaders, particularly Wright, made it clear that if the House were to revive the committee, Henry B. was expected, as the new chairman, to take firm command, insure a probe in which no one's rights were infringed and, above all, bring the committee's scandalously overextended finances back to par.

UNDERSTANDING

The obvious corollary to all this was: Bring the chief counsel, Richard Sprague, under control.

In fact, when the committee's life was extended for a trial two months, the word from reporters on the scene was: "This means Gonzalez has two months to get rid of Sprague."

So Henry B. moved to bring finances into line and insure control of operations by elected officials. Sprague, of course, rebelled, and the chairman's attempt to fire him was overturned by committee members who, in effect, supported the counsel's unbridled style of probing.

There followed a campaign of anti-Gonzalez reports by what the congressman was to call the media "wolf pack."

The barrage may have been topped out by a piece in the Washington Star by Lynn Rosellini which was mind-boggling in its resort to half-truths and loaded quotes.

Reporter Rosellini displayed her depth of knowledge by announcing that the late President Lyndon Johnson was a resident of Henry B's district.

HATCHET JOB

Her evidence against Gonzalez came from people like Ed Foreman, the right-wing Republican who holds some sort of record by having been a one-term congressman from two states.

Foreman did a McCarthy-type attack on Henry B. in the early 1960s because the San Antonian had committed sins like voting against the Un-American Affairs Committee—and was stunned when Gonzalez called him to account.

Reporter Rosellini saw something wild and strange in the speeches and Congressional Record inserts Gonzalez made regarding the Sharpstown bank failure—not noting that this was the greatest political scandal of recent Texas history, or that the Gonzalez speeches had led directly to the resignation of a ranking Nixon Administration official, Asst. Atty. Gen. Will Wilson.

Then came her clincher, two vocal local witnesses against Gonzalez.

Of all people, they were Doug Harlan, described only as a "political science professor," and Jim Dement, depicted as a businessman in touch with the political scene.

GOP DUO

There was not a hint for Star readers that Harlan was really a Republican politician, twice defeated as a candidate for Congress and most recently a high-level briefcase-toter for the GOP administration.

Nor did reporter Rosellini tell readers that Dement has been an active enemy of Gonzalez or that much of his contact with politics has been through the Republican Party where he was a major backer of Harlan's most recent campaign.

The national GOP data bank couldn't have provided a more biased group of anti-Henry B. spokesmen.

With this sort of partisan abuse splattering over Gonzalez where were the leaders who pushed him to take strong action to control the investigation?

Wherever, they were, they offered him no sincere support.

In fact, Wright allowed himself to quip glibly about forcing a "shotgun marriage" of Gonzalez and Sprague—thus equating a committee chairman with a Congressional employe.

The wreckage of the committee has also been attributed by some insiders to "malign neglect" by O'Neill.

Certainly the message to put things in order never got through to anyone other than Gonzalez. And the reaction of other committee members tc the attempted firing of Sprague was strictly political.

"They never stopped to see if there was a good reason for Henry's action," noted one Washington veteran. "Then they found themselves out on a limb and couldn't admit it."

Never one to mince words, Henry B. proceeded to express his feelings for all to hear.

What now?

"Henry is a free man now in a way few members have ever been," concludes one Washington friend. "It's the kind of freedom that comes from not being afraid. Most guys up here are governed by fear."

On top of that, and following the question I raised, I challenge the leadership, the members of the select committee, other well-intentioned Members of the House, to demand an FBI field check or any independent investigatory agency field check of Mr. Richard A. Sprague—forgetting about this turbulent period back in Philadelphia politics—just for the period of the last 5 or 6 years. If he is honest, would he not be willing to give the chairman of the committee or the Speaker of the House, or somebody, a copy of his income tax returns for the last 5 years? I challenge the chief counsel to do that. I challenge him to tell the House how many times during that period of time he has been down to the Fontainebleau Hotel in Miami, and whose guest, since the hotel, it is well known, is owned by the syndicate or the mob; the trips he has made just in the last 3 years to Las Vegas, and whose guest. What was the nature of the case he was defending while on the payroll in Detroit, contrary to the House rules?

Why does the leadership and the Members of the House not challenge a violation of the rules of the House?

We are all under oath and charged with upholding them. These are questions I wanted to raise.

Mr. Speaker, I want to go further with respect to the role of the leadership. I offer for the RECORD at this point a series of correspondence from one Kenneth E. Brooten, Jr., who had been a staff counsel of the House Select Committee on Assassinations. One letter is to the Honorable JAMES WRIGHT and is dated March 1, 1977. Another letter was hand delivered February 25, 1977, and addressed to Richard A. Sprague.

Mr. Speaker, the correspondence is as follows:

SELECT COMMITTEE
ON ASSASSINATIONS,
Washington, D.C. March 1, 1977.

Hon. JAMES WRIGHT,
Majority Leader, U.S. House of Representatives, Washington, D.C.

DEAR MR. WRIGHT: This is in further reference to our meeting of February 24, 1977, at which you requested Mr. Sprague and I to meet to discuss and attempt to resolve certain immediate problems facing the House Select Committee on Assassinations.

Following that meeting I advised Mr. Sprague that I would immediately go to the staff office to meet with him. He declined to meet with me at that time.

On Friday, February 25, 1977, I sent him a letter advising him that I would be available to meet with him during the entire weekend. On Sunday, February 27, 1977, I attempted to call him at the Committee offices, at his residence in Philadelphia, and finally left a message with his answering service at the Watergate Apartments here in Washington. I was available all day Monday in the office of Chairman Gonzalez. Today, I have again called Mr. Sprague's secretary at the Committee offices in a further attempt to meet with him.

In addition to attempting to contract Mr. Sprague, I have personally gone to the Committee on House Administration on two occasions to see if temporary long distance telephone service could be restored on the basis which we discused at our meeting.

I reluctantly bring this to your attention because I feel that time is of the essence in resolving the problems confronting the Select Committee. By his failure and refusal to meet with me he has delayed resolving the problem of how to regain access to non-classified information in FBI and Secret Service files. If access can be granted, then Committee staff can continue to analyze information in those files. The simple fact is that if Mr. Sprague was acting in good faith and genuinely concerned about resolving these problems, he would have contacted me as you requested. His failure to do so has resulted in unwarranted delays which has seriously impaired the investigations. You may be assured that I will continue to work to resolve these problems.

With kindest personal regards, I am

Sincerely,

KENNETH E. BROOTEN, JR.,
Acting Staff Director and Counsel.

SELECT COMMITTEE
ON ASSASSINATIONS,
Washington, D.C., February 25, 1977.

RICHARD A. SPRAGUE, Esq.
House Select Committee on Assassinations, Washington, D.C.

DEAR DICK: This is in reference to our meeting with the Honorable James Wright, House Majority Leader on Thursday, February 24, 1977. It was my clear understanding that Mr. Wright wanted you and I to meet to discuss and clarify the following matters:

1. Temporary long distance telephone calls to be billed to his office number—225-8040.
2. The actual expenditures for the Select Committee for January, 1977, as well as the estimated expenditures for February, 1977.
3. Vouchers for December, 1976.
4. Arrangements to provide access to non-classified FBI and Secret Service files.
5. Forms for Subpoenas.
6. Establishment of a petty cash fund and designation of a custodian.
7. Any other matters which are of an immediate necessity for the orderly operation of the Select Committee.

As you know, following the meeting I offered to immediately come to the staff offices with you to discuss these matters, however, you advised that you would check on the long distance telephone calls and then I should call you.

Following my conversation with Alvin B. Lewis, who called on your behalf at 6:20 p.m., yesterday, I have today been in contact with the staff of the Committee on House Administration to attempt to work out the details for critical temporary long distance telephone service.

In an effort to avoid any unwarranted delay in the resolution of these most important matters and to avoid misunderstandings as to the matters which Majority Leader Wright wanted us to discuss, I will very much appreciate it if you will call me so we can set up an appointment at a mutually convenient time.

You may contact me at Chairman Gonzalez office—225-3236 until 5:00 p.m. today. I will also be available and most happy to meet with you during the weekend. If you cannot reach me at Chairman Gonzalez office, please do not hesitate to contact me at my residence. My residence telephone number is: 546-5126.

I shall look forward to hearing from you.

With kindest personal regards, I am

Sincerely,

KENNETH E. BROOTEN, JR.,
Acting Staff Director and Counsel.

Mr. Speaker, this correspondence reveals the pusillanimity with which such leaders as the majority leader, JIM WRIGHT, accepted the abuse of such men as Sprague. Let us just see briefly what it amounts to. Mr. WRIGHT was charged, according to Mr. WRIGHT, by the Speaker to meet. He was supposed to find a compromise, so before February 24 he called a meeting for February 24, at which time he asked that Richard A. Sprague be present. Sprague refused. He said:

You can't mandate me, and I refuse to go unless I go with my 2 lawyers.

Eventually Sprague showed up late, after first threatening that he could not get there until 1:30 p.m.—an hour and a half late. The Honorable JAMES WRIGHT instructed that Sprague, the chief counsel, and Mr. Brooten meet to discuss an attempt to resolve certain immediate problems facing the House select committee. Sprague refused to do that, and he again told the majority leader to go take a big jump. The majority leader smiled and jumped. Not a word was said.

He finally came out Saturday and said, "Well, HENRY GONZALEZ did not have a shot he could fire straight, but he thought he did." But he neglected to say, as I pointed out yesterday, that he had given me every assurance at the time I did give notice to Mr. Sprague that he was being fired that he was backing me. He went further and assured me that not only he but the Speaker felt the same way.

Mr. Speaker, it seems strange that there should be such fear and trepidation. I know that at one of the meetings Congressman RICHARDSON PREYER, who would be the ranking member on the Democratic side of the select committee, expressed repeatedly his fear of what Sprague might do if anybody did anything to him.

What is this hold? What is this power behind the scenes? What is this power that makes the maharajah of the Rules Committee jump through a hoop and get through two resolutions saying that Sprague has got to stay?

Is the House interested? Should it not ask questions? What is this power? What is that power that condones palpable, premeditated defiance of the House rules? What is that combination, that confederation, or that conspiracy that banded solidly the black Members and some of the others together to sign a letter on the same day, when they were not even in town, reading the law into precedents? I wonder why?

For what reason have the specific allegations of malfeasance, misfeasance, and deceitfulness been completely overlooked and dismissed? By what unjust decree was I made the solitary object of all expectations all during the month of January and up to February 2, and since then no similar expectations or demands of the others, such as the present chairman.

Questions were in the press daily. "What are you going to do about this? What are you going to do about that?"

It was to no avail. Was the answer "I have no authority. I am not chairman and I have not been chairman; I have no privity or confidence with anybody who has had the power"?

Certainly outgoing Chairman Downing never communicated anything.

As a matter of fact, I had to reply to a letter in December that had been directed by the chairman of the Committee on House Administration, the gentleman from New Jersey, Mr. FRANK THOMPSON, addressed to Mr. Downing saying: "Your request for this artifact, this little automatic cutoff of the telephones that will enable you to listen in without authority and contrary to title XXV, et cetera, of the United States Code," et cetera—and all of a sudden, they said that they were going to have to answer because Downing was gone.

This is terrible, Mr. Speaker, and it raises a big issue. One can imagine my surprise when I found that obviously Downing had never sent the letter, even though it was apparently signed by him. Finally, I had an abject confession by this staffer, Mr. Feeney whom I mentioned a while ago, who received an 87-percent increase in his salary and is currently earning $30,000-plus. He said, "I did it. Mr. Downing had given us carte blanche authority to write letters and sign his name, and that was one of the requests."

"We used to have one of those devices in the congressional office."

In the meanwhile, Mr. Speaker, I had to answer the letter stating that as far as I was concerned as just a member of the committee—and that had been in December—if anything happened and I had anything in the future to do with that committee, certainly that kind of request would never be made.

How many actions of that nature were taken that we do not know about, even now do not know about?

Also, Mr. Speaker, I would like to review the other situation that I referred to previously, just yesterday, with respect to the possibility that the House can be embarrassed through litigation by the actions that have already been taken by the staff director and chief counsel and members of his investigative staff.

There were two instances which troubled me greatly. Those concerned his involvement with the Cuban Ambassador in the U.N. and with a phone call that was made by one of his aides to Cameroon, a letter, a communication, and telephone call, which elicited a protest from the State Department saying that the mere fact that a letter had been sent and a telephone message attempted to be communicated in the name of the Committee on Assassinations had created a sensitive situation with the Cameroon authorities.

Authority vests in a chief counsel to do that, unknown to any member of the committee? Who delegated that authority to the chief counsel? Nobody has bothered to say.

Next, Mr. Speaker, I refer to the undermining of the chairman in creating divisiveness within the committee. I have made those specific charges.

At this point, I wish to offer for the RECORD a documented, chronological series of events to put flesh into that charge.

UNDERMINING THE CHAIRMAN AND CREATING DIVISIVENESS IN THE COMMITTEE STAFF

I have charged Mr. Sprague with attempting to undermine my chairmanship as well as creating divisiveness in the committee staff. Let me be specific:

First, on Wednesday, February 8, 1977, while referring to the meeting which I held with Mr. Sprague on Tuesday and the afternoon meeting. He falsely stated:

The present Chairman appeared with a list of staff to be fired before the Committee. The Committee asked if I had been told about this. I told them I had not, and the present Chairman had directed me to produce a list of people to be fired.

I had no such list—the only list I had was the same list that every member of the committee had. But by telling the staff that I had such a list it made it appear that I alone was out to get some of them.

Second, he stated:

What do you do when you have a Chairman acting in this manner? In view of the fact that the rest of the Committee is supportive, I made up my mind to battle it out. The way which the Chairman behaved yesterday, and his actions at that meeting, the Committee is more and more willing to take action. I will struggle along with the problems created by the Chairman.

Mr. Sprague is very adept at muddying the waters. It was not I but he who hired the 23 people, it was not I but he who by that action necessitated a 35-percent reduction in pay. It was not I but he who refused to make the necessary adjustments in staff to comply with the mandate of House Resolution 222 and House Resolution 11.

Finally, he arrogated unto himself the position of a Member of Congress, when he stated:

There may have been feelings around this office of uncertainty about who run things . . . sort of a headless horse. But the head is right here—on me. I am laying out the lines of command in this office. Who is in charge of what? Regarding any relationships with any Congressmen, as of this moment if they want to communicate with you, they will do it through me, so don't have any thought as far as who is running to whom.

It is quite clear that the members of the select committee are entitled to call upon staff personnel for briefings and information—it is quite clear that members of the select committee are by that directive being cut off from the staff—and only can a member go through Mrs. Sprague. Clearly, he is setting a policy which the committee has not yet even had an opportunity to discuss.

He further maligned me with the staff when in response to a question from Richard Feeney he stated:

He (referring to me) is again, more and more out on a limb. But corrective measures will be taken.

I know of no way a staff could be responsive to the chairman of any committee after those accusations by Mr. Sprague. Mr. Sprague's opinion of me is one thing—he is certainly entitled to his opinion—but when he states his opinion to the members of the committee staff he undermines the work of the total committee. I cannot and will not condone this type of action—I do not think any of you can.

I do not know what Mr. Sprague meant when he referred to me as the "present chairman." I do not know what he meant when he said "But corrective measures will be taken."

From the totality of the circumstances it is clear to me that Mr. Sprague wants to continue to run this committee, to dictate policy, and to invade the province of the members of

this committee by attempting to manipulate the chairmanship. I cannot and will not tolerate this type of activity on the part of the chief counsel and staff director. It is counterproductive, it is divisive, it is disruptive and it has I fear destroyed this committee.

Mr. Speaker, with regard to the Philadelphia incident in which Mr. Sprague deceitfully distorted the facts, I wish to offer for the RECORD a copy of the Philadelphia Inquirer editorial dated Monday, April 9:

SINCE SPECTER WON'T, PACKEL MUST PROBE APPLEGATE

District Attorney Arlen Specter has done nothing to dispel the strong implication of conflict of interest on the part of his first assistant, Richard A. Sprague, in the Applegate case. In forcefully supporting Mr. Sprague, Mr. Specter has now assumed substantial responsibility for the decisions made, although he was not originally involved.

"I have personally reviewed the homicide file on the extensive investigation conducted by the Philadelphia Police Department arising out of the death of Mr. John Applegate on March 3, 1963," Mr. Specter wrote to the editor of this newspaper. "In my legal judgment, Mr. Sprague acted entirely properly."

Mr. Specter's judgment defies independent evaluation. The district attorney has refused to allow this newspaper access to the Police Department investigative records to which his letter referred. And he has refused to allow any expert or agency independent of his office to examine all the facts and to assess the case.

The city medical examiner concluded in 1963 that Mr. Applegate "died as a result of a blunt impact" to his head. There were three persons present when that apparently occurred. No grand jury or court of record ever was given the opportunity to judge whether a crime was committed, or to determine if anyone should be held responsible

The case has many mysterious aspects, and we offer no simple solutions. But simply on the facts briefly outlined above, we believe it is imperative that the mysteries be solved. An independent and irrefutable determination must be made—and made public.

The primary concern now focuses on the fact that Mr. Sprague was in direct charge of the original case, in which his recommendation that no criminal prosecution take place was followed. One of the persons involved was the son of former State Police Commissioner Rocco P. Urella Sr., a man whom Mr. Sprague has described as a close friend both then and now.

The public does not know if that association affected the case. But the relationship raises doubts that would hang darkly over any determination by the district attorney's office as it is now constituted. Mr. Sprague's highly selective excerpting of the investigative file in an outspoken attack on this newspaper's reporting and editorial position deepens rather than clarifies that ambiguity.

The case is sordid and complex, filled with conflicting statements and subject to widely diverse interpretations. Only one point is utterly unequivocal: Mr. Sprague made the critical decisions and the son of his close friend was involved.

We regret Mr. Specter's decision against an independent investigation. It forces us to conclude, with some reluctance, that it is imperative that the Pennsylvania attorney general undertake one.

State law and judicial precedent give the attorney general broad powers of supercession in such matters, powers that should be exercised with the greatest restraint. But the Applegate case, because of Mr. Specter's adamant attitude has overpowered such healthy reservations.

We strongly urge Attorney General Israel Packel to move swiftly for an exhaustive investigation of the circumstances and disposition of the case. The objective must be not only to serve criminal justice, but to allow the people of Pennsylvania to learn beyond doubt what influenced and motivated the decisions involved: Mr. Sprague's at the time of the homicide, and now Mr. Specter's.

Prosecutors with personal associations that could influence—or give the appearance of influencing—decisions crucial to the criminal justice system should not be allowed to manage such cases. The people of Pennsylvania have the right to demand that protection. Mr. Specter has refused to give his assurance that that demand will be met, in reviewing the Applegate case or in the future.

Mr. Speaker, with respect to the lawsuit that he filed which is still pending, a several million dollar lawsuit in which the House of Representatives, by indirection, in its continued rubberstamping of the misbehavior of its chief counsel, is unwittingly being fast drawn as a party, I offer a news report of April 21, 1973, also from the Philadelphia Inquirer:

INQUIRER IS SUED BY SPRAGUE

The Inquirer, three of its editors and four reporters were sued for libel Friday by Richard A. Sprague, first assistant district attorney of Philadelphia.

Sprague, in a 23-page complaint, contends that a series of recent Inquirer articles have "blackened" his reputation, exposed him to public ridicule, questioned his integrity and caused him "severe emotional distress."

The articles, Sprague contends in the suit filed in Common Pleas Court, were malicious, false and defamatory.

Sprague, requesting a jury trial, is asking for an award of $2 million. State law, however, does not allow a plaintiff to request a specific sum.

The disputed articles are news accounts of a court-martial hearing of three state troopers accused of wire tapping phones of the State Crime Commission and of Sprague's role in a 1963 homicide case, involving the son of Rocco Urella, former commissioner of the State Police.

The Inquirer's account of the court-martial proceedings reported the testimony of a witness who said he was told that Sprague used the alias of "Nicholas Pratko." The articles also said that Sprague vigorously denied using any alias.

Other articles mentioned in the suit described Sprague's role in the homicide case of John Applegate, who died in 1964 as a result of a blow to the head. Urella's son, Rocco Jr., and a classmate, Donald Scalessa, were in Applegate's apartment the night he died.

Scalessa was later arrested in the incident but the charges were dropped at a magistrate's hearing. The articles reported that Sprague, then chief of homicide in the District Attorney's office and a friend of Urella Sr., recommended against the arrest of both Urella Jr. and Scalessa.

The Applegate articles were written by Kent Pollack and Aaron Epstein. Greg Walter, who is being prosecuted for allegedly violating the state's wiretapping law, assisted in The Inquirer investigation.

Sprague claims Walter is "out to smear and destroy" him because of the pending wiretap prosecution.

Gene Roberts Jr., executive editor of The Inquirer, said he had "the utmost confidence in the accuracy of the stories and the reliability of our reporters."

"We welcome the suit if, as we hope, it will force the disclosure of the complete records and police files of the Applegate case," he said.

The District Attorney's office has refused to release the entire files of the case.

Besides The Inquirer, Roberts, Walter, Epstein and Pollack, other defendants are Creed C. Black, editor; Michael Pakenham, associate editor; Howard Shapiro, reporter, and Knight Newspapers Inc., The Inquirer's parent company.

Mr. Speaker, all in all, to sum up, it has been very distressing to find, and I cannot quite describe the depression of spirit that on this level, the highest legislative level of the Nation, that anybody would have had to confront this experience.

I served 3 years on the city council, 5 years in the State senate, and 15 years and 3 months on this level, and I have never seen such deterioration.

It is depressing only because it is in the most exalted sense that we think of this great institution. It seems to me that the level of standard of honesty, of decency and comportment in as good and honest a background as a man could probably muster, or a woman, for that matter, is reflected in the recent approval by the House of a strong ethics bill.

It is inconceivable to me that the House would demand of its Members limitation on outside income, strict fidelity for the rules of the House, strict limitation in the amount and in the type of gift that could be received extraneously by the Member and yet hold no accountability for a hired hand.

It is so unreasonable that it is very difficult for an outsider to grasp the dimensions until he reads and then cannot understand.

The mail coming in from everywhere in this country reflects a disbelief that such things would be countenanced by the great U.S. House of Representatives.

I feel that at the time, referred to repeatedly by the Speaker and the majority leader, that they had tried to get hold of me, that it becomes obvious that their intention was plain.

They were going to finish that coffin. The only thing that was disturbing them was that I would not sit still in that coffin while it was completed. At no time has the leadership admitted the communications and the contacts I did make immediately at the time the issue was hot—February 10–11. They are talking about subsequent to February 19. By that time there was only one thing I could do, and that was to wait and see when the leadership would prove that it would own up to whatever its true feelings were. In my heart, mind, and soul, I feel I have been dealt with treacherously, cravenly, and cowardly.

Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alaska (Mr. YOUNG) is recognized for 20 minutes.

IN THE INTEREST OF PRODUCING NEW SUPPLIES, THE NATURAL GAS STRIPPER WELL EXEMPTION BILL WILL BE REINTRODUCED ON THURSDAY

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from New York (Mr. KEMP) is recognized for 10 minutes.

Mr. KEMP. Mr. Speaker, several days ago seven of my colleagues and I sent out a "Dear Colleague" letter announcing our intention of reintroducing the Natural Gas Small Producer Exemption Act legislation on Thursday of this week.

That letter was signed by BILL MOORHEAD of Pennsylvania, LUD ASHLEY of Ohio, CARL PERKINS of Kentucky, RICHARDSON PREYER of North Carolina, CARLOS MOORHEAD of California, RALPH REGULA of Ohio, and MICKEY EDWARDS of Oklahoma, and myself. The grapevine has it that LUD ASHLEY will be the chairman of the New Select Committee on Energy; our congratulations to him.

As those signatures reflect, this is a matter of nationwide importance. It is not restricted to the Appalachian and certain Midwestern States. There are 30 States in this country with wells covered by the provisions of our bill. I will chart out this information in a moment.

Last month's nullification of the Government's mid-Atlantic offshore oil and gas leases program by a Federal district court underscores the importance of bringing additional on-shore natural gas onto line immediately.

It also underscores the importance of enacting the provisions of the Natural Gas Small Producer Exemption Act, whose sponsorship reflects broad, bipartisan support. This support is drawn from those who oppose broader deregulation, as well as those who support partial or complete deregulation.

The legislation would exempt sales by small producers—very tightly defined—of certain natural gas from regulation of the Federal Power Commission and from the requirement of certificates of public convenience and necessity of section 7(c) of the Natural Gas Act. We are talking here of the low production wells referred to as stripper wells.

Of all the natural gas now moving in interstate commerce, about 2 to 3 percent is derived from stripper wells. Inasmuch as this winter's shortage shows us just how narrow the dividing line is between having enough and not enough, one can see the importance if doubling or tripling the output from these stripper wells.

One can see the little effect it would have on final price of natural gas at the burner tip for consumers. Yet to the small producers who own these wells, it would be enough to uncap them, increase their flow, or start up new ones.

We feel this legislation has additional advantages.

First, since stripper oil wells are already released from price controls, the search for and production of small volumes of natural gas would be given equal market incentives.

Second, a significant amount of administrative burden would be lifted from the Federal Power Commission or its successor agency.

Third, the bill supplements the important research and development effort by ERDA to commercialize the Devonian shale gas by encouraging industries using natural gas to drill or recondition their own wells in the eastern shale areas.

Fourth, these supplies are critically needed by industrial users. I have obtained from the U.S. Bureau of Mines a chart showing natural gas production and producing wells by State in the United States. This information proves our case about this bill being of importance to every section of the country. The chart follows:

U.S. NATURAL GAS PRODUCTION AND PRODUCING WELLS BY STATES

Area, State	Production (million cubic feet)	Producing wells (12-31)	Production per year (million cubic feet)
Appalachian:			
Kentucky	60,511	7,386	8.2
Maryland	93	15	6.2
New York	7,628	900	8.5
Ohio	84,960	10,382	8.2

U.S. total	20,108,661	130,364	154.2

Source: U.S. Bureau of Mines.

Mr. Speaker, it was on this basis that we prepared the provisions of our legislation. The text of this bill follows:

H.R. —

A bill to exempt sales by small producers of certain natural gas from regulation of the Federal Power Commission and from the requirement of certificates of public convenience and necessity of section 7(c) of the Natural Gas Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding any provision of the Natural Gas Act or any other provision of federal law or any contractual price limitation applicable thereto on the date of enactment of this Act, sales of any natural gas (except synthetic or liquified natural gas) by small producers shall be exempt from regulation of the Federal Power Commission and may be made without any application for a certificate of public convenience and necessity under section 7(c) of the Natural Gas Act (15 U.S.C. 717f(c)); and any such sale shall be made at a price not less than that which adequately compensates the seller for current costs, including an adequate return on investment, as determined by the seller and the purchaser.

SEC. 2. For purposes of this Act—

(a) "small producer" shall mean an independent producer of natural gas

(1) who is not affiliated with a natural gas pipeline company or a producer who is not included within this definition;

(2) whose total sales of natural gas on a nationwide basis, together with such sales of affiliated producers, are not in excess of 10 million Mcf at 14.50 P.S.I.A. during any calendar year; and

(3) whose average production per well for all wells for such calendar year is not in excess of 100 Mcf per day.

(b) "affiliated producers" are persons who, directly or indirectly, control or are controlled by, or are under common control with, a small producer.

This bill, as I indicated a moment ago, has found broad support in this Chamber. A list of the cosponsors as of this afternoon—and it is growing each day—includes:

Mr. Ashley of Ohio.
Mr. Brown of Ohio.
Mr. Cederberg of Michigan.
Mr. Cochran of Mississippi.
Mr. Collins of Texas.
Mr. Dan Daniel of Virginia.
Mr. Dent of Pennsylvania.
Mr. Derwinski of Illinois.
Mr. Devine of Ohio.
Mr. Dornan of California.
Mr. Duncan of Tennessee.
Mr. Edwards of Oklahoma.
Mr. Flippo of Alabama.
Mr. Forsythe of New Jersey.
Mr. Guyer of Ohio.
Mr. Harsha of Ohio.
Mr. Hyde of Illinois.
Mr. Kemp of New York.
Mr. Lent of New York.
Mr. Kindness of Ohio.
Mr. Lederer of Pennsylvania.
Mr. Lott of Mississippi.
Mr. Madigan of Illinois.
Mr. Mollohan of West Virginia.
Mr. Montgomery of Mississippi.
Mr. Moorhead of Pennsylvania.
Mr. Moorhead of California.
Mr. Murphy of Pennsylvania.
Mr. Murtha of Pennsylvania.
Mr. Myers of Indiana.
Mr. Neal of North Carolina.
Mr. Pattison of New York.
Mr. Perkins of Kentucky.
Mr. Preyer of North Carolina.
Mr. Price of Illinois.
Mr. Pursell of Michigan.
Mr. Quillen of Tennessee.
Mr. Rahall of West Virginia.
Mr. Regula of Ohio.
Mr. Rudd of Arizona.
Mr. Sebelius of Kansas.
Mr. Stockman of Michigan.
Mr. Symms of Idaho.
Mr. Vander Jagt of Michigan.
Mr. Walker of Pennsylvania.
Mr. Walgren of Pennsylvania.
Mr. Walsh of New York.
Mr. Whitehurst of Virginia.
Mr. Charles Wilson of Texas.
Mr. Yatron of Pennsylvania.

Mr. Speaker, we will be reintroducing this legislation at the close of business on Thursday, March 31. We invite those who share with us a commitment to bringing additional onshore quantities of natural gas onto line immediately are invited to join with us in our cosponsor-

ship. Those who do should contact either BILL MOORHEAD's office or mine.

CONGRESSIONAL PAY RAISE DEFERRAL: AN IDEA WHOSE TIME HAS COME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 10 minutes.

Mr. WHALEN. Mr. Speaker, I note with approval that there is an effort underway to exclude Members of Congress from the annual adjustment of Federal employees' salaries that will occur in October. The obvious reason for this exclusion is that we recently have received a 28-percent increase in our salary as a result of the Peterson Commission recommendations. It would, therefore seem unjustifiable—not to mention politically unwise—to provide ourselves an additional 6.5 percent compounded pay increase.

As a matter of fact, the Senate 2 weeks ago passed S. 964, a bill to exclude Members of Congress and certain top-level executive and judicial branch officials from the 1977 cost-of-living increase. The vote was 93 to 1 and there was no adverse comment during floor action on the bill. Now, several Members of the House are promoting similar legislation in this body.

Of course, I believe it is a good idea to take us out of the loop for this year's cost-of-living increase, and I do intend to support this proposal. But I also think we should be looking beyond this October and beyond this specific legislative proposal, which is of a once-only character.

Passage of S. 694 or similar legislation will do nothing to correct the major problems now found in our congressional salary adjustment mechanisms. Rather, it would merely let us off the hook temporarily and perhaps permit us to postpone once again the needed procedural reforms.

On several occasions, Mr. Speaker, I have used this forum to point out that there are certain defects inherent in our present mechanisms for congressional pay raises. Correcting these structural flaws seems to me to be far more important, in the long run, than focusing our attention solely on the short-term question of how much more money we may or may not receive this October.

The most glaring problem with the present Quadrennial Commission and cost-of-living increase laws is, of course, the ability of Congress to raise its pay without any vote occurring. At a minimum, I believe the existing statutes should be revised to require a recorded vote by the Members of both Houses before a pay raise could go into effect.

There is another, more fundamental, matter that must be addressed as well. This is the problem of Members of Congress now being placed in the position of having to decide on their own salaries. It is bad enough that this situation has existed for a number of years, but now we find ourselves placed in this difficult situation at regular intervals.

After we finished debating the new congressional code of ethics which I support, I identified this situation of voting on our own salaries as being the biggest single conflict-of-interest problem that remains to be resolved. See the CONGRESSIONAL RECORD for March 7, page 6458. In my opinion, it is an unquestionable conflict-of-interest for us to be deciding—either by our vote or our failure to vote—on current congressional salary levels, a matter of immediate and personal financial interest to each and every one of us.

On the first day of this Congress I introduced a bill, the Congressional Pay Raise Deferral Act, H.R. 1365, that would change the law so that no increase in congressional salary could occur until the start of the Congress following the one in which it is approved. The entire House and one-third of the Senate would have to stand for election during the interval between approval and receipt of the higher salary.

In this way, we no longer would be deciding directly on our own salaries, but instead on the salaries of those who will be elected to serve in the next Congress. Also, this would assure our constituents a better opportunity to assert their views on this very sensitive subject.

On January 24 I placed in the RECORD—page 1912—a list of the 37 States whose constitutions prohibit State legislators from raising their own salaries during their term of office. That list included my home State of Ohio.

And on February 3 I placed in the CONGRESSIONAL RECORD—page 3485—an article tracing the history of congressional pay raise deferral proposals back to 1789, when James Madison proposed a constitutional amendment to this same effect.

Last month, President Carter twice specifically endorsed the concept of congressional pay raise deferral. Also, the House Post Office and Civil Service Committee's ad hoc subcommittee that was formed to consider the Quadrennial Commission's proposals also heard a great deal of testimony on the merits of congressional pay raise deferral. At the conclusion of these hearings, the panel's chairman, BILL FORD of Michigan, indicated that the final report would endorse this idea in principle.

Currently, the Post Office and Civil Service Committee is forming a special ad hoc legislative panel to consider proposed reforms of our congressional pay adjustment mechanisms.

The Congressional Pay Raise Deferral Act is now cosponsored by over 90 Representatives, and has received widespread support from the public and the news media. It is an idea whose time has come.

So, yes, I do support the proposal that Members of Congress should not be included in the anticipated 6.5 percent cost-of-living adjustment that is due this fall. But I sincerely hope that before then we will have enacted H.R. 1365, or some similar measure, in order to affect some meaningful long-term reform.

Because if we do not soon change the law regarding the processes of congressional salary deliberations, we repeatedly will find ourselves in the awkward position of once again deciding on our own salaries. The solution to this problem is simple and popular. All that remains is to do it.

MRS. FRANCES P. BOLTON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER of Ohio. Mr. Speaker, today would have marked the 92d birthday of our former colleague, Mrs. Frances P. Bolton. Mrs. Bolton's death early this month saddened all of us who had the good fortune to know and work with her.

While I and other Members have previously paid tribute to Mrs. Bolton, I wish to take the occasion of her birthday to again reflect upon the life of this truly remarkable public servant.

What I most vividly recall about this gallant woman was her drive and determination. Neither her age nor sex were ever barriers in the way to serve her country and speak her mind. Whenever she set her sights on something, she went after it with all the grit and energy she had. With quiet dignity and lively wit, she captivated her audiences and achieved her objectives. Convinced the Nation needed an Army School of Nursing in World War I, private citizen Bolton sold the War Department on the idea and the school was established. Later in World War II, her legislation created the Cadet Nurses Corps. Indeed today, the nursing profession is indebted to her for her pioneer efforts.

No idle visionary, Frances Bolton was interested in results—getting things when they had to be done. When the overview of George Washington's Mount Vernon was threatened by commercialization, Mrs. Bolton purchased the 500 acres, thus preserving the home's splendor.

Born to wealth, Mrs. Bolton nevertheless exhibited throughout her life uncommon compassion for those less fortunate than herself. She understood the needs and hopes of America's working men and women. In public she fiercely championed the rights of women and minority, devoting herself to expanding their educational and employment opportunities. In private she gave her time, boundless energy, and wealth to innumerable philanthropic causes.

It was a rare privilege for me to have served with Mrs. Bolton, whose life of service to others is an inspiration to all of us.

REMARKS ON RECOMBINANT DNA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. HOLLENBECK) is recognized for 5 minutes.

Mr. HOLLENBECK. Mr. Speaker, the series of hearings which started today in the Science, Research and Technology Subcommittee of the Science and Technology Committee should help separate fact from fiction concerning recombinant DNA research now underway in the United States.

It was only a generation ago that

James Watson and Francis Crick made their epic discovery of the precise molecular structure of DNA, the substance which carries the determining hereditary chemicals or genes. Since then research on DNA has progressed almost at a logarithmic rate, as has controversy surrounding it.

The prospect of DNA recombinant molecule research or genetic engineering conjures up mixed feelings among the general public. A large part of the dilemma facing most citizens is the honest desire to understand the benefits and hazards which surround this scientific endeavor without the distortion or theatrics which 30-second spot news features sometimes contain. Whatever the pros and cons of recombinant DNA research may be, the public's interest has been sparked and can only be satisfied by a thorough review of what this emerging science holds for us in the future.

The issue of DNA research contains elements of both science per se and public policy. The purely scientific questions focus on prospects for the development of recombinant DNA research and what it offers in terms of improving the human condition as well as agricultural applications. The apprehension lurking in the back of many persons' minds is that the same powerful technology which produces such genetic breakthroughs might one day backfire and cause irreparable harm to our environment or to the human race. One goal of the DNA hearings is to shed light on whether such an apprehension is well-founded or exaggerated. If the apprehension is well-founded, then the next step is to search for a means of containing any possible adverse reactions without jeopardizing our use of any beneficial applications of genetic engineering. Recent developments and research on natural selection at the molecular level may again change the emerging picture.

These considerations involve substantial public concern and require a corresponding evidentiary input. The evidence presented during this series of hearings could shape the future direction of American public policy on recombinant DNA research. I am sure we all look forward to learning more about this intricate field in the coming months so that we can make a well-informed, objective, and analytic contribution to legislative consideration of the future of genetic engineering.

LET US DO WHAT HONOR DEMANDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. HYDE) is recognized for 5 minutes.

Mr. HYDE. Mr. Speaker, I am today introducing a resolution directing the interment of an Unknown Soldier from the Vietnam war at Arlington National Cemetery.

The men who answered their country's call in Vietnam are entitled to the same recognition accorded those who served in other wars.

The courage and conviction, determination, and devotion that these men displayed in a strange, distant, and unpopular war must place them in the very front ranks of all the heroes in our history to whom the concept of "duty' was more than a word.

The President has granted a full pardon for Vietnam-era draft evaders. The Pentagon announced yesterday a review and upgrading of undesirable and general discharges, as a program of "forgiveness and compassion."

When are we going to do what honor demands?

I know of no more appropriate time for the Congress of the United States to put itself on record by honoring those who, at great sacrifice, served in obedience to the law, above and beyond the call of duty.

Congress has already authorized a special crypt at Arlington National Cemetery. The crypt has been constructed. There is no display of medals, ribbons, and tributes to honor the Vietnam veterans. These tributes are displayed only after the interment of the Unknown Soldier.

I urge my colleagues to join with me in cosponsoring my resolution.

Let us do what honor demands.

LEGISLATION TO ALTER POLICY FOR LEASING PUBLIC DOMAIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arizona (Mr. UDALL) is recognized for 5 minutes.

Mr. UDALL. Mr. Speaker, today I am introducing, with Congressman SEIBERLING and several of our colleagues from the Interior Committee, a bill to alter the policy for leasing the public domain.

This bill would not allow leases granted after 1980 to be awarded to companies that are horizontally or vertically integrated, or that are oil giants involved in joint ventures with other giants.

One of the responsibilities of the Interior Committee is to insure that the public domain is developed in a manner that best serves the interests and needs of the Nation. Traditionally, resources on public lands have been leased in accordance with the needs of the developers. While this may have been sensible in the 19th and early 20th centuries when we seemed to have an endless supply of resources and wanted to build an industrial base as quickly as possible, our perspective is different now and our leasing policy should be modified.

A major portion of the remaining energy resources are located on or under Federal lands. The Federal Trade Commission estimated that the Federal Government owns 40 percent of the total U.S. coal resources, 60 percent of the Western coal; 100 percent of OCS reserves, past State borders, and the OCS provided 16 percent of gas and 11 percent of oil produced in 1974; 80 percent of high grade oil shale; 50 percent of geothermal resources; and 50 percent of high quality uranium.

I plan to hold hearings in the Interior Committee to examine how such legislation could change the pattern of development of the public lands.

In closing, I would like to include a statement from "Horizontal Divestiture of Energy Companies and Alternative Policies," a booklet prepared by Hossein G. Askari, Timothy W. Ruefli, and Michael P. Kennedy for the Graduate School of Business at the University of Texas at Austin. This booklet is the result of studies financially supported by a gift from the American Petroleum Institute:

There is available another policy to influence directly the level of horizontal concentration, and thus indirectly influence competitiveness. The reason for the existence of this alternative policy, as shown earlier, is that in the United States a large share of the proven and potential energy reserves is under government, chiefly federal, lands. In a real sense, the federal government is the monopolist in U.S. energy, and its behavior is critical to the future development of energy supplies in the U.S. Recent debates in the area of energy have focused on direct legislative action, without taking into account the federal ownership of energy resources. In the future, coal, and to a lesser extent shale, will be dominant resources; and since the federal government holds such substantial amounts of these resources, it has wide control over the future of the U.S. energy picture. In this role, it must make its decisions about mineral resource leasing in a way that promotes U.S. energy goals.

To be specific, the federal government, through its leasing policy, can influence horizontal concentration levels without incurring the costs of divestiture. Other energy goals must of course be considered by the government in its exercise of its policy prerogatives. The government could, for instance, promote lower concentration by limiting leases to companies which have a small part of the national market. The government could also promote increased regional competition by leasing only land to companies that have a small part of a particular regional market. Such federal leasing policies should be coordinated with state governments, since state lands are bordered by government holdings and in many cases the state lands are too small to be economically developed.

Government policies toward the leasing of such land are critical both to U.S. energy goals and to the general functioning of the energy sector, especially with respect to increased competition. In view of the relative importance of government holdings, the government can use leasing policies to maximize any objectives function it desires. Thus it is most appropriate to examine leasing policies with a view to their impact on important energy goals.

CORRECTION IN THE TEXT OF H.R. 5064

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 5 minutes.

Mr. LEVITAS. Mr. Speaker, 2 weeks ago, on March 15, I introduced the proposed Disability Insurance Amendments of 1977, H.R. 5064.

I have just learned, though, that a line was inadvertently omitted from the text of this bill. On page 4, between lines 12 and 13, the words "in the national economy, regardless of whether such work exists" should have been included. This change, with the additional words underlined for emphasis, will make the

sentence beginning on line 4 read as follows:

An individual (except a widow, surviving divorced wife, or widower for purposes of section 202 (e) or (f) shall be determined to be under a disability only if his physical or mental impairment or impairments, and their effect upon him, are of such severity that he is not only unable to do his previous work but cannot, considering his age, education, degree of literacy, work experience, and residual skills, engage in any kind of substantial gainful work which exists *in the national economy, regardless of whether such work exists* in the immediate area in which he lives, or whether a specific job vacancy exists for him, or whether he would be hired if he applied for work.

SMALL BUSINESS DEVELOPMENT CENTER ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. BALDUS) is recognized for 5 minutes.

Mr. BALDUS. Mr. Speaker, I am introducing today a bill entitled "The Small Business Development Center Act of 1977." The bill provides authority for the Small Business Administration to establish Small Business Development Centers at cooperating universities to aid small businesses with their management problems. As importantly, the Small Business Development Centers would develop information, data and research for small business.

The need for management assistance for small business is profound. Over 400,000 small businesses fail each year. This predictably dislocates 1,000,000 people, approximately, and greatly affects competition in the market areas these businesses occupy.

The SBA reports that 90 percent of these failures are traceable to lack of managerial skill on the part of the entrepreneur. SBA is aware of this problem, and in fact has management assistance programs in effect at present, most notably the Small Business Institute and the management information and training program.

Clearly, however, this limited emphasis on management assistance by SBA is not enough. As a matter of perspective, nearly 70 percent of SBA's personnel devote themselves to operation of the loan programs. The management assistance programs are understaffed and relatively limited. Yet, it is clear that management assistance would be a key factor in the small business survival given the proper priority. The benefits would undoubtedly show up in a saving to the loan program.

Presently, the SBA has in existence a pilot program called the Small Business Development Center program. This program, while given only limited funding has been eminently successful in terms of participation by small businessmen. This program, while effective, is in need of expanded staff and financing.

I believe a real benefit to small business across the country will accrue from this program. Small Business Development Centers will provide for small business what the Agriculture Extension Service did for agriculture. The program will help infuse small business with the creativity, resources, fresh approaches, and talents of the universities. It will acquaint our youth with a practical business sense, at the same time that it provides entrepreneurs with management assistance.

Furthermore, it is my hope that this program will bring to small businesses what the Federal Government has failed to provide: A body of research, information, data, and analysis which will help to give small business a clearer picture of itself. Hopefully, this will lead to clearer and more universal definitions of small business, something of which we are sorely in need.

Let me briefly address myself to the bill. This is a companion bill to S. 972, introduced by the Honorable Senator NELSON in the Senate on March 10. Hearings were held on the bill March 23, and action is taking place on it this week.

The responsibility for administering the program will be assigned to the SBA. The bill authorizes some changes and additions to the organization in order to adequately manage the program. Appropriate changes will be made at the SBA.

An analyst will be assigned to each problem and will stay with it through the entire process. Eventually, various centers will begin to develop general approaches to the needs of the area, utilizing the resources available to the university. Other centers will do depth research, provide innovation centers, and develop and share technology. The bill also provides for a network of the centers so that centers can refer clients with special problems to the location with the resources which can best solve the problem.

The Assistant Administrator of Management Assistance will be upgraded to the Associate Administrator for Management and Technical Assistance who, in addition to his current duties, will assume the responsibility for this new program. A new position of Deputy Associate Administrator for Management and Technical Assistance is created. This person will report to the Associate Administrator for Management and Technical Assistance and will have sole responsibility to administer the small business development center program and to serve as a member of the SBA Management Council.

An advisory board is established to assist the Deputy Associate Administrator in setting policy, selecting participating universities, and establishing budgets. The board shall be appointed from universities, small business, associations representing small business, and other Government agencies who have programs that interact with this program.

Universities wishing to participate in the program will make application to the SBA, demonstrating their capability to provide the necessary assistance to small business. Since the act specifies that the Federal Government will fund only 75 percent of the center's expenses, the application will also include budget data and the source of the additional funds. The local funding availability plus the general attitude of the university toward community service are important ingredients to insuring the success of the program.

The act intends that the program will evolve gradually. Fifteen million dollars is authorized for grants and administrative expenses for fiscal year 1978.

In addition to creating centers, the act calls for the establishment of research grants to be awarded to universities for specific studies of problems that affect small business, on a broad scale. The bill authorizes $5,000,000 for these grants for fiscal year 1978.

This bill provides a long awaited investment in the kind of free enterprise small business represents. It is a necessary commitment, and a minimum commitment to the long term improvement of the lot of small businessmen.

I am including a text of the bill for the RECORD:

H.R. —

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Small Business Development Center Act of 1977".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds that—

(1) small business concerns rarely have access to useful and practical advice, information, and services of the types which are available to large business concerns or, through the Department of Agriculture extension service, to farmers and agricultural business concerns;

(2) small business would benefit from the availability of a single source of assistance in obtaining loans and developing equity capital, in obtaining, interpreting, and applying analysis, advice, training and information including but not limited to management, market, or product development, manufacturing, finance and technical information, in obtaining technical advice and assistance relating to government regulation, policies, and legal problems, and in the development of entrepreneurs; and

(3) Universities are aware of local problems and local conditions in the business communities in the United States and are better equipped than the Federal Government to develop and establish programs designed to aid small business concerns in such communities.

(b) It is the purpose of this Act to stimulate economic diversity and to foster competition by encouraging the development of Small Business Development Centers through a grant program giving Universities wide flexibility in developing and establishing centers to aid in the development and growth of existing and new small business concerns.

DEFINITIONS

SEC. 3. As used in this Act—

(1) the term "Administration" means the Small Business Administration;

(2) the term "Center" means State Small Business Development Centers and regional Small Business Development Centers established or operated with assistance furnished under this Act;

(3) the term "Board" means the Small Business Development Center Advisory Board;

(4) the term "University" means any public or private non-profit institution of higher education which is located in any State; and

(5) the term "State" means a State of the United States, the District of Columbia, or any territory, possession, or commonwealth of the United States.

CENTER GRANTS

SEC. 4. (a) The Administration, acting through the Associate Administrator for Management and Technical Assistance, is authorized to make grants to Universities to assist them in developing and operating Centers to carry out a program of furnishing small businesses with a broad range of advice, information, and assistance.

(b) The Administration shall maintain a clearing house to provide for the dissemination and exchange of information between Centers, including information obtained under section 8 of this Act.

APPLICATIONS

SEC. 5. Assistance under section 4 shall be made available to a University only if that University has submitted an application to the Administration containing such information and assurances as the Administration may prescribe to assure that the University is competent to carry out activities eligible for assistance under this Act.

LIMITATIONS

SEC. 6. (a) Except as provided in subsection (b), a grant to finance the operation or development of a Center may not exceed 75 percent of the cost of eligible activities in the operation or development of the Center, as determined by the Administration, after a thorough review of the program budget submitted by the University. Assistance made available pursuant to this Act may be used only to support activities described in section 2(a)(2) or such other comparable activities as are approved by the Administration that are designed to benefit small business concerns by providing direct information or assistance or by providing access to business analysts who can refer small business concerns to available experts or consultants.

(b) The Administration may waive the 75 percent limitation contained in subsection (a) with respect to a grant to a regional Center which shall assist and cooperate with State Centers in carrying out capital intensive research or activities involving product innovation, technological opportunity analysis, or other high cost activities which are approved by the Administration.

PROGRAM MANAGEMENT

SEC. 7. (a) There is hereby established in the Small Business Administration a division to be known as the Small Business Mangement and Technical Assistance Division. The division shall be headed by an Associate Administrator for Management and Technical Assistance who shall be appointed by the Administrator, and shall receive compensation at the rate provided by law for other Associate Administrators of the Small Business Administration.

(b) The Administrator shall appoint a Deputy Associate Administrator for Management and Technical Assistance who will report to the Associate Administrator for Management and Technical Assistance, and who will be a member of the Management Board of the Administration.

(c) The sole responsibility of the Deputy Associate Administrator for Management and Technical Assistance shall be to administer the Small Business Development Center Program. His duties shall include, but are not limited to, establishing the annual program budget, reviewing the annual budgets submitted by each Center, establishing appropriate funding levels therefor, selecting Centers to participate in this program under this Act, establishing policies implementing the provisions of this Act, reviewing applications for research grants under section 8 of this Act, and conducting audits of recipients of grants under sections 4 and 8 of this Act. The Deputy Associate Administrator for Management and Technical Assistance shall confer with and seek the counsel of the Board in carrying out his responsibilities described in this section.

(d)(1) There is established a Small Business Development Center Advisory Board which shall consist of 14 members, 9 of whom are to be appointed from civilian life by the President, by and with the advice and consent of the Senate, and shall be persons of outstanding qualifications known to be familiar and sympathetic with small business needs and problems. Of the 9 members so appointed, no more than 3 shall be from Universities or their affiliates and 6 shall be from small business or associations representing small business. At the time of the appointment of the members of the Board, the President shall designate at least one-third of the members and a minimum of 1 member from each category whose term shall end one year after the date of his appointment, and a second third whose term shall end 2 years after the date of his appointment. Members of the Board not designated for one or two year terms under the preceding sentence and the successors of all members of the Board shall have terms of office of three years. The other members of the Board shall be the National Science Foundation Director of the Office of Small Business Research and Development, Assistant Secretary of Commerce for Economic Development, Assistant Secretary of Commerce for Science and Technology, Assistant Secretary of Health, Education, and Welfare for Education, and the Assistant Administrator for Industry Affairs and Technology Utilization of the National Air and Space Administration.

(2) The Board shall elect a chairman and advise, counsel, and confer with the Deputy Associate Administrator for Management and Technical Assistance in the carrying out of his duties as described in section 7(c) of this Act. The Board shall meet at least quarterly and at the call of the Deputy Associate Administrator for Management and Technical Assistance. Each member of the Board, other than representatives of the Federal Government shall be entitled to be compensated at a rate not in excess of the per diem equivalent of the highest rate of pay for individuals occupying a position under GS-18 of the General Schedule for each day he is engaged in activities of the Board and shall be entitled to be reimbursed for his necessary expenses as a member of the Board.

RESEARCH GRANTS

SEC. 8. The Administration acting through the Associate Administrator for Management and Technical Assistance, is authorized to make grants to universities, public and private organizations, and business concerns, to support research to identify and solve managerial, economic, financial, operational, technological, or other problems which affect small business concerns. To carry out its activities under this section, these are authorized to be appropriated not to exceed $5,000,000 for fiscal year 1978.

AUTHORIZATION

SEC. 9. There are authorized to be appropriated for grants under section 4 of this Act and for salaries and expenses under section 7 of this Act not to exceed $15,000,000 for fiscal year ending September 30, 1978.

REPORTS

SEC. 10. The Administration shall transmit annually to the Committees of Small Business in the Senate and the House of Representatives a report on its activities under this Act, and for the purpose of preparing such a report, the Administration is authorized to require any recipient of assistance under this Act to furnish it with such information annually or otherwise as it deems appropriate.

HON. RAY ROBERTS, CHAIRMAN OF THE COMMITTEE ON VETERANS' AFFAIRS EXPRESSES DISAPPROVAL OF PARDONS FOR DRAFT EVADERS AND UPGRADING OF BAD DISCHARGES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ROBERTS) is recognized for 5 minutes.

Mr. ROBERTS. Mr. Speaker, yesterday Secretary of Defense Harold Brown announced that the President approved his plan to consider upgrading more than 432,000 undesirable and general discharges issued to veterans who served during the period August 4, 1964 through March 28, 1973.

Service members presently in a desertion status will be eligible to participate in the program.

In a letter to the President dated January 6, 1977, I expressed my opposition to his decision to grant pardons to draft evaders. I informed the President that I thought it would be a tragic mistake to give serious consideration to the upgrading of "bad discharges" and that I would strongly oppose any such proposal.

Mr. Speaker, the action taken by the Carter administration yesterday could cost the Federal Government more than $100 million in veterans' benefits for individuals whose conduct and behavior while on active duty were less than desirable. This comes at a time when we are having extreme difficulty obtaining adequate benefits for various veterans' programs, especially the funding necessary to maintain the quality of medical care mandated by Congress for those who served with honor and distinction and who were injured on active duty while serving in Vietnam.

I question the priorities of this administration as I did with the past administration concerning benefits and services for veterans. Prior to leaving office, President Ford directed the Secretaries of the various service departments to upgrade certain discharges of those who had applied to his Clemency Board unless there were compelling reasons not to upgrade such discharges. I understand the Veterans' Administration has already received approximately 180 cases resulting from this action and the total number, I am told, may exceed 500.

This administration has gone beyond that recommended by the previous administration and is now directing the various military services discharge review boards to upgrade discharges by categories for thousands of veterans. In addition, the Board must review, on a case-by-case basis, hundreds more. In addition to the $100 million in veterans' benefits that must be paid by the Federal Government as a result of this action, according to the Department of Defense, additional manpower necessary to carry out the procedure for review of these discharges will exceed between $1.7 and $2.4 million. I feel the estimate is far too low. The cost for publicity alone necessary to inform those with bad discharges the procedure under which they may apply will exceed $4.7 million. If

military counsel is provided applicants as proposed, it will cost the Federal Government more than $14 million. I believe most individuals seeking counsel will demand civilian counsel and this cost alone could exceed $100 million. In addition, increased costs to the General Services Administration for identifying and pulling the records will certainly be hundreds of thousands of dollars and could go into the millions.

Mr. Speaker, I regret the President's decision. He is wrong. It seems to me the administration is, in a unique way, taking from those who served honorably and giving to those who served under conditions less than honorable. It simply does not make any sense to me and I would suggest that the overwhelming majority of this body agrees with me.

LEGISLATION PERMITTING IMPORT-EXPORT BANK TO EXTEND CREDIT FOR AMERICAN SALES TO PEOPLE'S REPUBLIC OF CHINA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AuCoin) is recognized for 5 minutes.

Mr. AuCOIN. Mr. Speaker, I am today introducing legislation that will permit the Export-Import Bank of the United States to extend credit for American sales to the People's Republic of China. I am joined in my sponsorship by the gentleman from Illinois (Mr. Price) and the gentleman from Wisconsin (Mr. Reuss).

Until recently, the question of Eximbank financing for sales to the People's Republic was an academic one. China was committed to a policy of purchasing from abroad only by cash or through short-term credits. Economic self-sufficiency was the cry, led by Madame Mao and her radical cohorts.

In the last several years, however, there has been a growing tendency on the part of China to finance purchases on a medium-term basis. These trends have been given further impetus by recent internal changes within the People's Republic. The ascension of Hua-Kuo-feng as premier of China and the purge of Madame Mao, to give but two examples, have further strengthened the hand of those Chinese leaders who can be expected to seek increased foreign trade.

Export promotion banks in Japan and Western Europe moved rapidly to extend lines of credit to the Chinese. The U.S. Export-Import Bank is prohibited by charter restriction from extending credit for sales to China. The first of our bills would amend the charter to correct this. A further limitation on the bank is the Jackson-Vanik amendment to the Trade Reform Act of 1974. The second of our bills would exempt China from that amendment.

As you know, the Jackson-Vanik amendments are aimed at a specific problem in the Soviet Union. But unlike the U.S.S.R., China has not been accused of discriminating in its emigration policies on an ethnic basis. Ethnically, the composition of China is 99 percent Han Chinese. The Chinese Government has not been accused of preventing emigration or of imposing exorbitant fees and taxes on those wishing to emigrate. In fact, as if to make certain that it was never accused of restricting emigration, the Chinese Government has been allowing increased numbers of persons to leave for Hong Kong.

In 1971, the Chinese Government allowed 21,000 persons to emigrate from China. This figure went up to 50,000 in 1973. Moreover, China has longstanding immigration treaties with Australia and Canada to expedite the reunion of families. The U.S.S.R. has no such agreements.

It should be noted that the Export-Import Bank finances American exports to foreign nations, not imports. These bills can in no way be construed as bringing about most-favored-nation treatment of China. Most-favored-nation status primarily concerns lowering of tariffs on goods imported by the United States. This is, instead, a modest but significant step toward more beneficial trade between these countries.

The potential for Sino-American trade, both immediately and in the future, appears bright. According to a recent Department of Commerce study, the lack of improved trade relations between the People's Republic of China and the United States resulted in a loss of more than $468 million in 1972 alone.

In addition to general pressures to maintain the pace of industrial growth, two other factors could strengthen import demand in the coming months. Very little has been revealed about the effects of the Tangshan earthquake of last July. The presence of extensive damage to the heavy industrial sectors, such as steel, iron, and coal may set the backdrop for increased steel and industrial equipment exports. The Chinese Government has already pressured Japan to increase its shipments of specialized steel, especially steel pipe.

Additionally, if the current estimates for the 1976 crop harvest are correct, agricultural production has shown little improvement over that of the last 2 years.

In the long run, China's economic growth depends heavily on imports. The present shift in investment to the industrial sector will stimulate higher growth in both gross national product and imports. On the basis of current economic planning in the People's Republic, it is evident that large markets exist for American exports of agricultural plants and equipment. High priority also is given to mining equipment for the development of the nation's mineral resources and the petroleum, chemical and industrial sector.

I need not remind our colleagues that in this age of mushrooming energy costs and a global energy crunch, China possesses the third largest coal reserves in the world, and has estimated oil reserves that rival those of the Persian Gulf. Without Western technology, however, development of these energy resources will lag. In other fields, too, such as communications and computer technology, the Chinese also are heavily dependent on Western know-how.

The prospect for agricultural imports is promising. It is often assumed that China's imports of U.S. agricultural products are purely temporary, and the result only of poor harvests. This is most doubtful. China has been a net importer of grain since 1961, even following good harvest years. This policy has been necessary to relieve the burden on China's domestic distribution and transportation system, and thus ease the strain of supplying the coastal cities. This policy can be expected to continue throughout the rest of the decade. The long-term outlook for Chinese imports of cotton also are quite favorable, given the limited opportunities for expanding cotton acreage within China itself.

The likelihood of increased Sino-American trade also would be a boon to the economy of the Pacific Northwest. Large, untapped markets exist in China for two of the Northwest's economic mainstays, wood products and wheat. According to one lumber company executive, the market for wood products in the People's Republic could grow many times over the current sales level of $4 to $5 million. The picture for wheat is also promising. The People's Republic has long followed a policy of exporting much of its rice crop to earn foreign exchange and making up the deficit in its cereal needs through imports of wheat. The Chinese are said to be especially interested in importing the more economical soft red winter wheat and soft white wheat which are grown in the East and in the Pacific Northwest.

Today, Pacific Rim trade accounts for 19 percent of America's exports; it is a fertile area for strengthening America's balance of payments position in the years to come. This is significant, when you consider that in February the U.S. trade deficit reached record heights for the second straight month.

By 1980, and coming into full flower by the year 2000, the impact of China's economic potential will be felt around the world. For Americans, the benefits of dealing with China are many and varied. There is the prospect of new markets for American agricultural commodities and technology; there is the promise of greater cooperation and understanding between the world's most technically advanced society and the world's most populous society; and there is the prospect of greater stability all along the perimeter of the Pacific Rim Basin.

This meeting of East and West, of Asia and America, is the promise and the challenge that is before us today.

H.R. 5715

A bill to amend the Trade Act of 1974 to permit the Peoples Republic of China to participate in programs of the United States which extend credits, credit guarantees, or investment guarantees

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 402 of the Trade Act of 1974 is amended by inserting after "treatment), such country" the following: "(other than the Peoples Republic of China)".

H.R. 5714

A bill to amend the Export-Import Bank Act of 1945 by eliminating the Presidential determination requirement in connection with trade with the Peoples Republic of China

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 2(b)(2) of the Export-Import Bank Act of 1945 is amended—

(1) by inserting in subparagraph (A) immediately after "(as defined in section 620 (f) of the Foreign Assistance Act of 1961" the following: ", but excluding the Peoples Republic of China"; and

(2) by inserting in subparagraph (B) immediately following "(as so defined" the following: ", but excluding the Peoples Republic of China".

SEC. 2. Section 2(b)(5) of the Export-Import Bank Act of 1945, is amended by striking out "or by Communist China" in the third sentence thereof.

THE SST AGAIN?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

Mr. WEISS. Mr. Speaker, on March 17, I introduced an amendment with the support of the gentleman from Arizona, Congressman UDALL, and the gentleman from Ohio, Congressman SEIBERLING. My amendment would have amended H.R. 4088—the NASA authorization for fiscal year 1978—to preclude any funding of an overall plan relating to the development, planning, analysis, and research for an advanced supersonic transport—AST—without an act of Congress specifically authorizing such an expenditure.

The controversy which developed over the AST occurred, because of a mandate in the House committee report which accompanies H.R. 4088—House report 95–67, pages 18–19. The report says:

. . . it is in the national interest for the United States to build an environmentally acceptable, economically viable advanced supersonic transport.

This mandate, although printed in the report, is not stated in the bill itself. The bill seems to contain no provision for the funding of the preparation which the mandate would require.

However in the debate that ensued over this matter—see pages 7758 to 7885 of the March 17 CONGRESSIONAL RECORD—members of the House Science and Technology Committee revealed that at least $15 million under H.R. 4088 would be available for NASA to fulfill the mandate.

I strenuously object to this method of achieving an authorization for the expenditure of public funds. A fair reading of the committee report makes two facts clear: that a mandate concerning the national interest of the entire country is being given to NASA in a committee report and not through the direct passage of a bill—the appropriate method for considering such a mandate—and that NASA is being directed to prepare for the actual construction of a new SST. But rather than providing just my own view or that of someone else's, I think it is important to reprint the exact language of the committee report in order that Members of Congress and others can reach their own conclusions. The relevant excerpt from the committee report is printed below:

EXCERPTS FROM HOUSE REPORT 95–67

COMMITTEE VIEWS

Technology for advanced supersonic transports

The Committee, in its report, "The Future of Aviation," recommended that it is in the national interest for the United States to build an environmentally acceptable, economically viable advanced supersonic transport.

The Committee is concerned because a research and technology base is not being developed in the United States that is adequate to permit development of an American AST in the forseeable future. Since such a development will require more than 10 years even after a 4- or 5-year intensive technology effort, now is the time for careful long-range planning if the United States is to regain preeminence in this field.

The Aircraft Energy Efficiency Program, comprehensively planned in response to congressional requests and now being implemented by NASA, is a most effective way to develop and demonstrate the research and technology base necessary to make possible a new generation of fuel-efficient subsonic transport aircraft in the 1980's. A similar effort is needed for the advanced supersonic transport (AST). Accordingly, the Committee requests that the Administrator of NASA prepare an overall program plan with the goal of achieving technology readiness for such an aircraft by the early 1980's.

The plan should describe the efforts needed in each of the major technology disciplines, the associated costs and the significant milestones.

In addition, an analysis of the broader economic and policy questions should be prepared in conjunction with the program plan.

Among the important factors to be addressed are:

(1) Economic analysis covering investment/return aspects of development implementation.

(2) Societal benefits of supersonic transportation, including trade and communications.

(3) Societal, including environmental impacts from the operation of a fleet of supersonic transports.

(4) Approaches for development financing.

(5) Extent of Federal government participation in the development and alternatives for organizational arrangements.

Furthermore, the Committee expects that NASA will develop these plans in full coordination with DOT, DOD, EPA, other appropriate government and non-government agencies with the aviation industry and with State and local governments in whose area such aircraft will likely be operated. It is essential that adequate comprehensive planning be conducted in advance to insure that the AST will be both operationally and environmentally acceptable at airports where it is intended to be operated.

The results of the outlined study should be available for Committee consideration during the fiscal year 1979 Authorization hearings in September 1977.

SCIENTISTS WARN AGAINST REPEATING MIRV MISTAKE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 5 minutes.

Mr. BINGHAM. Mr. Speaker, on March 16, 1977, Dr. Jeremy Stone, the director of the Federation of American Scientists, presented some extremely thoughtful testimony before the Senate Foreign Relations Subcommittee on Arms Control that I would like to bring to the attention of the House. Dr. Stone warned the Congress that the Defense Department is on the verge of repeating the same error made in 1970 with multiple independent reentry vehicles—MIRV's—when the United States rushed into deploying a new technology instead of first exploring the possibility of including it in the strategic arms limitation talks. As a result, the United States achieved only a temporary advantage and forced the Soviet Union into developing and deploying its own MIRV's, thereby immensely complicating the problems of arms control.

The technology in question now is the MK12A nuclear warhead and improved guidance system for the Minuteman III ICBM, which the Defense Department plans to start deploying in fiscal year 1978. The higher yield and accuracy of this warhead will give the United States a huge jump in hard target kill capability, that is, the ability to destroy targets such as missile silos which have been specially protected against nuclear blasts. Dr. Stone challenges the all-too-prevalent belief that any and every technological advance is desirable and should be developed and deployed as quickly as possible. His testimony points out the self-defeating implications of this strategy which eliminates any room for negotiating limits on strategic arms and adds impetus to the arms race. I commend this excellent presentation to the attention of my colleagues:

TESTIMONY OF DR. JEREMY J. STONE

It gives me great pleasure to accept the invitation of this most distinguished Subcommittee to participate in its important work. I should like to preface my remarks by explaining that I am not a former government official nor have I, for a considerable number of years, been engaged in work requiring access to classified material. I have, however, been a student of arm limitation problems since 1962 and, for the last six years, have watched government processes closely as Director of the Federation of American Scientists.

PART I: NATIONAL SECURITY AND ARMS CONTROL IMPLICATIONS OF CURRENT STRATEGIC OPTIONS

Of the many things to be said on the general subject of the hearing, I should like to focus on what I believe to be the most urgent national security and arms control implication of a current strategic option.

Today, the central issue in the strategic arms race is the increasing vulnerability of the land-based missiles on each side to the land-based missiles of the other. From every point of view, this development is viewed with alarm.

For the hawks, the problem is the possibility that the Soviet landbased missile force—once MIRVed and modernized—will have the capacity to destroy our 1,054 land-

based missiles with only a portion of its 1,600 land-based missiles. This is the core substantive concern underlying the present-day use by hawks of the phrase "Soviet strategic superiority."

For the doves, the problem centers on the implications of having both sides simultaneously possess the ability to destroy the land-based missiles of the other with a portion of its own. In this case, each side might perceive a considerable improvement in the outcome of a war if its strategic forces struck first, rather than second. During an escalating violent struggle in Europe, for example, these incentives might lead to a mounting, reciprocal, and self-fulfilling, anticipation that each was going to attack the land-based missiles of the other with its own vulnerable land-based force. ICBM firings, which would not otherwise have occurred, might then be induced by fear and fatalism. Indeed, the very fact of land-based missile vulnerability may be inducing both sides to prime their forces to fire on a 30 minute, or lesser, warning, which could lead to ill-considered, or even inadvertent firings.[1]

For the Administration, a further problem lies in the costs of unilateral resolutions of this issue. The increasing vulnerability of our 1,000 Minuteman missiles may tempt the Administration to buy the mobile missile MX at a cost that may involve $30 billion—and to deploy it in hundreds of twenty mile covered trenches, or to hide it among 10,000 semi-hardened shelters in a gigantic shell game. A further (non-financial) cost arises from the fact that MIRVed mobile missiles undermine hopes for arms control by complicating problems of verification while pushing Vladivostok limits upward.

In short, hawks, doves, and the Administration all must agree—each in his own way—that a crucial problem in the strategic balance at this time is the prospect of land-based missile vulnerability. For strategic stability, this issue is more important than any immediately foreseeable reduction in overall aggregates of strategic delivery vehicles; more important than the cruise missile; and far more important than the Backfire bomber.

Perhaps the only costless solution to this problem lies in arms limitation agreements that would prevent the Soviet Union from completing the modernization and MIRVing of its land-based force. In return, we would forego high degrees of counterforce capability which few believe necessary except, at most, as a response to Soviet counterforce capability. Indeed, the most senior proponent of U.S. counterforce capability advised this very Subcommittee in December, 1974 that this was precisely U.S. policy. Secretary of Defense Schlesinger told you, on September 11, 1974:

"We have no desire to develop a unilateral counterforce capability against the Soviet Union. [Deleted]. What we wish to avoid is the Soviet Union having a counterforce capability against the United States without our being able to have a comparable capability. I continue to be hopeful that the SALT [Strategic Arms Limitation Talks] talks will permit both sides to restrain themselves."—p. 3 (Briefing on Counterforce Attacks).

In the light of all this, it will come as a rude shock to most Senators, hawks or doves, that the United States seems about to foreclose this possible negotiation by the deployment of the MK–12A warhead (and the NS–20 guidance system) for the Minuteman III missile.

This can be illustrated by the following graph (not reproduced) which is drawn from page 125 of the official Annual Defense Department Report for Fiscal 1978 presented by former Secretary of Defense Donald Rumsfeld of the Ford Administration and presented to the Congress on January 17 of this year. The graph shows the emerging hard-target kill capability of the two sides projected over coming years. (Hard-target kill capability refers to the ability of the two sides to destroy targets specially hardened against nuclear attack which includes, in particular, the hardened missile silos of the other side).

As the graph reveals, the United States deployment during fiscal 1978 will produce a five year lead in this crucial and strategically most relevant category. What the graph does not show is the magnitude of the hard-target kill capability on either side because—in its unclassified form—the graph is unlabeled.

But the Russians will have no difficulty, as I have no difficulty today, estimating the rough impact of this development. Using newspaper reports of 350 kiloton warheads with .1 mile accuracy, they will conclude that the United States is providing 1650 of its warheads (on 550 Minuteman III missiles) with a hard-target capability that could, on paper, provide each warhead with a high kill probability against each of the approximate 1600 hardened Soviet land-based missiles. In short, the deployment is providing us with what must surely look to the Russians (as it does to me) with a significant counterforce capability. As a result, notwithstanding the larger Soviet throw-weight, its total strategic force is in greater peril than our own and this situation bids fair to continue.

These developments have been foreseen in broad outline for some years. In a background statement in 1972 justifying the Interim Agreement, Kissinger said:

"The Soviet Union has 85 percent of its throwweight in the most vulnerable target, that is to say, its landbased missile.

"The United States has only about 25 percent of its throwweight in its most vulnerable targets, i.e., our landbased missiles.

"In the 1980's, the greater flexibility of our force and the greater vulnerability of their force is very likely to bring about a situation in which the threat to their forces is likely to be much greater than the threat to our total force regardless of what the weight of the individual warhead is."—Henry A. Kissinger, December 3, 1974 backgrounder

This quotation further illustrates the dilemma facing the Russians since the Soviet land-based force is fairly characterized at present as their primary deterrent while our land-based force is second in significance, in our thinking, to our Polaris force.

I want to emphasize that there are a number of other valid universes of discourse in which these strategic developments can be discussed. Perhaps from the perspective of the high-ranking political official—President or Soviet General Secretary—it can be argued with considerable force that deterrence of nuclear war will, nevertheless, be about as great as it can be. Perhaps none of these developments, even if accepted at face value, is about to delude political officials that ICBM's should be used, even if considerable fighting is going on in Europe, because of the number and variety of strategic forces maintained on each side.

Furthermore, from the perspective of the professional missileer, it can be argued that these technological developments should not be taken at face value for another reason since, when other operational considerations (reliability, residual uncertainties, variations in hardness, etc.) are taken into consideration—as they should be—the land-based missile forces will remain useful deterrents for a long time indeed.

But, in between these two perspectives, one must consider the perspective of the bargaining table. Our negotiators will confront Soviet experts burdened with their own worst case assessments. Soviet experts can therefore be expected to ignore a number of valid uncertainties and to have a healthy respect for American technological ability to make missiles work, and American ingenuity in devising war plans.

Second, our negotiators must find some discernable stopping point between the hard-target capability that we and they have, on the one hand, and that to which we and they might verifiably agree to limit ourselves.

These are important major difficulties. My conclusion is that the MK–12A warhead is eliminating any room for negotiating maneuver. I do not, in saying this, mean to imply that Soviet developments are not equally important, in their way, in limiting the options available for negotiation. I simply point to the Rumsfeld graph in showing that it is *our* about-to-emerge five year lead that will likely push the competition in hard-target capability beyond negotiable restraint. Why not bargain?

In short, the point I wish to emphasize today is simple and obvious. If we are going to move to achieve such a substantial measure of counterforce capability against Soviet missiles, will we be able to persuade the Soviet Union to halt its parallel capability in negotiations over the coming months? I do not see how we can.

The situation is embarrassingly similar to that which occurred in 1970. The United States had then a five year lead in the development of MIRV. We were ready to deploy and the Russians were far behind. We know that deployment would make further negotiations over MIRV highly difficult and that Soviet MIRV would imperil our land-based forces as it now increasingly threatens to do. But we failed to take the advice of Mr. Paul C. Warnke, among others, to negotiate; today many, including former Secretary Kissinger are fairly open in expressing their regret that this matter was not more thoroughly investigated. ("I would say, in retrospect that I wish I had thought through the implication of a MIRVed world more thoughtfully in 1969 and 1970 than I did." op. cit.). In sum, we seem to be about to make, almost precisely, the same mistake twice.

I am by no means certain: (a) that it is logistically possible to delay this program; or (b) that an arms control agreement could be designed to balance hard-target kill capability on each side; or (c) that the Russians might agree to halt a program of MIRV and modernization which has been steadily underway for years and in which they have invested several tens of billions of dollars.

But the matter deserves immediate Congressional attention in the context of emerging strategic trends on both sides. In the light of the forthcoming talks in Moscow, it may not be overly dramatic to suggest that the next few weeks may provide the last clear chance to avoid a new round of arms destabilization.

THERE'S NO DEFENSE FOR DEFENSE FUNDS THAT DON'T HELP DEFENDANTS

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, this morning I had the pleasure of testifying on H.R. 41 before the House Subcommittee on Postal Personnel and Modernization of the House Post Office and Civil Service Committee. The proposed legislation would regulate the collection of chari-

[1] I believe the Defense Department is now considering the possibility of "abort" mechanisms on missiles which would permit missile firings to be aborted after launch; this could only encourage premature and ill-considered firings and strikes as a bizarre and dangerous effort to solve a serious problem with a technological gimmick.

table funds so as to make certain they are used for the purposes for which they were collected.

I testified specifically on three instances I have been made aware of in New York City where large amounts of money were raised for charitable purposes. In each case most of the funds collected were expended on administrative and fundraising costs while few dollars ended up benefiting the intended beneficiaries. Two of these cases involved defense funds, both of which were able to raise large sums but neither of which funneled a significant portion of those dollars to the actual defense of the defendants. There is no defense for defense funds that do not help defendants.

I recommended this morning that H.R. 41 be made more comprehensive and designed to insure that such organizations be more carefully audited so that the public has a way of insuring that public donations solicited by mail or otherwise accrue to the benefit of the contemplated recipient. For the benefit of my colleagues, the text of my prepared remarks follows. I am also appending a series of letters which trace my efforts to bring the records of these defense funds under public scrutiny, copies of the financial reports filed by these funds, and a news article from the New York Times that indicates these funds are not being used for the cause for which they were collected. The material follows:

TESTIMONY OF HON. EDWARD I. KOCH ON H.R. 41

(Before the House Subcommittee on Postal Personnel and Modernization of the House Post Office and Civil Service Committee, Mar. 29, 1977)

Thank you Mr. Chairman for providing me with an opportunity to testify before your subcommittee on the need for legislation to regulate the collection of charitable funds so as to make certain that they are used for the purposes for which they were collected.

Your bill, H.R. 41, deals with regulations that might appropriately be the function of the U.S. Postal Service in that it would require that information needed to be made available to the public be filed with an agency that is equipped to handle such filings. However, I should like to bring to your attention an area which would require, in my judgement, giving the I.R.S. jurisdiction to monitor and investigate these organizations which collect funds for charitable purposes. I should like to provide you with my own research into this matter which has brought me to this conclusion.

I was advised many months ago that two fund raising organizations in New York had raised considerable sums of money which were not properly accounted for. Let me say at the outset that in the State of New York the solicitation of monies from the public is regulated in a limited way, in that reports simply have to be filed with the New York State Board of Social Welfare. Regrettably, few of those reports are ever audited.

As a result of the information provided to me, I asked the New York State Attorney General and ultimately the Social Welfare Board to look at the reports filed by the two organizations: one, Freedom for All Forever Corporation, a fund allegedly for the defense of Hurricane Carter and a second defense fund known as Attica Defense Committee, allegedly for the defense of convicts who had engaged in what became known as the Attica Uprising at the New York State prison. I will append for the permanent record the pertinent correspondence that I have had with both the New York State Attorney General and the New York Board of Social Welfare. Suffice it to say that with respect to the Hurricane Carter fund, the filed report shows that approximately $600,000 was raised in two events, one at Madison Square Garden in New York City and the other at the Astrodome in Houston, Texas. The Madison Square Garden event raised approximately $220,000 and showed a net profit of $108,000. According to the committee's filed report, the Houston event, while allegedly taking in another $379,000, stated that "expenses exceeded income." The New York State Board of Social Welfare is now examining the books of the Hurricane Carter fund.

The second fund to which I have referred, the Attica Defense Committee, allegedly raised a large sum of money, but failed to file the required reports. We have no way of knowing how much they raised, and the Committee is out of existence. When I raised the matter with the New York State Board of Social Welfare, I was advised that "Although Board staff has made several attempts to locate one or more persons who had been connected with the Committee, all efforts along that line have been unsuccessful. When, and if, we manage to contact anyone having knowledge of the affairs of the Committee, we will attempt to secure its records for examination."

The third report which was brought to my attention by a superb reporter, Steve Bauman of Channel 5 TV, and I would like to bring to your attention was filed by the Puerto Rican Day Parade Inc. Committee which shows that in 1975 it raised $93,779 from the public. The expenses listed totaled $75,433 leaving an alleged net balance of $18,366. One of the intriguing expenses listed was the sum of $39,514.39 for "conferences, conventions and meetings". These expenditures were made in relationship to a one-day parade. Another interesting item was the listing of a dance held on June 27, 1975, by that Committee where the gross receipts were $24,500 with the expenses being listed as $22,364 with a "net amount available to charity organizations of $1,443." Mr. Chairman, I am not able to pass judgment on the legitimacy of any of the expenditures of these organizations, but surely audits should be made either on a regular basis or on a spot check basis so that those collecting public funds will know that there is accountability.

Finally, the need for legislation is evidenced by the letter from the I.R.S. dated March 22, 1977, which I am appending and which is summed up by the following portion of that letter:

"In the past, the Service has indicated that public hearings on the many aspects of charitable solicitation and fund raising abuses would be appropriate. We believe such hearings would reveal a multifaceted problem, deserving careful legislative consideration. As matters presently stand, the Service's primary enforcement tool is an examination of the tax returns filed by the organization. Such examinations may be initiated as a result of complaints by members of the public or by a number of more routine selection methods established by the Services to identify returns deserving inquiry."

We should give the I.R.S. the right to "establish uniform accounting requirements to record receipts and expenditures of these solicitations" which their letter clearly indicates is necessary if we are to deal adequately with this very serious matter and the abuses that clearly exist. Apparently, the only returns now filed with the I.R.S. are those which support the tax exempt status of the charitable organization; and what I believe is necessary is that details of collections, whether subject to taxes or not, be filed with the I.R.S. for post-auditing.

In conclusion, Mr. Chairman, the role of philanthropic efforts in our society is an important and laudable one. In 1975 alone, Americans donated nearly $28 billion to charitable causes. Yet, these fund raising operations which have benefited from the generosity of the American public are almost without any regulation whatsoever and no one knows how much of the moneys collected actually reach the intended beneficiaries. If those charities are required to make disclosures at regular intervals and be subject to I.R.S. auditing, the public would be in a position to know what is happening to the huge sums donated for charitable causes and particularly whether they are actually going to those causes or are being shortstopped along the way.

Therefore my belief is, in addition to whatever controls H.R. 41 would impose, that there be additional regulation which would require that charitable organizations file with the I.R.S. the names and addresses of contributors, a detailed statement of expenses, the names and addresses of each payee and that the I.R.S. be authorized to audit these organizations in the same manner as other fiduciaries responsible for the safekeeping of moneys collected by them.

WASHINGTON, D.C.,
November 9, 1976.

NEW YORK STATE BOARD OF SOCIAL WELFARE,
World Trade Center,
New York, N.Y.

GENTLEMEN: I have been advised by the Assistant Attorney General—see the enclosed—that no field audits have yet been conducted with respect to any of the organizations mentioned in that letter. I am interested in ascertaining whether in each of the cases in which money was solicited by these organizations how much went to the direct benefit for the individuals for whose benefit the money was raised, and whether the respective net amounts meet any criteria imposed by our office, particularly with respect to alleged expenses incurred in collecting the gross amounts. I would appreciate having your responses to these questons, as well as knowing why it is that no audits have been made of any of these organizations' reports. The organizations I have referred to are: The Hurricane Trust Fund, The Attica Defense Committee, Attica-Bridge, Inc. (Bridge/Associates, Inc.).

I would appreciate hearing from you as soon as possible.

Sincerely,

EDWARD I. KOCH.

NEW YORK STATE
BOARD OF SOCIAL WELFARE,
Albany, N.Y., November 22, 1976.

Hon. EDWARD I. KOCH,
Longworth Office Building,
Washington, D.C.

DEAR CONGRESSMAN KOCH: You have inquired about the fund-raising activities of The Hurricane Trust Fund, The Attica Defense Committee, and Attica-Bridge, Inc. (Bridge Volunteers/Associates, Inc.). I note, from the attachment to your letter of November 9, 1976, that you already have been furnished with copies of the registration statements and annual reports filed by these organizations.

The Hurricane Trust Fund was a division of Freedom for All Forever Corporation. The corporation registered in October, 1975 with

this Board and on September 8, 1976 filed an annual report for the year ended March 31, 1976. According to said report, contributions, including excess receipts over costs benefiting contributors, amounted to $155,357. Of that amount, $79,445 reportedly was used for the purposes for which the funds were solicited; management and general, and fund-raising expenses amounted to $67,846; and a balance of $8,066 remained in the fund at the end of the fiscal year. Since more than 50% of the funds collected was spent on program, no further action or referral to the Attorney General was indicated. As a matter of policy we would refer to the Attorney General for his review any report which indicated that less than 50% of the contributions received were devoted to program purposes.

The Attica Defense Committee registered with this Board in February, 1972. They failed to file a financial report for the fiscal year ending December 31, 1972 and on October 16, 1973, a notice of cancellation of their registration for failure to file was sent to the corporation in care of its attorney of record, and was returned as undeliverable. Thereafter, a letter from the Clinical Law Center of New York University advised that the Committee was no longer operating and had not been for a number of months.

Attica-Bridge, Inc. (later Bridge Volunteers/Associates, Inc.) registered on July 11, 1973. On July 21, 1975 the corporation filed a financial report for the fiscal year ended September 30, 1974 showing that $18,158 had been received, of which $15,853.34 was spent on program and the balance transferred for use in 1975. There were no fund-raising costs. On July 28, 1976 the corporation's registration was cancelled for failure to file an annual report. Thereafter, the corporation claimed exemption from the registration requirements of the statute on the ground that it had collected less than $10,000. during the previous year and no one had been paid for fund raising.

There are some 7,000 charitable organizations registered with the Board. We can only make field audits in selected cases, either upon a direct request from the Attorney General or where the annual report itself indicates the need for a field audit.

Very truly yours,

BERNARD SHAPIRO,
Executive Director.

STATE OF NEW YORK,
DEPARTMENT OF LAW,
New York, N.Y., December 2, 1976.

Hon. EDWARD I. KOCH,
Congressman, 18th District,
New York, N.Y.

DEAR CONGRESSMAN KOCH: I have your letter of November 9, 1976 and regret the delay in not responding at an earlier date.

The reports which I sent to you on October 27th are the annual reports filed by the organizations with the State Board of Social Welfare pursuant to Article 10-A of the New York Social Services Law. These are not reports which are filed with this office. All organizations soliciting or receiving more than $10,000 from the public are required to register with the State Board of Social Welfare and file annual financial reports.

As of the present this department has not received any request from the State Board of Social Welfare to investigate collections and disbursements of these organizations. It would appear to me that questions raised by you should be addressed to that State Board for its consideration. It has the statutory authority to make audits and thereby finds the response to your inquiry. Should the Board find any indication of fraud, it can refer to this department for attention. To the best of my knowledge no audit has been made by the State Board of Social Welfare into the activities of either of these organizations.

I am sending the Board a copy of our correspondence for its information and possible attention.

Very truly yours

LOUIS J. LEFKOWITZ,
Attorney General.
By HERBERT J. WALLENSTEIN,
Assistant Attorney General.

BOARD OF SOCIAL WELFARE,
Albany, N.Y., December 14, 1976.

Re the Hurricane Carter Fund and Attica Defense Fund.

Hon. EDWARD I. KOCH,
Congressman, 18th District,
New York, N.Y.

DEAR CONGRESSMAN KOCH: In accordance with your urging, I am directing that a field audit be made.

Sincerely,

BERNARD SHAPIRO,
Executive Director.

WASHINGTON, D.C.,
December 8, 1976.

HERBERT J. WALLENSTEIN,
Assistant Attorney General, State of New York, Department of Law, New York, N.Y.

BERNARD SHAPIRO,
Executive Director, New York State Board of Social Welfare, Albany, N.Y.

DEAR MESSRS. WALLENSTEIN AND SHAPIRO: I have the responses of each of you. Yours, Mr. Shapiro, dated November 22, and yours, Mr. Wallenstein, dated December 12, to my earlier correspondence raising questions concerning the auditing of the organizations known as The Hurricane Trust Fund, The Attica Defense Committee, and Attica-Bridge, Inc. (Bridge/Associates, Inc.). I am enclosing the entire set of correspondence because each of you is apparently relying on the other to take appropriate action, and nothing is being done.

It is inconceivable to me that with the large amounts raised and the questions that have been raised concerning the use of the monies, neither of you felt it necessary to date to audit these organizations.

May I suggest that field audits are required and that whoever is authorized to do so undertake that obligation. I repeat that on the face of it the March 31, 1976 report filed by Freedom For All Forever Corporation (Hurricane Trust Fund) requires inquiries by your respective offices. To simply accept the statement of the Attica Bridge Inc. that the monies were spent on programs without undertaking an audit makes no sense. When questions have been raised as to what benefits, if any, the Attica defendents received from monies raised on their behalf, I urge immediate attention to these matters, and would appreciate having your response on what you intend to do.

Sincerely,

EDWARD I. KOCH.

NEW YORK STATE BOARD
OF SOCIAL WELFARE,
Albany, N.Y., February 9, 1977.

Re the Hurricane Carter Fund and Attica Defense Fund.

Hon. EDWARD I. KOCH,
Congressman, 18th District,
New York, N.Y.

DEAR CONGRESSMAN KOCH: This is in response to your letter of January 27th, inquiring about the current status of our investigation with reference to the above-named organizations.

The Charities Registration Section of this Board has completed its examination of the books and records of the Hurricane Carter Defense Fund of the Freedom for All Forever Corporation. The audit report based on such investigation is being prepared and a copy will be forwarded to you as soon as it has been typed.

As we advised you in our letter of November 22, 1976, the Attica Defense Committee has been out of existence for several years. Although Board staff has made several attempts to locate one or more persons who had been connected with the Committee, all efforts along that line have been unsuccessful. When, and if, we manage to contact anyone having knowledge of the affairs of the Committee, we will attempt to secure its records for examination.

Very truly yours,

BERNARD SHAPIRO,
Executive Director.

NEW YORK STATE BOARD
OF SOCIAL WELFARE,
Albany, N.Y., February 11, 1977.

Re the Hurricane Carter Fund and Freedom For All, Forever Corp.

Hon. EDWARD I. KOCH,
Congressman, 18th District,
New York, N.Y.

DEAR CONGRESSMAN KOCH: I am enclosing a copy of the audit report prepared by staff of the Board in connection with the examination of the books and records of Freedom For All, Forever Corporation.

A copy of this audit report was referred to the Attorney General's office on February 10, 1977 for his review and any enforcement action he deems appropriate.

Very truly yours,

BERNARD SHAPIRO,
Executive Director.

WASHINGTON, D.C.,
February 15, 1977.

Mr. JEROME KURTZ,
Acting Commissioner, Internal Revenue Service, Washington, D.C.

DEAR MR. KURTZ: Enclosed for your ready reference are copies of correspondence that I have had as well as a recent article that appeared in *Rolling Stone* magazine concerning the Rubin "Hurricane" Carter defense fund.

It is alleged that money raised, to be used to insure an adequate legal defense for Rubin Carter, was misspent and mishandled. At my request the New York State Board of Social Welfare conducted an audit and they have recently turned their findings over to the New York State Attorney General for further investigation and possible prosecution. Due to the fact that monies raised crossed state lines, what regulations does the Internal Revenue Service have to insure that the above described organizations are in fact reputable. If regulations do not exist I would appreciate your informing me whether new legislation is required in order for the Service to have jurisdiction.

I would appreciate your responding to my New York office within ten days.

All the best.

Sincerely,

EDWARD I. KOCH.

INTERNAL REVENUE SERVICE,
Washington, D.C., March 1, 1977.

Hon. EDWARD I. KOCH,
House of Representatives,
Washington, D.C.

DEAR MR. KOCH: This will acknowledge receipt of your letter of February 15, 1977, to Commissioner-Designate Jerome Kurtz, with which you enclosed copies of correspondence and an article from *Rolling Stone* magazine regarding the Rubin "Hurricane" Carter defense fund.

I have asked that this matter be reviewed

and we will respond to you as soon as possible.

With kind regards,

Sincerely,

WILLIAM E. WILLIAMS,
Acting Commissioner.

INTERNAL REVENUE SERVICE,
Washington, D.C., March 22, 1977.

Hon. EDWARD I. KOCH,
House of Representatives,
Washington, D.C.

DEAR MR. KOCH: Thank you for your letter of February 15, 1977, concerning the Rubin "Hurricane" Carter defense fund. We apologize for the delay in responding to your inquiry and we hope this has not caused you any inconvenience.

The Freedom for All Forever Corporation (Hurricans Trust Fund) and the Attica-Brinde, Inc. (Bridge Volunteers/Associates, Inc.) are recognized as exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code. Like all other exempt organizations, their exemptions were granted on the basis of representations made by the organizations during the process of applying for recognition of exempt status. We have no record of recognition of a similar status for the Attica Defense Committee.

The Internal Revenue Service maintains an audit program to review the activities of tax-exempt organizations to ensure that they are operating consistently with the representations made during the application process. Because we share your concern about adherence to these laws, we have forwarded your correspondence to our field office for its consideration. We can assure you that the information you have furnished will be thoroughly evaluated for use within the scope of its audit program.

The Internal Revenue Service has limited authority in the area of charitable solicitations. A specific handicap to enforcement in this area is the lack of any provision in the relevant statutes permitting a review of solicitation material by the Service in advance of the solicitation. Under legislation introduced by Senator Mondale and Representative Karth in 1975, (subsequently reintroduced this session as H.R. 478) the Treasury would be authorized to approve solicitation material in advance, and to establish uniform accounting requirements to record receipts and expenditures of these solicitations. Another bill, H.R. 41, is scheduled for hearings in the Post Office Committee beginning on March 23, 1977.

In the past, the Service has indicated that public hearings on the many aspects of charitable solicitation and fund raising abuses would be appropriate. We believe such hearings would reveal a multifaceted problem, deserving careful legislative consideration.

As matters presently stand, the Service's primary enforcement tool is an examination of the tax returns filed by the organization. Such examinations may be initiated as a result of complaints by members of the public or by a number of more routine selection methods established by the Service to identify returns deserving inquiry.

We appreciate your concern.

With kind regards,

Sincerely,

WILLIAM E. WILLIAMS,
Acting Commissioner.

HURRICANE CARTER DEFENSE FUND

SCHEDULE A—CONTRIBUTIONS

Received directly from public

Direct Mail, $36,905.
Special Events, $118,452.
Received Directly: Public, $155,357.

Allotments

Allotments, None.

Governmental grants

Gov't Grants, None.
Contributions, $155,357.

SCHEDULE A-1—SPECIAL EVENTS

[If more than 2 events, submit a separate schedule using same format]

Item	Total (a)	Event (b)	Event (c)
1. Brief description of activity comprising the event		[1]	[1]
2. Date held		[2]	[3]
3. Gross receipts	600,366	220,578	379,788
4. Costs benefiting contributor	481,914	112,500	369,414
5. Contributions (adjusted receipts) line 3 minus line 4	[4] 118,452	108,078	10,374
6. All other direct expenses	13,750	3,376	[5] 10,374
7. Net amount available to charitable organization	104,702	104,702	

[1] Night of the Hurricane Concert.
[2] Dec. 8, 1975.
[3] Jan. 25, 1976.
[4] Transfer total to schedule A, line 3.
[5] This event resulted in expenditures exceeding receipts; Aowever, the excess was not passed through to Freedom For hll, Forever Corp.

ANNUAL REPORT—CHARITABLE ORGANIZATION

(For year ended 1975, New York State Board of Social Welfare.)

Registration No. 45240)

Puerto Rican Day Parade, Inc.
210 West 50th Street.
New York, N.Y.

Statement of support, revenue, and expenses and changes in fund balances

Public Support and Revenue

Contributions, received directly from the public, $93,799.00.
Total contributions, $93,799.00.

Expenses

Program services, $75,433.00.
Total expenses, $75,433.00.

STATEMENT OF FUNCTIONAL EXPENSES

Puerto Rican Day Parade

Item of Expense

Professional Fees, $500.00.
Supplies, $3,534.50
Telephone, $188.19.
Postage and Shipping, $326.00.
Occupancy, $5,543.00.
Rental and Maintenance of Equipment, $1,185.00.
Printing and Publications, $4,339.94.
Travel, $301.88.
Conferences, Conventions, and Meetings, $39,514.39.
Use to raffle in Puerto Rico, $20,000.
Total, $75,433.00.

BALANCE SHEET WITH COMPARATIVE TOTALS FOR PRIOR YEAR ASSETS

Current funds, unrestricted

Cash, $18,366.00.
Total assets, $18,366.00.

INDEPENDENT PUBLIC ACCOUNTANTS REPORT

We (I) have examined the balance sheet (Exhibit C) of P.R. Day Parade, Inc., as of October 31, 1975, and the related statements of support, revenue, and expenses and changes in fund balances (Exhibit A) and of functional expenses (Exhibit B) for the year then ending. Our (my) examination was made in accordance with generally accepted auditing standards and, accordingly included such tests of the accounting records and such other auditing procedures as we (I) considered necessary in the circumstances.

In our (my) opinion, the financial statements referred to above present fairly the financial position of P.R. Day Parade, Inc., as of October 31, 1975, and the results of its operations and changes in fund balances for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

Our (my) examination has been made primarily for the purpose of forming the opinion stated in the preceding paragraph. The data contained in Schedules A, A-1, C, D, E, F and H, inclusive, of this report, although not considered necessary for a fair presentation of financial position and results of operations and changes in fund balances, are presented as supplementary information and have been subjected to the audit procedures applied in the examination of the basic financial statements. In our (my) opinion, these data are fairly stated in all material respects in relation to the basic financial statements, taken as a whole.

Name of firm or individual practitioner, Anita Vega.

Address, 751 Walton Ave., Bronx, N.Y. 10451.

Date signed, April 23, 1976.

Notes to financial statements are to be attached to the annual report

General information

1. Were there any changes that would affect the information previously filed on the registration statement or amendment sheets with the State Board of Social Welfare? No.

2. Does your organization send "Unordered Merchandise," "Seals," or "Stamps" in its solicitation of contributions? If Yes, describe merchandise: No.

3. Have your organization's books and records been audited by any governmental agency during the year? No.

SCHEDULE A—CONTRIBUTIONS

Received directly from public

General Appeals, Reunions, $92,356.00.
Special Events, $1,443.00.
Total Received Directly From Public, $93,799.00.
Total Contributions, $93,799.00.

SCHEDULE A-1—SPECIAL EVENTS

Brief Description of Activity Comprising the Event. Dance.
Date Held. June 27, 1975.
Gross Receipts, $24,500.00.
Costs Benefiting Contributor, $22,364.00.
Contributions (Adjusted Receipts), $2,136.00.
All Other Direct Expenses, $693.00.
Net Amount Available to Charitable Organization, $1,443.00.

[From the New York Times, Mar. 26, 1977]

BID FOR CARTER APPEAL SUM

Attorneys for Rubin ("Hurricane") Carter and John Artis have said they will ask a court for state funds to appeal the two men's triple murder convictions. Mr. Carter, a former contender for the middleweight boxing title, and Mr. Artis were convicted for the second time last December on charges of murdering three persons in a Paterson, N.J. bar in 1966. They say they are unable to raise the $10,000 needed for trial transcripts.

REPORT ON SERA

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, I placed a detailed statement in the CONGRESSIONAL RECORD concerning the activities of a tax funded drug addiction rehabilitation program known as SERA which received over $3.2 million a year in Federal, State, and city grants. That statement was entitled "Curiouser and Curiouser" and can be found on page 4784 of the February 21, 1977, CONGRESSIONAL RECORD.

I would like to bring to the attention of the Members of this House, who would be interested in knowing what has developed since that time, a report in today's New York Times which reports on

investigations now underway by the U.S. Attorney's Office in New York working with the New York City Department of Investigation.

The article follows:

BRONX DRUG PROGRAM UNDER INVESTIGATION

(By Howard Blum)

The Hispanic Association for a Drug-Free Society, a Bronx addiction rehabilitation program known as SERA that receives over $3.2 million a year in Federal, state and city grants, is being investigated by a Federal grand jury for "wide-ranging abuses of poverty funds," according to law enforcement officials.

The United States Attorney's Office, working with the city's Department of Investigation, has issued subpoenas and convened a grand jury to hear testimony on:

SERA's recent purchase, with Federal funds, of a building in the East Bronx from a group that included the organization's former lawyer. The group made a $275,000 profit—literally—within hours.

Alleged misuse of Federal funds, forged payroll checks, fictitious enrollment, and the employment of association residents for the profit of the organization's administrators.

Suspected irregularities and criminalities in the group's methadone program, which a police intelligence officer described as "obviously one of the major sources for methadone sold on the streets of the South Bronx."

The widespread mailing of a fictitious and politically damaging letter purportedly signed by Representative Edward I. Koch, which, according to law-enforcement agencies, has been identified through a fingerprint as originating at the association.

Robert Munoz, the executive director of the organization and himself the center of the investigation, said: "S.E.R.A. is definitely the victim of a political plot. All the charges against us are untrue."

Mr. Munoz became executive director of S.E.R.A. in 1973, after the organization's first director was convicted of gun and drug charges. The position is financed by a National Institute of Drug Abuse grant that specifies $35,000 a year as salary and $300 a month for a rented car. The job officially requires only 60 percent of the director's time.

On Dec. 5, 1975, Mr. Munoz was convicted of one count of conspiracy "to use explosives and extort" from Bronx construction concerns.

Thirty-one other counts against Mr. Munoz were dropped, and he was sentenced to 18 months' imprisonment, which was suspended. He was then placed on two years' parole.

Despite Mr. Munoz's conviction he has continued as director of the association, which, as a nongovernmental corporation, has no legal responsibility to remove him. The organization has expanded under his leadership into a multiprogram facility treating more than 300 patients.

Only the city's Human Resources Administration, of all the public agencies financing the association, has criticized Mr. Munoz's continued role in the organization. The agency's Commissioner, J. Henry Smith, has called it "highly improper and inappropriate for him [Mr. Munoz] to serve as executive director," and on Nov. 18, 1976, the agency terminated all contracts with the association.

The association instituted a suit in State Supreme Court in the Bronx demanding that the H.R.A. contract between the organization and the city be fulfilled. Last Thursday Justice Herbert B. Evans held that the contract should be continued during the financing period.

The Commissioner of the Addiction Services Agency, Jerome Hornblass, explained: "S.E.R.A. is delivering a needed service in an adequate manner, we haven't been able to find any evidence of any serious wrongdoing."

Using information provided by the Federal Bureau of Investigation, the city police, the Department of Investigation, the city Comptroller's office, and "a very valuable" Government witness, who is being considered for the Federal witness protection program, the United States Attorney for the Southern District recently convened a grand jury that is expected to hear detailed testimony in the following areas:

PURCHASE OF 1776 CLAY AVENUE

On Jan. 17, 1977, the association purchased the former Hebrews Hospital for the Chronically Sick for $350,000 from the 1776 Clay Avenue Corporation. The terms of the transaction were $25,000 cash, a $50,000 mortgage from the Dime Savings Bank, and a $275,000 second mortgage to the 1776 Clay Avenue Corporation. The funds for the purchase were provided, according to Mr. Munoz, by the association's rent allocation from the National Institute of Drug Abuse. However, according to a spokesman for the institute, the association did not obtain the necessary agency approval for such a transaction.

The United States Attorney's office is also "concerned" by the fact that earlier on the same day, when the association executed its purchase of the building for $350,000, the 1776 Clay Corporation purchased the property from the Hebrew Hospital for the Chronically Sick for only $75,000.

The four principals of the 1776 Clay Avenue Corporation include Murray Richman, Robert Munoz's personal attorney during his bombing and extortion trial and a former corporate attorney for the association, and Efrain Gonzalez, a board member of the National Association for Puerto Rican Civil Rights Inc., whose president is Robert Munoz. The four principals of the corporation have been subpoenaed by the grand jury.

The executive director and at least two other offices of the Hebrew Hospital have also been subpoenaed.

Richard Shedlovsky, the executive director of the hospital, said: "The decision was made by the board of directors. No, we never advertised or consulted a broker. We just thought this was the best deal we could get."

TWO TROUBLING AUDITS

A visit to S.E.R.A. by a member of the city comptroller's staff last September to inspect a $63,195 office-skills training program resulted in a memo that could cost the organization millions in public funds. The memo reported that many of those enrolled in the program were not ex-addicts as the contract with the city required but "mothers from the neighborhood"; that "over half of new placements were for jobs in S.E.R.A. itself," a situation that raised doubts in the Comptroller's office not only about the effectiveness of the program, but also about suspected double-billings and that the city might have been billed for rents and telephone charges totally covered by other Federal contracts.

"It was that memo which got us started on S.E.R.A.," said an official in the Comptroller's office. "We immediately began a full-scale audit."

An interim report in February by Comptroller Harrison J. Goldin on the still-uncompleted audit cited "forged payroll checks, some of them to fictitious names," "no reconciliation of S.E.R.A. payroll accounts for many months" and "questionable charges of rent payments to contracts, although actual payments have not been made."

The final audit, which is expected to be made public next month, will show, according to persons familiar with its findings, "a $200,000 accumulation of unpaid bills and that these unpaid bills are financing nongovernmental or nonacceptable programs."

"It's simply a $200,000 slush fund funded with public moneys to cover unauthorized expenses," a spokesman for the Comptroller's office said.

A recently completed, still-confidential audit by the Department of Health, Education and Welfare of S.E.R.A. has also found irregularities, concluding "that the proposal . . . presented for negotiation of indirect costs for the fiscal year ended June 30, 1975, was not based on the contractor's [S.E.R.A.'s] actual experience or books and records."

The United States Attorney's office is closely following the findings of what they call these "two troubling audits."

METHADONE IRREGULARITIES

Law-enforcement agencies have received testimony asserting that the association's methadone program is receiving Federal funds for unfilled beds, that drugs are dispensed by unauthorized personnel, that arbitrary determination of methadone dosage is commonplace and that nonaddicts are enrolled in the program to create more favorable statistics.

Dr. Christ Zois, the association's medical director, commented on these allegations: "I guess it may be true that people can come in and be put in the methadone program without checking them to see if they are addicts. But we have a policy to deal with everyone who comes in."

A city police intelligence officer commented further: "We've had undercover agents trying to make buys of methadone inside S.E.R.A., but we've never had any success. We're able to go just down the block, though, and buy all the methadone we could want. We know we're buying stuff from S.E.R.A. It's obviously one of the major sources for methadone sold on the streets of the South Bronx."

FICTITIOUS LETTER

Following the Human Resources Administration's decision in November 1976 to terminate its contract with S.E.R.A., Representative Edward I. Koch issued a statement, the first of many, calling for the removal of Robert Munoz as the association's director. Two months later, a fictitious letter addressed to Representative Herman Badillo and purportedly signed by Mr. Koch stating "that we are now faced with a crisis should the city administration fall in the hands of a black Mayor . . ." was circulated throughout New York.

Law-enforcement agencies believe these two events were related. An F.B.I. examination of the fictitious Koch letter discovered a fingerprint belonging to Robert Munoz. And an association employee has told The New York Times that he was an eyewitness while these letters were being prepared by members of the association's secretarial staff.

Mr. Munoz commented: "I had nothing to do with that letter. I cooperated with the F.B.I. and gave them samples of my handwriting. I've got nothing to hide."

BELLA ABZUG: CHAIRWOMAN OF THE NATIONAL COMMISSION ON THE OBSERVANCE OF INTERNATIONAL WOMAN'S YEAR

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, yesterday President Carter announced the appointment of our former colleague, Bella Abzug of New York, as chairwoman of the National Commission on the Observance

of International Woman's Year. Those of us who know Bella Abzug, both from her service as a Member and since leaving the House, should be pleased with her appointment.

She will bring to that very important position a dedication and expertise that will provide not only the United States but the world with a far greater and much needed understanding of the need for equality without regard to gender in every area. There is no question that women still suffer discrimination throughout the world and regrettably also here in the United States.

Along with Bella Abzug, Mrs. Betty Ford was also appointed a member of the Commission. We all came to know Mrs. Ford when she was First Lady, as a woman of intellect, dedication, and ability as well as being politically even more dangerous to those of us in the other party than her husband.

The 40 other Commission members appointed by President Carter are:

Ruth J. Abram, New York City; Maya Angelou, Sonoma, Calif.; Elizabeth Atahnasakos, Fort Lauderdale, Fla.; Bety Blanton, Nashville; Liz Carter, New York; Seymour M. Chassler, New York;

Ruth C. Clusen, Green Bay, Wis.; Audrey Rowe Colom, Washington; Jane Culbreth, Leeds, Ala.; Harry T. Edwards, Boston; Beverly Everett, New Sharon, Iowa; March K. Pong Eu, Sacramento, Calif.; Bernice S. Frieder, Lakewood, Ohio;

Former Representative Martha Griffiths, Romeo, Mich.; Dorothy Haener, Detroit; Rhea Mojica, Hammer, Chicago; LaDonna Harris, Albuquerque, N.M.; Lenore Hershay, New York; Koryne Horbal, Minneapolis; Mildred Jeffrey, Detroit;

Jeffalyn Johnson, Arlington, Va.; Coretta Scott King, Atlanta; Mary Ann Krupsak, Canapoharie, N.Y.; Margaret J. Mealey, Washington; Jean O'Leary, New York City; Mildred E. Persinger, Dobbs Ferry, N.Y.; Connie Plunkett, Carrolton, Ga.;

Ersa Poston, Loudonville, N.Y.; Cecilia deBurciago Preciado, Palo Alto, Calif.; Claire Randall, New York; Alice S. Rossi, Amherst, Mass.; Gloria Scott, Houston; Eleanor Smeal, Pittsburgh;

Jean Stapleton, Los Angeles; Gloria Steinem, New York; Ethel Taylor, Bela-Cynwyd, Pa.; Carmen Delgado Votaw, Bethesda, Md.; Gerridee Wheeler, Bismarck, N.D., and Abbie Wyatt, Chicago.

RESOLUTION DESIGNATING NATIONAL FOOD SERVICE EMPLOYEES WEEK

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I have introduced a resolution designating a National Food Service Employees Week.

Since World War II, the food service industry has been one of the most rapidly growing of all American businesses. Changes in lifestyles and the steady proliferation of various institutions have spawned an astounding increase in the patronage of both commercial and noncommercial eating places.

One of the results is that commercial eating places alone are generating an unprecedented volume of approximately $40 billion a year.

In addition, the rising needs of health care, educational and industrial institutions have accounted for a combined yield of nearly $30 billion annually.

All told, the industry's total volume has more than doubled over the last decade, reaching $70 billion in 1975, and surpassing that figure last year. With the retail food and automotive businesses, food service is now among the leaders of all consumer industries. It is, in fact, ranked first in retail operating units.

Perhaps the most significant benefit of this surge is in the number of people for whom the industry provides job opportunities. Four million employees—more than in any other consumer industry—provide the energy for its productivity and its contribution to the economy.

The request for this resolution has originated with an organization involved in hospital food service. In that particular field, which is responsible for a $6 billion volume, the employees have taken part in a successful effort to provide for their own continuing education, awarding scholarships for further food service administration study and sponsoring conferences to promote the professional development of industry administrators.

Considering our present struggle with unemployment, the contribution to the economy of food service certainly merits our recognition.

LEGISLATION TO AMEND SO-CALLED DELANEY AMENDMENT OF FOOD, DRUG, AND COSMETIC ACT

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I am today introducing legislation to modify the standards by which the Food and Drug Administration tests and restricts food additives, by amending the so-called Delaney amendment of the Food, Drug, and Cosmetic Act. The recent ban on saccharin is an unfortunate example of worthwhile legislative sanction carried to an unpredictable and unreasonable extreme.

The Delaney clause requires the FDA to prohibit any food substance that is shown in tests to induce cancer in humans or animals. The original intention of Congress in enacting this amendment is laudable; its general purpose in prohibiting the introduction of carcinogenic substances is vital to the cause of consumer protection and public health. But, as the recent ban on saccharin demonstrates, this law irrationally prohibits additives that have never been proven to cause even a single cancer in human beings. Beyond the serious risks to those on restricted diets, such automatic prohibitions seriously undermine the agency's credibility in the eyes of millions of Americans who have used these additives for many years without harmful side effects.

My bill is an attempt to correct this problem by introducing a requirement for reason into the FDA test process. Agency scientists and doctors would be required to evaluate test data to determine whether a reasonable causal link exists between the cancer found in test animals and the probability of its occurrence in human beings. If no such relationship could be predicted, but if cancer was still present among test animals, a warning would be issued by the FDA to inform consumers who need or want the additive and are willing to accept whatever risks might be entailed.

A number of other bills have been introducd to address this problem, one of which requires risk-benefit analyses of food additives to determine possible carcinogenic effects. Mine is another alternative. I believe, however, that it more adequately meets the requirements of balancing consumer choice and information with genuine health protection.

The Food and Drug Administration is not to blame for the situation with which we are faced; it simply has carried out its statutory responsibility. It is up to the Congress to redress the statutory excess by introducing the concept of careful scientific prediction in the additive authorization process.

The amendment follows:

H.R. 5691

A bill to amend the Federal Food, Drug, and Cosmetic Act to revise the standard for regulation of food additives found to induce cancer

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 409(c)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(3)) is amended—

(1) in subparagraph (A)—

(A) by redesignating clauses (I) and (II) as subclauses (I) and (II), respectively, and

(B) by inserting after "shall not apply with respect to" the following: "(i) any food additive found to induce cancer in animals if the Secretary determines that such additive does not present a significant risk to human health, taking into account (I) the totality of all scientific data and information available on the additive, including human experience, (II) the relationship between the amounts of the additive found to induce cancer in animals and the amounts which humans can reasonably be expected to ingest, (III) the scientific validity of the test or tests in which the additive was found to induce cancer in animals, including consideration of the design and execution of the protocol, the analysis of the test results, and other conditions of testing, (IV) current knowledge about the reliability in predicting human cancer from data from the test or tests in which the additive was found to induce cancer in animals, (V) the availability and safety of alternative ingredients which serve the same function as the additive, and (VI) the usefulness of the function performed by the additive in food in terms of nutrition, dietary management of disease, and the cost, availability, and acceptability of food; and (ii)".

(2) by adding after and below subparagraph (B) the following:

"In the case of a food additive with respect to which the Secretary has made the determination described in subparagraph (A)(i), no such regulation shall issue for such additive unless it requires appropriate labeling of the additive or of any food containing the additive that warns of the carcinogenic nature of the additive; and the Secretary shall provide reasonable opportunity for inspection by the public of the data and other information upon which such determination was based.".

THINKING SMALL

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, the New York Times of Wednesday, March 23, carried an excellent "op-ed" piece by John B. Oakes relating to President Carter's proposal to hold up 19 water resources projects. In supporting the President's plans, Mr. Oakes raised some very important issues, particularly relating to the opportunity facing the Nation to make better energy use of existing dams which, presently, do not produce electric power.

Indeed, in checking with the Federal Power Commission, I found that there are 49,000 dams 25 feet high or higher in the country, and only 800 of these are licensed by the FPC to produce power. The potential of the untapped dams could be harnessed simply by adding turbines.

By utilizing this existing national potential for hydropower, we could reduce our dependence on foreign oil by 10 percent.

The Nation's utilities have largely ignored the potential of these generating sites, because they are individually relatively small and do not add as much to the utility rate base as the giant fossil fuel and nuclear plants do. It is time the utilities start thinking small to win big savings in dwindling oil supplies and consumer rates.

In the State of New York, the PFC found 769 dams, of which only 143 are presently licensed for power generation. Commission figures indicate that utilization of the 626 untapped dams could produce enough power to replace at least 7.5 million barrels of oil per year and save New York State electricity consumers $112.5 million annually.

One upstate utility, the Niagara Mohawk Power Corp., has estimated that upgrading 15 of that company's 79 hydroelectric facilities could increase their potential enough to replace 1.2 million barrels of oil per year and save its consumers about $18 million annually. The company estimates that the upgrading could be accomplished for a capital cost of only $150 million, about one-half the cost of constructing an equivalent new nuclear powerplant and with no fuel costs whatsoever. The Niagara Nohawk proposal would be in addition to the power gained by developing the 626 dams not used for power generation in the State.

Obviously, there is a substantial amount of hydropower that could and should be developed in New York, and I am urging New York officials to work with the FPC on a program to realize our real potential.

Power Commission estimates indicate that existing, but untapped, dams in the Ohio River Valley could produce up to 2 million kilowatts of additional power capacity that would replace 15 million barrels of oil per year and save consumers some $625 million annually. Indeed, the city of Vanceburg, Ky., which operates a municipal electric company, is currently installing turbines in two of the Ohio River dams at a cost of less than $30 million apiece. The return will be 140,000 kilowatts of capacity, capable of producing about 620 million kilowatt hours annually at a savings of 1 million barrels of oil per years and $15 million per year.

The proposal involves only dams already in place and would not require the construction of a single new dam. That is the beauty of it, in that we could go back over and do better than we did the first time—and not destroy any wild rivers in the bargain.

The article follows:

THINKING SMALL

(By John B. Oakes)

In his bravest political action since becoming President, Jimmy Carter stuck a knife into one of the most sacred of Congressional sacred cows—and aroused corresponding Senatorial fury—in trying to eliminate 19 major water-resources projects for the excellent reason that they "now appear unsupportable on economic, environmental and/or safety grounds."

Scattered from northern Maine to central Arizona, these projects would cost the nation over $5 billion to complete, not counting the incalculable environmental and social damage some would do by flooding farms and forests, by destroying rivers and by setting short-term priorities that could lead to long-term disaster. But when the President said he intended to cut them out of the 1978 budget and also to re-evaluate the remaining 300 such projects that Congress had previously approved, the roof fell in on Mr. Carter.

The Senate promptly voted, by a nearly two-thirds majority, to block the President from making these cuts; it thereby implicitly rejected his expressed desire to develop with Congress "a coherent water resource policy." The trouble is that Congress doesn't really want a "coherent water resource policy." It never did. It prefers to trade votes for special-interest projects in one part of the country for those in another, regardless of their merits.

This cynical point was well illustrated by Senator Moynihan of New York, a freshman who learns fast. "We shall be grateful for the support of those states we support," he intoned as he voted for the 19 (mainly Western) projects while acknowledging that they would "result in a great flow of funds out of the Northeast"—not to mention their adverse environmental and other effects on the nation.

One of the smaller of the boondoggles, Mr. Carter would like to eliminate, for example, costing a mere $70 million, is estimated even by its sponsor, the Bureau of Reclamation, to produce only 89 cents in return for each dollar spent in providing more irrigation for some 100 Wyoming and Colorado ranches.

One of the larger (but by no means the largest) involves construction by the Army Corps of Engineers of two huge hydroelectric dams near the Canadian border in Maine, at the mindboggling cost of well over a half-billion dollars. Everybody knows that New England needs a cheaper supply of energy than it is getting now; but not everyone agrees with Senator Muskie that this unbelievably costly and environmentally devastating Dickey-Lincoln project (which would flood out more than 250 miles of free-flowing rivers along the Canadian border) is the best way—or even a remotely acceptable way—of getting it.

At a recent energy conference in Washington, every conceivable source of energy supply, except one, was discussed—oil, gas, coal, shale, nuclear, wind, sun, etc. The sole exception was hydro-power. The reason it was ignored is that virtually every large-scale power site is either already in use or—like Dickey Lincoln—is unsuitable for development on compelling economic and/or environmental grounds. But what is overlooked by most energy experts as well as by pork-barrel-minded legislators is the ready availability of thousands of small sites where, at relatively little cost and in relatively little time, electrical generation on a small but practical scale can be easily supplied with minimal environmental damage.

To start with, there are estimated to be some 3,000 small dams on mill streams throughout New England and in other parts of the country as well, which have long since been abandoned but which could easily be restored and fitted with modern turbines and generators to supply local needs. In fact, recent engineering developments make it feasible to generate electricity with far less fall and far less velocity than had ever before been thought practical—and with far smaller turbines.

One expert who hasn't overlooked these possibilities is David E. Lilienthal, former chairman of the Tennessee Valley Authority and of the Atomic Energy Commission, whose name is almost synonymous with huge power projects.

"As one who has been responsible for and an advocate in past years of very large structures," says Mr. Lilienthal, "I'm in a position to say objectively that great size, in this area at least, is no longer a complete economic advantage. . . . This is particularly true where a dam is already in place on smaller streams but is not equipped with turbines. Such in-place dams exist by the thousands and not alone in the Northeast."

Small hydro plants based on such existing dams or locks—and on irrigation canals in the West—could make an appreciable contribution to the energy supply of local communities, industries and rural enterprises, Mr. Lilienthal points out. The "economics of scale" no longer necessarily applies—another sacred cow gone to pasture.

If President Carter can make elimination of Dickey-Lincoln stick—and if David Lilienthal can make his pint-sized power plants go—Americans may yet begin to realize that "thinking big" is not necessarily the answer to all the problems of growth. "Thinking small" may sometimes have its merits too.

MORE ON THE SACCHARIN DEBATE

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, yesterday's edition of the Washington Post carried an excellent column regarding recent Canadian tests that showed saccharin to be a carcinogen. This article by Barry Commoner describes the extensive testing that led to a ban on saccharin in both Canada and the United States and explains the validity and necessity of animal testing. I am inserting the Post article into the RECORD, since I believe it has great value in explaining how and why we regulate substances that go into our food supply.

I am encouraged to learn that a sweetener extracted from the rind of grapefruit holds some promise as a safe substitute for sugar and may be marketed in the United States in the near future.

I must say that I think FDA has handled the matter miserably from the point of view of accurately informing the pub-

lic of the reason for its action. In view of the public outcry that has resulted and the fact that the best solution may be to phase out saccharin over a period of time, thus saving the Delaney amendment, and try at the same time to speed up the approval of a safe substitute.

I am also inserting an excerpt from an editorial in the Baltimore Sun on March 24, 1977, on this subject:

[From the Washington Post, Mar. 27, 1977]

SACCHARIN AND CANCER—RAT TESTS VALIDLY SHOW THE DANGER; THEN IT IS RISKS VERSUS BENEFITS

(By Barry Commoner)

The current controversy about the Food and Drug Administration's decision to ban saccharin, based on tests which show that it produces cancer in laboratory rats, reveals a serious degree of confusion about the significance of such tests and about what steps should be taken to reduce the risk of cancer.

Some claim that tests carried out on rats do not apply to people because of the biological difference between the two species. ("People aren't rats.") Some claim that the results of such tests are irrelevant because they involve extremely high exposures never encountered in human experience. ("A person would have to drink 800 bottles of diet soda per day to be exposed to the amount of saccharin equivalent to that fed to the rats.") Finally, others propose that the Delaney Amendment, which forbids the addition to food of any amount of a substance known to cause cancer in any species of animal, should be replaced by a procedure which balances the anticipated risk of cancer against the social benefits of using the substance.

This confusion is dangerous because it threatens to hinder the most important step that can be taken to reduce the enormous human toll of cancer: that of reducing exposure to environmental agents believed responsible for at least three-fourths of the U.S. cancer incidence.

To begin with, we must understand that because of the unquestionable scientific evidence that most of the U.S. cancer incidence is due to environmental agents, the only possible prevention for the disease is to reduce contact with these agents. Nearly all of these agents are carbon-containing chemical substances, mostly synthesized by the petrochemical industry, rather than occurring in nature. There is sound scientific evidence that most of these substances do not directly trigger the development of cancer, but that they are converted into active carcinogens in the body by the metabolic action of enzymes.

It has also been established that the ability of different animal species to metabolize, or convert, environmental carcinogens into inherently active cancer-causing substances varies greatly. Thus, when fed a particular carcinogen called AAF, rats will almost always develop cancer, whereas guinea pigs will never develop it.

Clearly, the best way to determine what substances cause cancer in people would be to observe the effects of different substances on people. Obviously, since deliberate exposure is unthinkable and because epidemiological data are obscured by long delays and demographic factors, such information is very difficult to obtain. An exception is the kind of intense occupational or accidental exposures that too often occur. Studies of such exposures yield a list of about 10 to 20 substances which can be directly shown to cause cancer in people. But this list is far too short to explain the strong dependence of the incidence of cancer in the United States on the environment which is revealed by the National Cancer Institute's county-by-county survey. Many more substances must be involved; the question is how to identify them.

Meanwhile, tests on laboratory animals, particularly rats and mice, have produced a list now approaching a thousand substances known to cause cancer in one or more species. What does this information tell us about the likelihood that a particular substance will cause cancer in people?

ANY ANIMAL EQUALS SOME PEOPLE

A basic fact that animal tests is this: Laboratory animals are strains which have been intentionally bred into highly uniform populations. Most laboratory animal strains are highly uniform in their sensitivity to carcinogens. In any one strain each laboratory rat is very much like the next one; but as already indicated, one strain, or species, may be very different from the next.

One of the most important factors that determines the sensitivity of a species or strain of animal is the activity of the enzyme system which converts environmental carcinogens into active metabolic products that actualy trigger the cancer. (In the previous example, the rat's carcinogen-activating enzymes are able to convert AAF into the active metabolic product, while the guinea pig enzymes are not.)

Now, the situation in people is vastly different. Human populations are, of course, much more variable in their characteristics than inbred strains of laboratory animals. There is now specific evidence that this variability occurs in the enzymes that are involved in activating environmental carcinogens. For example, according to a recent study of enzyme activity in the placentas of pregnant mice and pregnant women, activity varied by only 10 per cent among individual mice, while among different women, it varied by 7,000 per cent. In this experiment, the women were all cigarette smokers, and the mice were also exposed to cigarette smoke. (This reflects another essential fact about carcinogen-activating enzymes: their production is considerably increased by exposure to a number of environmental agents—of which many, but not all are carcinogens—including tobacco smoke, chlorinated hydrocarbons such as DDT and PCB and certain drugs.)

People then, are more variable than pure-bred strains of laboratory animals in their genetically determined levels of enzyme activity (this may well explain why not all smokers develop cancer); in addition, people are exposed to a much more variable environment of substances (such as tobacco smoke) that can stimulate the carcinogen-activating enzymes.

This very different range of variability among populations of laboratory animals and of people must be carefully considered in interpreting animal tests on carcinogens. In the absence of direct data on people, there is little point in comparing the entire human population to either a population of carcinogen-sensitive rats or to a population of carcinogen-resistant guinea pigs. Rather, because the human population is so variable, it will contain some individuals who react like one species, some who react like the other and many who occupy the whole range in between. Once it is established that a substance is carcinogenic toward *any* species of laboratory animal, it is likely that it will cause cancer in *some* individuals in the human population.

WHY THE LARGE DOSAGE

At this point it is important to consider the actual incidence of cancer observed in laboratory tests and in human populations. The overall annual incidence of cancer in the United States is about 0.3 per cent; and at that rate cancer is the second highest cause of death. A 1 per cent incidence would be huge. To reduce this incidence, we need to know what environmental substances are responsible for incidences of cancers of the order of about 1 per cent.

In order to measure such a small statistical effect in a laboratory experiment, huge numbers of animals would be needed. Therefore, much higher doses of carcinogen are used, so that the cancer incidence among the test animals is usually between 50 and 100 per cent.

The purpose of the animal test is not to determine whether people would get cancer from such high exposures, but only to decide in a feasible, statistically significant way, whether or not the substance will cause cancer in the test animal. Such tests can usually give an unequivocal answer, at the large doses that are customarily used. For example, animals fed large amounts of sugar, aspirin or sulfa drugs do not develop cancer. It is therefore scientific nonsense to assert, as some people have, that "any chemical given in a sufficiently high dose will cause cancer."

To compare the carcinogenic potency of different substances is extremely difficult. According to the most comprehensive evaluation of the carcinogenicity of chemicals, "Comparison of potency between compounds can only be made if and when substances have been tested simultaneously." Since such comparison tests are rare and involve relatively few substances, there is little basis for quantitative evaluation of the potency of most carcinogens, especially where it is necessary to extrapolate from animal data to human beings. However, it is generally agreed that there is usually no absolutely "safe" level for exposure to a carcinogen; low exposures involve a small, but not zero, risk.

In the absence of direct observations of human populations, it is impossible to predict what percentage of the population will develop cancer when exposed to a given concentration of a particular substance over a stated period of time. Except for the relatively few substances (such as vinyl chloride) directly observed to cause cancer in people, those substances shown to be carcinogenic to animals must be regarded as a cancer risk of unknown degree. Animal tests tell us that the risk is *not* zero, but they do not tell us the size of the risk.

RISKS AND BENEFITS

We now come to the question of whether the risk of a carcinogen to people ought to be evaluated against its benefits.

For example, what is the benefit of a carcinogenic dye that makes hot dogs red? If the social purpose of hot dogs is to nourish people, then—leaving aside the argument about what contribution the hot dog itself makes to human nutrition—the dye has no value at all. If "market research" shows that people are more likely to buy red-dyed hot dogs than a competitive brand which is not dyed, then the only social value of the dye is to enable the first company to sell more hot dogs.

In the same way, the social benefit derived from preservatives is that they help make possible the production of foods at large, centralized factories from which they are shipped over long distances and necessarily long times. If a food preservative turns out to be carcinogenic, then the risk must be evaluated not against the benefit of buying "fresh" food but against the relative benefits of preserving food for long shipment, or arranging to produce it locally and to deliver it fresh.

It can be seen, therefore, that once the attempt is made to weigh the risks against the benefits of a food additive—or of any of the numerous synthetic chemicals introduced into the environment by the petrochemical industry—very far-reaching economic, social and even political questions are raised. In practical terms, a substance is designated as a "carcinogen" by animal testing. (A new type of test, in which the ability of a substance to ifduce genetic changes, or muta-

tions, in bacteria is used to predict its carcinogenicity toward laboratory animals, promises to deliver this information more rapidly than animal tests.) Once this information is in hand, a decision regarding whether and how human exposure to it is to be controlled becomes inescapable. Such a decision can be made in two alternative ways:

1. Absolute (i.e., the Delaney Amendment): This approach involves the decision that, given the disastrous health effects of cancer, no benefit from a particular substance is worth the risk, however small it may be. And, evidence that a substance causes cancer in a laboratory animal means that some people also run the risk of cancer. Accordingly there is scientific support for the *scientific* assumption inherent in the Delaney Amendment—that a positive animal test for carcinogenicity is evidence of a risk to people. In effect, then, this approach involves no further evaluation by society, other than the assertion that no risk of cancer to people is ever, under any circumstances, to be deliberately induced. No evaluation of benefits is undertaken in this approach. Thus, once the absolute evaluation of the importance of the cancer risk is accepted, the decision rests only on a purely *scientific* fact: that, on the basis of animal tests, a substance is or is not carcinogenic.

2. Relative (i.e., risk/benefit evaluation): This approach is now being urged in opposition to the Delaney Amendment. In keeping with the approach used to evaluate general environmental hazards, this method asserts that action should be based on the socially perceived balance between the carcinogenic risk of exposure to a substance, and the benefits to be derived from using the substance. For example, the risk of cancer from using saccharin would be balanced against the benefits it yields in weight control or in the diet of diabetics. This approach involves the scientific evaluation of the risk of cancer, as well as the scientific evaluation of the benefits associated with a substance. However, balancing the benefits against the risks belongs not to the domain of science, but to society. The assessment is a value judgment—a *social* rather than a *scientific* process.

In order to ensure an informed social evaluation, the magnitudes of the risks and benefits need to be scientifically evaluated. As already pointed out, animal tests about a given carcinogen can produce a vital but qualitative conclusion: that the risk of cancer among exposed people is not zero. On the other hand, the benefits of a substance, such as saccharin, can often be assessed over a wide range of values.

For example, if saccharin is essential in the diet of a diabetic, it has the considerable benefit of extending human life. In contrast, saccharin used in the massive marketing of "diet soda," which for most people could be replaced by another product, can be assigned a much lower benefit.

Similarly, the social benefit of an antileukemia drug which is itself carcinogenic may be quite high, whereas the social benefit of a carcinogenic food dye is very low.

In the same way, the use of polyvinylchloride—from which the carcinogen vinyl chloride may leach—may have a very high social value in an artificial heart valve, because there is no substitute for this essential function. In contrast, the use of the same polyvinylchloride in food packaging has a much lower social value, because safer substitutes, such as glass or paper, are available.

Thus, if we choose the option of balancing the risks and benefits of carcinogens we face a rather unusual situation: While it is possible to attach a wide range of values to the various possible benefits of using a carcinogen, about all that can be said about the risk is that it *does* or *does not* exist. Given this situation, the practical course of making the social risk/benefit judgment can take one of the following general forms:

1. If, balanced against the fact that the risk of cancer from a particular substance is greater than zero, it is determined that the associated benefit is essentially zero, then the substance would be banned. For example, carcinogenic food dyes would be banned on the grounds that they contribute nothing to nutrition, which is the social value of food.

2. At the other extreme, if the social benefit associated with the use of a carcinogen is judged to be so great—for example, saving a life that would certainly be lost otherwise—that it warrants even a large carcinogenic risk, the substance would be approved *for that social use.* For example, saccharin might be approved for use by diabetics who have no alternative way to achieve an acceptable diet, but banned for massive use in diet soda, on the grounds that there are equally or more effective ways to control weight.

3. In intermediate cases, it would again be necessary to reach some judgment of the benefits associated with the use of the substance, so that its social value can be balanced against the evidence that it creates some risk of cancer. Such a judgment would be more difficult than the first two, but not impossible.

What is noteworthy about this kind of risk/benefit evaluation—necessitated by the peculiarly qualitative natural of carcinogenic risks—is that the social balance between risk and benefit is, in practice, based on a comparison of the social benefits of different substances which are known to involve some, unmeasurable but real, risk of cancer. This means, therefore, that if the risk/benefit approach is chosen to deal with carcinogens (for example, if, in the case of food additives, the Delaney Amendment is revoked) the decision will need to be based on the social evaluation of the benefits to be derived from any chemical that imposes a risk of cancer.

The foregoing arguments apply not only to the carcinogenicity of chemicals, but also to most of the toxic effects of chemicals, since these are often as difficult to assess quantitatively. In effect, then, if the risk/benefit approach is adopted, it means that society must undertake to determine, on the basis of their *value to society,* what chemical substances are to be produced, and are permitted to come into contact with people. This will require social governance of decisions—about what chemicals to produce and for what purposes—which, in our present economic system, are governed not by social, but by private interests.

[From the Baltimore Sun, Mar. 24, 1977]

SHOUTING SWEET NOTHINGS

The latest fad on Capitol Hill is condemning the Food and Drug Administration for its decision to ban saccharin. It's as if the agency acted mindlessly, without any basis in fact. Yet the FDA will tell anyone who asks that the Canadian tests which showed saccharin causes bladder cancer in rats were the most thorough ever done. And the Canadian Ministry of Health says the rat tests were conducted according to strict toxicological protocols and that the results were certified by an international panel of pathologists. The Canadians also reported that cancer was far more common to the second generation of rats fed saccharin, indicating there is a cumulative effect from generation to generation.

But for many it is easier to swallow the propaganda of artificial sweetener manufacturers, or to condemn all government regulation, than to investigate and learn the facts. The manufacturers claim that a human would have to drink 800 bottles of artificially-sweetened pop daily to consume saccharin equivalent to the amount fed to the rats. They neglect to mention that the high dosage was necessary to extrapolate tests with 200 rats to millions of humans. Nor do they mention that toxicologists usually insist on a 5,000-fold safety margin for cancer-causing chemicals and that the rats contracted cancer at only 800 times the usual dosage for human beings. Saccharin thus failed the test miserably.

SLAYING OF SBA EMPLOYEE

(Mr. SMITH of Iowa asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SMITH of Iowa. Mr. Speaker, it was with deep regret that I learned of the killing last week of a Small Business Administration employee, Thomas Patzke, who was only 26 years old, was a loan specialist in SBA's liquidation office in Chicago and apparently was killed while carrying out his duties.

Some 5 years ago, SBA made a loan for $60,000 to the Conrad Food and Liquor Store, on East 71st Street. The borrower defaulted on repayment and the loan went into liquidation after the firm filed bankruptcy proceedings in July 1975. SBA continued to work with the owner to try to get the firm back on its feet.

On Wednesday, March 23, the store's landlord advised SBA by phone of his intent to evict Brown for nonpayment of rent.

Mr. Patzke was sent to the store about noon, to take an inventory of its contents and padlock it pending SBA proceedings to foreclose. He also took with him an auctioneer-appraiser, Robert Fender, who was to assist with the inventory.

About 1 p.m. Mr. Patzke called the SBA office to say that a crowd was forming in front of the store. His supervisor, James Burke, chief of liquidation, advised him to lock the place and get out.

Shortly thereafter, fire broke out in the building, destroying the store and heavily damaging two other businesses. Firemen found the bodies of Mr. Patzke and Mr. Fender in the building. Both apparently had been shot and Mr. Fender's hands and feet had been bound.

After discovery of this crime, the FBI was contacted for assistance in investigating the death of a Federal employee who was carrying out official duties as an SBA loan specialist. The Bureau, however, was unable to enter this case as the law making it a Federal offense to kill a long list of individuals, including judges, Federal officials, inspectors, and other Federal employees does not cover SBA employees. This omission should be changed.

I certainly hope that there will be no repetition of this tragedy. If there is, however, I believe that we should authorize the FBI to enter the case and bring to bear its expertise and investigative facilities. Surely a situation involving a Federal loan officer should be placed on a par with one involving other Government employees who are killed,

or assaulted, solely because they are doing a good job.

Accordingly, today I have introduced, on behalf of myself and Mr. CONTE, the ranking minority member of the Small Business Committee, a bill which would make it a Federal offense to kill or assault an SBA employee while engaged in the performance of his official duties or on account of his official duties.

HEALTH CARE—WHAT SHOULD BE DONE

(Mr. FRASER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FRASER. Mr. Speaker, early this month, I sponsored an all-day public health forum in Minneapolis to discuss with my constituents the issues that must be considered as new approaches are developed to finance and deliver health care. More than 100 health consumers, providers, planners, administrators, and educators attended the day-long meeting.

The message that repeatedly came across is that there is a need for a clearly defined national health policy before a national health insurance program is initiated.

I would like to share with my colleagues the statement of one of the panelists at the forum, Mr. Jay N. Greenberg, assistant professor at the University of Minnesota School of Public Affairs.

In a well-reasoned presentation, Mr. Greenberg analyzes the structure and incentives of the existing health system and offers alternative models of delivery and reimbursement to bring about increased access, choice, cost containment, and efficient delivery of services.

The statement follows:

STATEMENT OF JAY N. GREENBERG

According to the agenda, I have the heroic task of addressing the issue of what should be done with or to our health care system. As with all heroic tasks, it must be whittled down to size.

The first step is to ask "What types of information do we need before we can make rational decisions with regard to modifying our current health care system?"

It is my contention that we must have three types of information in hand before we can answer the question of what should be done?

First, we must know what we, collectively, want from our health care system—that is, we must set goals and objectives prior to embarking on any course of action.

Second, we must understand the current system. Without having an understanding of how the current system is structured, how it functions, and what makes it function the way it does, we can't possibly hope to change it for the better. That is, we must not only be able to describe the current system, but we must begin to examine what incentives are at work and how they have led us to our current situation.

Once this is done we can begin to examine possible alternatives. This examination of alternatives should be done in two stages. In the first stage we should examine how each alternative modifies the current structure and set of incentives that are in operation. In the second stage we shoud examine how this change in structure and/or incentives will most likely affect our desired objectives.

Before I proceed to the main body of this talk, let me warn you that my background is in economics and policy research. Now, besides giving me a rather jaundiced view of the world in general, this background specifically affects the context of my presentation in two ways:

First, economists have an almost compulsive desire to dissect the components of any system under study and see how the parts interrelate, and

Secondly, our predictions of what course of action will be taken are almost always wrong.

This latter point implies that I would be prudent to leave the prediction of future actions to those of you who are more politically astute, and so I shall.

Instead, I will discuss the system as I see it, how the pieces of the jigsaw fit together, and most importantly, the interrelationship of the pieces.

Indeed, the major theme of my talk is just that. If we are going to effect positive change in the medical care system, we must realize that changing or adjusting one part of the system may affect the outcome of yet another part of the system.

Thus it makes little sense to discuss changes in financing such as National Health Insurance without putting these changes into the broader context of changes in the system as a whole. And yet, with the noteworthy exceptions of the work done by Victor Fuchs and Walter McClure, most of the discussion and debate over alternative forms of NHI have been done in a vacuum—as if the rest of the system did not matter.

I will begin by briefly discussing what most people consider to be the major goals or objectives of intervention in the health system, then discuss the structure and incentives of our current system and what impact each of several interventions may have.

There seem to be five objectives that occur and recur in discussions of intervention in the health care system:

1. increased access to care,
2. increased financial protection from catastrophic events,
3. containment of the cost of care,
4. increased efficiency, and
5. occasionally some authors mention increases in the levels of health,

I would propose that we add still another to the list:

6. increased consumer choice.

I would do this for two reasons. First, increased choice in and of itself is a laudable goal. Secondly, as we shall see, increased consumer choice may, under certain conditions, bring us closer to our goals of increased efficiency and cost containment.

Let me say a word about financial protection. Only about 50 percent of all Americans have any form of major medical coverage and most of these policies have a rather low upper limit on benefits. In a day when the average cost of care for such conditions as terminal cancer is greater than $25,000, even those with some insurance can face severe financial hardships as a result of medical expenditures.

However, it is essential that we distinguish between the above example of financial hardship that we *can* do something about from the typical statement that health care is so expensive that the average person cannot afford it—therefore we need NHI and we need it now.

To be blunt, this type of thinking is pure nonsense. As economists are fond of saying, "there ain't no such thing as a free lunch." Someone is ultimately going to have to pay the bills. And who will that be?

Well, if we decide to pay for NHI out of general revenues, then it will be the "average American" who pays, and she or he will probably be paying more because they will not only be paying for themselves but also for anybody who is making less money than they are. If we decide to pay for NHI through indirect taxes such as higher corporate taxes or higher payroll taxes, the cost will in all likelihood be passed forward to the consumer in the form of higher prices. And the burden of this form of financing would fall most heavily on the poor.

I apologize for the disgression but I think the distinction is important.

Let us briefly take a look at the basic components of the health care system and how they interrelate. At the risk of being too simplistic, let us divide the system into four component parts:

1. health person power,
2. place or site of delivery,
3. financing mechanisms,
4. method of payment.

(Later on we will add a fifth component—government regulation.)

HEALTH PERSON POWER

When I speak of health person power, I am referring to physicians, nurses, and the whole cadre of para—and allied health professionals.

The physicians as a group can be crudely broken down into two groups: general practitioners and specialists.

There are approximately 315,000 practicing physicians in this country, of which about 240,000 (or approximately 75 percent) are specialists and only 75,000 or 5 percent are general practitioners. Among the specialists, approximately 100,000 are surgeons. That is, we have more surgeons than we do general practitioners.

SITE OF DELIVERY

The place or site of delivery can be broken down into doctors' offices or clinic (the site of most primary care) and hospitals (the site of most secondary and tertiary care).

FINANCING

Likewise, financing can be divided into financing of primary care and financing of hospital care. Statistics indicate that the proportion of cost that the patient pays out of pocket for ambulatory care (i.e., doctor's visits) is five times higher than the proportion of hospital costs that they pay for directly.

METHOD OF PAYMENT

It is important to distinguish between the financing (or who pays the bills) and the method of payment or how and when the bills are paid.

Again, at the risk of oversimplifying, there are two basic methods of payment:

1. fee-for-service,
2. capitation or prepayment.

Under fee-for-service, a fee is charged the patient for each task or procedure that is performed, with differing fees according to the length and difficulty of the task.

Under capitation, a fixed amount of money which covers a fixed time period is given to the party or parties responsible for care, regardless of the amount of care that patient receives.

At the current time, over 95 percent of all payment is done on a fee-for-service basis.

This structure of the medical care system alludes to the importance of five types of actors:

1. consumers of medical care (alias, the patients),
2. physicians,
3. financial intermediary,
4. hospitals, and
5. the government.

Now that we have discussed the basic anatomy of the system, let's take a crack at its physiology. In particular, we will examine how the structure rewards or penalizes the actors for certain behavior and the impact of these behavior patterns on our goals for the system.

Let's begin by taking a look at the problem of access to care. There are still a significant number of persons in this country who have only limited access to medical care. For the

most part they are the poor and near poor, certain ethnic minorities, and persons living in rural areas. The main reasons for the limited access to care of these groups are money, discrimination, and a maldistribution of health person power. This maldistribution has two dimensions. First, there is a geographic maldistribution and secondly, there is a maldistribution in the types of health professions.

It is important to note that the access problem is primarily a problem of access to primary and emergency care, care that is mainly delivered by general practitioners. It should also be noted that much of this primary care could probably be delivered by non-physician health professions.

Why then don't we have more G.P.'s relative to specialists and why don't we utilize non-physicians to deliver more of this type of care? To answer these questions we must look to the structure and incentives of the system.

What are the incentives facing a medical student with regard to specialization vs. general practice?

1. On the average, he or she could expect to earn less by becoming a G.P.

2. There is less prestige associated with being a G.P.

What about the structure of training?

1. Physicians are usually trained in high technology settings—they are trained to practice at university hospitals. They are, for the most part, not trained to practice in a rural setting.

2. A disproportionately large number of medical students come from middle and large sized cities. Likewise, almost all medical schools are found in middle and large size cities. What's more medical students tend to establish practice either where they were trained or where they lived prior to going to medical school.

Why don't we utilize more nurse practitioners, physician extenders, and the like?

1. In many cases these health professionals cannot practice unless they are under the supervision and direction of a licensed physician.

2. Many insurance policies do not cover the services of these non-physician health professionals.

3. Finally, there is a lack of consumer education. We are under the impression that the only person capable of rendering quality medical care is a licensed physician—and a specialist at that!

COST CONTAINMENT AND EFFICIENCY

What about our goals of cost containment and efficiency? Nobody has to tell you that hospitals are expensive. So why do we use them so much? Let us briefly look at the incentives that each of the relevant actors faces:

The patient

1. Patients are more likely to have hospital insurance than they are to have insurance that covers visits to the doctor's office—so from the patient's perspective, an expensive hospital stay may actually be cheaper than having a particular procedure done in the physician's office.

2. Even for the patient who has insurance that covers visits to the doctor's office, there are usually certain tests and procedures that will not be paid for unless they are associated with a hospital stay, even if these procedures can be performed safely and less expensively in the physician's office.

What incentives do the doctors face?

1. The way fees are usually structured, the physician will receive more for visiting a patient in the hospital than in his office.

2. And most importantly, the physician generally wants the "best possible care" for the patient. However, we tend to define best in terms of the most technologically advanced care, and if the patient doesn't have to pay directly for this high technology, all the better.

The hospitals face a similar set of incentives. They want to get the best, most highly qualified physicians to join their staff—so they provide the most up-to-date technologically advanced equipment. Since, with few exceptions, they have been reimbursed on a cost-plus scheme, the structure has permitted them to do this. (With the advent of certificate-of-need, this may not be quite as true today as it was two years ago, but the evidence is not in yet.)

WHAT ABOUT CHOICE?

It is often argued that one of the best features of the current system is that we can pick whichever type of care we want (or can afford). Even apart from personal financial constraints, do we really have much choice?

To me choice means having information about alternatives and having real alternatives to choose from. How much information do we have? Is there a medical directory for each town that lists the doctors' medical training, past track record, and fee schedule? Most of us have more information about a football team on which we bet $2.00 than we do about our physician.

Two years ago I taught a course in health economics to a group of physicians, and once in class I used that football/doctor example. Well, one of the physicians was simply outraged and said something like the following: "I'm sick and tired of people saying things like that. What about airline pilots? How much did you know about the pilot on your last flight?"

I thought for a minute and realized that the structure was certainly the same, but the incentives weren't. Unlike the doctor, the damn pilot was up there with me.

Even if we did have the appropriate information, how much variation in the type and mix of service is there to choose from? With over 95 percent of all care done on a fee-for-service solo practice or small group basis, there really isn't much choice at all. That is not to say that there isn't significant variation among the fee-for-service solo practitioners—I suspect that there is. But it is sort of like going to a fruit store and expecting to find 20 different types of fruit, from mangoes to apples, and instead finding 20 different types of oranges. It just isn't the same.

WHAT DOES ALL THIS MEAN?

What it means to me is that when we talk about what is wrong with our medical care system, it is foolish to talk about bad guys and good guys—or to cast the physician and hospital administrators as villains. Rather, we should realize that each actor in the system, whether it be the physician, the hospital, the insurance company, or the patient, is responding to a set of rewards and punishments within a fixed structure.

Therefore, if we are going to try to improve the system, we must modify the structure and/or change the current set of incentives that the various actors face. With this groundwork laid, let us examine several proposed modifications to the current system.

Over the last several years there has been a proliferation of bills in Congress and proposals by researchers that relate directly or indirectly to modifying the financing of health care. Rather than discussing the details of the actual proposals, I think it would be beneficial at this point to try to separate them into "types" of proposals and to examine how each type of proposal might offer progress toward our health care goals.

There have been two general types of changes proposed. The first would have us modify just the financing mechanism and the other would modify the financing mechanism and at the same time alter other aspects of the system.

With regard to the first, the two major types of modification of the financing mechanism seem to be comprehensive/universal third-party payment and what has been called "major risk" insurance.

Under the heading of financing and other system changes I would include the following:

1. So called National Health Service (a la the British system). (Since this alternative was the topic of an earlier panel discussion I will not discuss it here.)

2. Universal, third-party payment plus increased choice in the way services are packaged, delivered and reimbursed.

3. Universal, third-party payment coupled with much stronger government regulation.

Needless to say, some combinations of the above are possible. But as I will point out, some approaches cannot be combined effectively.

Let us begin the discussion by examining comprehensive third-party payment.

What effect might universal/comprehensive insurance have on access to care?

If the main constraint on access to care is money, then this may help. However, if people are allowed to utilize private funds to supplement their insurance and if physicians are allowed to charge them more than what the insurance plan will reimburse, then we might be back in the same situation where the rich are bidding health resources away from the poor—but at a higher ante.

If the main access problem is a maldistribution of medical resources and/or discrimination, then just changing the financing system won't help very much.

Comprehensive third-party payment would remove the last bit of cost consciousness from the patient. It would thus exacerbate the problem of escalating costs. With the rest of the system and its incentives intact, I see no reason to hope for a more efficient utilization of resources.

However, it would give us complete financial protection against catastrophic events—but at what cost?

The other type of financing or reform that has been proposed is "Major Risk Insurance." Some of you may not be familiar with this concept, so let me take a minute to describe it briefly. The basic idea behind major risk insurance is that people would pay the full cost of medical expenses up to a certain amount, after which point there would not be any out-of-pocket expenses. This limit on out-of-pocket expenses is usually related to a percentage of the person's income.

How will major risk insurance affect access to care?

Since the major access problem is access to primary or ambulatory care, and since the patient will most likely be footing all or most of these bills, MRI will, in all likelihood, not improve access. Actually, it might even make things worse. Since most of the money, by definition, would be in secondary and tertiary care, there may be an incentive for even fewer physicians to become general practitioners.

Like comprehensive coverage, major risk insurance would completely eliminate the risk of the consumer's having to pay for very large medical bills.

What about cost containment and efficiency?

Since patients have to pay the first "x" dollars completely out of pocket, it would appear that they would become very cost conscious, but let's look a little closer.

What is to stop someone from also purchasing shallow first dollar coverage? In order for MRI to work, this would either have to be prohibited or somehow discouraged through negative economic inventives.

Since initial expenditures would be paid by the patient and only large subsequent expenses by insurance, there would be less incentive for persons to seek early care or preventative treatment; rather, the emphasis would be on expensive tertiary care.

MRI may involve substantial administrative costs and inconvenience. People would be required to keep detailed records of expenses and if the cutoff point is income-related, the government must determine and verify each person's cutoff point on an annual basis.

Thus it would appear that National Health Insurance by itself will probably not get us very close to many of our health care goals and will significantly reduce cost consciousness and efficiency. Therefore, if this type of financing scheme appeals to us, we must combine it with changes in the structure and/or changes in the incentives that various actors face.

One type of structure that have been proposed is combining universal third-party payment with strong government regulation. The areas that are most often nominated as candidates for regulation are health person power, hospital construction and equipment, and the amount and manner in which hospitals are reimbursed.

Suggestions for government regulation of health person power usually include control of the number of slots available in residence programs for the various medical specialties and the use of institutional licensure to encourage the greater use of alternate health person power such as nurse practitioners, and physician extenders.

It is often said that the supply of hospital beds creates its own demand. There is some empirical evidence that suggests that this statement is true. This is really not so strange when you recognize that patients don't demand hospital beds, doctors do. But control over the number of hospital beds is not enough. If we want to go this route we must also control the capital equipment that the hospital buys, otherwise the cost per bed will increase significantly.

It has also been proposed that we eliminate the current practice of cost-plus reimbursement and install in its place a system of prospective reimbursement or fixed annual budgets.

We have very little experience with some of these controls and no experience with others, but one can speculate as to their combined impact.

Let us begin with access. The availability of more para-professionals, coupled with a policy to restrict entry into some of the medical specialties, may increase access to primary care.

What about cost containment and efficiency? Tight controls on the number and capital intensity of hospital beds coupled with a predetermined budget for hospitals or prospective reimbursement should not only make the hospital more cost conscious, but they may have the additional effect of putting enough pressure on bed space so that physicians might treat more of their low risk patients outside of the hospital.

The other form of combining insurance with intervention would replace strong government controls with competing alternative delivery systems.

According to its advocates, this model would encourage the growth and development of various types of directly prepaid comprehensive medical care organizations. It is argued that these new plans would compete with each other as well as traditional fee-for-service providers. One varient of the model suggests that national health insurance be universal in coverage and that the coverage be in the form of an income related voucher. This voucher could then be spent on any of several qualified plans—one of the options still being a conventional third-party insurance plan using traditional providers.

Let us briefly investigate this proposal with reference to our goals.

The introduction of a wide variety of plans with different benefit packages along side of the more traditional delivery mechanism would seem to provide the potential for improved consumer choice. But, this potential will not be realized unless inexpensive and easily understood information is provided consumers with respect to the various options.

What about cost containment and efficiency?

Since the nature of the payment mechanism is prepayment, the provider is forced to work within a fixed predetermined budget. Secondly, the provider will be forced to compete with other providers on the basis of cost. Also, since coverage will be comprehensive, the provider will have an incentive to substitute lower cost primary care for more expensive hospital care.

If a voucher is utilized, the patient has an incentive to find the provider who has the best package of services at the lowest possible cost.

Will regulation be necessary under this model? My guess is that the answer to this question is yes. However, since these providers face different incentives than do traditional providers, different types of regulations will be required.

First, these providers have an incentive to underserve and under invest in plant and equipment (just the opposite of traditional providers). One possible solution to this, if it becomes a problem, is to limit ownership to the patients themselves. That is, to have patient cooperatives.

Secondly, providers will have an incentive to enroll only "low risk" patients. I should add that the patients themselves will have an incentive to enroll in plans that are comprised mainly of low risk and hence low cost participants. Some form of open enrollment policy will be necessary.

Most of the available evidence seems to suggest that prepaid groups do indeed contain costs and provide services in an efficient manner. But this data is often countered by the argument that current prepaid groups serve mainly low-risk and hence low cost populations. While this is true, and it is also true that serving higher risk groups will cost more, it does not necessarily follow that prepaid groups won't be able to deliver services to these higher risk groups at a lower cost than traditional providers do.

As was mentioned earlier, some of these options or proposals could be combined to produce a more effective package. For example, a program that would combine the major risk insurance model with tight controls on hospital beds and hospital reimbursement might be a viable alternative.

However, certain combinations will not work. For example, the prepaid group concept cannot expand and grow if it is subject to the same regulation of hospital beds as fee-for-service providers. We must remember that the provider working on a prepaid basis has an incentive to keep hospital utilization as low as possible and to keep lengths of stay short. Therefore if a prepaid group can demonstrate that they can serve their patient population more efficiently by owning their own hospital, then they should be free to do so. Again, remember which way the incentives are going. If they cannot run a hospital more efficiently or at a lower cost than the rest of the community, they would have no incentive to venture into that arena.

To summarize, it would appear that the initiation of any form of national health insurance by itself and without regard to the rest of the system will lead us far short of our goals of increased access, choice, cost containment, and efficient delivery of services. But comprehensive national health insurance coupled with major changes in the rest of the system may yield the outcome we desire. The two interventions that seem to have the most promise are tight regulation of the traditional delivery system and the fostering of alternative models of delivery and reimbursement such as prepaid groups.

With all this in mind, I will now take a "stab" at answering the question "What should we do?"

It is my opinion that at this time we should not implement a system of national health insurance. It is clear that when national health insurance is implemented, it should be done in conjunction with or after major interventions in the system have been accomplished. But at this time we do not have enough empirical evidence to evaluate which model of intervention will work the best. I support, in concept, comprehensive NHI and recommend the following actions be taken to prepare for its implementation:

Recommendation 1. We should enforce and strengthen our anti-discrimination laws with reference to access to medical care.

Recommendation 2. We should eliminate many of the restrictions associated with the use of para- and allied health professionals. As Victor Fuchs put it "There is a continuum of health needs, and there should be a continuum of health care personnel to meet those needs."

Recommendation 3. We should strictly control the number of residencies in medical specialties that are in over supply.

Recommendation 4. PSRO's or similar organizations should develop a valid and reliable data base on physician credentials, performance, and fees and this information should be made available to consumers upon request.

Recommendation 5. In preparation for national health insurance we should explore the two forms of major intervention that seem most promising. That is:

a. We should continue to utilize and evaluate certificate-of-need for traditional providers and we should implement prospective reimbursement of hospitals.

b. We should encourage and foster the growth of consumer oriented prepaid groups. This can be accomplished by insuring that state and federal certification programs don't put these groups at a disadvantage with respect to traditional fee-for-service providers. Secondly, we should exempt these groups from the certificate-of-need process on an experimental basis.

Finally, we should understand that while implementation of these recommendations should lead to greater access, greater choice, increased cost consciousness and more efficient utilization of resources, they cannot significantly improve the overall health of our nation. We must realize that in a modern industrialized nation such as ours, increased dollars into medical care will not buy us much in the way of improved health.

If we want to improve the level of our nation's health, then we must clean up our environment, alter our life styles and modify our behavior patterns.

HEARINGS TOMORROW ON MEASURES TO ALLEVIATE AIRCRAFT NOISE

(Mr. SNYDER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SNYDER. Mr. Speaker, The Aviation Subcommittee of the Committee on Public Works and Transportation plans to commence hearings tomorrow, March 30, on measures which have been proposed to alleviate aircraft noise, and I wish to commend the chairman of the Aviation Subcommittee, the gentleman from California (Mr. ANDERSON), for his leadership in seeking solutions to this vexing problem. Indeed, I, too, fully recognize that excessive noise is a severe problem in the vicinity of some of our larger airports—as it is in areas adja-

cent to numerous busy highways in our urban areas.

Regrettably, the generation of unwanted noise has proved to be one of several negative aspects of the development of all modes of our transportation system. The muffler surely is one of the most significant components of an automobile—and I am impressed by the progress being made in quieting new models of other transportation vehicles, notably, trains, transit cars—as well as aircraft.

Mr. Speaker, I would inject just a word of caution as we consider the question of aircraft noise. I urge that the Congress guard against being stampeded into precipitous action by some local lawsuits—many of them frivolous—which have been commenced against airport operators—as well as by the unreasonable requirements imposed on air carriers by the previous administration when they adopted their retrofit/replacement regulation which took effect on January 1, 1977—a lame-duck decision of dubious wisdom, at best, in my opinion.

I suggest, Mr. Speaker, that we should place the aircraft noise problem in its proper perspective lest we proceed to legislate beyond the realm of reason and responsibility. According to FAA, about 6 million of our citizens are affected by aircraft noise—a little over 2 percent of our population; and about 600,000 are said by FAA to be severely impacted—less than one-quarter of 1 percent of our people.

Now, I agree that we should continue our efforts to minimize the disturbance from aircraft noise, and I believe we are making substantial progress—notably in the reduction of aircraft source noise which is so evident in the new aircraft models which are coming on line. But I wonder if aircraft noise is really as significant a national problem as we have been led to believe.

I wonder sometimes if we are not overreacting when we speak in terms of multibillion-dollar programs to alleviate a situation which confronts such a small segment of our population—and a situation which technology will alleviate without such programs within the foreseeable future.

Mr. Speaker, I have prepared and am introducing legislation today which approaches the aircraft noise problem from an entirely different perspective—and I urge my colleagues to consider it as one of the alternative courses which are before us. Briefly, this legislation would: First, preclude lawsuits against airport operators for damages from aircraft noise if the litigant acquired title or right of occupancy to the property where injury is alleged to have occurred after the airport came into existence; and second, permit the operation or aircraft not meeting FAR 36 noise standards to operate for the remainder of their useful lives. In the latter connection, Mr. Speaker, the situation is analogous to EPA's regulations on emissions standards for automobiles—which apply only prospectively, not to cars already produced and on the road.

Mr. Speaker, I am convinced that these proposals have merit—not only for their equity but because they would eliminate the pressures for action which now confront us—both from lawsuits against airport operators and from the FAA regulation which went into effect on January 1, 1977, to require all air carrier jets to meet FAR 36 by 1985. It simply is unacceptable and wrong for the Congress to attempt to legislate in this atmosphere—to be subjected to outside pressures of this kind while considering legislation in such a complex area.

Thank you, Mr. Speaker.

AMENDMENT TO SHOSHONE AND ARAPAHOE PER CAPITA DISTRIBUTION ACT

(Mr. RONCALIO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RONCALIO. Mr. Speaker, today I am introducing legislation to amend the Shoshone and Arapahoe Per Capita Distribution Act to permit per capita payments from excess tribal trust funds of the Shoshone and Arapahoe Indian Tribes of Wyoming.

The Wind River Reservation is jointly owned by the Shoshone and Arapahoe Tribes. Present law divides income from tribal trust property equally between the two tribes, and a separate trust fund is established for each tribe with the provision that the United States pay interest on the principal of the fund at the rate of 4 percent per annum. Under present law, 85 percent of each tribe's trust fund is paid per capita to the members of that tribe on a monthly basis. The remaining 15 percent is reserved for expenditure by the tribal government. These expenditures include community improvements, capital investments, servicing of debts, construction of tribal buildings and similar items.

As of December 31, 1976, the Shoshone Tribe's 15 percent fund exceeded $1 million—well above the tribal government needs. The Arapahoe Tribe expects to have well in excess of $1 million by the end of 1978.

The bill I am introducing today contains two basic features:

The first provides that 100 percent of the interest earned each calendar year on all trust funds of the tribes be included in the 85 percent for distribution, rather than included in the 15 percent for administrative functions.

The second provides that any funds in excess of $1 million in the 15-percent fund will be added to the 85-percent fund to prevent any decrease in the per capita payments and, when circumstances warrant, to increase the per capita payments by a sum that does exceed 20 percent of the per capita for the preceding calendar year.

The per capita is fixed at the beginning of each calendar year based on an estimate of the next year's income. This is not always accurate because although royalties and rents can be fairly estimated, an estimate of bonuses involves some guesswork. Because of this, in some years the actual income has been less than the amount needed to meet the estimated per capita. Although the Secretary is now authorized to withdraw money from the 15-percent fund to maintain the per capitas at the level estimated for the year, it is also required that withdrawals be paid back out of the next, or succeeding years' income. Although an equalizing feature is provided for emergencies, it is one which ties up funds for more than 1 year in some cases, due to requirements to pay back the funds withdrawn. The bill would clarify this situation, and allow for a more integrated system of adjusting estimates and per capita payments.

Funds exceeding $1 million are sufficient for contingencies and possible capital investments. Since the Government pays only 4 percent interest on the principal of the fund in the Treasury and pays no interest on the interest earned by the principal, it is felt that it is not wise economics to leave the excess on deposit. While the BIA invests most of the funds in certificates of deposit, the rate of interest thus earned does not keep up with inflation.

The people of the tribes believe that they should have the benefit of these excess funds now, when they are under financial stress because of continually increasing cost-of-living expenses, and I urge favorable consideration of this legislation.

BILL INTRODUCED TO PAY AWARD TO DELAWARE INDIANS

(Mr. RONCALIO asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. RONCALIO. Mr. Speaker, today I am introducing a bill to authorize that a certain portion of the funds appropriated to pay an award to the Delaware Indians in Indian Claims Commission docket No. 72–298 be set aside for payment to the group known as the Kansas Delawares.

This group is comprised of lineal descendants of Delaware Indians who were residing on the reservation in Kansas at the time of the treaty in 1854, but who chose to remain in Kansas rather than to remove to Oklahoma. The act of October 3, 1972, which provided for the distribution of the funds in docket No. 72–298, did not make provision for the inclusion of these Indians. There is some evidence that this omission was unintentional. The Supreme Court has reviewed the case and found the 1972 act to be constitutional.

I am introducing this legislation to correct the omission on behalf of the Kansas Delawares as chairman of the Indian Affairs and Public Lands Subcommittee upon the request of the members of the Kansas delegation.

MARCH 23, 1977.

Hon. TENO RONCALIO,
Chairman, Subcommittee on Indian Affairs, Longworth House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: It has been brought to my attention that an injustice has been done the Kansas Delaware Indians by excluding them from the distribution of funds appropriated to satisfy the judgment in Indian Claims Commission Docket No. 72–298.

It is my understanding that the only way

in which this injustice can be rectified is through the introduction of legislation which would include the Kansas Delaware Indians in the distribution.

A great many Kansas Delawares are residents of the Third District in Kansas, and I will appreciate your introducing appropriate legislation which will correct the mistake which excluded my constituents from their rightful share of the distribution of funds.

Your cooperation and courtesy in this matter is appreciated.

Most sincerely,

LARRY WINN, Jr.,
Member of Congress.

DISASTER RELIEF FOR ROMANIA

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, I am introducing today, together with Mr. VANIK, Mr. ROSTENKOWSKI, Mrs. FENWICK, and Mr. WHALEN, a bill to authorize $25 million for disaster relief to Romania. As you know, on March 4, 1977, a devastating earthquake which measured 7.2 on the modified Richter scale struck Romania. The epicenter of the earthquake was only 110 miles from that nation's capital of Bucharest, where the heaviest damage was incurred. The most recent estimates of damage indicate that almost 1,400 people were killed in Bucharest alone; 10,500 were injured; and 32,897 units of housing collapsed or were heavily damaged, leaving 143,200 people homeless. The damage suffered by the Romanian economy are also substantial but more difficult to quantify. Industry, transportation, and manufacturing establishments throughout the country were heavily damaged, including many plants equipped with recently purchased American machinery. President Ceaucescu has estimated the total cost of the earthquake at about $1 billion.

Following longstanding tradition the United States has already responded to this crisis by providing emergency relief in the form of medicine, food, and teams of seismological experts who have helped the Romanians assess the risks of further earthquakes or aftershocks. Other experts from the Department of Housing and Urban Development, the Corps of Engineers and the Bureau of Reclamation have been dispatched to help begin the process of reconstruction. However, further assistance will require authorization by the Congress, which the bill we are introducing today would provide.

Further assistance is well warranted. The United States has responded generously to similar but smaller disasters in this region of the world, including aid to Yugoslovaia, Turkey, and Italy. The Department of State will shortly be recommending to the Congress that disaster relief for Romania be authorized as quickly as possible so that the United States can assist the Romanian people in overcoming the tremendous damage caused by the earthquake. Our relations with Romania have been steadily improving in recent years and a generous response from the people of the United States in this time of special need will surely add impetus to this development.

Mr. Speaker, both the House and the Senate have already approved Senate Concurrent Resolution 12, stating the sense of the Congress that the United States should do all that is possible to assist the people of Romania in recovering from this disaster. The bill we are introducing today can make that expression of intent a reality.

The full text of the bill follows:

H.R. 5717

A bill to provide for relief and rehabilitation assistance to the victims of the recent earthquakes in Romania

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Chapter 9 of the Foreign Assistance Act of 1961 (as amended) is amended by adding at the end thereof the following new Section:

Sec. 495D. Romanian Relief and Rehabilitation.

(a) The Congress, recognizing that prompt United States assistance is necessary to alleviate the human suffering arising from recent earthquakes in Romania, authorizes the President to furnish assistance, on such terms and conditions as he may determine, for the relief and rehabilitation of refugees and other needy people in Romania.

(b) There are hereby authorized to be appropriated to the President for the fiscal year 1977, notwithstanding any other provisions of this Act, in addition to amounts otherwise available for such purposes, not to exceed $25,000,000, which amount is authorized to remain available until expended.

(c) Assistance under this section shall be provided in accordance with the policies and general authority contained in section 491.

(d) Obligations incurred prior to the date of enactment of this section against other appropriations or accounts for the purpose of providing relief and rehabilitation assistance to the people of Romania may be charged to the appropriations authorized under this Section.

(e) Not later than sixty days after the date of enactment of appropriations to carry out this Section, and on a quarterly basis thereafter, the President shall transmit reports to the Committees on Foreign Relations and Appropriations of the Senate and to the Speaker of the House of Representatives regarding the programming and obligation of funds under this Section.

(f) Nothing in this Section shall be interpreted as endorsing any measure undertaken by the Government of Romania which would suppress human rights as defined in the Conference on Security and Co-operation in Europe (Helsinki) Final Act and the United Nations Declaration on Human Rights, or as constituting a precedent for or commitment to provide United States development assistance to Romania, and the Romanian government shall be so notified when aid is furnished under this Section.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, to address the House for 60 minutes, today, and also to address the House for 60 minutes each on Wednesday, March 30, 1977; Thursday, March 31, 1977; and Monday, April 4, 1977; and to revise and extend his remarks and include extraneous matter in each instance.

(The following Members (at the request of Mr. KASTEN) to revise and extend their remarks and include extraneous material:)

Mr. YOUNG of Alaska, for 20 minutes, today.

Mr. KEMP, for 10 minutes, today.

Mr. WHALEN, for 10 minutes, today.

Mrs. HOLT, for 60 minutes, April 4, 1977.

Mr. O'BRIEN, for 60 minutes, April 4, 1977.

Mr. MILLER, for 5 minutes, today.

Mr. YOUNG of Alaska, for 60 minutes, March 31, 1977.

Mr. HOLLENBECK, for 5 minutes, today.

Mr. HYDE, for 5 minutes, today.

(The following Members (at the request of Mr. PANETTA) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.

Ms. HOLTZMAN, for 30 minutes, today.

Mr. UDALL, for 5 minutes, today.

Mr. LEVITAS, for 5 minutes, today.

Mr. BALDUS, for 5 minutes, today.

Mr. ROBERTS, for 5 minutes, today.

Mr. AUCOIN, for 5 minutes, today.

(The following Members (at the request of Mr. PICKLE) to revise and extend their remarks and to include extraneous matter:)

Mr. WEISS, for 5 minutes, today.

Mr. BINGHAM, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FRASER, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printed to cost $1,047.

Mr. FISH, immediately following the remarks of Mr. HAMMERSCHMIDT during general debate today on H.R. 5045.

(The following Members (at the request of Mr. KASTEN) and to include extraneous matter:)

Mr. KEMP in two instances.
Mr. LENT.
Mr. BUTLER.
Mr. RHODES.
Mr. FINDLEY.
Mr. DEVINE.
Mr. MARKS.
Mr. WALSH.
Mr. KASTEN.
Mr. WHITEHURST.
Mrs. HOLT.
Mr. RUDD.
Mr. QUAYLE.
Mr. MCEWEN.
Mr. YOUNG of Florida.
Mr. ABDNOR in two instances.
Mr. ASHBROOK.
Mr. MCCLORY.
Mr. CARTER.
Mr. DERWINSKI.
Mr. BROWN of Ohio.

(The following Members (at the request of Mr. PANETTA) and to include extraneous matter:)

Mr. YOUNG of Missouri.
Mr. REUSS in two instances.
Mr. MCHUGH.
Mr. EDWARDS of California.
Mr. EILBERG.
Mr. VENTO in two instances.
Mr. STOKES in three instances.
Mr. ANDERSON of California in three instances.

Mr. GONZALEZ in three instances.
Mr. EVANS of Colorado in five instances.
Mr. MINETA.
Mr. FUQUA in five instances.
Mr. WON PAT in two instances.
Mr. HARRIS.
Mr. PANETTA.
Mr. LEVITAS.
Mr. BEARD of Rhode Island.
Mr. LEHMAN.
Mr. LONG of Maryland in five instances.
Ms. OAKAR.
Mr. WIRTH.
Mr. JACOBS.
Mr. GUDGER.
Mr. FARY in two instances.
Mrs. BOGGS.
Mr. AUCOIN.
Mr. MCDONALD in two instances.
Mr. MCCORMACK.
Mr. RANGEL.
Mr. TEAGUE.
Mr. BYRON.
Mr. EDGAR.
Mr. FISHER.
Mr. LEDERER.
Mr. ZABLOCKI in three instances.
Mr. ROGERS.
Mr. WEISS.
Mr. LUKEN.
Mr. PEPPER.

ADJOURNMENT

Mr. PICKLE. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 38 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, March 30, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1113. A letter from the Deputy Secretary of Defense, transmitting a draft of proposed legislation to authorize certain construction at military installations and for other purposes; to the Committee on Armed Services.

1114. A letter from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to revise the basis for estimating the annual Federal payment to the District of Columbia for water and water services and sanitary sewer services furnished to the United States; to the Committee on the District of Columbia.

1115. A letter from the Secretary of Labor, transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1976, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1116. A letter from the Acting Comptroller of the Currency, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1117. A letter from the Administrator, Federal Energy Administration, transmitting notice of proposed changes in various records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1118. A letter from the Attorney General, transmitting notice of three existing records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1119. A letter from the Comptroller General of the United States, transmitting a report assessing the coordination of federally assisted areawide planning activities by State and local governments and other organizations (GGD-77-24, March 28, 1977); to the Committee on Government Operations.

1120. A letter from the Chairman, Federal Election Commission, transmitting the Commission's annual report for calendar year 1976, pursuant to section 311 of the Federal Election Campaign Act of 1973, as amended; to the Committee on House Administration.

1121. A letter from the Secretary of Transportation, transmitting a report recommending future action with respect to railyard, shop, and dock facilities in New York, pursuant to section 402(b)(1) of the Regional Rail Reorganization Act of 1973, as amended (90 Stat. 140); to the Committee on Interstate and Foreign Commerce.

1122. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to provide temporary authorities to the Secretary of Commerce to facilitate emergency actions to mitigate the impacts of the 1976-77 drought and promote water conservation; to the Committee on Public Works and Transportation.

1123. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a draft of proposed legislation authorizing additional appropriations for the prosecution of projects in certain comprehensive river basin plans for flood control, navigation, and for other purposes; to the Committee on Public Works and Transportation.

1124. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a list of present and former NASA employees who have filed reports pertaining to their NASA and aerospace-related industry employment for fiscal year 1976 and the transition quarter, pursuant to section 6 of Public Law 91-119, as amended; to the Committee on Science and Technology.

1125. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to further amend the Foreign Service Act of 1946 to improve the Foreign Service personnel system, and for other purposes; jointly, to the Committees on International Relations, and Post Office and Civil Service.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SMITH of Iowa: Committee on Small Business. Allocation of budget totals to subcommittees for fiscal year 1977 (Rept. No. 95-128). Referred to the Committee of the Whole House on the State of the Union.

Mr. BOLLING: Committee on Rules. House Resolution 445. Resolution providing for the consideration of House Resolution 433. Resolution to provide for the continuation of the Select Committee on Assassinations (Rept. No. 95-129). Referred to the House Calendar.

Mr. BOLLING: Committee on Rules. House Resolution 433. Resolution to provide for the continuation of the Select Committee on Assassinations; with amendment (Rept. No. 95-130). Referred to the House Calendar.

Mr. REUSS: Committee on Banking, Finance and Urban Affairs. H.R. 5294. A bill to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors; with amendment (Rept. No. 95-131). Referred to the Committee of the Whole House on the State of the Union.

Mr. DENT: Committee on House Administration. House Resolution 283. Resolution to provide funds for the expenses of the investigations and studies to be conducted by the Committee on Interstate and Foreign Commerce; with amendment (Rept. No. 95-132). Referred to the House Calendar.

Mr. DENT: Committee on House Administration. House Resolution 328. Resolution to provide for the expenses of investigations, studies, oversight, and functions to be conducted by the Committee on Government Operations; with amendment (Rept. No. 95-133). Referred to the House Calendar.

Mr. DENT: Committee on House Administration. House Resolution 428. Resolution to provide for the expenses of investigations and studies to be conducted by the Select Committee on Ethics (Rept. No. 95-134). Referred to the House Calendar.

Mr. DENT: Committee on House Administration. House Resolution 434. Resolution providing additional funds for expenses of the Committee on International Relations in connection with visits to the United States by heads of states and other foreign dignitaries (Rept. No. 95-135). Referred to the House Calendar.

Mr. DENT: Committee on House Administration. House Resolution 436. Resolution to provide for the administrative expenses incurred in concluding the business and activities of the former Select Committee on Professional Sports (Rept. No. 95-136). Referred to the House Calendar.

Mr. DENT: Committee on House Administration. House Resolution 442. Resolution providing funds for the expenses of the House Information Systems staff of the Committee on House Administration to provide for the development, operation, maintenance, and improvement of ongoing computer services for the House of Representatives, for the investigation of additional computer services for the House of Representatives, and to provide computer support directly to the committees, Members, and administrative offices of the House of Representatives (Rept. No. 95-137). Referred to the House Calendar.

Mr. STAGGERS: Committee on Interstate and Foreign Commerce. Report on allocation of budget totals to subcommittees (Rept. No. 95-138). Referred to the Committee of the Whole House on the State of the Union.

Mr. JOHNSON of California: Committee on Public Works and Transportation. H.R. 3199. A bill to amend the Federal Water Pollution Control Act to provide for additional authorizations, and for other purposes; with amendment (Rept. No. 95-139). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MITCHELL of Maryland:

H.R. 5675. A bill to authorize the Secretary of the Treasury to invest public moneys, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

By Mr. BEARD of Rhode Island:

H.R. 5676. A bill to strengthen the warning label required on cigarette packages, extend such warning to cigarette advertisements, regulate smoking in Federal facilities and in facilities serving interstate common carrier passengers, and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce, Public Works and Transportation, and Ways and Means.

By Mr. BRINKLEY:

H.R. 5677. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and

foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CONTE (for himself, Ms. MIKULSKI, and Mr. MCCORMACK):

H.R. 5678. A bill to amend the Social Security Act to provide for inclusion of the services of licensed (registered) nurses under medicare and medicaid; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. GINN:

H.R. 5679. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GONZALEZ:

H.R. 5680. A bill to authorize recomputation at age 60 of the retired pay of members and former members of the uniformed services whose retired pay is computed on the basis of pay scales in effect prior to January 1, 1972, and for other purposes; to the Committee on Armed Services.

By Mr. HARRIS (for himself, Mr. AKAKA, Mr. CARR, Mr. FORD of Tennessee, and Mr. LAGOMARSINO):

H.R. 5681. A bill to amend the Internal Revenue Code of 1954 to allow a tax credit on houses or apartments for portion of the real estate taxes paid or incurred by their landlords; to the Committee on Ways and Means.

By Ms. KEYS (for herself and Mr. BRODHEAD):

H.R. 5682. A bill to amend part B of title XI of the Social Security Act to assure appropriate participation by professional registered nurses in the peer review, and related activities authorized thereunder; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. LUJAN:

H.R. 5683. A bill to modify the boundary of the Cibola National Forest, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 5684. A bill relating to the settlement of debts owed the United States by foreign countries; to the Committee on International Relations.

H.R. 5685. A bill to provide that members of all commissions, councils, and similar bodies in the executive branch of the Government appointed from private life shall serve without any remuneration for their services other than travel, subsistence, and other necessary expenses; to the Committee on Post Office and Civil Service.

H.R. 5686. A bill to provide early retirement benefits for atomic energy security guards and ERDA couriers; to the Committee on Post Office and Civil Service.

By Mr. MARTIN (for himself, Mr. DEL CLAWSON, Mr. ICHORD, Mr. LAGOMARSINO, Mr. MIKVA, Mr. MCCLORY, Mr. MONTGOMERY, Mr. PURSELL, Mr. NATCHER, Mr. REGULA, Mr. PATTERSON of California, Mr. TREEN, Mr. PICKLE, Mr. BEARD of Tennessee, Mr. ROBERTS, Mr. RUNNELS, Mr. DERWINSKI, Mr. MEEDS, Mr. JEFFORDS, Mr. PEPPER, Mr. SPENCE, Mr. ARCHER, Mr. HYDE, and Mr. MOAKLEY):

H.R. 5687. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. MARTIN (for himself, Mr. RAILSBACK, Mr. ANDERSON of Illinois, Mr. PIKE, Mr. ABDNOR, Mr. LEACH, Mr. STEERS, Mr. TRIBLE, Mr. QUIE, Mr. RAHALL, Mr. RUPPE, Mr. PEASE, Mr. GUDGER, Mr. HANSEN, Mr. BEDELL, Mr. JOHN L. BURTON, Mr. GIBBONS, Mr. BURGENER, Mr. HARRINGTON, Mr. BROOKS, Mr. BROWN of Michigan, Mr. BUCHANAN, Mr. BURLESON of Texas, and Mr. DON H. CLAUSEN):

H.R. 5688. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mrs. MEYNER:

H.R. 5689. A bill to amend the Internal Revenue Code of 1954 to exempt from the manufacturers excise tax parts and accessories used on local transit buses, and tires, inner tubes, and tread rubber used on such buses; to the Committee on Ways and Means.

H.R. 5690. A bill to amend the Internal Revenue Code of 1954 with respect to certain excise tax refunds paid to the local transit systems; to the Committee on Ways and Means.

By Mr. MIKVA:

H.R. 5691. A bill to amend the Federal Food, Drug, and Cosmetic Act to revise the standard for regulation of food additives found to induce cancer; to the Committee on Interstate and Foreign Commerce.

By Mr. NEDZI (for himself and Mr. WHITEHURST) (by request):

H.R. 5692. A bill to authorize certain construction at military installations and for other purposes; to the Committee on Armed Services.

By Mr. PEPPER:

H.R. 5693. A bill to amend title 5, United States Code, to make Inauguration Day a legal public holiday; to the Committee on Post Office and Civil Service.

By Mr. PERKINS:

H.R. 5694. A bill to allow nonprofessional employees of educational institutions to receive special unemployment assistance during periods between academic years or terms; to the Committee on Ways and Means.

By Mr. PRESSLER:

H.R. 5695. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. QUILLEN:

H.R. 5696. A bill to amend section 709 of title 32, United States Code, to provide increased job protection for certain civilian National Guard technicians, and for other purposes; to the Committee on Armed Services.

By Mr. RODINO:

H.R. 5697. A bill to amend chapter 40, title 18, United States Code, to authorize the destruction of explosive materials subject to seizure and forfeiture where it is impractical or unsafe to remove the materials to a place of storage or where such materials cannot be safely stored; to the Committee on the Judiciary.

H.R. 5698. A bill to amend section 1114 of title 18 of the United States Code to include officers and employees of the Bureau of Alcohol, Tobacco, and Firearms; to the Committee on the Judiciary.

H.R. 5699. A bill to amend section 114 of title 18 of the United States Code to make the killing, assaulting, or intimidating of any officer or employee of the Federal Communications Commission performing investigative, inspection, or law enforcement functions a Federal criminal offense; to the Committee on the Judiciary.

By Mr. RONCALIO:

H.R. 5700. A bill to amend the act of May 19, 1947, chapter 80, section 3, 61 Stat. 102, as amended (25 U.S.C. 613) to permit per capita payments from excess tribal trust funds of the Shoshone and Arapahoe Indian Tribes in Wyoming; to the Committee on Interior and Insular Affairs.

By Mr. RONCALIO (by request) (for himself, Mr. SKUBITZ, Mr. SEBELIUS, Mrs. KEYS, Mr. WINN, and Mr. GLICKMAN):

H.R. 5701. A bill to authorize the Kansas Delaware Indians to share in the funds appropriated by the act of December 26, 1969 (83 Stat. 447, 453) to pay judgments of the Indian Claims Commission in docket Nos. 72 and 298, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. ROSTENKOWSKI (for himself, Mr. ROGERS, Mr. FITHIAN, and Mr. RINALDO):

H.R. 5702. A bill to strengthen the capability of the Government to detect, prosecute, and punish fraudulent activities under the medicare and medicaid programs, and for other purposes; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. SHIPLEY:

H.R. 5703. A bill to limit the jurisdiction of the Supreme Court of the United States and of the district courts to enter any judgment, decree, or order, denying or restricting, as unconstitutional, voluntary prayer in any public school; to the Committee on the Judiciary.

H.R. 5704. A bill to amend the Internal Revenue Code of 1954 to provide that advertising of alcoholic beverages is not a deductible expense; to the Committee on Ways and Means.

By Mr. SMITH of Iowa (for himself and Mr. CONTE):

H.R. 5705. A bill to amend title 18 of the United States Code to make it a Federal offense to kill a Small Business Administration employee engaged in the performance of his official duties; to the Committee on the Judiciary.

By Mr. SNYDER:

H.R. 5706. A bill to amend the Federal Aviation Act of 1958 to prohibit certain actions against operators of airports and to exempt certain aircraft from certain noise standards; to the Committee on Public Works and Transportation.

By Mr. TSONGAS:

H.R. 5707. A bill to reaffirm the intent of Congress with respect to the structure of the common carrier telecommunications industry rendering services in interstate and foreign commerce; to grant additional authority to the Federal Communications Commission to authorize mergers of carriers when deemed to be in the public interest; to reaffirm the authority of the States to regulate terminal and station equipment used for telephone exchange service; to require the Federal Communications Commission to make certain findings in connection with Commission actions authorizing specialized carriers;

and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. TSONGAS (for himself and Mr. THOMPSON):

H.R. 5708. A bill to amend the Comprehensive Employment and Training Act of 1973 to establish an Office of Youth Employment in the Department of Labor to administer youth programs under that act, and for other purposes; to the Committee on Education and Labor.

By Mr. UDALL (for himself, Mr. SEIBERLING, Mr. KASTENMEIER, Mr. VENTO, and Mr. WEAVER):

H.R. 5709. A bill to amend the Mineral Leasing Act of 1920 and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WHITEHURST:

H.R. 5710. A bill to establish a Special Advisory Council on Social Security Financing; to the Committee on Ways and Means.

By Mr. WIRTH (for himself, Mr. HANNAFORD, Mr. BLOUIN, Mr. PHILLIP BURTON, Mr. DODD, Mr. ERTEL, Mr. KINDNESS, Mrs. MEYNER, Mr. VOLKMER, Mr. WALKER, and Mr. CHARLES H. WILSON of California):

H.R. 5711. A bill to prohibit the use of Federal funds for certain activities designed to support or defeat any legislation or legislative issue on the ballot in any State; to the Committe on the Judiciary.

By Mr. ZABLOCKI:

H.R. 5712. A bill to amend the Internal Revenue Code of 1954 to allow a refundable credit against the individual income tax for tuition paid for the elementary or secondary education of dependents; to the Committee on Ways and Means.

H.R. 5713. A bill to amend the provisions of the Social Security Act to consolidate the reporting of wages by employers for income tax withholding and old-age, survivors, and disability insurance purposes, and for other purposes; to the Committee on Ways and Means.

By Mr. AuCOIN (for himself, Mr. PRICE and Mr. REUSS):

H.R. 5714. A bill to amend the Export-Import Bank Act of 1945 by eliminating the Presidential determination requirement in connection with trade with the Peoples Republic of China; to the Committee on Banking, Finance and Urban Affairs.

H.R. 5715. A bill to amend the Trade Act of 1974 to permit the Peoples Republic of China to participate in programs of the United States which extend credits, credit guarantees, or investment guarantees; to the Committee on Ways and Means.

By Mr. BAFALIS:

H.R. 5716. A bill to authorize the Secretary of the Interior to convey certain phosphate interests of the United States to the owner or owners of record of certain lands in the State of Florida; to the Committee on Interior and Insular Affairs.

By Mr. BINGHAM (for himself, Mr. VANIK, Mrs. FENWICK, Mr. ROSTENKOWSKI, and Mr. WHALEN):

H.R. 5717. A bill to provide for relief and rehabilitation assistance to the victims of the recent earthquake in Romania; to the Committee on International Relations.

By Mrs. BOGGS (for herself, Mr. ABDNOR, Mr. APPLEGATE, Mr. AuCOIN, Mr. BAUCUS, Mr. BURLESON of Texas, Mr. DAN DANIEL, Mrs. FENWICK, Mr. FRENZEL, Mr. GILMAN, Mr. GOLDWATER, Mr. GRASSLEY, Mr. HALL, Mr. JONES of Tennessee, Mr. LUNDINE, Mr. MITCHELL of New York, Mr. RAHALL, Mr. RICHMOND, Mr. ROUSSELOT, Mr. STARK, Mr. WALSH, Mr. WHALEN, and Mr. WINN):

H.R. 5718. A bill to provide recognition to the Women's Air Forces Service Pilots for their service to their country during World War II by deeming such service to have been active duty in the Armed Forces of the United States for purposes of laws administered by the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. BOWEN:

H.R. 5719. A bill to provide price and income protection for cotton farmers and assure consumers plentiful supplies of food and fiber at reasonable prices; to the Committee on Agriculture.

By Mr. BROWN of California:

H.R. 5720. A bill to establish a research and development effort resulting in the commercialization of native latex rubber; to the Committee on Science and Technology.

H.R. 5721. A bill to authorize instruction, research, and demonstrations directly and primarily related to the maintenance, protection, and improvement of the environment; jointly, to the Committees on Agriculture, and Science and Technology.

By Mr. BROWN of California (for himself, Mr. WINN, Mr. JENRETTE, Mr. LAFALCE, and Mr. MURPHY of New York):

H.R. 5722. A bill to authorize and direct the establishment of a coordinated national program related to climate, and for other purposes; to the Committee on Science and Technology.

By Mr. BURKE of Massachusetts (for himself, Mr. ANNUNZIO, Mr. BLANCHARD, Mr. BURLISON of Missouri, Mr. BLOUIN, Mr. COCHRAN of Mississippi, Mr. EILBERG, Mr. FLOWERS, Mr. HAMMERSCHMIDT, Mr. HARRINGTON, Mr. HEFNER, Mr. JACOBS, Mr. JONES of Oklahoma, Mr. LUJAN, Mr. MCDADE, Mr. MAHON, Mr. MOAKLEY, Mr. MURPHY of New York, Mr. OBERSTAR, Mr. PREYER, Mr. RODINO, Mr. ST GERMAIN, Mr. CHARLES WILSON of Texas, Mr. WON PAT, and Mr. ZEFERETTI):

H.R. 5723. A bill to provide that certain persons who were originally appointed as SSI hearing examiners under pre-1976 provisions of title XVI of the Social Security Act shall without restriction be deemed appointed as administrative law judges; jointly, to the Committees on Post Office and Civil Service, and Ways and Means.

By Mr. BURKE of Massachusetts (for himself, Mr. ABDNOR, Mr. ADDABBO, Mr. ALLEN, Mr. ANDERSON of California, Mr. BREAUX, Mr. BROYHILL, Mr. CORMAN, Mr. DRINAN, Mr. GILMAN, Mr. LAFALCE, Mr. LEHMAN, Mr. MINETA, Mr. MOTTL, Mr. MURPHY of Illinois, Mr. NEAL, Mr. QUILLEN, Mr. ROSENTHAL, Mr. SEIBERLING, Mrs. SPELLMAN, Mr. STUDDS, Mr. TUCKER, Mr. VAN DEERLIN, Mr. VENTO, and Mr. WAXMAN):

H.R. 5724. A bill to provide that certain persons who were originally appointed as SSI hearing examiners under pre-1976 provisions of title XVI of the Social Security Act shall without any restriction be deemed appointed as administrative law judges; jointly, to the Committees on Post Office and Civil Service, and Ways and Means.

By Mr. BURKE of Massachusetts (for himself, Mr. DE LA GARZA, Mr. BEDELL, Mr. FASCELL, Mr. MARKEY, and Mr. BOB WILSON):

H.R. 5725. A bill to provide that certain persons who were originally appointed as SSI hearing examiners under pre-1976 provisions of title XVI of the Social Security Act shall without any restriction be deemed appointed as administrative law judges; jointly, to the Committees on Post Office and Civil Service, and Ways and Means.

By Mr. DRINAN (for himself, Mr. AKAKA, Mr. BEDELL, Mr. BEILENSON, Mr. BROWN of California, Mr. JOHN L. BURTON, Mr. CAPUTO, Mr. CARR, Mr. CLAY, Mr. EILBERG, Mr. GILMAN, Mr. GLICKMAN, Mr. HAWKINS, Mr. KREBS, Mr. LAFALCE, Mr. LEHMAN, and Mr. MAZZOLI):

H.R. 5726. A bill to amend title II of the Social Security Act to eliminate the special dependency requirements for entitlement to husband's and widower's insurance benefits, to provide benefits for widowed fathers with minor children, to make certain other changes so that benefits for husbands, widowers, and fathers will be payable on the same basis as benefits for wives, widows, and mothers, and to permit the payment of benefits to a married couple on their combined earnings record where that method of computation provides a higher combined benefit; to the Committee on Ways and Means.

By Mr. DRINAN (for himself, Mr. MITCHELL of New York, Mr. O'BRIEN, Mr. PATTISON of New York, Mr. PANETTA, Mr. PRICE, Mr. PRITCHARD, Mr. PURSELL, Mr. RYAN, Mr. SAWYER, Mr. SOLARZ, Mrs. SPELLMAN, Mr. STEERS, Mr. TRAXLER, Mr. VENTO, and Mr. WALGREN):

H.R. 5727. A bill to amend title II of the Social Security Act to eliminate the special dependency requirements for entitlement to husband's and widower's insurance benefits, to provide benefits for widowed fathers with minor children, to make certain other changes so that benefits for husbands, widowers, and fathers will be payable on the same basis as benefits for wives, widows, and mothers, and to permit the payment of benefits to a married couple on their combined earnings record where that method of computation provides a higher combined benefit; to the Committee on Ways and Means.

By Mrs. FENWICK (for herself, Mr. MOFFETT, Mr. MAGUIRE, and Mr. GEPHARDT):

H.R. 5728. A bill to provide that rates of pay for Members of Congress shall not be subject to adjustment under the Federal Salary Act of 1967 or subject to any other automatic adjustment; to the Committee on Post Office and Civil Service.

By Mr. FRENZEL:

H.R. 5729. A bill to amend the Internal Revenue Code of 1954 relating to group-term life insurance purchased for employees; to the Committee on Ways and Means.

By Mr. HOWARD:

H.R. 5730. A bill to amend title 38 of the United States Code in order to extend the delimiting period for completing programs of education, to the limit of entitlement, for veterans pursuing such programs at the close of such period; to the Committee on Veterans' Affairs.

By Mr. HYDE:

H.R. 5731. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for income tax purposes of certain expenses incurred by the taxpayer for the education of a dependent; to the Committee on Ways and Means.

H.R. 5732. A bill to amend title XVIII of the Social Security Act to extend the coverage of services provided outside the United States; to the Committee on Ways and Means.

By Mr. JEFFORDS:

H.R. 5733. A bill to amend the Interstate Commerce Act to provide that no pipeline company engaged in the transportation of oil may transport oil through its pipelines if that company has an interest in such oil; to the Committee on Interstate and Foreign Commerce.

H.R. 5734. A bill to restore and to promote competition in the petroleum industry, and for other purposes; to the Committee on the Judiciary.

By Mrs. LLOYD of Tennessee:

H.R. 5735. A bill to authorize recomputation at age 60 of the retired pay of members and former members of the uniformed services whose retired pay is computed on the basis of pay scales in effect prior to January 1, 1972, and for other purposes; to the Committee on Armed Services.

By Mr. MARKS:

H.R. 5736. A bill to amend the Social Security Act to make certain that recipients of supplemental security income benefits, recipients of aid to families with dependent children, recipients of medicaid benefits, and recipients of aid or assistance under the veterans' benefit programs and certain other Federal and federally assisted programs will not have the amount of such benefits, aid, or assistance reduced because of increases in monthly social security benefits; to the Committee on Ways and Means.

By Mr. MARTIN (for himself, Mr. JONES of Oklahoma, Mr. HILLIS, Mr. YATRON, Mr. WEAVER, Mr. NEDZI, Mr. CAPUTO, and Mr. CARR):

H.R. 5737. A bill to amend the Federal Food, Drug, and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it; to the Committee on Interstate and Foreign Commerce.

By Mr. MOAKLEY:

H.R. 5738. A bill to amend section 709 of title 32, United States Code, to provide increased job protection for certain civilian National Guard technicians, and for other purposes; to the Committee on Armed Services.

By Mr. MOAKLEY (for himself, Mr. BLANCHARD, Mr. CARNEY, Mr. CARR, Mr. DRINAN, Mr. JENRETTE, Mr. MEEDS, Mr. NOLAN, Mr. OTTINGER, Mr. PATTISON of New York Mr. RANGEL, Mr. ROSE, Mr. ROYBAL, Mr. RYAN, Mr. SCHEUER, Mr. SIMON, Mr. SOLARZ, Mr. TSONGAS, Mr. WEAVER, and Mr. CHARLES WILSON of Texas):

H.R. 5739. A bill to prohibit State and local law from permitting construction which interferes with sunlight necessary for solar heating and cooling equipment; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MOAKLEY (for himself, Mr. ALLEN, Mr. BADILLO, Mr. BAUCUS, Mr. BEDELL, Mr. CARNEY, Mr. CARR, Mr. CORMAN, Mr. EDWARDS of California, Mr. EILBERG, Mrs. FENWICK, Mr. GEPHARDT Mr. GIBBONS, Mr. HANNAFORD, Mrs. MEYNER, Mr. NOLAN, Mr. PATTISON of New York, Mr. RANGEL, Mr. ROSE, Mr. ROYBAL, Mr. SIMON, Mr. SOLARZ, Mrs. SPELLMAN, Mr. STUDDS, Mr. VENTO, and Mr. CHARLES WILSON of Texas):

H.R. 5740. A bill to require that energy consumption analyses be prepared and considered before the construction or renovation of certain Federal buildings; to the Committee on Public Works and Transportation.

By Mr. PEPPER (for himself and Mr. COHEN):

H.R. 5741. A bill to direct the Coordinating Council on Juvenile Justice and Delinquency Prevention to organize and convene a national conference on learning disabilities and juvenile delinquency, and for other purposes; to the Committee on Education and Labor.

By Mr. BRECKINRIDGE (for himself, Mr. SISK, Mr. MOORE, Mr. RODINO, Mr. MATHIS, Mr. CORMAN, Mr. PHILLIP BURTON, Mr. BRODHEAD, Mr. BROWN of Ohio, Mr. BUCHANAN, Mrs. FENWICK, Mr. OTTINGER, Mr. THONE, Mr. BURGENER, Mr. ADDABBO, Mr. CHARLES WILSON of Texas, Mr. LUNDINE, Mr. PICKLE, Mr. SIMON, Mr. PRICE, Mr. PEPPER, Mr. VENTO, Mr. DODD, and Mr. RAHALL):

H. Con Res. 182. Concurrent resolution providing for the printing as a House document of the pamphlet entitled "Black Americans in Congress"; to the Committee on House Administration.

By Mr. BRECKINRIDGE (for himself, Mr. JENRETTE, Mr. BADILLO, Mr. ECKHARDT, Mr. FISHER, Mrs. SPELLMAN, Mr. STARK, Mr. MURPHY of New York, Mr. ROE, and Mr. EDWARDS of California):

H. Con. Res. 183. Concurrent resolution providing for the printing as a House document of the pamphlet entitled "Black Americans in Congress"; to the Committee on House Administration.

By Mr. BRECKINRIDGE (for himself, Mrs. BOGGS, Mr. MAZZOLI, Mr. HUBBARD, Mrs. BURKE of California, Mrs. CHISHOLM, Mr. CLAY, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. DELLUMS, Mr. DIGGS, Mr. FAUNTROY, Mr. FORD of Tennessee, Mr. HAWKINS, Miss JORDAN, Mr. METCALFE, Mr. MITCHELL of Maryland, Mr. NIX, Mr. RANGEL, Mr. STOKES, Mr. ANDREWS of North Carolina, Mr. FUQUA, Mr. LEHMAN, Mr. RICHMOND, and Mr. BINGHAM):

H. Con. Res. 184. Concurrent resolution providing for the printing as a House document of the pamphlet entitled "Black Americans in Congress"; to the Committee on House Administration.

By Mr. MARTIN (for himself, Mr. BAUCUS, and Mr. ROSE):

H. Res. 446. Resolution expressing the sense of the House that no ban on saccharin should take effect without prior congressional approval; to the Committee on Interstate and Foreign Commerce.

By Mr. THONE (for himself and Mrs. SMITH of Nebraska):

H. Res. 447. Resolution to insure that the quality and quantity of free broadcasting service not be impaired; to the Committee on Interstate and Foreign Commerce.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

68. By the SPEAKER: Memorial of the Legislature of the State of Illinois, relative to Federal impact school-aid funds; to the Committee on Education and Labor.

69. Also, memorial of the Legislature of the State of Montana, relative to raising the 160-acre limitation on lands under single owner-

ship which may be irrigated from Federal reclamation projects to reflect varying climatic and soil conditions; to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEARD of Rhode Island:

H.R. 5749. A bill for the relief of Colleen Kerr, Matthew Philip Kerr, Daniel Robert Kerr, Michael Domenic Kerr, David Charles Kerr, and James Kennedy Kerr, to the Committee on the Judiciary.

By Mr. DAVIS:

H.R. 5750. A bill for the relief of Hardy King and Herbert Ravenel, Jr.; to the Committee on the Judiciary.

By Mr. DICKS:

H.R. 5751. A bill for the relief of Day's Sportswear, Inc., and Roffe-Rene, Inc., to the Committee on the Judiciary.

By Mr. GORE:

H.R. 5752. A bill for the relief of Dr. Frank Vallejo and Dr. Luz Vallejo; to the Committee on the Judiciary.

By Mr. MIKVA:

H.R. 5753. A bill for the relief of the Nedlog Co.; to the Committee on the Judiciary.

SENATE—*Tuesday, March 29, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 4 p.m., on the expiration of the recess, and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

We come to Thee, our Father, at the vesper hour asking for a renewal of our energy and an increase in our strength. As we undertake the legislative period of the day's duties, we thank Thee for the high privilege of serving Thee in this Capitol. May we comport ourselves as persons who walk and work with Thee. Forbid that we should waste precious moments, neglect timely opportunities, or fail in any clear duty. Keep us mindful of the Apostle's exhortation that we are called to serve "* * * *not with eyeservice as men-pleasers; but in singleness of heart, fearing God: and whatsoever ye do, do it heartily, as to the Lord, and not unto men.*" (Col. 3: 22, 23.) Bring us at the close of this day at peace with ourselves, at peace with our fellow men, and at peace with Thee. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 29, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. JAMES B. ALLEN, a Senator from the State of Alabama, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Monday, March 28, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ELECTION REFORM

Mr. BAKER. Mr. President, recently, the President of the United States submitted a message to Congress with certain recommendations on election reform, including a recommendation for an amendment to the Constitution to eliminate the electoral college and provide for the election of the President by popular vote. He also asked that Congress consider public financing by the Federal Treasury of congressional campaigns, and proposed a so-called system of instant voter registration, among other proposals.

At the time that message was sent to Congress, I stated that I had long been a supporter of the popular election of the President, and that I would support, in this Congress, an amendment to the Constitution to abolish the electoral college.

I will not support the public financing of congressional races. I think it is a dangerous thing for the Government to finance the process by which we select the Government. For that reason, among others, I opposed the proposal to provide public financing of Presidential campaigns; and I will oppose such a proposal as it relates to Members of the House and the Senate.

On the matter of other electoral reform, I have always felt that it was a national disgrace—a national tragedy, at least—that such a small percentage of eligible voters actually vote in Federal elections. I have long felt that we should find ways to improve upon that percentage—to bring America closer to the percentage participation of other democracies around the world.

We must enhance and improve the level of public participation in the great decisionmaking processes, which are the essence to a democracy.

I have in the past suggested such proposals as: The Federal registration of voters; a uniform registration system; a uniform voter registration card; and other procedures to make voting more convenient, such as keeping the polls open for a full 24 hours on election day or, perhaps, making election day a national holiday. Such measures would accommodate those who work night shifts or who find it otherwise inconvenient to vote at a given time. In other words, there are many reasonable proposals to improve the percentage of our citizens who participate in the electoral process.

Mr. President, on the matter of so-called instant voter registration—which is a voter presenting himself at the polling place and on meager identification securing permission to vote immediately—I feel there is so much propensity for fraud, so much risk and danger of abuse to the electoral system, that such a proposal would not be a wise step and is incautious to consider. Perhaps some way can be found to cure the deficiencies that I fear, perhaps not. While I will do all in my power to support electoral reform, I have serious concern and great reservations about the so-called instant registration and voting proposals contained in the President's message.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no further requirement for my time and no other requests, and I yield back the remainder of my time under the standing order.

The ACTING PRESIDENT pro tempore. Does the majority leader desire further recognition?

Mr. ROBERT C. BYRD. Yes. How much time do I have remaining?

The ACTING PRESIDENT pro tempore. Nine minutes.

ORDER FOR MESSAGE FROM THE HOUSE ON CONTINUING RESOLUTION TO BE HELD AT THE DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the message from the House on the continuing resolution (H.J. Res. 351) be held at the desk pending further disposition.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of Robert S. Strauss.

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nomination of Mr. Strauss will be stated.

SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

The assistant legislative clerk read the nomination of Robert S. Strauss, of Texas, to be special representative for trade negotiations, with the rank of Ambassador Extraordinary and Plenipotentiary.

Mr. CURTIS. Mr. President, what I am about to say, I think, merits the attention of the distinguished majority leader of the Senate. It is not my purpose to undertake to defeat the confirmation of Robert Strauss for trade negotiator. As

a matter of fact, I think he has many qualities that will make him a good negotiator.

I shall review some facts concerning an illegal corporate contribution to the Democratic National Committee while he was treasurer that is so serious that I call upon the majority leader, as the leader of the Senate, and I call upon President Carter, as leader of the Democratic National Committee, to see to it that the remaining $42,500 of corporate funds still in the committee's hands be returned before a commission is issued to Robert Strauss to be the special representative for trade negotiations. It is of those facts that I wish to speak.

A number of public officials and candidates discover sometimes to their surprise—often usually, and usually that is the case—that their committees have received unlawful corporate contributions, and the candidate and the committee did not know of them at the time.

The senior Senator from Nebraska, now speaking, was informed 2 years after my election that a check for $5,000 received by my committee was, in fact, corporate funds from the Ashland Oil Co., at Ashland, Ky.

When the facts were established the money was returned by the Citizens for Curtis Committee, every dollar of it.

About that time I read in the papers that Robert Strauss, as treasurer for the Democratic National Committee, had received $50,000. Those receipts were, I believe, in 1970 or 1971.

The money was not returned. Many of my colleagues who found themselves in an embarrassing situation, as I did, had returned the money. I would not have permitted my committee to accept it had I known it. I have championed the cause of private enterprise enough so that I can raise all the campaign funds I need without taking a nickel of tainted money. So I am not too critical of someone who gets caught in a web with which he had nothing to do, but I raise the question today why is that money not returned? I suggest it be returned before they send this gentleman to be our negotiator.

Now, it was not returned. A suit had to be filed, and was filed, in the Western District of the U.S. District Court in Louisville, Ky., on May 16, 1975. There were many defendants. A stipulation of settlement was made in reference to the Democratic National Committee on January 28, 1976, and that is an astounding arrangement. It provided that the Democratic National Committee should return $7,500 to the stockholders of Ashland Oil, and give a note for $42,500.

What do you suppose were the provisions of the note? Due in 7 years. What do you suppose the rate of interest was? No interest.

If that in itself is not a contribution then I do not know what is one. How many guarantors or endorsers were on the note? None. The note was signed by one man, S. Lee Kling, finance chairman.

Mr. President, I ask unanimous consent that a copy of the note be inserted in the RECORD at this point.

There being no objection, the note was ordered to be printed in the RECORD, as follows:

NOTE: $42,500.00

WASHINGTON, D.C.
June 19, 1976.

For valuable consideration, the receipt and sufficiency of which is hereby acknowledged by the undersigned, the undersigned promises to pay Ashland Oil, Inc., a Kentucky corporation, the principal sum of Forty-Two Thousand Five Hundred Dollars, which amount shall be payable without interest at the principal offices of the Payee in Ashland, Kentucky, or at such other place as the Payee may designate, on the seventh anniversary of the date hereof.

DEMOCRATIC NATIONAL COMMITTEE,
S. LEE KLING, *Finance Chairman.*

Mr. CURTIS. Now, think of it, here this wealthy, powerful national political party being extended credit for 7 years without interest. How do you make a contribution more openly than that?

Why does not the Democratic National Committee return all of this money to the stockholders? Why should they be singled out for treatment better than anybody else? I am here to tell you that the Democratic Party could pay it if they wanted to. They are rich. Just in the last few weeks we are told they received $11 million from the unions for the last campaign. They also have their hand in the public till, $21.8 million from the U.S. Treasury for the last campaign. Anyone knowledgeable about politics knows there are rich Republicans.

They could pay this money; they could raise it in one-half day. Why do they not do it? How long are we going to go on here with a double standard? Therefore, I call upon the majority leader of the Senate to demand that this be repaid before a commission is issued, and I call upon the President of the United States, as the head of the Democratic Party, to insist that this be repaid before he issues a commission.

It is not a question of legality. It is a question of morals. Oh, maybe you could quarrel a long time about that note, and whether it constituted a further gift because of the fact that it was for 7 percent without interest, no endorsers or guarantors.

But there is another side to this story, too. For some time after this illegal contribution the statute of limitations for offenses of this kind was 5 years.

This Senate passed the Federal Election Campaign Act of 1974. It went over to the House of Representatives, and there it had the tender loving care of the chairman of that committee, one Congressman Wayne Hays, and when it came out of that committee and passed through the channels and became law, the statute of limitations was 3 years—saved by the bell.

Here are some news items that refresh our memory of what took place. I read from the January 10, 1975, copy of the Washington Post an article by Robert Shogan of the Los Angeles Times:

Democratic National Committee Chairman Robert S. Strauss says he may have unknowingly committed a "technical" violation of the federal law on reporting political contributions when he was party treasurer in 1970 and 1971.

The Watergate special prosecutor's office is known to be pursuing an investigation into the case, and into other possible violations of disclosure statutes by political figures.

"I thought it was legal at the time," Strauss said of his handling of two cash contributions totaling $50,000 arranged by top executives of Ashland Oil, Inc., of Kentucky.

Strauss said he reported the money as "miscellaneous" contributions, rather than listing the specific amounts and names of donors as the law required for gifts of more than $100. He did so, he said, because he felt that Ashland officials didn't want the Nixon administration to know of the contribution.

He should be glad he is not a Republican. He would never have received such tender loving care.

Mr. President, I ask unanimous consent that the entire article from the Washington Post of January 10, 1975, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Jan. 10, 1975]

STRAUSS ADMITS POSSIBLE SLIP

(By Robert Shogan)

Democratic National Committee Chairman Robert S. Strauss says he may have unknowingly committed a "technical" violation of the federal law on reporting political contributions when he was party treasurer in 1970 and 1971.

The Watergate special prosecutor's office is known to be pursuing an investigation into the case, and into other possible violations of disclosure statutes by political figures.

"I thought it was legal at the time," Strauss said of his handling of two cash contributions totaling $50,000 arranged by top executives of Ashland Oil, Inc., of Kentucky.

Strauss said he reported the money as "miscellaneous" contributions, rather than listing the specific amounts and names of donors as the law required for gifts of more than $100. He did so, he said, because he felt that Ashland officials didn't want the Nixon administration to know of the contribution.

The transaction first came to light last week when Ashland Oil pleaded guilty in federal court here to charges of making illegal corporate contributions to the Democratic National Committee, through Strauss, and to politicians in both parties.

Strauss was not charged in these cases. And he said he was led to believe that the money came from individual executives, which would have been legal, rather than from the company itself, which was a violation of the law.

"It was clearly represented to me as individual contributions," Strauss said. "I couldn't do anything for Ashland Oil, and they never asked me to do anything."

Mr. CURTIS. Then I read from March 20, 1975, of the Washington Post:

The Watergate special prosecutor's office has asked the Justice Department for an advisory opinion that could decide the outcome of the current investigation involving Democratic National Chairman Robert S. Strauss, it was learned.

Strauss has been under investigation for his handling of an illegal $50,000 contribution from Ashland Oil Co. while he was Democratic Party treasurer in 1970 and 1971.

Instead of reporting the names of the donors, as required by federal law, Strauss said he listed the money as miscellaneous contributions. He has conceded this might have been an unintentional technical violation of the reporting requirements, which were part of the Federal Corrupt Practices Act of 1925.

A spokesman for the special prosecutor's

office would say only that the Justice Department has been asked its view on whether the statute of limitations in the 1925 act was shortened from five years to three as a result of federal campaign reform legislation passed last year.

Mr. President, I ask unanimous consent that the full article from the Washington Post of March 20, 1975, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 20, 1975]

STATUS OF STRAUSS QUESTIONED

(By Robert Shogan)

The Watergate special prosecutor's office has asked the Justice Department for an advisory opinion that could decide the outcome of the current investigation involving Democratic National Chairman Robert S. Strauss, it was learned.

Strauss has been under investigation for his handling of an illegal $50,000 contribution from Ashland Oil Co. while he was Democratic Party treasurer in 1970 and 1971.

Instead of reporting the names of the donors, as required by federal law, Strauss said he listed the money as miscellaneous contributions. He has conceded this might have been an unintentional technical violation of the reporting requirements, which were part of the Federal Corrupt Practices Act of 1925.

A spokesman for the special prosecutor's office would say only that the Justice Department has been asked its view on whether the statute of limitations in the 1925 act was shortened from five years to three as a result of federal campaign reform legislation passed last year.

The spokesman did not mention any specific case under investigation as the reason for its inquiry to the Justice Department. But the legal question raised clearly bears on the case in which Strauss was involved.

If the statute of limitations on the reporting requirement of the old law is held to be only three years, Strauss would now be immune from prosecution for any violations he might have committed in 1970 and 1971. Strauss has told the Los Angeles Times that his lawyers had advised him this was the case.

But the matter is not a simple one. The 1925 Corrupt Practices Act was repealed by the Federal Election Campaign Act of 1972. Repeal did not eliminate liability for any prior violations of the old statute, which remained subject to prosecution until the period of limitations ran out.

Then last year Congress enacted a new campaign reform law. One of its provisions, little noted at the time of passage, reduced the statute of limitations for a number of campaign law violations to three years and applied the new limit retroactively.

Though the reporting provisions that Strauss may have violated were not specifically listed in the amendment, Strauss' lawyers are understood to have argued that the intent of Congress was to reduce all limits to three years. Other legal authorities, however, believe the limit still stands at five years.

It was to help resolve this dispute that the prosecutor's office has sought the views of the Justice Department. Though the special prosecutor would not necessarily be bound by the department's view, a difference of opinion between the two government agencies would probably create problems for any attempt to prosecute violations of the 1925 law.

Strauss and most other Democratic leaders have avoided public discussion of the case since the special prosecutor's investigation became known. However, related matters are due to come up this week when the Democratic National Committee meets here.

Today Strauss is expected to ask the DNC's Executive Committee whether he should return the $50,000 illegal contribution to Ashland Oil. Some illegal contributions received from corporations by the Committee for the Re-Election of the President were returned by the Nixon campaign organization.

Mr. CURTIS. Mr. President, we have some interesting information in the Washington Star of April 25, 1975.

I read part of it:

Informed sources confirmed, that the prosecutor's office has called off its fund-raising probes in at least these two areas because it would have been all but impossible to bring charges against either of the men under a new, shorter, statute of limitations included in the campaign reform bill at the reported insistence of two powerful House Democrats, Reps. Wayne Hays of Ohio and Rep. Phillip Burton of California.

In separate interviews, Strauss and Burton denied that there had been any attempt on the part of Democrats to "shield" anyone from prosecution through legislation that, in effect, changed the rules under which federal prosecutors could bring charges of illegal campaign fund-raising activity.

Mr. HANSEN. May we have order, Mr. President?

The PRESIDING OFFICER. The Senator will suspend while the Chair obtains order in the Chamber. Members will please take their seats.

Mr. CURTIS (continuing):

Before the new campaign law—called by supporters a means to limit the role of "big money" in federal elections—the statute of limitations for prosecution of campaign spending violations had been five years. But a new provision, passed last year, cuts the statute of limitations to three years and applies it retroactively.

Thus the current law says, "No person shall be prosecuted, tried or punished for an violation (of the fact) unless the indictment is found, or the information is instituted within three years after the date of the violations."

"When the new law took effect, Jan. 1, 1975," one source said "the prosecutor's office immediately lost all of 1970 and 1971"—the periods in which Strauss and Mills allegedly were engaged in their separate fund-raising activities.

Mr. President, I ask unanimous consent that the article from the Washington Star of April 25, 1975, and also an article from the Washington Post of April 26, 1975, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Star, Apr. 25, 1975]

STRAUSS, MILLS INVESTIGATIONS DROPPED: TIME RUNS OUT ON PROBES

(By Frank Van Riper)

The Watergate special prosecutor, frustrated by a little-noticed amendment to the new federal campaign reform law, has abandoned plans to prosecute Democratic National Chairman Robert Strauss for alleged fund-raising violations and has called off a related probe into the political fund-raising of Rep. Wilbur D. Mills, D-Ark., it has been learned.

Until recently, Strauss had been under investigation by the special prosecutor's campaign finances task force in connection with a $50,000 cash contribution to the party from Ashland Oil, Inc. for the 1972 presidential campaign.

Mills, formerly chairman of the House Ways and Means Committee, reportedly had been under investigation for his fund-raising activities before and during his unsuccessful try for the 1972 Democratic presidential nomination.

Informer sources confirmed that the prosecutor's office has called off its fund-raising probes in at least these two areas because it would have been all but impossible to bring charges against either of the men under a new, shorter, statute of limitations included in the campaign reform bill at the reported insistence of two powerful House Democrats, Reps. Wayne Hays of Ohio and Rep. Philip Burton of California.

In separate interviews, Strauss and Burton denied that there had been any attempt on the part of Democrats to "shield" anyone from prosecution through legislation that, in effect, changes the rules under which federal prosecutors could bring charges of illegal campaign fund-raising activity.

Before the new campaign law—called by supporters a means to limit the role of "big money" in federal elections—the statute of limitations for prosecution of campaign spending violations had been five years. But a new provision, passed last year, cuts the statute of limitations to three years and applies it retroactively.

Thus the current law says, "No person shall be prosecuted, tried or punished for an violation (of the fact) unless the indictment is found, or the information is instituted within three years after the date of the violations."

"When the new law took effect, Jan. 1, 1975," one source said "the prosecutor's office immediately lost all of 1970 and 1971"—the periods in which Strauss and Mills allegedly were engaged in their separate fund-raising activities.

Had the old statute of limitations not been changed, it was said, "There is no question" that charges would have been brought against Strauss and the active investigation of Mills would have continued.

As he has several times in the past, Strauss acknowledged yesterday that he accepted the $50,000 from Ashland. But he insisted that he regarded the money—made in two cash payments—as a "personal" gift from Ashland President Orin Atkins and not as an illegal corporate contribution.

Last Dec. 30—or two days before the new campaign law took effect—the Kentucky-based oil firm pleaded guilty in federal court here to five counts of making illegal campaign contributions to the Democratic National Committee as well as to prominent individual Democrats and Republicans. Both the firm and Atkins had been fined the previous year for a separate illegal gift of $100,000 to the Nixon re-election campaign.

Mills' fund-raising activity was believed to have occurred in 1971 as he prepared to launch his presidential campaign. His troubles began almost immediately, with a dismal showing in the March 7, 1972, New Hampshire primary, in which he managed to pull only 4.1% of the total. In eight other contests in which his name was entered, the Arkansas lawmaker did equally badly. For his trouble Mills garnered a total of only 33,875 votes.

In reports filed with the General Accounting Office, Mills said he spent approximately $469,580 during his campaign.

Sources said the federal probe of Mills' presidential campaign fund-raising already had been slowed considerably by the lawmaker's hospitalization late last year for alcoholism following his public activities with a striptease dancer. Mills, who has not appeared on Capitol Hill since the episode, is now in Florida.

One source close to the Mills probe said that federal investigators wanted to speak with Mills in late 1974, but that their plans were frustrated when Mills checked into Bethesda Naval Medical Center.

Strauss denied that he ever had any discussions with Hays, chairman of the House Administration Committee, on cutting back the statute of limitations in the reform

bill. "I never even knew it was in there," Strauss said.

Burton, however, said that he was the one who first suggested to Hays that the statute be altered—but only, Burton said, to tailor the statute of limitations to the particular federal office involved.

The dropping of the probes of Strauss and Mills sparked some Republican grumbling on Capitol Hill.

One Republican source, who attended markup sessions of the reform bill—in which Hays allegedly "ramrodded the statute provision through," groused that "it always ticked us off that Nixon and his crew would subvert the law and then cover it up, while the Democrats simply rewrote the law."

The Watergate prosecutor's office, now under Special Prosecutor Henry Ruth, reportedly had no say in the drafting of the reform measure and was "taken completely by surprise" by the abbreviated statute of limitations.

[From the Washington Post, Apr. 26, 1975]

STRAUSS CASE HELD UNLIKELY DUE TO TIME

The Watergate special prosecutor's investigation into an alleged campaign reporting violation by Democratic National Committee Chairman Robert S. Strauss apparently has been short-circuited by a provision of the new federal campaign law shortening the time during which charges can be brought.

A spokesman for the special prosecutor's office declined to discuss specific cases but said that investigations of 1972 cases are continuing.

Strauss has said publicly that he may have committed a "technical" violation of the federal Corrupt Practices Act in 1970 and 1971, when he was party treasurer, by failing to report the names of donors who gave two cash contributions totaling $50,000.

Strauss said the donations, arranged by top executives of Ashland Oil Inc. of Kentucky, were represented to him as being from individuals. The oil company has admitted in court that the contributions were an illegal corporate gift.

The Corrupt Practices Act, which was in force at the time, required the listing of names and addresses of donors who contributed more than $100. Strauss listed the contributions as "miscellaneous."

The new federal law that went into effect Jan. 1, however, shortened the statute of limitations for campaign violations from five to three years and applied the shorter time span retroactively.

The special prosecutor's office originally maintained the shorter statute of limitations did not apply to the reporting provisions of the old law, but it asked the Justice Department for an opinion on the scope of the new law.

Although the department has not given a formal answer yet, the special prosecutor's office expects to be told that the shorter time for prosecution also applies to the reporting provisions of the old law—thereby foreclosing any prosecution of Strauss, if warranted, because the alleged violations occurred in 1970 and 1971.

Mr. CURTIS. Mr. President, I am not here charging any collusion between Robert Strauss, his lawyers, or his friends with Wayne Hays and PHILLIP BURTON that changed the statute of limitations. I am not here to debate the legality of this whole transaction. I am here to point out the morals of it. And I ask the question, why do they not return the money today? This rich party that was helped in the last campaign by the unions $11 million, that received over $21 million from the Federal Treasury for their campaign, that has all these rich individuals, why do they not get together on the telephone and raise this money and pay it back?

That is the reason that I call on two important leaders of that party that this be done. I call upon the majority leader of this Senate to insist on behalf of the Senate that this be done, and I call upon the President of the United States, as leader of the Democratic Party, to see that that money is returned.

There are people who can ask questions. What, if anything, did the Democratic National Committee have to do with the change of the statute of limitations? And why, if he did, did the Special Prosecutor on December 20, 1974, 11 days before the statute of limitations ran, bring Ashland Oil to court and they plead guilty but bring no action against the individual who received it? The giver of the illegal contribution is reached and proceeded against; the receiver is not. Why did they prosecute the giver of an illegal gift and not the receiver?

Did the Special Prosecutor on March 20, 1975, as alleged, ask the Department of Justice for an opinion as to whether the 3-year limitation applied to this transaction?

We should also ask, did the Special Prosecutor in June 1975 announce that Strauss would not be prosecuted because the statute of limitations had run?

Mr. President, I make no legal argument as to the value or standing or anything else of this note due in 7 years, interest-free. I make no charge that there was any collusion. But can anyone connected with the Democratic National Committee and Wayne Hays' committee over there that lessened the statute of limitations from 5 to 3 years explain this? I make no charge against Robert Strauss as a man of ability to be our negotiator. But we had a few Republicans who were guilty of technical violations of not reporting things just as they were. They were prosecuted. They are broken men. A great many Senators of this body here were innocent victims of corporate contributions coming into their treasury unbeknownst to them. But they have returned the money. Here we have a case of one of the great political parties not returning an illegal corporate contribution about which there is no question that it was corporate and it was illegal.

Mr. President, I know I am overpowered. There will be no attempt to defeat this nomination. But there is a judgment to be rendered that goes beyond this Chamber, and that is on a matter of common honesty and morals.

I sincerely hope and request that before the commission is issued to this man, who I am sure will be an able advocate in behalf of the United States, the majority leader of this body and the President of the United States, as head of the Democratic Party, see to it that this illegal contribution is returned.

I think it is a matter of integrity.

Mr. President, I yield the floor.

Mr. TOWER. Mr. President, I wish to express my gratitude to the Senator from Nebraska for not pressing this matter to the extent that the confirmation of Bob Strauss is delayed.

Bob Strauss is a fellow Texan, a man of good reputation in our State and indeed I think nationally, a tough-minded man and a canny man who will, I think, reflect and act in the best interests of the United States in international negotiations during a difficult period when some of our trading partners might not be disposed to want to arrive at any agreements with us, because things are pretty good for them as it is. I feel confident that the national interests of the United States will be well represented and defended by Bob Strauss, a man who has distinguished himself as a lawyer, a businessman, and a politician. A distinguished Democrat, he has worked on the opposite side of the political fence from me for many years; as a matter of fact, he has worked mightily for my defeat on occasion. Had there been more like him, I am sure I would have been defeated. He may work against me in the future.

But I think politics should be subordinate when we have available to us the talent of a man who can serve our country well, represent its interests, and reflect credit on himself and his party in the process. I heartily commend to the Senate the confirmation of Bob Strauss.

Mr. BENTSEN. Mr. President, I have known Bob Strauss for a great many years. I know him to be a man of ability and a man of integrity. He is an advocate; and if this country ever needed an advocate in trade matters, it needs one now. When we look at this last month's deficit in the balance of trade of almost $1 billion, it is time we have someone who gets over there and fights for this country.

He is a man who knows how to trade. Any fellow who can take over the chairmanship of a political party that has just suffered a devastating defeat and a great deal of indebtedness, and help heal its wounds and pull it back together—I heard someone speak of our Republican colleagues, when they were looking for a chairman for their party, and say that if they could not get Bob Strauss, they would have to invent their own Bob Strauss.

This man will fight for the best interests of this country. Any man who can take people of differing political philosophies like BARBARA MIKULSKI and Dolph Briscoe of Texas and have them working shoulder to shoulder is a man who can take the varying views of this great Nation when it comes to trade and bring about an effective result.

He is a man from a humble background, who knows what it is to be poor and what it is to be successful, who knows what it means for people to be out of work in this country and is concerned about seeing that we have a positive trade balance to help put people back to work.

I have heard John Pastore stand up on this floor time after time in the past and say:

When we get some of those people working over there for us, they think the way to be successful is to be garlanded with flowers by the people of the country where they are located.

It is not the job of our trade repre-

sentative to be popular, but to be alert and tough, and to fight for the best interests of this country. Again, as John Pastore used to say:

We have a Latin desk, a European desk, an Asian desk, an African desk; it is time we have an American desk over there.

If we confirm Bob Strauss, we will have an American desk fighting for our interests over there. I urge the confirmation of this nomination.

Mr. GOLDWATER. Mr. President, I do not wish to join my colleagues in criticism of Mr. Bob Strauss. I think he is one of the most honorable men I have ever known. He has served his party well, and I think he has served his country well. I do not think he could be associated with many of the wrongdoings that we can so easily associate certain members of the Democratic Party with. So I shall cast my vote for Mr. Strauss, and do it very proudly.

The PRESIDING OFFICER. Does anyone else seek recognition?

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD certain extracts from the committee report, the committee hearings, and whatever information may be available in addition to the speech made by the distinguished Senator from Nebraska.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. Mr. President, reserving the right to object, will the Senator identify the material designated as "whatever other material may be available"?

Mr. ROBERT C. BYRD. Mr. President, I do not have that information. I am not on the committee, and I do not know what the Senator is talking about, but I am sure the Senator must have asked questions of Mr. Strauss.

Mr. CURTIS. Oh, yes; if it pertains to the committee I have no objection.

Mr. ROBERT C. BYRD. Yes. And did I not understand the Senator to say that Mr. Strauss had sent a letter to the distinguished Senator from Nebraska?

Mr. CURTIS. Oh, very much so.

Mr. ROBERT C. BYRD. It is information such as that that I wish to put in the RECORD.

Mr. CURTIS. Yes. I do not present any legal proposition here, no criticism of Mr. Strauss. All I request is that he return the money.

(The following proceedings occurred later in the day and are printed at this point in the RECORD by unanimous consent.)

Mr. LONG. Mr. President, I was not present during the debate involving the confirmation of Robert Strauss. I want the record to show that I would have voted to confirm him.

Something was said about the contribution that was made to the Democratic Party by Ashland Oil, which the Democratic National Committee felt should be repaid in view of the fact that Ashland had not made a proper contribution. That matter was brought up in the Finance Committee. I ask unanimous consent that the letter from Mr. Strauss to me be printed in the RECORD, and also that excerpts from the transcript of the committee hearings be printed in the RECORD; these excerpts make clear Mr. Strauss's position.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
March 23, 1977.

Hon. RUSSELL B. LONG,
Chairman, U.S. Senate,
Committee on Finance,
Washington, D.C.

DEAR SENATOR LONG: May I begin by expressing my personal appreciation to you and through you to the other members of the Finance Committee for the reception I received when I appeared before you this morning. It was a proud moment for me. May I also assure you that I am going to do by very best to justify the confidence of the members of the Committee.

You will recall Senator Curtis asked that I submit the facts with respect to the repayment of certain Ashland Oil Company contributions to the Democratic National Committee while I was its Treasurer.

In 1970 and 1971, certain contributions totaling $50,000 were made by Ashland Oil Company executives to the Democratic Nation Committee which some years later proved to be corporate funds. On learning that they were corporate funds, I immediately brought the matter to the attention of our Executive Committee and our Counsel. We had an informal opinion from outside Counsel that a return of the funds was probably not legally necessary but concluded that it should, nevertheless, be paid back. During this time, a derivative shareholders action was filed against certain officers of the Company as well as the Democratic National Committee. The entire matter was settled by a voluntary judgment being entered providing that the Democratic National Committee would repay the entire $50,000, $7,500 in cash, and by the execution and delivery of a note payable to Ashland Oil Company in the amount of $42,500 due and payable on or before 1983. This period of time for repayment was identical to that agreed to by certain other defendants and former officers of the Company. The check and note have been delivered.

The above represents my best recollection, the best recollection of the Controller and of the outside Counsel of the Democratic National Committee as well as our examination of the files. I trust this satisfactorily provides the information Senator Curtis desires.

Respectfully submitted,
ROBERT S. STRAUSS,
Designate.

EXCERPT FROM TRANSCRIPT OF FINANCE COMMITTEE MEETING, MARCH 23, 1977

Senator CURTIS. Mr. Strauss, I am glad to support you. I think that a lawyer should be in this job. They understand adversary proceedings and lawyers have the dedication to the cause of their clients.

In a very strong sense, I feel that the workers, the businessmen, the farmers of America are your clients, and it is not an arena for diplomats. It is an arena for advocates and fighters for the cause of their clients.

Now, I am going to ask you on another matter—I assure you it is no desire to cause any embarrassment or anything else. I think when these things come up everybody should be treated alike.

Unbeknownst to me I learned several years after my last election that Ashland Oil Company contributed $5,000 of corporate funds to my campaign. I did not know it; did not know anything about it. I do not know any of Ashland's officers yet—if I had known it, I would not have touched it with a ten-foot pole.

I have championed the cause of private enterprise here and I can raise all the campaign money I need without taking a nickel of tained money. Nevertheless, that happened.

That $5,000 was returned. I cause it to be returned to the Ashland Oil Company. I never was able to find out from them or anyplace else what happened to everybody else.

The news media at that time that $50,000 was turned over to you. What are the facts in reference to that, and if any money was turned over to you, was it returned back to the Ashland Oil Company?

Mr. STRAUSS. The story that $50,000 was donated to the Democratic Party while I was Treasurer is an accurate statement, and I accepted that money. That money was reported in keeping, I believe, with the standards prevailing at the time. It was not reported in sufficient detail. It was an improper gift.

The money, to my recollection substantially all of it, has been returned now. A portion of it was paid at once; there were additional payments made. There has been a note—I do not know whether it has been liquidated or is still outstanding, with respect to those funds.

I will say this to you, Senator Curtis, of course, I regret that I received that money. I will point out to you, sir, with considerable pride and without apology, that I have been in politics a long time. I am very proud of being a politician. I have no apologies to make for it.

When I think of the sums of money that I received and disbursed for the National Democratic Party for the Presidential and other candidates, the fact that the occasion where I may have been remiss, an instance like that happening, has been very rare. I am rather proud of my record. I have no apology to make for it, sir.

Senator CURTIS. I feel the same way. I was a victim. I not only did not seek the money; I did not know that it was corporate money, did not even known that it had been given. It was properly reported by my committee.

But we did return it.

I know the circumstances in which you were given that contribution are very similar.

Mr. STRAUSS. That is correct.

Senator CURTIS. I am not pointing a finger at anybody for having been victimized as I was. I would appreciate it if you would provide to the Chairman or to our Chief Counsel so it can be examined whatever are the facts and the evidence to support it in reference to the return of the $50,000.

Mr. STRAUSS. I will be very pleased to do that, and will do it promptly.

Mr. LONG. The way I understand this matter is simply that a contribution was made to the Democratic National Committee. No one on behalf of the committee knew at the time that the contribution was from corporate funds. When the matter came to light, it was agreed that the Democratic National Committee should undertake to repay the money. Part of it has been repaid and, as I understand it, the Democratic Committee has given a note for the remainder of it. This is about the way some other people involved in this type of situation have undertaken to return money they felt a company had no right to contribute under the law.

As far as I could see, and I think that speaks for the majority of us, none of us could find anything whatever that Mr. Strauss had done that was improper, or that he had any knowledge of any of this, except that when he found the money

had been improperly received, he undertook to see that it was repaid.

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that the earlier consent request that was granted me, as in executive session, to insert material in the RECORD in connection with the Strauss matter be vitiated, because Mr. LONG has now done that.

The PRESIDING OFFICER. Without objection, it is so ordered.

(This concludes proceedings that occurred later in the day.)

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Robert S. Strauss, of Texas, to serve as special representative for trade negotiations, with the rank of Ambassador Extraordinary and Plenipotentiary?

The nomination was confirmed.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the able was agreed to.

Mr. TOWER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of nominations under the Department of the Treasury, the Department of Health, Education, and Welfare, and the Department of Defense, all of which nominations have been cleared on both sides.

The PRESIDING OFFICER. Is here objection?

Mr. BAKER. Mr. President, reserving the right to object, there will be no objection from me. The majority leader is correct—all of the remaining nominations on the Executive Calendar, with the exception of the Council on Environmental Quality, are cleared on this side.

Mr. ROBERT C. BYRD. Mr. President, that would conform with my request. I ask that the nomination under Department of Justice and the nomination under Council on Environmental Quality not be taken up at this time.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the first nomination.

DEPARTMENT OF THE TREASURY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations under "Department of the Treasury" be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations under "Department of Health, Education, and Welfare" be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

DEPARTMENT OF DEFENSE

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE ARMY AND NAVY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations under the Department of Defense, U.S. Air Force, U.S. Army, U.S. Navy, U.S. Marine Corps, and going over on page 4 under U.S. Air Force, U.S. Army, U.S. Marine Corps, and nominations placed on the Secretary's desk in the Army and Navy, be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

(All nominations confirmed today are printed in the RECORD after Senate proceedings.)

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimus consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of the pending business, Senate Resolution 110, which the clerk will state.

The legislative clerk read as follows:

A resolution (S. Res. 110) to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate, and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, with the permission of Mr. HELMS, that Mr. BENTSEN be recognized at this time to call up an amendment which he and Mr. HANSEN are cosponsoring.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 108

Mr. BENTSEN. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Texas (Mr. BENTSEN) for himself and Mr. HANSEN, proposes an unprinted amendment No. 108.

Mr. BENTSEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, line 10, strike out "1977" and insert in lieu thereof the following "1978".

On line 11, strike out "1978" and insert in lieu thereof the following "1979".

On line 12, strike out "1977, through September 30, 1977" and insert in lieu thereof the following "1978, through September 30, 1978".

Line 14, strike out "1977" and insert in lieu thereof the following "1978".

On line 17, strike out "1978" and insert in lieu thereof the following "1979".

Mr. HANSEN. May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BENTSEN. Mr. President, this is a relatively simple amendment which I hope the committee will adopt. The Senator from Wyoming and I have cosponsored this amendment. What we are trying to do is to make the language in Senate Resolution 110 conform to the language of the ethics resolution passed by the House, insofar as the effective date for the limitation on outside income.

The Senate version calls for it to be put into effect on January 1, 1978. The House version says January 1, 1979.

I do think it important that Congress act in a uniform and coordinated fashion in its ethics guidelines to the greatest extent possible. The House believes that that limitation should be put into effect on January 1, 1979. I think we should have the Senate version conform to that.

Most of us make financial commitments not on a month-to-month basis but on a medium- to long-range basis. Many of these Senators who were earning honoria made such commitments without any realization that this kind of a limitation was going to be placed upon these earnings. I believe they ought to be given that year to adjust and to conform to this resolution. Then we would see the House and the Senate on the same basis. That is all this amendment does. It has a continuation of rule XLIV as it is until January 1979. We would then be exactly in step with the House on the limitation on outside earnings.

Mr. HANSEN. Mr. President, I am pleased to join with my distinguished colleague from Texas in cosponsoring this amendment. It seems to me the reasons for its adoption are logical and compelling. I believe the Senator has already spelled out very clearly the per suasive reasons for having the ethics resolution on this side of the Capitol conform to the actions taken by our colleagues on the other side.

Added to that is the very real need to recognize that Members of this body do make long-term commitments. As all of us can recall from the debates which have taken place in this Chamber in recent days, it is going to be very upsetting, very disconcerting, to a number of Members to find that they have had imposed upon them, and upon their ability to earn, a very restrictive prohibition. I think there is every reason for the Senate to adopt this amendment.

Mr. BENTSEN. I would say, Mr. President, I think I can speak objectively on this amendment. I do not take honoraria. I have not taken honoraria since the

day I came to the Senate. I really have no self-service in this. But I do think I have some understanding of some of the problems faced by these Members in trying to adjust to these new limitations.

Mr. HANSEN. Mr. President, may I say that my situation is not identical to that of the Senator from Texas, but it is rather similar. It has been some time since I have accepted any honoraria. For a while I gave the honoraria which I did receive to a charity. However, I finally concluded that I would not take any honoraria at all. Thus, I think I, too, can have ascribed to me a certain degree of objectivity in proposing this amendment.

Mr. DECONCINI. Will the Senator from Texas yield for a question?

Mr. BENTSEN. I yield.

Mr. DECONCINI. What is the rationale for putting it off that long other than to correlate it with the House? That is more than 18 months to put it into effect.

Mr. BENTSEN. First, I think that is a very valid point, that we ought to be in step as much as we possibly can with the House concerning legislation on ethics. I found a long time ago that when the Senate is reported upon, people will use the standards of the House to which they will refer to make their point on legislation. If we have a conformance between the two Houses, when they speak of the Congress they are speaking of the Congress and not just the Senate or not just the House.

The other problem we have is that we do not make financial commitments, normally, on a month-to-month basis, when we talk about financial obligations. We make commitments trying to anticipate what our income is going to be over a period of time. I am sure that some of these financial obligations that were entered into by some of our colleagues were made with the understanding, or with the thought, that they were not suddenly going to have this kind of curtailment.

I am trying to let them have a little more time to make that kind of an adjustment, by accepting the House version of it.

Mr. DECONCINI. Will the Senator indulge one further question? Does this only apply to the honoraria or to the entire scope of the resolution?

Mr. BENTSEN. To the entire limitation of 15 percent being set at the same time as the House. Rule XLIV as it now in force will continue until January 1, 1979.

Mr. DECONCINI. All the other provisions of the code of conduct, assuming it is enacted, will be effective?

Mr. BENTSEN. That is correct.

Mr. DECONCINI. I thank the Senator from Texas.

Mr. NELSON. Mr. President, in considering this matter, the committee was aware that under the House provision the effective date of the ceiling would be January 1, 1979. However, the committee did decide that the date should be set at January 1, 1978. However, it has been my position, publicly stated and repeatedly stated to staff and other Members, that I would like to stay as close to the House version as possible. I was aware of the complications of the various issues involved here. I was aware of the fact that they had spent 6 to 7 months full time, with full-time staff working on it, and that they were aware of number of problems, issues, and difficulties in the drafting of a code of this kind. I had the feeling that whenever we departed from what the House did, we would risk running into problems.

As a matter of fact, a number of items which were put in this resolution and were not in in the House rule did raise problems that were unanticipated. Many of those items have been removed. If we had had the time for hearings and further consideration of a number of the items that we have had modified since we started, they would not have gone into the resolution in the first place. In any event, since it has been my position that I would attempt to keep this as close to the House provision as possible and since a statute is going to come over from the House, translating into statutory language a number of subjects that are now a part of the rule—and if the statute does come over, it will have to be agreed upon in conference by all of us—the closer together we are, the better.

I personally prefer the date of January 1, 1978, but this amendment does conform to the date set by the House. As I have repeatedly said, I have no objection to agreeing on the basic things that the House did. So, as far as I am concerned, the amendment of the Senator from Texas is acceptable.

Mr. BENTSEN. Mr. President, I am prepared to yield back the remainder of my time.

Mr. NELSON. I yield back my time.

Mr. BENTSEN. I urge the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment was agreed to.

Mr. HANSEN. I move to reconsider the vote by which the amendment was agreed to.

Mr. BENTSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator yield to me?

Mr. HELMS. Yes.

Mr. ROBERT C. BYRD. Mr. President, I understand that this request has been cleared with the distinguished Senator, that he might be interrupted at this time.

I ask unanimous consent that the time not be charged against the Senator or against Mr. NELSON.

The PRESIDING OFFICER. Without objection, it is so ordered.

FURTHER CONTINUING APPROPRIATIONS, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the distinguished Senator from Arkansas (Mr. MCCLELLAN) may be recognized at this time, that the Chair lay before the Senate a message from the House of Representatives on House Joint Resolution 351, that it be considered as having been read the first and second times, and that the Senate proceed to its immediate consideration with the understanding that there be a time limitation of not to exceed 5 minutes thereon and that no amendments thereto be in order.

This is the continuing resolution and I have discussed this with the distinguished minority leader. I hope we will get no objection.

Mr. BAKER. Mr. President, reserving the right to object, and I certainly shall not object, this is a matter that I think has come back to us without amendment and that it can be disposed of in this way, there is no objection on our side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from North Carolina for his usual courtesy and cooperation.

Mr. HELMS. I thank the Senator.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (H.J. Res. 351), making further continuing appropriations for the fiscal year 1977, and for other purposes.

The PRESIDING OFFICER. Without objection, the joint resolution will be considered as having been read the second time by title.

Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

NEED FOR A FURTHER CONTINUING RESOLUTION

Mr. MCCLELLAN. Mr. President, the existing continuing resolution which expires at midnight, Thursday, March 31, 1977, has provided interim financing authority since the beginning of the fiscal year for certain programs traditionally funded in the appropriation bill for the Departments of Labor, and Health, Education, and Welfare. This interim authority was necessary because certain authorizations were not completed in time last year for the subsequent funding to be included in the regular appropriation bill which cleared the Congress late last session. Although provision is made for these activities in the supplemental appropriation bill, 1977 (H.R. 4877), it is now obvious that final congressional action on this bill will not be completed and the bill signed by the President before the expiration of the existing continuing resolution.

Additionally, it is now apparent that congressional action will not be completed on H.R. 4876, which contains the appropriation for the general revenue sharing program, before the April 5 statutory date for making payments to State and local governments for the current calendar quarter. The bill H.R. 4876 also contains the appropriation for title VI of the Comprehensive Employment and Training Act. The resolution will insure the continuation of the title VI program until enactment of this bill.

For these reasons the committee is recommending a 1-month extension of the

continuing resolution with a provision which will enable the Secretary of the Treasury to make general revenue-sharing payments to some 39,000 State and local government entities at the time prescribed by law.

PROGRAMS COVERED BY THE RESOLUTION

Mr. President, in addition to the general revenue-sharing provision, the accompanying resolution contains further continuing authority until April 30, 1977, for certain ongoing programs not otherwise provided for. The programs covered by the accompanying resolution include activities under the following:

Higher education, National Health Service Corps; home health services; emergency medical services; library resources; teacher corps; alcohol abuse and alcoholism prevention, treatment and rehabilitation.

Health professions educational assistance; D.C. medical and dental manpower; activities under title VI of the Comprehensive Employment and Training Act; vocational education; and National Institute of Education.

The authorities contained in the accompanying resolution are governed by section 105 of Public Law 94-473 which provides that expenditures made pursuant to the continuing resolution are charged to the applicable appropriation when a bill containing such appropriation is enacted into law. The authority is available until enactment of the applicable appropriation bill or April 30, 1977, whichever occurs first.

Mr. President, on this side of the aisle, I know of no opposition to this resolution.

Mr. BAKER. Mr. President, if the distinguished chairman from Arkansas is finished, I do not know of any opposition, either; but I hope we will not proceed for just a moment.

Mr. President, if we could forbear just a few moments before proceeding with consideration of this measure, the distinguished ranking member of the Appropriations Committee has not yet reached the Chamber and will be here in just a moment.

I ask unanimous consent that it might be in order to suggest the absence of a quorum without the time being charged.

Mr. McCLELLAN. Mr. President, I ask unanimous consent that we may suggest the absence of a quorum without——

Mr. NELSON. I wonder if I might ask just one question.

A number of Members thought the voting was going to start at 4 p.m. It was my understanding we would start at 4, and the Bentsen amendment that was taken up in advance would come immediately after.

Some Republicans and some Democrats both thought we were going to be done by 6.

Could we not set this matter aside, take it up immediately after the next vote and use up the time on this amendment? Would there be any objection to that?

Mr. McCLELLAN. I have no objection, I am willing to cooperate in this matter.

Mr. BAKER. I would offer no objection.

I might say, I would like just a moment to see.

Mr. NELSON. I have no objection to the request.

Mr. BAKER. Let us have a brief quorum and let me check the circumstances.

Mr. McCLELLAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MELCHER). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have not been able to yet locate the distinguished ranking member of the Appropriations Committee. I ask unanimous consent that the remainder of the time under the order be reserved, and that we temporarily lay aside this matter as the pending business, subject to being called up again after the disposition of the Helms amendment which was pending before we turned to this resolution.

The PRESIDING OFFICER. Is there objection?

Mr. McCLELLAN. I have no objection.

Reserving the right to object, I understand that immediately following the rollcall vote on the pending item, which will occur in less than 15 minutes under the time agreed upon, that immediately following that we will proceed to vote on this?

Here is the distinguished Senator from North Dakota.

Perhaps the Senator can ascertain from him what he wishes.

Mr. BAKER. Mr. President, I see the distinguished ranking minority member of the Appropriations Committee in the Chamber. Since we have consumed some time on this matter with this colloquy, I ask unanimous consent that he may proceed for not to exceed 2 minutes before disposing of this matter.

The PRESIDING OFFICER (Mr. MELCHER). Without objection, it is so ordered.

Mr. YOUNG. Mr. President, I have no objection to bringing up this matter. It involves money we have to spend to continue certain operations of HEW, which I support.

Mr. McCLELLAN. Mr. President, I move the adoption of the resolution.

The PRESIDING OFFICER. The question is on the third reading and passage of the joint resolution.

There being no objection, the joint resolution (H.J. Res. 351) was ordered to a third reading, was read the third time, and passed.

Mr. YOUNG. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

AMENDMENT NO. 112

Mr. PERCY addressed the Chair.

Mr. ROBERT C. BYRD. Mr. President, what is the pending question under the order?

The PRESIDING OFFICER. Under the previous order, the Senator from North Carolina (Mr. HELMS) is recognized to call up amendment No. 112, on which there shall be 20 minutes, to be equally divided and controlled.

Mr. NELSON. What was the time?

Mr. PERCY. Will the Senator yield for a unanimous-consent request?

Mr. HELMS. Yes.

Mr. PERCY. Mr. President, I ask unanimous consent that John Childers, minority counsel for the Governmental Affairs Committee, and Hannah Sistare be given the privilege of the floor during consideration of the present measure and any votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, did the Senator from North Carolina have the floor?

The PRESIDING OFFICER. Under the previous order, the Senator had been recognized to call up his amendment.

Mr. NELSON. May I ask the Senator from North Carolina, what is the time limit?

Mr. HELMS. I believe the unanimous-consent agreement involved a 20-minute time limitation, 10 minutes to a side.

The PRESIDING OFFICER. That is correct.

Mr. HELMS. I call up amendment No. 112 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. HELMS. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 35, line 11, strike out "sixty days" and insert "ninety days immediately before the date of any primary election (whether regular, special, or runoff) and one hundred and eighty days".

On page 35, line 12, strike out "primary or".

Mr. HELMS. I ask that the Chair remind me when 5 minutes have expired, inasmuch as I want to reserve 3 minutes for the Senator from New Mexico and 2 minutes for the Senator from Illinois to discuss this subject.

The PRESIDING OFFICER. The Chair will remind the Senator.

Mr. HELMS. First of all, Mr. President, I congratulate the distinguished Senator from Wisconsin on the success of Marquette in the NCAA championship game last night. I was somewhat chagrined to see his team defeat the University of North Carolina but if you cannot be No. 1, No. 2 is next best.

Mr. President, we have heard much about how the sole purpose of newsletters is to inform the citizenry. It is denied that newsletters have any political purpose. Of course, we all know that name recognition is one of the most val-

uable assets in a political race. And the more newsletters there are, the more name recognition there is. The pending amendment would at least diminish this built-in incumbent advantage by restricting the use of newsletters prior to any primary or general election.

Under Senate Resolution 110, there is a prohibition of the use of newsletters for 60 days prior to an election. This creates quite an interesting loophole. Most States have their primary elections in the spring; the general election, of course, is in November. So, for instance, if the primary is June 15, and the general election November 2, a candidate may not issue a newsletter from April 15 through June 15, and from September 2 through November 2. But he may, quite conveniently, issue one or more newsletters between June 15 and September 2. That is a pretty effective kickoff to any campaign I submit.

My amendment closes this loophole by imposing a cutoff 90 days before any primary election, and 180 days prior to any general election. Thus, under my amendment, the hypothetical incumbent would be prohibited from issuing a newsletter from the 15th of March, 3 months before the primary, until after the election on November 2, effectively covering the entire political season which is only simple fair play. I am sure the citizens of North Carolina and other States will get by without being informed by Senatorial newsletters during this brief period, especially considering the fact that there will be much political activity during this time which will inform the voters of the supposed virtues of the incumbent. We are talking about a blackout for only approximately 6 months—at the most 9 months—of a Senator's 6-year term. I am inclined to believe the Republic will survive such a blackout; I am not at all sure, however, that the Republic will fare very well if we continue to set up systems and schemes designed to keep incumbents in power.

It may be a novel idea, but even though I am an incumbent, I nonetheless think that we ought to play fair toward challengers. I think a step in the direction of fairness is to limit and restrict the use of newsletters during political seasons.

Mr. President, I am happy to yield to my friend from New Mexico.

Mr. President, does the Senator from North Carolina have 5 minutes remaining?

The PRESIDING OFFICER. The Senator from North Carolina has 5 minutes remaining.

Mr. HELMS. Mr. President, I yield 3 minutes of that time to the Senator from New Mexico.

Mr. SCHMITT. Mr. President, I agree completely with the sentiments expressed by the distinguished Senator from North Carolina, that, in the interest of reform and fairness, the code of conduct under consideration should include, at the very least, the elimination of unfair advantages of the incumbent with respect to the franking privileges, dealing with mass mailings. The incumbent already has many advantages, including inherent public identification, advantages in the collection of funds for political campaigns, and in his or her committee assignments.

The use of the frank for mass mailings near election time is unethical, I believe, no matter how many vertical pronouns the particular mailing may include. One of the few unethical practices we can truly prevent by a code of conduct is this use of mass mailing in the timeframe prior to an election.

My cause is—and frequently will be, in the course of my tenure as a U.S. Senator—the cause of the citizen legislator versus the professional politician. The motivation behind this effort in behalf of the citizen politician is shown in my cosponsorship of proposed limitations on congressional terms, so that there is more chance for candidates to run for office, and support for amendments relative to the code of conduct that permit earned income with full disclosure. Limitations, I am afraid, will discourage the citizen as a candidate.

With the adoption of the Helms amendment, let us tell all citizen candidates, current and potential, that they will have at least a fair go if they decide to run, in connection with the use of the franking privileges.

I thank the Senator, and I yield back the remainder of my time.

Mr. HELMS. I thank the Senator for his comments. He has very adequately stated the case for the amendment.

Mr. President, I yield the remainder of my time to the able Senator from Illinois.

Mr. PERCY. Mr. President, I commend to the Senate the amendment offered by the distinguished Senator from North Carolina.

At the beginning of last year I urged a detailed review of the franking system and other ways in which the Senate spends public money for its own operation. I pointed out that the cost of franking 322 million pieces of congressional mail was estimated at $46.1 million, or roughly $86,000 per Senator or Representative.

At that time, I proposed a ban on the use of the frank for general mass mailings by Senators during the entire calendar year of their reelection. That conforms in principle, I believe, to the pending amendment.

Now that the Senate has taken up the matter of the mass mailings, I shall conform to whatever ethics code we adopt, as I believe we would adhere to a uniform policy that applies to all Senators. However, I strongly urge that the Senate strengthen the present ethics code and adopt the suggested schedule of 180 days before a general election and 60 days before a primary. Essentially—at least, in the State of Illinois—this would mean that during the entire calendar year mass mailings would be prohibited.

I urge the Senate to adopt the Helms amendment.

Mr. HELMS. I thank the Senator from Illinois for his comments.

Mr. SCHMITT. Mr. President, will the Senator from North Carolina yield?

Mr. HELMS. I yield.

Mr. SCHMITT. I think the Senator from Illinois misstated the numbers in the amendment. It is 90 days prior to the primary and 180 days prior to the general election.

Mr. PERCY. I appreciate the correction. I had meant to say 90 days.

The PRESIDING OFFICER. Does the Senator from Wisconsin desire any time?

Mr. NELSON. Mr. President, this is an amendment so simple that all of us can understand it.

The resolution says 60 days prior to the primary, 60 days prior to the general election. The amendment says 90 days prior to the primary, 180 days prior to the general election.

I have no philosophical difference with the amendment at all. In fact, I had proposed to the committee that the rule be 90 days before the primary and 90 days before the general election. The committee decided that it would go along with the House, so I am supporting the committee resolution.

Is the Senator from North Carolina prepared to yield back the remainder of his time?

Mr. HELMS. I am.

Mr. NELSON. We debated it yesterday, so the very complicated question is well laid out in yesterday's RECORD.

Mr. President, I yield back the remainder of my time.

Mr. HELMS. I yield back the remainder of my time.

Mr. NELSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. NELSON. What amendment is being voted on first?

Mr. HELMS. This one.

Mr. NELSON. I do not believe so.

The PRESIDING OFFICER. Amendment No. 112 will be the first one voted on. That is this amendment.

Mr. NELSON. I just wanted to be clear on this, because the unanimous-consent agreement——

Mr. HELMS. I believe the unanimous-consent agreement is silent on that.

Mr. NELSON. Mr. President, I yield back the remainder of my time, and I move to table the amendment.

Mr. HELMS. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER (Mr. SASSER). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from North Carolina. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

(Mr. MELCHER assumed the Chair at this point.)

Mr. CRANSTON. I announce that the Senator from Kentucky (Mr. FORD), the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Maine (Mr. MUSKIE) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I further announce that, if present

and voting, the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Michigan (Mr. RIEGLE) would each vote "yea."

On this vote, the Senator from Kentucky (Mr. FORD) is paired with the Senator from Maine (Mr. MUSKIE). If present and voting, the Senator from Kentucky would vote "yea" and the Senator from Maine would vote "nay."

Mr. STEVENS. I announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

The result was announced—yeas 47, nays 46, as follows:

[Rollcall Vote No. 77 Leg.]

YEAS—47

Abourezk	Humphrey	Pearson
Anderson	Inouye	Pell
Bayh	Jackson	Sarbanes
Bentsen	Javits	Sasser
Brooke	Johnston	Schweiker
Burdick	Kennedy	Sparkman
Byrd, Robert C.	Long	Stennis
Cannon	Magnuson	Stevens
Case	Mathias	Stevenson
Chafee	Matsunaga	Stone
Church	McGovern	Talmadge
Eagleton	Melcher	Thurmond
Eastland	Metcalf	Tower
Hathaway	Moynihan	Williams
Hollings	Nelson	Young
Huddleston	Packwood	

NAYS—46

Allen	Domenici	McClellan
Baker	Durkin	McClure
Bartlett	Garn	McIntyre
Bellmon	Glenn	Metzenbaum
Biden	Goldwater	Nunn
Bumpers	Hansen	Percy
Byrd, Harry F., Jr.	Hart	Proxmire
	Haskell	Randolph
Chiles	Hatch	Roth
Clark	Hatfield	Schmitt
Cranston	Hayakawa	Scott
Culver	Heinz	Stafford
Curtis	Helms	Wallop
Danforth	Laxalt	Weicker
DeConcini	Leahy	Zorinsky
Dole	Lugar	

NOT VOTING—7

Griffin	Morgan	Riegle
Ford	Muskie	
Gravel	Ribicoff	

So the motion to lay on the table Mr. HELMS' amendment No. 112 was agreed to.

AMENDMENT NO. 114

The PRESIDING OFFICER. Under the previous order the Senate will now proceed to vote on amendment No. 114 by the Senator from North Carolina (Mr. HELMS).

Mr. HELMS. I ask for the yeas and nays.

Mr. NELSON. I move to table—I am sorry. We have an agreement on this to vote straight up or down.

Mr. HELMS. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, may we have order so that we may hear the calling of the roll?

Mr. President, the Senate is not in order.

Mr. STONE. Mr. President, will the Senator yield for a unanimous-consent request about my vote on the last vote, before calling the roll on this vote? It will not change the result.

The PRESIDING OFFICER. The vote has been called for. The Chair is waiting until the Senate is in order. The clerk will then call the roll.

The clerk will call the roll.

The second assistant legislative clerk resumed the call of the roll.

Mr. NELSON. Mr. President, may we have order? A number of Senators are carrying on discourses in the aisles; will the Chair request Senators to go to the cloakrooms or take their seats?

The PRESIDING OFFICER. We cannot proceed with the vote until the Senate comes to order. If Senators will take their seats or retire to the cloakrooms, we can proceed with the vote.

Mr. NELSON. Mr. President, some of the Senators do not have their hearing aids on. Will the Chair speak more loudly?

The PRESIDING OFFICER. The Senate will be in order. We would like to proceed with the vote. Senators who wish to converse will please go to the cloakrooms.

The clerk may proceed.

The call of the roll was resumed and concluded.

Mr. CRANSTON. I announce that the Senator from Kentucky (Mr. FORD), the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Maine (Mr. MUSKIE) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I further announce that, if present and voting, the Senator from Kentucky (Mr. FORD), the Senator from North Carolina (Mr. MORGAN), the Senator from Maine (Mr. MUSKIE), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Michigan (Mr. RIEGLE) would each vote "nay."

Mr. STEVENS. I announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

The result was announced—yeas 28, nays 65, as follows:

[Rollcall Vote No. 78 Leg.]

YEAS—28

Allen	Hansen	Proxmire
Bartlett	Hart	Randolph
Byrd, Harry F., Jr.	Hatch	Schmitt
	Hayakawa	Stevens
Case	Heinz	Stone
Curtis	Helms	Thurmond
DeConcini	Laxalt	Wallop
Dole	Leahy	Weicker
Garn	Lugar	Zorinsky
Goldwater	McClellan	

NAYS—65

Abourezk	Culver	Kennedy
Anderson	Danforth	Long
Baker	Domenici	Magnuson

Sasser	Stennis	Young
Schweiker	Stevenson	

NOT VOTING—7

Ford	Morgan	Riegle
Gravel	Muskie	
Griffin	Ribicoff	

So Mr. HELMS' amendment (No. 114) was rejected.

AMENDMENT NO. 113

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to vote on amendment No. 113, proposed by the Senator from North Carolina.

The yeas and nays have been ordered.

Mr. NELSON. Mr. President, I move to table the amendment.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on all remaining rollcall votes today there be a time limitation of 10 minutes.

Mr. WEICKER. I object.

The PRESIDING OFFICER. Objection is heard.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from North Carolina (Mr. HELMS), amendment No. 113.

The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. RANDOLPH (when his name was called). Mr. President, I have a live pair with the Senator from Kentucky (Mr. FORD). If I were permitted to vote, I would vote "nay." I withhold my vote because the Senator from Kentucky would wish to vote "yea."

Mr. CRANSTON. I announce that the Senator from Kentucky (Mr. FORD), the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Maine (Mr. MUSKIE) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I further announce that, if present and voting, the Senator from North Carolina (Mr. MORGAN), the Senator from Maine (Mr. MUSKIE), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Michigan (Mr. RIEGLE) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

The result was announced—yeas 68, nays 24, as follows:

[Rollcall Vote No. 79 Leg.]

YEAS—68

Abourezk	Burdick	DeConcini
Anderson	Byrd, Robert C.	Dole
Baker	Cannon	Domenici
Bartlett	Chiles	Durkin
Bayh	Church	Eagleton
Bentsen	Clark	Eastland
Biden	Cranston	Glenn
Brooke	Culver	Haskell
Bumpers	Danforth	Hatch

Hatfield	Mathias	Sarbanes
Hathaway	Matsunaga	Sasser

Goldwater	Nunn	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Randolph, against.

NOT VOTING—7

Ford	Morgan	Riegle
Gravel	Muskie	
Griffin	Ribicoff	

So the motion to lay on the table was agreed to.

Mr. STONE. Mr. President, I ask unanimous consent to speak for 1 minute and, following that, to make a motion to reconsider the vote by which the amendment No. 112 of the Senator from North Carolina was tabled.

The PRESIDING OFFICER (Mr. MATSUNAGA). Is there objection?

The Chair hears none.

Without objection, it is so ordered.

Mr. STONE. Mr. President, I voted "yea" on the motion to table after being informed, or misinformed, that it was a straight up or down vote. I wanted to support Helms amendment No. 112. Under those circumstances, I move to reconsider the vote by which Helms amendment No. 112 was laid on the table.

Mr. NELSON. I move to lay on the table the motion to reconsider.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 158

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to vote on amendment No. 158 by the Senator from North Carolina (Mr. HELMS) with a motion to table in order.

Mr. HELMS. Mr. President, I do not intend to have a vote on amendment No. 111. I am perfectly willing to have a voice vote.

I ask unanimous consent in connection with amendment No. 158 that I be allowed to withdraw that amendment temporarily for the purpose of modification and consideration at a later date this week.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

Mr. NELSON. Mr. President, what is the pending business?

Mr. HELMS. No. 111.

Mr. NELSON. Mr. President, I move to table the pending amendment.

AMENDMENT NO. 111

The PRESIDING OFFICER. The Chair has not yet announced the order.

Under the previous order, the Senate will now proceed to vote on amendment No. 111 by the Senator from North Carolina (Mr. HELMS) with a motion to table in order.

Mr. NELSON. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table amendment No. 111.

The motion to lay on the table was agreed to.

AMENDMENT NO. 133

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to vote on amendment No. 133 by the Senator from Illinois (Mr. PERCY) with a motion to table in order, and the yeas and nays have been ordered.

Mr. NELSON. Mr. President, I move to table the amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion to table.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Illinois (Mr. PERCY). The yeas and nays have been ordered and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. METCALF (after having voted in the negative). On this vote I have a pair with the Senator from Kentucky (Mr. FORD). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I, therefore, withdraw my vote.

Mr. EASTLAND (after having voted in the affirmative). On this vote I have a pair with the Senator from Maine (Mr. MUSKIE). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I, therefore, withdraw my vote.

Mr. CRANSTON. I announce that the Senator from Kentucky (Mr. FORD), the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Maine (Mr. MUSKIE) are necessarily absent.

I further announce that the Senator from Alaska (Mr. GRAVEL) and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I further announce that, if present and voting, the Senator from North Carolina (Mr. MORGAN), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Michigan (Mr. RIEGLE) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), is necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN), is absent on official business.

The result was announced—yeas 57, nays 33, as follows:

[Rollcall Vote No. 80 Leg.]

YEAS—57

Abourezk	Durkin	McIntyre
Allen	Eagleton	Melcher
Anderson	Glenn	Metzenbaum
Bayh	Hart	Moynihan
Bentsen	Haskell	Nelson
Biden	Hathaway	Nunn
Brooke	Hollings	Pearson
Bumpers	Huddleston	Pell

Danforth	McClellan	Wallop
Dole	McClure	Weicker
Garn	Packwood	Young
Hansen	Percy	
Hatch	Roth	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—2

Eastland, for.

Metcalf, against.

NOT VOTING—8

Ford	Griffin	Ribicoff
Goldwater	Morgan	Riegle
Gravel	Muskie	

So the motion to lay on the table was agreed to.

UP AMENDMENT 109 (SUBSEQUENTLY NUMBERED AMENDMENT 167)

Mr. PERCY. Mr. President, I send an amendment to the desk on behalf of Senator BELLMON and myself and ask that it be printed.

The PRESIDING OFFICER. The amendment will be stated.

Mr. PERCY. Mr. President, I am very happy to yield to the majority leader.

The PRESIDING OFFICER. The Senate will be in order. The Chair is unable to hear the Senator from Illinois.

The Senator will proceed.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. PERCY. I am happy to yield.

Mr. ROBERT C. BYRD. Mr. President, will the clerk state the amendment?

The PRESIDING OFFICER. The amendment is just submitted for printing.

Mr. ROBERT C. BYRD. But the Senator wants to call it up. He wants to take it up tomorrow, as I understand.

Mr. PERCY. That is right. It is not the intention to have a vote on it tonight but to have a 1-minute discussion for the purpose of the RECORD, so that Senators can be informed as to what the amendment provides.

However, I would be happy to enter into a time limitation agreement. I suggest 15 minutes to a side.

Mr. ROBERT C. BYRD. That is the point.

The PRESIDING OFFICER. The Chair poses this question to the Senator from Illinois: Is the Senator offering the

amendment for consideration at this time?

Mr. PERCY. Yes.

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes unprinted amendment No. 109.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

S. RES. 110

On page 28, strike out lines 12 through 19 and insert in lieu thereof:

"6. No Member, officer or employee of the Senate compensated at a rate in excess of $25,000 per annum and employed for more than 90 days in a calendar year (unless hired on a per diem basis) shall affiliate with a firm, partnership, association, or corporation for the purpose of providing professional services for compensation or permit that individual's name to be used by such a firm, partnership, association or corporation. For the purposes of this paragraph, 'professional services' means those which involve a fiduciary relationship."

The PRESIDING OFFICER. The time for debate on this amendment will be limited to 15 minutes on each side and, without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, that has not been agreed to. The Senator merely said he would be willing to enter into that agreement. Would he like to take his minute and explain the amendment first?

Mr. PERCY. I would like to very much indeed.

Mr. ROBERT C. BYRD. May I say, if the Senator will allow me, without losing his right to the floor, there will be no more rollcall votes.

Will the Senator explain his amendment?

Mr. PERCY. Mr. President, the purpose of the amendment is simply to take into account some of the objections made to the Bellmon amendment and to the just-voted-upon Percy amendment.

This amendment, I believe and I trust, does resolve most of the problems associated with a Member of the Senate or particularly a staff member engaging in the practice of law by affiliating with an organization.

The amendment simply provides that no Member shall affiliate with a firm, partnership, association, or corporation for the purpose of providing professional services for compensation or permit that individual's name to be used by such a firm, partnership, association, or corporation.

For the purpose of this paragraph professional services mean those which involve a fiduciary relationship.

Mr. President, I ask unanimous consent that a definition paraphrased from Black's Law Dictionary of fiduciary relationship be printed in the RECORD at this point.

There being no objection, the definition was ordered to be printed in the RECORD, as follows:

FIDUCIARY RELATIONSHIP (PARAPHRASE OF BLACK'S LAW DICTIONARY)

A "fiduciary relationship" is a legally enforceable condition of trust where one person, by contract or other form of agreement or commitment, agrees to act on behalf of another person for the purpose of conducting a specified transaction. The fiduciary becomes, in effect, the agent of his benefactor, and in all actions within the relationship must place the interests of the client above its own. Among the specific responsibilities of a fiduciary, which may be enforced through civil suit for damages or other relief, are a duty of care, and a duty of loyalty.

Examples of "fiduciaries" are the directors of a corporation, a lawyer, an accountant, a trustee, any agent under a technical principle-agent relationship, or a financial manager. Any of these individuals may, under common law principles, be sued by their benefactors for failure to meet their various duties of trust and confidence.

Mr. PERCY. Finally, Mr. President, so that Senators may have a brief summary of what this embraces, it would prohibit a Member or a staff member joining a firm or corporation. It allows individual services for compensation up to the 15-percent limitation. It prohibits a firm or corporation from using a Senator's name or an employee's name. It retains the provision in the resolution prohibiting outside employment, which would involve a conflict of interest.

Mr. President, I trust this will satisfactorily answer most of the objections that have been raised to the previous Bellmon and Percy amendments, and I look forward to a favorable vote on this tomorrow.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. PERCY. I would be happy to yield to the distinguished Senator from Minnesota.

Mr. HUMPHREY. I am not being facetious but serious about this. We have a family business belonging to my father. I am a junior member of the family. What do I have to do about that? I am serious. Do I have to take my name off the door? It is a family business, and I want to know what will happen.

Mr. BELLMON. I believe family businesses are permitted under the bill. This is on professional services.

Mr. PERCY. It would not be a fiduciary relationship.

Mr. HUMPHREY. I thank the Senator.

Mr. PERCY. I would be happy to yield to my distinguished colleague from Oklahoma. I appreciate the support he has provided to this provision which, I think, would be fair and equitable to staff members as well as Senators.

The Senator from Illinois is very happy to enter into a time agreement and a definite time for a vote tomorrow.

ADDITIONAL STATEMENTS SUBMITTED ON S. RES. 110

Mr. FORD. Mr. President, I was necessarily absent from the Senate late this afternoon, and a word of explanation is in order since I will be absent for several rollcall votes.

The reason for my absence is to attend a public hearing in Dayton, Ky., on the local protection project, which is one of the water resource projects being reviewed in accordance with the President's request to the Secretary of the Army.

This project is of great importance to the people of this community and is the only hope they have for protection from future flooding of the Ohio River between river miles 467.0 and 468.5, downstream from Pittsburgh. I feel very strongly about the need for continued funding of this project, and believe it is important that I attend this meeting to assist the concerned members of the community in presenting their case for funding the project through its completion.

I have sought pairs on the votes which have been scheduled for today, and it is my intention to be present for final passage of this measure.

Mr. GOLDWATER. Mr. President, as we approach a vote on the Senate ethics resolution, I have been giving some serious thought to this whole problem and indeed, to the roots of this problem as they affect individual behavior and the nature of man.

In any serious attempt to apply the principles of moral ethics to political practice, it is vitally important that we understand the nature of man as it truly exists. As a conservative, I believe man's nature is such that he will have his failures and character defects no matter how many laws are passed in the name of morality and no matter how many codes of ethics are devised for any group of men whether they be public officials or some other special group.

Mr. President, there is no way to legislate or arrange for men in a particular position of responsibility to become forever noble. Being human, man's nature is such that no matter what kind of laws and regulations and codes are adopted, he will still be assailed by the same temptations that have plagued men and women since the days of Adam and Eve. A few will always allow their greed and avarice to overrule their regard for duty and morality. Some will always let their selfishness overrule their fears of breaking the law. Some will go to almost any length, engage in almost any kind of nefarious activity, show almost every kind of disregard for the rights of others, if this is what is required to feather their own nests.

While it is true that in any group of men there will be a few who break moral standards, it nevertheless pains me when I hear people express the belief that all Members of Congress are on the make or are basically dishonest or carry with a high tendency toward larceny. Of course it takes only one highly publicized example to spread the idea that all Members are a bunch of crooks. Such generalizations are not unusual and they develop quite naturally upon the publicity and moralizing that attends any case of questionable conduct on the part of one or a few Members.

Mr. President, we err if we assume that, merely because a man is prominent enough in his community to be chosen for political office, he must have some special claim on exemplary behavior. As his name implies, he is representative, in

the sense of being typical, of the American people. This being the case, there will be some Members of Congress who are inclined to cut legal corners just as there are on the main streets of America. Some members will perhaps be greedy or bigoted or just plain mean. Again, this is a reflection of the various human elements that make up our society. If America can indeed be called a melting pot, the elected Members of Congress, in body assembled, can be called a reasonable reflection of that amalgamating process.

If there are going to be a few rotten apples in any barrel, then what difference should Christian ethics make? This is not a point which can be proved objectively. For me it is a matter of personal conviction as a Christian. I believe that a dedicated Christian, or a man dedicated to any truly religious concepts—for I know highly moral men who happen to be American Indians, Muslims, Buddhists, et cetera, will be better able to withstand the temptations that might come his way in public life than a person with no belief and little regard for moral values. To a man without religious convictions, the only reasons for being moral are practical ones—fear of disapproval or of being caught, inconvenience, psychological guilt. But a Christian, whether in politics or any other profession, practices morality not merely because of external sanctions but because of internal conviction. In his heart he knows he is either right or wrong, and this knowledge acts as a powerful incentive to proper conduct.

The question arises, is it possible to conduct an investigation which would prove a man's moral worth prior to his election or appointment to an office of public trust? If it could be done, this would be the best insurance that could be devised for the maintenance of a higher ethical standard in the ranks of our public servants. But to date no one has seriously suggested that such a test is possible. We can measure behavior when it is possible to observe it, but many of a man's actions are as private as his conscience, and his thoughts and motives are even further hidden from public view. I am reminded of Proverbs 23:7—

As he thinketh in his heart, so is he (King James version).

Furthermore, it is often difficult to predict whether a man who has always been known for honesty and fairness in his dealings with others will continue to resist temptation once he is subjected to the pressures of public office. As Lord Acton said:

Power corrupts, and absolute power corrupts absolutely.

Mr. President, in all this furor over ethics it has gotten so Members of Congress are beginning to look askance at the most routine kind of daily activity. I just want to say that I for one, will not avoid going out with a lifelong friend merely because he works for General Motors and might outwrestle me for the dinner check. Nor will I forego playing golf with an old friend merely because he works for United States Steel and might pick up the tab for the greens fees while I am taking a shower. I think it is obvious that Members of the Senate who now earn more than a quarter of a million dollars in a 6-year term are not likely to be compromised by petty gifts or contributions.

Mr. President, this whole problem presents me with something of a dilemma. On one hand, I am inclined to vote for this ethics resolution as a demonstration of my desire to do something about the abuses and irregularities which have been reported. On the other hand, I ask myself if we are not creating in the public mind an impression that by passing one law or resolution we are going to correct legislatively everything that has gone wrong. I agree with this last reasoning and will vote against the resolution.

(This concludes additional statements submitted on Senate Resolution 110.)

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON FEDERAL ADVISORY COMMITTEES—MESSAGE FROM THE PRESIDENT—PM 58

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

In accordance with the provisions of Section 6(c) of the Federal Advisory Committee Act, the report on the status of advisory committees in 1976 is herewith forwarded.

This is the fifth annual report. It is organized to provide summary information about the activities of advisory committees, and public access to specific committees and the federal agencies to whom they provide advice.

With the current government-wide, zero-base review of all advisory committees, the number of existing committees should be sharply reduced. This reduction will be reflected in the next annual report.

JIMMY CARTER.

THE WHITE HOUSE, *March 29, 1977.*

REPORT ON THE NATIONAL CANCER PROGRAM—MESSAGE FROM THE PRESIDENT—PM 59

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Human Resources:

To the Congress of the United States:

Pursuant to the requirements of the National Cancer Act of 1971 (P.L. 92-218) as amended, I hereby transmit the Report of the Director, 1976 on the National Cancer Program for calendar year 1975. The period covered by the report precedes my term of office.

JIMMY CARTER.

THE WHITE HOUSE, *March 29, 1977.*

MESSAGE FROM THE HOUSE

At 4:04 p.m., a message from the House of Representatives delivered by Mr. Hackney, one of its reading clerks, announced that the House has passed House Joint Resolution 351, making further continuing appropriations for the fiscal year 1977, and for other purposes, in which it requests the concurrence of the Senate.

The message also announced that the Speaker, pursuant to the provisions of section 1, Public Law 689, 84th Congress, as amended, has appointed Mr. Hamilton as a member on the part of the House of the U.S. group of the North Atlantic Assembly, vice Mr. Zablocki, resigned.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations, with amendments:

H. Con. Res. 142. A concurrent resolution urging the Canadian Government to reassess its policy of permitting the killing of newborn harp seals (Rept. No. 95-71).

By Mr. HASKELL, from the Committee on Energy and Natural Resources, with amendments and an amendment to the title:

S. 266. A bill to authorize appropriations for fiscal year 1977 to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974 (Rept. No. 95-72).

By Mr. ROBERT C. BYRD (for Mr. MUSKIE), from the Committee on the Budget, without amendment:

S. Res. 123. A resolution waiving the provisions of section 402(a) of the Congressional Budget Act of 1974 with respect to S. 1070 (Rept. No. 95-73).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. SPARKMAN, from the Committee on Foreign Relations:

Joseph D. Duffey, of the District of Columbia, to be an Assistant Secretary of State.

Matthew Nimetz, of New York, to be counselor of the Department of State.

Herbert J. Hansell, of Ohio, to be legal adviser of the Department of State.

W. Michael Blumenthal, of Michigan, to be U.S. Governor of the International Monetary

Fund for a term of 5 years and U.S. Governor of the International Bank for Reconstruction and Development for a term of 5 years; a Governor of the Inter-American Development Bank for a term of 5 years; and U.S. Governor of the Asian Development Bank and U.S. Governor of the African Development Bank.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. MAGNUSON, from the Committee on Commerce, Science, and Transportation:

Jerry Joseph Jasinowski, of the District of Columbia, to be an Assistant Secretary of Commerce.

Sidney Harman, of New York to be Under Secretary of Commerce.

(The above nominations were reported with the recommendations that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. JACKSON (for himself, Mr. BAKER, Mr. RANDOLPH, Mr. STAFFORD, and Mr. MCCLURE):

S. 1153. A bill to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes. Ordered to be placed on the Calendar.

By Mr. THURMOND:

S. 1154. A bill for the relief of Jin Syen Suh; to the Committee on the Judiciary.

By Mr. CURTIS:

S. 1155. A bill to amend the Tax Reform Act of 1976 to correct an inadvertent omission; to the Committee on Finance.

By Mr. BENTSEN (for himself and Mr. TOWER):

S. 1156. A bill to authorize the establishment of the San Antonio Missions National Historical Park in the State of Texas, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. TOWER (for himself, Mr. BARTLETT, Mr. CLARK, Mr. CURTIS, Mr. PELL, Mr. RANDOLPH, Mr. SCHMITT, Mr. STONE, Mr. THURMOND, and Mr. ZORINSKY):

S. 1157. A bill to amend the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 to provide that States will be assured of receiving grants at a level equal to that which was received prior to July 26, 1976; to the Committee on Human Resources.

By Mr. THURMOND (for himself, Mr. STEVENS, Mr. HUDDLESTON, and Mr. Mr. HEINZ):

S. 1158. A bill to amend the Internal Revenue Code of 1954 to permit individuals to amortize certain rehabilitation expenditures for certified historic structures which are not depreciable; to the Committee on Finance.

By Mr. SPARKMAN (by request):

S. 1159. A bill to amend the Foreign Assistance Act of 1961, and for other purposes; to the Committee on Foreign Relations.

S. 1160. A bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes; to the Committee on Foreign Relations.

S. 1161. A bill to further amend the Foreign Service Act of 1946 to improve the Foreign Service Personnel System, and for other purposes; to the Committee on Foreign Relations.

By Mr. INOUYE:

S. 1162. A bill to repeal section 222 of the Communications Act of 1934; to the Committee on Commerce, Science, and Transportation.

By Mr. MATSUNAGA (for himself, Mr. DURKIN, and Mr. MELCHER):

S. 1163. A bill to amend title 5, United States Code, to improve the basic workweek of firefighting personnel of executive agencies, and for other purposes; to the Committee on Governmental Affairs.

By Mr. HART (for himself and Mr. THURMOND) (by request):

S. 1164. A bill to authorize certain construction at military installations, and for other purposes; to the Committee on Armed Services.

By Mr. MATSUNAGA:

S. 1165. A bill for the relief of Chester Chun Ket Young, also known as Chun-Kit Yeung; to the Committee on the Judiciary.

S. 1166. A bill for the relief of Maria Elena Jumalon; to the Committee on the Judiciary.

By Mr. DOMENICI (for himself and Mr. HUMPHREY):

S. 1167. A bill to establish a research and development effort resulting in the commercialization of native latex rubber; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. ABOUREZK:

S. 1168. A bill to amend the Act entitled "An Act to provide for certain payments to be made to local governments by the Secretary of the Interior based upon the amount of certain public lands within the boundaries of such locality", approved October 30, 1976; to the Committee on Energy and National Resources.

By Mr. HUMPHREY:

S. 1169. A bill to amend and extend the Agricultural Trade Development and Assistance Act of 1954, as amended; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY:

S. 1170. A bill to strengthen the surplus commodities provision of the Older Americans Act of 1965, and for other purposes; to the Committee on Human Resources.

By Mr. WEICKER:

S. 1171. A bill relating to collective bargaining representation of postal employees; to the Committee on Governmental Affairs.

By Mr. SCOTT:

S. 1172. A bill to amend the Federal Food, Drug, and Cosmetic Act to provide for the reasonable evaluation of the effects of certain food additives upon human health; to the Committee on Human Resources.

By Mr. MAGNUSON (for himself and Mr. JACKSON):

S. 1173. A bill for the relief of Day's Sportswear, Inc., and Roffe-Rene, Inc.; to the Committee on the Judiciary.

By Mr. DOLE (for himself and Mr. MELCHER):

S. 1174. A bill entitled the Critical Lands Resource Conservation Act of 1977; to the Committee on Agriculture, Forestry, and Nutrition.

By Mr. CHAFEE:

S. 1175. A bill to amend title II of the Social Security Act to provide for a phasing out of the earnings limitation; to the Committee on Finance.

By Mr. HASKELL:

S. 1176. A bill to require the Administrator of the Environmental Protection Agency to exercise his authority under the Safe Drinking Water Act to make grants for certain demonstration projects; to the Committee on Human Resources.

By Mr. MATSUNAGA:

S.J. Res. 41. A joint resolution to authorize the President to proclaim February 16 as "Bataan-Corregidor Day"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. JACKSON (for himself, Mr. BAKER, Mr. RANDOLPH, Mr. STAFFORD, and Mr. MCCLURE):

S. 1153. A bill to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes. Ordered placed on the Calendar.

JOINT COMMITTEE ON ATOMIC ENERGY

Mr. JACKSON. Mr. President, I introduce today a bill to abolish the Joint Committee on Atomic Energy, to reassign certain functions and authorities of the joint committee to other committees of the Congress, and for other purposes.

Senate Resolution 4, which was agreed to on February 4, 1977, directed that legislation be developed to abolish the Joint Committee on Atomic Energy, to complete the reassignment of its functions and authority, and to provide for the disposition of the staff of the joint committee. This bill accomplishes these purposes and follows the approach taken by Senate Resolution 4 in eliminating certain standing committees of the Senate.

In addition to completing the necessary arrangements for the joint committee, this bill will assist the committees which have received the jurisdiction of the joint committee with the performance of their new responsibilities. Although I am proud of my service on the joint committee and of the many accomplishments of that committee over the years, I believe that Senate Resolution 4 and this bill are important steps in improving the ability of the Senate to focus attention on energy issues.

In developing this legislation, I have had extensive discussions with Chairman RANDOLPH of the Environment and Public Works Committee and with Senator BAKER on the minority side, and they join me, along with Senators STAFFORD and MCCLURE, in cosponsoring this legislation.

Mr. President, in order to assist the committees receiving the jurisdiction of the joint committee in moving ahead as rapidly as possible with their new responsibilities, I ask unanimous consent that this bill not be referred to committee but rather that it be placed on the calendar.

The PRESIDING OFFICER. Without objection, the bill will be placed on the Calendar.

Mr. JACKSON. For the information of the Senate, I also ask unanimous consent that the bill, a summary bill analysis and a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1153

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

PURPOSES

SEC. 101. The purposes of this Act are—

(1) to abolish the Joint Committee on Atomic Energy and to provide for the transfer of its statutory functions and authority to other committees of the Congress which, under the rules of the House and Senate, are assigned jurisdiction over the develop-

ment, utilization or application of atomic energy;

(2) to preserve the security of information relating to the national security considerations of nuclear technology;

(3) to make necessary conforming amendments to the Atomic Energy Act of 1954, as amended, and certain other laws which pertain to the Joint Committee on Atomic Energy; and

(4) to provide for the disposition of staff personnel of the Joint Committee on Atomic Energy.

TITLE II—JOINT COMMITTEE ON ATOMIC ENERGY

SEC. 201. The Joint Committee on Atomic Energy is abolished.

TITLE III—TRANSFERS OF CERTAIN FUNCTIONS OF THE JOINT COMMITTEE ON ATOMIC ENERGY AND CONFORMING AMENDMENTS TO CERTAIN OTHER LAWS

SEC. 301. (a) Sections 201, 202, 203, 204, 205, 206, and 207 of the Atomic Energy Act of 1954, as amended, are repealed.

(b) Section 103 of the Atomic Energy Community Act of 1955 as amended, is repealed.

SEC. 302. Section 3 of the Congressional Budget Act of 1974 is amended by—

(1) striking the subsection designation "(a)"; and

(2) repealing subsection (b).

SEC. 303. Section 252(a)(3) of the Legislative Reorganization Act of 1970 is repealed.

SEC. 304. Section 502 of the Mutual Security Act of 1954, as amended, is amended by striking the words "the Joint Committee on Atomic Energy and".

SEC. 305. Section 3 of the International Atomic Energy Agency Participation Act of 1957 is amended by striking the words "the Joint Committee on Atomic Energy,".

SEC. 306. (a) Section 11 of the Atomic Energy Act of 1954, as amended, is amended by repealing subsection o.

(b) Section 11c of the Atomic Energy Act of 1954, as amended, is amended by deleting the words "The term 'atomic energy' or 'nuclear energy' mean".

(c) Section 11d of the Atomic Energy Act of 1954, as amended, is amended by deleting the words "The term 'atomic weapon' means" and inserting the words "The terms 'atomic weapon' or 'nuclear weapon' mean".

SEC. 307. Section 120 of the Atomic Energy Community Act of 1955, as amended, is amended by striking the second proviso and all that follows, and substituting the following: *"Provided further,* That before the Commission makes any disposition of property under the authority of this section, the basis for the proposed disposition (with necessary background and explanatory data) shall be submitted to the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, and a period of forty-five days shall elapse while Congress is in session (in computing such forty-five days, there shall be excluded the days on which either House is not in session because of adjournment of more than three days): *Provided, however,* That after having received the basis for the proposed disposition, such Congressional Committees may by resolution in writing agreed to by such Committees waive the conditions of all or any portion of such forty-five day period.".

SEC. 308. Section 91 d. of the Atomic Energy Community Act of 1955, as amended, is amended by striking the words "Joint Committee on Atomic Energy" and substituting "Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,".

SEC. 309. Section 51 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking the proviso and substituting *"Provided, however,* That the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, after having received such determination, may by resolution in writing agreed to by such Committees waive the conditions of all or any portion of such thirty-day period.".

SEC. 310. Section 54 a. of the Atomic Energy Act of 1954, as amended, is amended by deleting the words *"Provided, however"* the second time they appear and all that follows up to the next sentence and substituting the following:

"Provided, however, That before they are established by the Commission pursuant to this subdivision (ii), such proposed amounts and periods shall be submitted to the Congress and referred to the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, and a period of sixty days shall elapse while Congress is in session (in computing such sixty days, there shall be excluded the days on which either House is not in session because of an adjournment of more than three days): *And provided further,* That any such proposed amounts and periods shall not become effective if during such sixty-day period the Congress passes a concurrent resolution stating in substance that it does not favor the proposed action: *And provided further,* That prior to the elapse of the first thirty days of any such sixty-day period the Congressional Committees to which have been referred such proposed amounts and periods shall report to their respective Houses concerning their views and recommendations respecting the proposed amounts and periods and shall report to their respective Houses an accompanying proposed concurrent resolution stating in substance that the Congress favors, or does not favor, as the case may be, the proposed amounts or periods.".

SEC. 311. Section 61 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section,"; and

(2) striking all after the words *"Provided, however,"* and substituting "That the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section, after having received such determination, may by resolution in writing agreed to by such Committees waive the conditions of all or any portion of such thirty-day period.".

SEC. 312. (a) Section 123 c. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"c. the proposed agreement for cooperation, together with the approval and the determination of the President, has been submitted to the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements, and a period of thirty days has elapsed while Congress is in session (in computing such thirty days, there shall be excluded the days on which either House is not in session because of an adjournment of more than three days): *Provided, however,* That the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements, after having received such agreement for cooperation, may by resolution in writing agreed to by such Committees waive the conditions of all or any portion of such thirty-day period; and".

(b) Section 123 d. of such Act is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over such proposed agreements,"; and

(2) striking the remainder of the sentence following the word *"Provided"* and substituting the following:

"That prior to the elapse of the first thirty days of any such sixty-day period the Congressional Committees to which have been referred the proposed agreement shall each submit a report to their respective Houses of the views and recommendations of the Committee respecting the proposed agreement and an accompanying proposed concurrent resolution stating in substance that the Congress favors, or does not favor, as the case may be, the proposed agreement for cooperation.".

SEC. 313. Section 161 v. of the Atomic Energy Act of 1954, as amended, is amended by striking the third proviso and substituting the following: *"Provided further,* That before the Commission establishes such criteria, the proposed criteria shall be submitted to the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this subsection, and a period of forty-five days shall elapse while Congress is in session (in computing the forty-five days there shall be excluded the days in which either House is not in session because of adjournment for more than three days); *Provided, however,* That the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this subsection, after having received such proposed criteria, may by resolution in writing agreed to by such Committees waive the conditions of all or any portion of such forty-five day period.".

SEC. 314. Section 164 of the Atomic Energy Act of 1954, as amended, is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section."; and

(2) striking the proviso and substituting *"Provided, however,* That the thirty-day period may be waived by resolution in writing agreed to by the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

SEC. 315. Section 107(c) of Public Law 88-332 (42 U.S.C. 2204 a) is amended by—

(1) striking the words "Joint Committee" the first time they appear and substituting "Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section"; and

(2) striking the proviso and substituting *"Provided, however,* That the forty-five day period may be waived by resolution in writing agreed to by the Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

SEC. 316. Section 170 i. of the Atomic Energy Act of 1954, as amended, is amended by striking the words "Joint Committee" each time they appear and substituting "Congressional Committees which, under the rules of the House and Senate are assigned jurisdiction over the subject matter of this section.".

TITLE IV—INFORMATION AND ASSISTANCE TO CONGRESSIONAL COMMITTEES

SEC. 401. (a) The Energy Research and Development Administration and the Nuclear Regulatory Commission shall keep the com-

mittees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the functions of the Administration or the Commission, fully and currently informed with respect to the activities of the Administration and the Commission.

(b) The Department of Defense shall keep the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over national security considerations of nuclear technology, fully and currently informed with respect to such matters within the Department of Defense relating to national security considerations of nuclear technology which are within the jurisdiction of such committees.

(c) Any Government agency shall furnish any information requested by the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, with respect to the activities or responsibilities of such agency in the field of nuclear energy which are within the jurisdiction of such committees.

SEC. 402. The committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the development, utilization, or application of nuclear energy, are authorized to utilize the services, information, facilities and personnel of any Government agency which has activities or responsibilities in the field of nuclear energy which are within the jurisdiction of such committees: *Provided, however,* That any utilization of personnel by such committees shall be on a reimbursable basis and shall require, with respect to committees of the Senate, the prior written consent of the Committee on Rules and Administration, and with respect to committees of the House of Representatives, the prior written consent of the Committee on House Administration.

SEC. 403. All records, data, charts and files of the Joint Committee on Atomic Energy which are not transferred under section 501 of this Act are transferred to the committees of the Senate which, under the rules of the Senate, have jurisdiction over the subject matters to which such records, data, charts and files primarily relate. Such committees of the Senate shall make available such records, data, charts and files to other committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the subject matters to which such records, data, charts, and files relate.

TITLE V—PROTECTION OF NATIONAL SECURITY INFORMATION

SEC. 501. (a) All records, data, charts and files of the Joint Committee on Atomic Energy relating to national security matters, including the military applications of nuclear technology, shall be transferred to the committees of the Senate which, under the rules of the Senate, have jurisdiction over the subject matters to which such records, data, charts and files relate. In the event that any record, chart or file shall be within the jurisdiction of more than one committee of the Senate, duplicate copies shall be provided upon request.

(b) The Committees of the Senate which receive the records, data, charts and files of the Joint Committee on Atomic Energy under subsection (a) shall make available such records, data, charts and files to the committees of the House of Representatives which, under the rules of the House, have jurisdiction over the subject matters to which such records, data, charts and files relate.

(c) The committees of the Senate which receive the records, data, charts and files of the Joint Committee on Atomic Energy under subsection (a) may utilize the Office of Classified National Security Information established by section 502 of this Act or make other suitable arrangements for safeguarding such records, data, charts or files.

SEC. 502. (a) There is established for the period beginning on the effective date of this Act and ending March 31, 1979, an Office of the Senate to be known as the "Office of Classified National Security Information" (hereafter in this section referred to as the "Office"). The Office shall be under the policy direction of the Majority Leader, the Minority Leader and the Chairman of the Committee on Rules and Administration of the Senate, and shall be under the administrative direction and supervision of the Secretary of the Senate. The Office shall have the responsibility for safeguarding such restricted data and such other classified information as any committee of the Senate may from time to time assign to it.

(b) The Office shall have the authority—

(1) upon application of any committee of the Senate, to perform the administrative functions necessary to classify and declassify information relating to the national security considerations of nuclear technology in accordance with guidelines developed for restricted data by the responsible executive agencies;

(2) to provide appropriate facilities for hearings of committees of the Senate at which restricted data or other classified information is to be presented or discussed; and

(3) to establish and operate a central repository in the United States Capitol for the safeguarding of restricted data and other classified information for which such Office is responsible.

(c) The Secretary of the Senate, with the approval of the Majority Leader, the Minority Leader, and the Chairman of the Committee on Rules and Administration of the Senate, is authorized to appoint and fix the compensation of not more than two professional staff members and three clerical staff members for the Office. One of such professional staff members may be paid compensation at a rate not to exceed the rate provided for the two employees of a standing committee of the Senate referred to in section 105(e)(3)(A) of the Legislative Branch Appropriation Act, 1968, as amended and modified (2 U.S.C. 61–1), and the other professional staff member may be paid compensation at a rate not to exceed the rate provided for professional staff members of a standing committee of the Senate by section 105(e)(1) of such Act. The clerical staff members may be paid compensation at a rate not to exceed the rate provided for the four clerical assistants of a standing committee of the Senate referred to in section 105(e)(2)(A) of such Act.

(d) The salaries and expenses of the Office shall be paid from the contingent fund of the Senate pursuant to appropriations made to the contingent fund for such purpose. Until funds are first so appropriated, such salaries and expenses shall be paid from the contingent fund out of funds appropriated for "Miscellaneous Items". Such salaries and expenses shall be paid out of the contingent fund upon vouchers approved by the Secretary of the Senate, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

(e) Within 30 days of the date of enactment of this Act, the Office shall furnish the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Foreign Relations of the Senate with a listing of all those records, data, charts and files of the Joint Committee on Atomic Energy which are to be transferred to such committees under section 501(a) of this Act, indicating which committee(s) may have jurisdiction over each item. The chairman of the committees involved shall be responsible for resolving any case of doubt regarding jurisdiction over particular records, data, charts or files.

TITLE VI—COMMITTEE STAFF

SEC. 601. For purposes of this title, the term—

(1) "effective date" means the effective date of title II of this Act;

(2) "eligible staff member" means an individual who is a member of the staff of the Joint Committee on Atomic Energy on the day prior to the effective date and had served continuously (except for any period of four days or less) as a member of the staff of the Joint Committee on Atomic Energy since October 1, 1976;

(3) "new committee" means the Committee on Armed Services, the Committee on Energy and Natural Resources, the Committee on Environment and Public Works, and the Committee on Foreign Relations of the Senate; and

(4) "transition period" means the period beginning on the effective date and ending on June 30, 1977, or, if later, on the ninetieth day after the effective date.

SEC. 602. (a) On the effective date, those eligible staff members who are required to carry out the provisions of section 502 of this Act, as designated by the Majority and Minority Leader and the Chairman of the Committee on Rules and Administration of the Senate in accordance with such section, shall be transferred to the Office of Classified National Security Information.

(b) On the effective date, each eligible staff member not transferred to the Office of Classified National Security Information under subsection (a) shall be transferred to the staff of a new committee. The determination of the eligible staff members transferred to the staff of each of the new committees shall be made by the Committee on Rules and Administration in consultation with the chairmen and ranking minority members of the new committees. The chairman of each new committee (and the ranking minority member with respect to minority employees) shall notify the Secretary of the Senate of the eligible staff members transferred to that new committee.

(c) During the transition period, each eligible staff member transferred to a new committee—

(1) shall, ontwithstanding the limitations contained in section 105(e) of the Legislative Branch Appropriation Act, 1968, as amended and modified, receive compensation at a rate not less than the rate of compensation such staff member was receiving on March 1, 1977; and

(2) may not be removed, except for cause, as a member of the staff of the new committee.

(d) The provisions of subsection (c)(2) shall not apply in the case of an eligible staff member who would be entitled to an annuity under section 8336(d) of title 5, United States Code, upon his involuntary removal from service as an employee of the Senate if such staff member (but for the provisions of subsection (c)(2)) would be subject to involuntary removal from such service and such staff member elects to have the provisions of this subsection apply.

SEC. 603. Not later than the effective date, the Committee on Rules and Administration shall report a resolution which authorizes expenditures out of the contingent fund of the Senate during the transition period by the new committees sufficient to enable each new committee to pay the compensation and expenses of the eligible staff members transferred to its staff under section 602.

TITLE VII—MISCELLANEOUS PROVISIONS

SEC. 701. Titles II, III, IV, and V of this Act shall take effect on the tenth day after the date of enactment of this Act.

SEC. 702. Any reference in any rule, resolution, or order of the Senate or the House of Representatives or in any law, regulation, or

executive order to the Joint Committee on Atomic Energy shall, on and after the effective date of title II, be considered as referring to the committees of the Senate and the House of Representatives which, under the rules of the Senate and the House, have jurisdiction over the subject matter of such reference.

SEC. 703. The provisions of section 502 and title VI (except section 602(c)(1)) are enacted—

(1) as an exercise of the rulemaking power of the Senate, and as such they shall be considered as part of the rules of the Senate, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of the Senate to change such rules at any time, in the same manner, and to the same extent as in the case of any other rule of the Senate.

SUMMARY BILL ANALYSIS

The attached bill is intended to accomplish the following principal purposes: (1) to abolish the Joint Committee on Atomic Energy and to provide for the transfer of its statutory functions to the appropriate Committees of the House and Senate in accordance with the changes made in the House and Senate Rules; (2) to make any necessary conforming changes to other laws which include references to the Joint Committee; (3) to provide for the continued protection of classified information; and (4) to provide for the disposition of the JCAE staff under provisions which are comparable to those in S. Res. 4 for the staffs of Senate committees abolished by that resolution.

Title I sets forth the purposes of the bill.

Title II abolishes the JCAE.

Title III transfers certain statutory functions of the JCAE to other committees and makes necessary conforming changes in other laws pertaining to the Joint Committee on Atomic Energy, including the Atomic Energy Act of 1954, as amended.

Title IV ensures that the committees of the House and Senate which receive the jurisdiction of the JCAE have the same statutory rights to information and assistance from the agencies and departments of the Government as were given to the JCAE under the Atomic Energy Act. This includes the requirement that the Energy Research and Development Administration and the Nuclear Regulatory Commission keep the Joint Committee fully and currently informed with respect to the activities of those agencies. Title IV also provides for the disposition of all unclassified records and files of the Joint Committee on Atomic Energy in a manner which will assure that each congressional committee which, under the rules of the Senate or the House of Representatives, is assigned jurisdiction over atomic energy matters will have full access to those records and files which relate to such committee's assigned jurisdiction.

Title V provides for the continued protection of classified information. Such information which is now the property of the JCAE under section 207 of the Atomic Energy Act of 1954, as amended, becomes the responsibility of the appropriate Senate committees. The appropriate committees of the House of Representatives are guaranteed full access to any such information relating to the assigned jurisdiction of such committees. An Office of Classified National Security Information is established to safeguard such information, as well as any other highly classified information assigned to it by the Senate. Such Office is assigned the powers necessary to perform this function, including the power to establish and operate a central repository for classified information in the U.S. Capitol.

Title VI provides for the disposition of the Joint Committee staff. This includes provision for staffing the newly established Office of Classified National Security Information and the transfer, for a specified transition period, of all other staff members of the JCAE to the Senate committees which have acquired the jurisdiction of the JCAE. Title VI also includes provisions dealing with the continued employment of JCAE staff members during the transition period and providing for additional funding resolutions for the Senate committees acquiring JCAE staff personnel during the transition period.

Title VII includes the effective date of the bill and other miscellaneous provisions.

SECTION-BY-SECTION ANALYSIS

SECTION 101—PURPOSES

This section identifies the following purposes: to abolish the Joint Committee and transfer its statutory functions; to establish a basis for the protection of information relating to the national security considerations of nuclear technology; to make conforming amendments to other laws; and to provide for the disposition of affected staff personnel.

SECTION 201

This section abolishes the Joint Committee on Atomic Energy.

SECTION 301

This section repeals the statutory basis for the Joint Committee on Atomic Energy. The repealed sections of the Atomic Energy Act include the following: the provision of membership of the Joint Committee on Atomic Energy, provisions giving the Committee authority to conduct hearings and make studies and to consider and report resolutions and bills, provisions providing for the appointment of a chairman and vice-chairman, provisions authorizing the JCAE to appoint staff, and provisions authorizing the JCAE to classify information and to maintain records. This section also deletes the reference to the Joint Committee on Atomic Energy in section 103 of the Atomic Energy Community Act of 1955, as amended.

SECTION 302

This section eliminates the reference to the JCAE in the Congressional Budget Act of 1974. The section of the Budget Act which is affected (section 3), directs that House and Senate members of the JCAE shall be treated as standing committees of the House and Senate respectively for purposes of the Budget Act.

SECTION 303

This section deletes the reference to the JCAE in subsection 252(a) of the Legislative Reorganization Act of 1970, which requires that Senate committee reports accompanying reported bills contain an estimate of costs.

SECTION 304

This section deletes the reference to the JCAE from Section 502 of the Mutual Security Act of 1954, as amended, which makes foreign currency available to committees of the Congress.

SECTION 305

This section deletes the reference to the JCAE in Section 3 of the International Atomic Energy Agency Participation Act of 1957, which requires the Department of State to keep various committees, including the JCAE, informed of the activities of the International Atomic Energy Agency.

SECTION 306

This section deletes the JCAE from the definitional section of the Atomic Energy Act. The section also includes for the first time in the Atomic Energy Act of 1954, as amended, definitions for the terms "nuclear energy" and "nuclear weapon".

SECTION 307

This section amends the provision of the Atomic Energy Community Act of 1955 which gives the Energy Research and Development Administration the authority to dispose of property related to the Hanford project. The amendment to this section deletes the reference to the JCAE and substitutes therefor the congressional committees which, under the House and Senate rules, are assigned jurisdiction over this subject matter. Under the amendment, ERDA must notify the committees of any proposed property disposal actions forty-five days before such actions can be taken, and the committees may by resolution waive the forty-five day requirement.

SECTION 308

The Atomic Energy Community Act of 1955 permits the Energy Research and Development Administration to make certain assistance payments to local governmental entities and requires ERDA to make recommendations to the JCAE on the need for renewing this authority. This section amends those provisions by substituting reference to the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over this subject matter, for the reference to the JCAE and requires that ERDA's recommendations be submitted to the appropriate congressional committees.

SECTION 309

This section substitutes the appropriate congressional committees for the reference to the JCAE in the provision of the Atomic Energy Act (Section 51) which allows ERDA to designate additional material as special nuclear material.

SECTION 310

This section amends the provision of the Atomic Energy Act (Section 54a.) which authorizes ERDA to cooperate with foreign nations by making quantities of special nuclear material available to them for established periods of time. The amounts and periods of time must be reported to the JCAE, which makes recommendations on the action to the Congress. The amendment substitutes the congressional committees which, under the rules of the House and Senate are assigned jurisdiction over this subject for the reference to the JCAE.

SECTION 311

This section makes the same change to the section of the Atomic Energy Act dealing with source material (Section 61) as was made by Section 309 of the bill for special nuclear material.

SECTION 312

This section amends the provision of the Atomic Energy Act (Section 123) which directs that agreements for cooperation be submitted to the President, the JCAE and the Congress. The amendment deletes references to the JCAE and substitutes references to the committees of the House and Senate which are assigned jurisdiction over proposed agreements for cooperation.

SECTION 313

This section amends the provision of the Atomic Energy Act (Section 161v.) which provides for congressional review of criteria developed by ERDA to govern contracts for providing uranium enrichment services from Government facilities. The amendment deletes references to the JCAE and substitutes references to the congressional committees which are assigned jurisdiction over this subject by the rules of the House and Senate.

SECTION 314

This section amends the provision in the Atomic Energy Act (Section 164) which provides that certain contracts for electric utility service for ERDA's uranium enrichment facilities be submitted to the JCAE for a period of thirty days. The amendment substitutes references to the appropriate congressional committees having jurisdiction over this subject for references to the JCAE.

SECTION 315

This section makes the same change to the provisions of Public Law 88-332 for fission products contracts (Section 107) as is made for electric utility contracts by Section 314.

SECTION 316

This section amends the Price-Anderson provisions of the Atomic Energy Act (Section 170) which require that a report be made to the JCAE after certain nuclear incidents. The amendment substitutes reference to the committees of the House and Senate having jurisdiction over the indemnification area for the reference to the JCAE.

SECTION 401

This section provides the appropriate congressional committees receiving the jurisdiction of the Joint Committee on Atomic Energy with the same rights to information which the Joint Committee on Atomic Energy has under Section 202 of the Atomic Energy Act. This includes the requirement that the Joint Committee be kept fully and currently informed with respect to all matters relating to atomic energy.

SECTION 402

This section provides the appropriate congressional committees receiving the jurisdiction of the JCAE with the same authority to use the services, information, facilities and personnel of the Federal Government which was given to the JCAE under Section 205 of the Atomic Energy Act.

SECTION 403

This section provides for the transfer of all unclassified records and files of the Joint Committee on Atomic Energy. Such records and files are transferred to the committees of the Senate which are assigned jurisdiction over the subject matters to which such records and files primarily relate. All other committees of the Congress which are assigned jurisdiction over subject matters to which such records and files relate are guaranteed full access to such records and files.

SECTION 501

This section gives special attention to the national security information in the possession of the Joint Committee on Atomic Energy. Subsection 501(a) provides that the classified information now in the possession of the JCAE shall become the property of the Senate committees which, under the rules of the Senate, are assigned jurisdiction over the subject matters to which such information relates. Subsection 501(b) guarantees that each committee of the House of Representatives which is assigned jurisdiction over the national security considerations of nuclear technology will have full access to those classified files of the JCAE which relate to subject matters within the assigned jurisdiction of such committee. Subsection 501(c) permits these committees of the Senate which are assigned classified files and records of the Joint Committee on Atomic Energy to make use of the Office of Classified National Security Information or to make other suitable arrangements for the protection of such files and records.

SECTION 502

Subsection 502(a) establishes an Office of Classified National Security Information, the responsibilities of which include the safeguarding of classified information related to atomic energy and any other classified information which any committee of the Senate may assign to it. Subsection 502(b) gives the Office of Classified National Security Information the authority to establish and operate a central repository in the U.S. Capitol building for safeguarding the classified material assigned to such Office, to classify information upon the application of any Senate committee, and to provide appropriate facilities for classified committee hearings. Subsection 502(c) provides for the appointment and compensation of staff for the Office of Classified National Security Information. Subsection 502(d) provides for the payment of expenses of such Office. Subsection 502(e) directs that the Office provide, within 30 days of the enactment of this Act, each committee of the Senate which has been assigned jurisdiction formerly held by the JCAE with a listing of the classified records and files of the JCAE which are to be transferred to such committees under section 501(a) of the bill.

Title VI provides for the disposition of the staff of the JCAE in a manner which is comparable to the disposition of the staffs of those Senate committees which were abolished under S. Res. 4.

SECTION 601

This section includes definitions for the effective date of the Title, for "eligible staff member", for "new committee", and for a transition period.

SECTION 602

Subsection (a) provides for the permanent transfer of certain staff members of the JCAE to the newly established Office of Classified National Security Information.

Subsection (b) provides for the transfer for a defined transition period of all other staff members to the committees of the Senate which have received the responsibilities of the JCAE. The assignment of staff personnel during the transition period will be made by the Rules Committee of the Senate in consultation with the chairmen and ranking minority members of the Senate committees which have received the responsibilities of the JCAE. This subsection also requires the chairman (or ranking minority member where appropriate) of each new committee of the Senate which adds staff members from the Joint Committee on Atomic Energy during the transition period to notify the Secretary of the Senate of this fact.

Subsection (c) provides that during the transition period each staff member of the JCAE who is transferred to another committee shall have certain employment rights, including the right to the same salary as received while an employee of the JCAE and the right against removal, except for cause, as a staff member of the new committee.

Subsection (d) permits a staff member of the JCAE who would be eligible for retirement under the Congressional Retirement System if his position were abolished to treat his position with the JCAE as being abolished at the beginning of the transition period if he so elects.

SECTION 603

This section requires the Senate Rules Committee to report funding resolutions for the committees of the Senate acquiring staff personnel from the JCAE within ten days of the date of enactment of the bill.

SECTION 701

This section provides that the bill shall become effective ten days after the date of enactment.

SECTION 702

This section provides that any other reference to the JCAE after the effective date of the Act shall be considered as referring to the appropriate congressional committees which have been assigned the functions and responsibilities of the JCAE under the rules of the House and Senate.

SECTION 703

This section provides that section 502 and, with one exception, all of title VI shall be considered an exercise of the rulemaking power of the Senate and as such, shall be subject to change by the Senate in the same manner as for any other rule of the Senate.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. JACKSON. I yield.

Mr. BAKER. Mr. President, I am pleased to join the distinguished Senator from Washington in introducing this bill to abolish the Joint Committee on Atomic Energy, to complete the transfer of the joint committee's functions and authority to the committees of the Senate and the House which have been assigned jurisdiction over atomic energy matters.

I, too, share a sense of pride in the many accomplishments of the Joint Committee on Atomic Energy over the years. Nevertheless, I believe that the changes made by Senate Resolution 4 and by this bill will be helpful in promoting understanding and participation of energy matters in the Senate.

Mr. President, I hope the Senate will give prompt consideration to this measure.

Mr. RANDOLPH. Mr. President, I join in cosponsoring this bill, because I feel it is needed. The measure would abolish the Joint Committee on Atomic Energy and reassign its functions in the Senate to new committees in accordance with Senate Resolution 4, the Committee System Reorganization Amendments of 1977.

This bill amends the Atomic Energy Act of 1954 to transfer statutory authorities of the Joint Committee on Atomic Energy to the new congressional committees with jurisdiction over the subject matter of each section. It provides for an orderly transfer of documents and information from the Joint Committee on Atomic Energy to the new committees. And, it provides protection for the staff for a transition period. In philosophy, the legislation follows closely the intent of the Senate, as expressed in Senate Resolution 4.

The bill creates a new office, the Office of Classified National Security Information, to facilitate the handling of classified material during the remainder of the 95th Congress. This will be useful to the new committees in dealing with restricted data and other material now in the hands of the Joint Committee on Atomic Energy. However, if the Senate should wish to establish a permanent office for that purpose, that would require further action by the Senate.

Under Senate Resolution 4, the Committee on Environment and Public Works acquired a new legislative responsibility:

Nonmilitary environmental regulation and control of nuclear energy.

The measure we are introducing today will assist the committee in carrying out that important responsibility, by providing the necessary statutory authority. It also will provide the committee with full access to information relating in any way to that new jurisdiction. And it will provide a proportionate share of staff

assistance to the committee during the transition period.

Mr. President, section 201(c) of Senate Resolution 4 gave the new committees until July 1, 1977, to deal with this legislation. It is our hope to have it enacted into law well ahead of that date.

By Mr. CURTIS:

S. 1155. A bill to amend the Tax Reform Act of 1976 to correct an inadvertent omission; to the Committee on Finance.

AMENDMENT OF THE TAX REFORM ACT OF 1976

Mr. CURTIS. Mr. President, I have introduced S. 1155 to make a correcting technical amendment to section 1032 of the Tax Reform Act of 1976 to reflect the express decision of the conference committee and to avoid imposing an unintended tax penalty on taxpayers' operations in U.S. possessions. By changing the method of computing the foreign tax credit, section 1032 increased the U.S. taxes for taxpayers who had experienced an overall loss in an earlier year from foreign operations. Under the Tax Reform Act of 1976, the loss in the earlier year reduces the amount of foreign tax credit that can be taken in a later year when profits arise from the foreign operations. My amendment would maintain this tax increase. It would, however, avoid imposing additional penalties not intended by the conference committee.

At the time section 1032 was considered by the conference committee, it was decided that the application of these new rules for computing the foreign tax credit should be delayed for 3 years in the case of operations in a U.S. possession. The conference committee recognized that absent such a transition rule, the provision would have a harsh and unwarranted impact on certain taxpayers. The 3-year period was necessary to allow these taxpayers to take the new rules into account in their planning in a reasonable and orderly fashion.

However, the conference committee inadvertently did not reflect its decision in section 1032, which as actually enacted applied to all losses sustained in taxable years beginning after December 31, 1975, with no 3-year exception for possessions operations. I called the Senate's attention to this omission during our debates on the Tax Reform Act of 1976, but because of time pressures it was impossible at that point to make the necessary technical correction.

I was informed by Senator LONG, the distinguished chairman of the Finance Committee and manager of the bill, that every effort would be made to make this technical correction as soon as possible in order to reflect the decision of the conference committee. Congressman JOE WAGGONNER, of Louisiana, had a similar colloquy with the distinguished chairman of the House Committee on Ways and Means during the consideration of the 1976 act by the other body.

It is for these reasons that I have introduced S. 1155, which would amend section 1032 to provide that the change in the computation of the foreign tax credit would not apply to losses incurred in taxable years beginning before January 1, 1979, in a possession of the United States. I urge its immediate enactment. Unless we take action immediately, taxpayers will be significantly, improperly, and unnecessarily burdened when they file their tax returns for the past year.

By Mr. BENTSEN (for himself and Mr. TOWER):

S. 1156. A bill to authorize the establishment of the San Antonio Missions National Historical Park in the State of Texas, and for other purposes; to the Committee on Energy and Natural Resources.

SAN ANTONIO MISSIONS PARKWAY

Mr. BENTSEN. Mr. President, today I am introducing for myself and Senator TOWER a bill for the establishment of the San Antonio Missions National Historical Park.

The San Antonio area has the greatest concentration of Spanish missions in the United States. The bill I am introducing proposes to include these historically valuable sites under the jurisdiction of the National Park Service in cooperation with the San Antonio Missions Advisory Commission so that they may be protected and maintained for the benefit and enjoyment of present and future generations.

The San Antonio Missions National Historical Park would include four missions, Concepcion, San Jose, San Juan, and Espada, as well as the Espada Acequia, the Espada Dam and Acqueduct and the San Juan Acequia.

It is the intent of my bill to preserve the valuable historical value of this area. The San Antonio Missions were established during the 18th century and served not only as religious institutions, but also as fortresses for missionaries and nearby settlers. The missions served as a primary tool in the civilization of the area. Each mission is an excellent example of Spanish architecture and design and a valuable part of our heritage.

Each mission included an acequia system for irrigation of surrounding farmlands. Only two, Espada and San Juan, remain. However, because of time and a change in the water flows in the area, both are deteriorating and need protection. And they deserve the protection we can give them. They are extraordinary examples of the 18th century engineering and symbol of the working and dedication that built the Southwest. The Espada Aqueduct is still in use today, and is the oldest structure of its type in the United States still in use.

Mr. President, presently there is nothing to deter commercial construction in this valuable, historic area. Any commercial intrusion will greately diminish the historical integrity of the area as is the case of the city powerplant located across the street from the Yturri-Edmunds House and Old Mill which was originally part of Mission Concepcion. The plant generates excessive noise, and its bulk and height constitutes a visual intrusion to an otherwise serene and beautiful setting.

Mr. President, to allow this type of industrial growth to continue or, by neglect, to allow the destruction of this historical network of missions and irrigation systems from the 18th century is to lose the historical benefits of the area forever. Our future generations deserve more; therefore, I ask my colleagues to give favorable consideration to this proposal.

By Mr. THURMOND (for himself, Mr. STEVENS, Mr. HUDDLESTON, and Mr. HEINZ):

S. 1158. A bill to amend the Internal Revenue Code of 1954 to permit individuals to amortize certain rehabilitation expenditures for certified historic structures which are not depreciable; to the Committee on Finance.

REHABILITATION EXPENDITURES FOR CERTAIN NONDEPRECIABLE CERTIFIED HISTORIC STRUCTURES

Mr. THURMOND. Mr. President, section 2124 of the Tax Reform Act of 1976 was a provision to allow for special tax treatment of certified historic structures. It allows taxpayers an election, in lieu of claiming the depreciation deductions otherwise allowable, to amortize over a 60-month period the capital expenditures incurred in certified rehabilitation of certified historic structures.

Unfortunately, this provision is available only to owners of certified historic structures who can use depreciation allowances. This, in effect, rules out almost all noncommercial owners. The bill we are introducing would extend this worthwhile tax treatment to the private owner of a certified historic structure. It will allow as a tax deduction the amount which would be allowed to the taxpayer if he were in a position to take depreciation allowances. The taxpayer may use the equivalent of a depreciation allowance or he may amortize his certified rehabilitation expenditures over a 60-month period.

In the enactment of section 2124 of the Tax Reform Act, it was noted in committee reports that Congress believes that the rehabilitation and preservation of historic structures and neighborhoods is an important national goal. Of course, many of these structures are in private hands and not commercially used. In fact, many of them are the homes of the owners. To deny to these owners the benefits granted commercial owners would be to thwart the expressed intent of the Congress.

Pursuant to section 2124, to qualify as a certified historic structure, a building or structure must be: First, listed in the National Register of Historic Places; second, located in a registered historic district and be certified by the Secretary of the Interior as being of historic significance to the district; or third, located in a historic district designated under a State or local statute containing criteria satisfactory to the Secretary of the Interior. Under the Historic Preservation Act of 1966, these structures are eligible for grants for restoration and preservation expenditures. A requirement of receiving these funds is that the structure be accessible to the public at least 12 days per year. It seems only fair that if it is required of the owners that they comply with the requirements, they should be allowed the same tax treatment that commercial owners are allowed.

Often the buildings that qualify as certified historic structures are in need of repair, either for preservation or restoration. These expenditures are seldom small, often requiring the expertise of specialized craftsmen. Allowing the special tax treatment in this bill will provide an incentive for the owners to proceed with the needed repairs and help to preserve the architectural heritage of the country. For instance, owners of historic structures with ornate Victorian trim will be encouraged to paint and repair the trim rather than to remove it to save costs. Plasterwork will be less likely to fall prey to the economies of sheetrock. Costly expert bricklaying may be used rather than veneering. Any encouragement we can provide the owners of these valuable structures to save the integrity and the structural purity of their buildings will accrue to the benefit of all Americans, and we will be furthering the protection of our physical heritage.

Mr. President, the early implementation of this provision is essential, as it triggers the deadline provisions of section 2124 of the Tax Reform Act. In other words, to utilize the provisions of this bill, an owner must act before June of 1981 to begin restoration of his structure. Therefore, I urge that consideration of this bill be undertaken as soon as possible.

I am pleased that Senators STEVENS, HUDDLESTON, and HEINZ have joined me in sponsoring this important legislation.

Mr. President, I send this bill to the desk so it can be appropriately referred, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1158

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part VII of subchapter B of chapter 1 of the Internal Revenue Code of 1954 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as 222 and by inserting after section 220 the following new section:

"SEC. 221. REHABILITATION EXPENDITURES FOR CERTAIN NONDEPRECIABLE CERTIFIED HISTORIC STRUCTURES.

"(a) In General.—In the case of an individual who pays or incurs amounts in connection with the certified rehabilitation of a certified historic structure for which the deduction allowed by section 191 is not allowed because the structure is neither used in the taxypayer's trade or business nor held by the taxpayer for the production of income, there is allowed as a deduction the amount which would be allowed to the taxpayer under section 191 if such structure were, with respect to the taxpayer, property described in section 167(a).

"(b) Definitions.—The terms 'certified rehabilitation' and 'certified historic structure' are defined in section 191(d).".

(b) The table of sections for such part is amended by striking out the last item and by inserting in lieu thereof the following:

"Sec. 221. Rehabilitation expenditures for certain nondepreciable certified historic structures.

"Sec. 222. Cross references.".

SEC. 2. The amendments made by this Act apply with respect to taxable years beginning after December 31, 1976.

By Mr. SPARKMAN (by request):

S. 1159. A bill to amend the Foreign Assistance Act of 1961, and for other purposes; to the Committee on Foreign Relations.

S. 1160. A bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes; to the Committee on Foreign Relations.

AMENDMENT OF THE FOREIGN ASSISTANCE ACT OF 1961 AND THE ARMS EXPORT CONTROL ACT

Mr. SPARKMAN. Mr. President, by request, I introduce for appropriate reference bills to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act.

These bills have been requested by the President of the United States and I am introducing them so there may be legislation to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose these bills, as well as any suggested amendments to them, when these matters are considered by the Committee on Foreign Relations.

I ask unanimous consent that these bills be printed in the RECORD together with section-by-section analyses and the letters from the President of the United States to the President of the Senate dated March 28, 1977.

There being no objection, the bills and material were ordered to be printed in the RECORD, as follows:

S. 1159

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "International Development Assistance Act of 1977".

DEVELOPMENT ASSISTANCE

SEC. 2. (a) Chapter 1 of Part I of the Foreign Assistance Act of 1961 is amended as follows:

(1) Section 102 is amended by:

(A) Adding after subsection (c) the following new subsections:

"(d) For the purpose of promoting economic growth in the poorest countries, the President is authorized, notwithstanding any other provision of law, to make available to the relatively least developed countries assistance under this chapter on a grant basis to the maximum extent that is consistent with the attainment of United States development objectives.", and

(B) Redesignating existing subsection "(d)", subsection "(e)".

(2) In subsection 103(a), immediately after "for such purposes," by deleting "$291,000,000" and all that follows through "1976 and" and inserting "and $550,000,000 for the fiscal year 1978," immediately after "1977,".

(3) Section 104, relating to population planning and health, is amended to read as follows:

POPULATION PLANNING

"SEC. 104. (a) In order to increase the opportunities and motivation for family planning, and to reduce the rate of population growth, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for population planning. There are authorized to be appropriated to the President for the purposes of this section, in addition to funds otherwise available for such purposes, $167,000,000 for the fiscal year 1978, which amount shall remain available until expended."

"(b) Assistance under this section shall be furnished in accordance with the applicable provisions of section 105(b)."

(4) Immediately after the new section 104, add the following new section and renumber the following seven sections accordingly:

"SEC. 105. (a) HEALTH.—In order to prevent and combat disease, and to help to provide health services for the great majority, the President is authorized to furnish assistance, on such terms and conditions as he may determine, for health, disease prevention and environmental sanitation. There are authorized to be appropriated to the President for the purposes of this section, in addition to funds otherwise available for such purposes, $104,900,000 for the fiscal year 1978, which amount shall remain available until expended."

"(b) Assistance provided under this section and, where applicable, under section 104 shall be used primarily for extension of low-cost, integrated delivery systems to provide health and family planning services, especially to rural areas and to the poorest economic sectors, using paramedical and auxiliary medical personnel, clinics and health posts, commercial distribution systems, and other modes of community outreach; health programs which emphasize disease prevention, environmental sanitation, and health education; and population planning programs which include education in responsible parenthood and motivational programs, as well as delivery of family planning services and which are coordinated with programs aimed at reducing the infant mortality rate, providing better nutrition to pregnant women and infants, and raising the standard of living of the poor."

(5) In renumbered subsection 106(a), immediately after "for such purposes", by deleting "$90,000,000" and all that follows through "1976 and" and inserting "and $84,400,000 for the fiscal year 1978," immediately after "1977,".

(6) Renumbered section 107, relating to technical assistance, energy, research, reconstruction, and selected development problems, is amended by:

(A) In subsection (a), deleting "103, 104, and 105" and inserting in lieu thereof "103, 104, 105, and 106", and

(B) In subsection (b), deleting immediately after "for such purposes," "$99,550,000" and all that follows through "1976 and" and inserting "and $100,000,000 for the fiscal year 1978," immediately after "1977,".

(7) Renumbered section 110, relating to transfer of funds, is amended by:

(A) deleting "108" and inserting in lieu thereof "109", and

(B) inserting in the last sentence "Except for transfers to section 667," at the beginning thereof.

(8) Renumbered section 111(b), relating to funding limits, is amended by inserting "Except for grants to countries determined to be relatively least developed based on the United Nations Conference on Trade and Development list of "relatively least developed countries"," at the beginning thereof.

(9) Immediately after section 116, add the following new section:

EXAMINATION OF POPULATION GROWTH IMPACT

"SEC. 117. (a) Assistance under this chapter shall be administered so as to give particular attention to the impact of all programs, projects and activities on population growth. All activities proposed for financing under this chapter shall be reviewed to identify their possible impact on human fertility. Particular attention shall be given to opportunities to build motivation for family planning into programs in other fields such as education in and out of school, nutrition, disease control, maternal and child health services, agricultural production, rural development and assistance to the urban poor. Care should be taken to consider indirect as well as direct influences on fertility."

"(b) The President is authorized to study the complex factors affecting population

growth in developing countries and to identify the factors which might motivate people to plan family size or space their children. To the maximum extent consistent with the principles set forth in section 102, projects in other development fields should be designed to reduce population growth and to maximize recognition of the benefits of planned family size."

(b) The authorization of appropriations for the fiscal year 1977 contained in section 104 of the Foreign Assistance Act of 1961 prior to the enactment of this Act shall remain in effect.

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 3. Section 214 of the Foreign Assistance Act of 1961, relating to American schools and hospitals abroad, is amended as follows:

(a) In subsection (c), by deleting "each of the fiscal years 1974" and all that follows through "1976 and" and inserting "fiscal year" in lieu thereof, and inserting "and for fiscal year 1978, $7,500,000," immediately after "$25,000,000," and

(b) In subsection (d), by deleting "1974" and all that follows through "1977," and inserting in lieu thereof "1976 through 1978,".

HOUSING AND OTHER CREDIT GUARANTY PROGRAMS

SEC. 4. Title III of Chapter 2 of Part I of the Foreign Assistance Act of 1961 is amended as follows:

(a) In section 221, by deleting the next to last sentence, and by amending the last sentence to read: "Such guaranties shall be issued under the conditions set forth in section 222(b), 222(c) and 223."; and

(b) In section 222(c) by inserting "or under section 221," after "1969,", and by deleting "$600,000,000" and inserting in lieu thereof "$1,030,000,000"; and

(c) In section 222A(h) by deleting "December 31, 1977" and inserting in lieu thereof "September 30, 1978"; and

(d) In section 223(b) in the first sentence, by deleting "hereunder," and inserting in lieu thereof "under sections 221 or 222 or under prior housing guaranty authorities," and by adding the following new sentence at the end of section 223(b): "Fees collected in connection with guaranties issued under section 222A shall likewise be available to meet similar expenses, costs or liabilities incurred in connection with the programs authorized under secion 222A."; and

(e) In section 223(j) by deleting "1977" and inserting in lieu thereof "1978", and by deleting "$50,000,000", $20,000,000" and "$15,000,000" and inserting in lieu thereof "$75,000,000", "$30,000,000," and "$30,000,000," respectively.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 5. Section 302 of the Foreign Assistance Act of 1961, relating to international organizations and programs, is amended by deleting in subsection (a)(1) "1974, $127,822,000 and for the fiscal year 1975, $165,000,000, and for the fiscal year 1976, $194,500,000 and for the fiscal year" and by changing the period after "$219,900,000" to a comma and inserting immediately thereafter "and for the fiscal year 1978, $246,000,000.".

INTERNATIONAL DISASTER ASSISTANCE

SEC. 6. Section 492 of the Foreign Assistance Act of 1961, relating to international disaster assistance, is amended by deleting "1976 and" and inserting "and 1978." immediately after "1977".

SAHEL DEVELOPMENT PROGRAM

SEC. 7. (a) Section 494B of the Foreign Assistance Act of 1961, relating to the African Development Program, is amended by changing the caption to read "Sahel Development Program—Planning".

(b) A new section is inserted immediately after section 494B, as follows:

"SECTION 494C. SAHEL DEVELOPMENT PROGRAM IMPLEMENTATION

"(a) The President is authorized to furnish assistance, on such terms and conditions as he may determine, for the long-term development of the Sahelian region. Assistance furnished under this section shall be in accordance with a long-term, multi-donor development plan which calls for equitable burden-sharing with other donors, such assistance to be furnished whenever appropriate in cooperation with an international coordinating mechanism.

"(b) There is authorized to be appropriated to the President for the purposes of this section, in addition to funds otherwise available for such purposes, for use beginning in fiscal year 1978, $200,000,000, which amount shall remain available until expended."

LEBANON RELIEF AND REHABILITATION

SEC. 8. Section 495C(b), relating to Lebanon relief and rehabilitation, is amended by deleting "$20,000,000," and inserting in lieu thereof "$40,000,000,".

REIMBURSABLE DEVELOPMENT PROGRAMS

SEC. 9. Section 661 of the Foreign Assistance Act of 1961, relating to reimbursable development programs is amended by:

(1) deleting "up to $1,000,000" and all that follows through "1976,"; inserting after "$2,000,000" "of the funds made available for the purposes of this Act", and inserting immediately after "1977," "and $2,000,000 in the fiscal year 1978,".

OPERATING EXPENSES

SEC. 10. Section 667 of the Foreign Assistance Act of 1961, relating to operating expenses, is amended to read as follows:

OPERATING EXPENSES

"SEC. 667. (a) There are authorized to be appropriated to the President, in addition to funds otherwise available for the purposes of this section, for the fiscal year 1978, the following amounts:

(1) $220,200,000 for necessary operating expenses of the agency primarily responsible for administering part I of this Act; and

(2) Such amounts as may be necessary for increase in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary costs of such agency.

(b) Amounts appropriated under this section are authorized to remain available until expended."

AUTHORIZATION OF APPROPRIATIONS FOR THE FISCAL YEAR 1979

SEC. 11. There are authorized to be appropriated for the fiscal year 1979 such sums as may be necessary to carry out programs and activities for which appropriations for the fiscal year 1978 are authorized by this Act.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED INTERNATIONAL DEVELOPMENT ASSISTANCE ACT OF 1977

I. INTRODUCTION

The proposed International Development Assistance Act of 1977 (hereinafter referred to as the "Bill") is an amendment to the Foreign Assistance Act of 1961, as amended (hereinafter referred to as the "Act"). The major purpose of the Bill is to provide authorization for appropriations for activities under the Act for the fiscal year 1978. The Bill contains authorizations for appropriations for development assistance activities only.

The fiscal year 1978 authorization levels requested for programs under Part I of the Act are those set forth in the President's fiscal year 1978 budget.

The principal substantive amendments to Part I of the Act are: an authorization that development assistance be made available to the relatively least developed countries on a grant basis to the maximum extent consistent with U.S. development objectives; a waiver of the thirty-six month disbursement limit for grant assistance to the relatively least developed countries; separate authorizations for population planning and health activities; a requirement that special attention be given to the direct and indirect impact on population growth of all programs administered under Part I, Chapter 1 of the Act; a separate authorization for United States participation in the long-term development of the Sahel; an authorization for disaster relief assistance; an increase in the authorization of funds for the relief and rehabilitation of Lebanon; and the creation of a single worldwide guaranty ceiling for the housing guaranty program. Part III of the Act is amended by including a specific authorization for operating expenses, and by amending section 661 relating to reimbursable development programs.

II. PROVISIONS OF THE BILL

Section 2(a). Development Assistance authorizations

This subsection, consisting of nine paragraphs, provides development assistance authorizations which will permit the Executive Branch to conduct an effective bilateral development assistance program in fiscal year 1978. The specific authorizations provided are as follows:

(1) Paragraph (A) adds a new subsection (d) to section 102. New subsection (d) provides that development assistance under Chapter 1 of Part I may be made available to the relatively least developed countries on a grant basis to the maximum extent that is consistent with the attainment of United States development objectives. This provision is consistent with the United States position at the UNCTAD IV Conference in Nairobi where the United States urged the aid donor nations to provide the relatively least developed countries on the UNCTAD list with assistance on a grant rather than a loan basis.

Paragraph (B) redesignates existing subsection 102(d) as 102(e).

(2) This paragraph amends section 103(a) of the Act, which authorizes funds to alleviate starvation, hunger and malnutrition and to provide basic services to poor people by increasing their capacity for self-help, by authorizing $550,000,000 to carry out section 103 programs in fiscal year 1978. Food and nutrition programs will continue to receive primary emphasis under this authorization.

(3) This paragraph amends section 104 of the Act by creating a separate authorization for population planning programs. In the existing Act, section 104 contains authorization for both population planning and health programs. This amendment is intended to permit consideration of each of these important areas in separate authorization and appropriation categories.

Section 104(a) contains an authorization of appropriations of $167,000,000 in fiscal year 1978 for population planning.

Section 104(b) requires that population planning programs be carried out in accordance with the applicable provisions of section 105(b) of the Act.

(4) This paragraph adds a new section 105 relating to health programs, and renumbers the remaining sections in Chapter 1 of the Act accordingly.

Subsection 105(a) contains an authorization of appropriations of $104,900,000 for health programs.

Subsection 105(b) contains a policy statement relating to the types of health and population planning programs that will be authorized by new sections 104 and 105. It emphasizes low-cost, integrated delivery systems to provide health and family planning services, using paramedical and auxiliary medical personnel, clinics and health posts and other modes of community outreach; health programs under section 105 em-

phasizing disease prevention, environmental sanitation and education; and population programs which include motivational programs and education in responsible parenthood; and coordinated programs aimed at reducing infant mortality, providing better nutrition to pregnant women and infants and raising the standard of living of the poor.

(5) This paragraph authorizes appropriations of $84,400,000 in fiscal year 1978 for renumbered subsection 106(a), which relates to education and human resources.

(6) This paragraph, which relates to the programs of technical assistance, energy, research, reconstruction, and selected development problems authorized by renumbered subsection 107(b), contains (A) a technical amendment to conform the authority contained in section 107 to the renumbered functional accounts, and (B) an authorization of appropriations of $100,000,000 for fiscal year 1978.

(7) This paragraph (A) changes the reference in renumbered section 110 from 108 to 109, and (B) amends renumbered section 110 so as to permit the transfer of any funds, including funds made available under Chapter 1 of Part I, to augment operating expenses authorized under revised section 667 by using the authority contained in sections 610(a) and 614(a).

(8) This paragraph, which relates to funding limits, amends renumbered subsection 111(b) to permit grant assistance to countries determined to be relatively least developed based on the United Nations Conference on Trade and Development list of "relatively least developed countries" without regard to the thirty-six month limitation on disbursement of such assistance.

(9) This paragraph adds a new section 117 to Part I of the Act, relating to the examination of the impact of development assistance authorized under Chapter 1 of Part I on population growth. Subsection 117(a) requires that an appropriate review be made of programs administered under Chapter 1 of Part I of the Act to identify their possible impact, both direct and indirect, on human fertility. It also provides that particular attention be given to opportunities to build motivation for family planning into programs in other fields.

Subsection 117(b) authorizes the President to conduct studies into the factors affecting population growth in developing countries and to identify factors which might motivate people to adopt population planning methods. It also directs that consistent with the principles contained in section 102 of the Act, projects in other development fields should be designed to encourage population planning.

Section 2(b)

This subsection contains a technical provision assuring that funds authorized for the fiscal year 1977 for section 104 programs prior to the enactment of this bill will remain available for such purposes.

Section 3. American schools and hospitals abroad

This section, consisting of two paragraphs, amends section 214 of the Act, which authorizes assistance to institutions located outside the United States that are sponsored or founded by United States citizens, as follows:

(a) This paragraph amends section 214(c) by authorizing $7,500,000 for fiscal year 1978.

(b) This paragraph amends section 214(d) by providing foreign currency authorizations of $7,000,000 for fiscal year 1978.

Section 4. Housing and other credit guaranty programs

This section, consisting of five paragraphs, amends Title III of Chapter 2 of Part I of the Act as follows:

(a) This paragraph amends section 221, relating to worldwide housing investment guaranties by establishing a worldwide housing guaranty ceiling under section 222(c).

(b) This paragraph amends section 222(c), relating to the Latin America housing investment guaranty ceiling, by establishing a single worldwide guaranty ceiling in the amount of $1,030,000,000.

(c) This paragraph amends section 222A (h), relating to the authorization for Agricultural and Productive Credit and Self-Help Community Development Programs, by extending the authorization for such programs from December 31, 1977, until September 30, 1978.

(d) This paragraph amends section 223(b), relating to the use of fee income generated by programs administered under sections 221, 222, and 222A, to authorize the use of fee income generated by section 222A programs to pay certain administrative and operating cost of section 222A guaranty programs.

(e) This paragraph amends the last sentence of section 223(j) by authorizing Housing Investment Guaranty programs in Israel, Portugal and Lebanon through fiscal year 1978 in the amounts of $75,000,000, $30,000,000 and $30,000,000 respectively.

Section 5. International organizations and programs

This section extends the authorization for International Organizations and Programs through fiscal year 1978, and authorizes appropriations of $246,000,000 for fiscal year 1978. This authorization will enable the Executive Branch to make its voluntary contributions to international organizations whose programs are focused on the developing world.

Section 6. International disaster assistance

This section amends section 492, relating to the authorization of funds for international disaster assistance, by authorizing $25,000,000 to carry out programs authorized by section 491 in fiscal year 1978.

Section 7. Sahel development program

This section, consisting of two paragraphs, amends Chapter 9 of Part I of the Act as follows:

(a) This paragraph amends section 494B by changing the caption from "African Development Program" to "Sahel Development Program—Planning."

(b) This paragraph adds a new section 494C entitled "Sahel Development Program—Implementation." This new section contains two subsections. Subsection (a) would authorize assistance for the long-term development of the Sahel. Such assistance should be furnished in accordance with a long-term, multi-donor development plan based on equitable burden-sharing with other donor countries. To the extent appropriate such assistance should be furnished in cooperation with an international coordinating mechanism.

Subsection 494(c) authorizes $200,000,000 for the purposes of section 494C for use beginning in fiscal year 1978, which amount is authorized to remain available until expended.

Section 8. Lebanon relief and rehabilitation

This section amends section 495C(b) of the Act by increasing the authorization for programs relating to the relief and rehabilitation of Lebanon from $20,000,000 to $40,000,000.

Section 9. Reimbursable development programs

This section amends section 661 of the Act, relating to the stimulation of reimbursable development programs, by authorizing the use of $2,000,000 of the funds available under Part I of the Act for section 661 programs in fiscal year 1978.

Section 10. Operating expenses

This section amends section 667 of the Act, relating to operating expenses of A.I.D., by authorizing appropriations for necessary operating expenses for fiscal year 1978 of $220,000,000, plus such amounts as may be necessary for increases in salary, pay, retirement, and other employee benefits authorized by law, and for other nondiscretionary costs.

Section 11. Authorization of appropriations for the fiscal year 1979

This section reflects the requirements of section 607 of the Congressional Budget Act of 1974 (31 U.S.C. 11c) and authorizes appropriations for the fiscal year 1979 of the sums necessary to carry out programs and activities for which fiscal year 1978 appropropriations are authorized by the Bill.

THE WHITE HOUSE,
Washington, March 28, 1977.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I am transmitting today a bill to authorize foreign development assistance programs for the fiscal years 1978 and 1979.

Enactment of this legislation will enable the United States to carry out an efficient and effective bilateral development assistance program which our international position and objectives require. This bill also authorizes appropriation of voluntary contributions to International Organizations whose programs are focused on the developing world.

The bill provides that development assistance shall be made available to the poorest countries on a grant basis to the maximum extent that is consistent with the attainment of our development objectives. This proposal is consistent with the United States position at the UNCTAD IV Conference, which urged aid donor nations to provide the relatively least developed countries on the UNCTAD list with assistance on a grant rather than a loan basis. The bill creates separate authorizations for population planning and health programs, and a requirement that all development assistance programs be reviewed to assure that proper attention is paid to the relationship of these programs to worldwide population growth. The bill also contains an authorization of $200 million for a long-term multidonor development plan for the Sahel. U.S. contributions to this program will be based on equitable burden-sharing with other donor countries.

Enactment of this legislation will be an important step in demonstrating our concern for the economic problems of the developing world. I urge its early passage.

Sincerely,

JIMMY CARTER.

S. 1160

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "International Security Assistance and Arms Export Control Act of 1977".

CONTINGENCY FUND

SEC. 2. Section 451(a) of the Foreign Assistance Act of 1961 is amended by striking out for the fiscal year 1976 not to exceed $5,000,000 and for the fiscal year 1977 not to exceed $5,000,000" and inserting in lieu thereof "for the fiscal year 1978 not to exceed $5,000,000".

INTERNATIONAL NARCOTICS CONTROL

SEC. 3. Section 482 of the Foreign Assistance Act of 1961 is amended to read as follows:

AUTHORIZATION

"SEC. 482. To carry out the purposes of section 481, there are authorized to be appropriated to the President $39,000,000 for the fiscal year 1978. Amounts appropriated under this section are authorized to remain available until expended.".

MILITARY ASSISTANCE

SEC. 4. (a) Section 504(a) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(a)(1) There are authorized to be appropriated to the President to carry out the purposes of this chapter not to exceed $230,000,000 for the fiscal year 1978. Not more than the following amounts of funds available for carrying out this chapter may be allocated and made available for assistance to each of the following recipients for the fiscal year 1978:

Recipient:	*Amount*
Greece	$33,000,000
Portugal	25,000,000
Spain	15,000,000
Turkey	48,000,000
Jordan	55,000,000
Indonesia	15,000,000
Philippines	19,600,000
Thailand	8,000,000

The amount specified in this paragraph for military assistance to any such recipient for the fiscal year 1978 may be increased by not more than 10 per centum of such amount if the President deems such increase necessary for the purposes of this chapter.

"(2) Except with respect to costs incurred under the authority of section 516(b) or as otherwise specifically authorized by law, none of the funds available for assistance under this chapter may be used to provide assistance to countries or international organizations other than those specified in paragraph (1).

"(3) The authority of section 610(a) and of section 614(a) may not be used to increase any amount specified in paragraph (1), or to waive the limitations of paragraph (2).

"(4) Amounts appropriated under this subsection are authorized to remain available until expended.".

(b) Section 516(b) of the Foreign Assistance Act of 1961 is amended by striking out "paragraphs (2) and (3)" and inserting in lieu thereof "paragraph (2)".

STOCKPILING OF DEFENSE ARTICLES FOR FOREIGN COUNTRIES

SEC. 5. Section 514(b)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$93,750,000 for the period beginning July 1, 1975, and ending September 30, 1976, and $125,000,000 for the fiscal year 1977" and inserting in lieu thereof "$270,000,000 for the fiscal year 1978".

INTERNATIONAL MILITARY ASSISTANCE AND SALES PROGRAM MANAGEMENT

SEC. 6. (a) Section 515 of the Foreign Assistance Act of 1961 is amended to read as follows:

OVERSEAS MANAGEMENT OF ASSISTANCE AND SALES PROGRAMS

"SEC. 515. (a) In order to carry out his responsibilities for the management of international security assistance programs in accordance with the provisions of this Act and the Arms Export Control Act, the President is authorized to assign members of the Armed Forces of the United States to serve under the direction and supervision of the Chief of the United States Diplomatic Mission in any foreign country to perform necessary functions with respect to: military assistance and military education and training under this part; sales, credits and guaranties under the Arms Export Control Act; and such related functions as the President determines necessary. Members of the Armed Forces may be so assigned for such purposes only in accordance with the provisions of this section.

"(b) During the period beginning October 1, 1977 and ending September 30, 1980, members of the Armed Forces of the United States may be assigned under this section to the following countries: Argentina, Bolivia, Brazil, Colombia, Ethiopia, Greece, Indonesia, Iran, Japan, Jordan, Korea, Kuwait, Liberia, Morocco, Pakistan, Panama, Philippines, Portugal, Republic of China, Saudi Arabia, Spain, Thailand, Turkey, Venezuela and Zaire. The total number of personnel so assigned may not exceed by more than ten per cent in any fiscal year the number justified to the Congress in the Congressional Presentation materials for such fiscal year.

"(c) Not to exceed three members of the Armed Forces may be assigned under this section to any country not specified in subsection (b), except that not to exceed three additional such members may be so assigned to a country when specifically requested by the Chief of the Diplomatic Mission as necessary to the efficient operation of the Mission.

"(d) Members of the Armed Forces assigned under this section may not serve concurrently as defense attaches. Defense attaches may not perform security assistance functions under this section except in countries where the President determines that the performance of such functions by defense attaches is in the national interest. The President shall promptly report each determination under this subsection to the Speaker of the House of Representatives and to the Chairmen of the Senate Committees on Foreign Relations and Armed Services, together with a description of the number of personnel involved and a statement of the reasons for his determination.

"(e) The entire costs (including salaries of United States military personnel) of overseas management of security assistance programs under this section shall be charged to or reimbursed from funds made available to carry out this chapter, including such costs which are reimbused from charges for services collected from foreign governments pursuant to sections 21(e) and 43(b) of the Arms Export Control Act. The numerical limitations contained in subsections (b) and (c) of this section shall not apply to personnel performing services on a fully reimbursable basis under section 21 of the Arms Export Control Act.".

(b) Section 516(a) of the Foreign Assistance Act of 1961 is amended by striking out "515(b)(2)" and inserting in lieu thereof "515".

(c) Section 631(d) of the Foreign Assistance Act of 1961 is amended as follows:

(1) by striking out "this Act" and inserting in lieu thereof "part I of this Act"; and

(2) by striking out all that follows after "economic officer of the mission" and inserting a period in lieu thereof.

(d) Section 43(b) of the Arms Export Control Act is amended to read as follows:

"(b) Charges for administrative services calculated under section 21(e)(1)(A) of this Act shall include recovery of administrative expenses incurred by any department or agency of the United States Government (including any mission or group) in carrying out functions under this Act when:

"(1) such functions are primarily for the benefit of any foreign country, and

"(2) such expenses are not directly and fully charged to, and reimbursed from amounts received for, sales of defense services under section 21(a) of this Act.".

SECURITY SUPPORTING ASSISTANCE

SEC. 7. (a) Section 531 of the Foreign Assistance Act of 1961 is amended by deleting the first word of the last sentence and inserting in lieu thereof "Except for programs in southern Africa, the";

(b) Section 532 of the Foreign Assistance Act of 1961 is amended to read as follows:

AUTHORIZATION

"SEC. 532. There are authorized to be appropriated to the President to carry out the purposes of this chapter for the fiscal year 1978 not to exceed $1,887,200,000. Amounts appropriated under this section are authorized to remain available until expended.".

INTERNATIONAL MILITARY EDUCATION AND TRAINING

SEC. 8. Section 542 of the Foreign Assistance Act of 1961 is amended by striking out "$27,000,000 for the fiscal year 1976 and $30,200,000 for the fiscal year 1977" and inserting in lieu thereof "$35,000,000 for the fiscal year 1978".

MIDDLE EAST PEACE

SEC. 9. Section 903 of the Foreign Assistance Act of 1961 is amended as follows:

(1) in subsection (a), by striking out "for the fiscal year 1976 not to exceed $50,000,000 and for the fiscal year 1977 not to exceed $35,000,000" and inserting in lieu thereof "for the fiscal year 1978 not to exceed $25,000,000";

(2) in subsection (c), by inserting "or under section 532" immediately after "subsection (a)" in the first sentence, and by deleting "Such funds" in the second sentence and inserting in lieu thereof "Funds appropriated under subsection (a)"; and

(3) in subsection (e), by striking out "1977" and inserting in lieu thereof "1978".

TRANSFERS OF DEFENSE ARTICLES AND DEFENSE SERVICES FOR MAINTENANCE, REPAIR, MODIFICATION, AND OVERHAUL

SEC. 10. Section 3(d) of the Arms Export Control Act is amended by adding at the end thereof the following:

"This subsection shall not apply:

"(1) to transfers of maintenance, repair, modification, or overhaul defense services, or of the repair parts or other defense articles used in furnishing such services;

"(2) to temporary transfers of defense articles for the sole purpose of receiving maintenance, repair, modification, or overhaul; or

"(3) to cooperative cross servicing arrangements among members of the North Atlantic Treaty Organization.".

FOREIGN MILITARY SALES AUTHORIZATION AND AGGREGATE CEILING

SEC. 11. Section 31 of the Arms Export Control Act is amended as follows:

(1) in subsection (a), by striking out all in the first sentence after "not to exceed" the first time it appears and inserting in lieu thereof "$707,750,000 for the fiscal year 1978.";

(2) in subsection (b), by striking out all after "shall not exceed" the first time it appears and inserting in lieu thereof "$2,217,500,000 for the fiscal year 1978, of which not less than $1,000,000,000 shall be available only for Israel."; and

(3) in subsection (c), by striking out "the fiscal years 1976 and 1977" and inserting in lieu thereof "the fiscal year 1978".

LICENSES FOR THE EXPORT OF CERTAIN MAJOR DEFENSE EQUIPMENT

SEC. 12. Section 38(b)(3) of the Arms Export Control Act is amended by adding at the end thereof the following:

"The prohibition contained in the first sentence of this paragraph shall not apply to the issuance of licenses under this section for the export of major defense equipment to Australia, Japan or New Zealand, or major defense equpment sold commercially in implementation of an agreement between the United States Government and the government of a foreign country for the production of major defense equipment to which such licenses relate: *Provided*, That the President has submitted a certificate with respect

to such proposed agreement, prior to its signature, to the Speaker of the House of Representatives and to the Chairman of the Committee on Foreign Relations of the Senate in the same form as the certification required under section 36(c) of this Act and subject to the requirements of that section.".

AUTHORIZATION OF APPROPRIATIONS FOR THE FISCAL YEAR 1979

SEC. 13. There are authorized to be appropriated for the fiscal year 1979 such sums as may be necessary to carry out programs and activities for which appropriations for the fiscal year 1978 are authorized by this Act.

MISCELLANEOUS

SEC. 14. Authorizations of appropriations and limitations of authority applicable to the fiscal year 1977 as contained in provisions of law amended by this Act shall not be affected by enactment of this Act.

ASSISTANCE AND SALES TO GREECE AND TURKEY

[To be supplied by the Executive Branch upon completion of its examination of the findings and recommendations made by the President's Special Representative, Clark Clifford.]

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED INTERNATIONAL SECURITY ASSISTANCE AND ARMS EXPORT CONTROL ACT OF 1977

I. INTRODUCTION

The proposed International Security Assistance and Arms Export Control Act of 1977 (hereinafter referred to as "the Bill") amends the Foreign Assistance Act of 1961 (hereinafter referred to as "the FAA"), and the Arms Export Control Act (hereinafter referred to as "the AECA") in order to authorize appropriations to carry out international security assistance programs for fiscal year 1978. The Bill also contains authorizations for certain economic assistance programs and in accordance with the Congressional Budget Act of 1974, requests authorizations for fiscal year 1979.

II. PROVISIONS OF THE BILL

Section 1. Short title

This section provides that the Bill may be cited as the "International Security Assistance and Arms Export Control Act of 1977."

Section 2. Contingency fund

This section amends section 451(a) of the FAA to authorize appropriations of not to exceed $5,000,000 for the fiscal year 1978 for contingency fund purposes.

Section 3. International narcotics control

This section amends section 482 of the FAA to authorize appropriations of not to exceed $39,000,000 for the fiscal year 1978 for the international narcotics control program.

Section 4. Military assistance

Subsection (a) of this section amends section 504(a) of the FAA, which authorizes the appropriation of funds for military assistance purposes. The amended section 504(a) consists of four paragraphs:

(1) This paragraph authorizes appropriations of not to exceed $230,000,000 for fiscal year 1978 for the military assistance program. The amount of assistance which may be provided is specified with respect to each of the eight countries designated. These allocations may be increased by not more than 10% if deemed necessary for the purposes of the chapter. This paragraph constitutes the specific authorization required by section 516(a) of the FAA. The total military assistance program is made up of new budget authority plus reimbursements, reappropriations and recoupments to the military assistance account. The total fiscal year 1978 military assistance program of $284,600,000 will require the appropriation of $230,000,000. It is estimated that approximately $28,550,000 of the appropriated funds will be used to pay administrative and related expenses. The amount requested includes funds to reimburse the Department of Defense for the cost of overseas management of security assistance programs as required by section 515 of the FAA.

(2) This paragraph provides that except where funds are used to meet costs incurred in winding up military assistance programs or in connection with defense articles on loan to countries no longer eligible for military assistance, or where assistance otherwise specifically authorized by law, no military assistance may be provided in FY 1978 to countries or international organizations not specified in paragraph (1). This is consistent with section 516(a) of the FAA, terminating the general authority to provide military assistance after September 30, 1977, except where specifically authorized.

(3) This paragraph provides that the special authorities contained in sections 610(a) and 614(a) of the FAA cannot be used to increase any amount specified in paragraph (1) or to waive the limitations of paragraph (2). Section 610(a) authorizes the transfer of funds between certain FAA accounts; section 614(a) authorizes the waiver of restrictions on the use of FAA funds.

(4) This paragraph continues the authority in existing law for the availability until expended of funds appropriated under section 504(a).

Subsection (b) of this section amends section 516(b) of the FAA to bring it into conformity with the renumbering of the paragraphs of section 504(a) effected by the Bill.

Section 5. Stockpiling of defense articles for foreign countries

This section amends section 514(b)(2) of the FAA to establish a ceiling of $270,000,000 on the aggregate value of additions made in fiscal year 1978 to overseas stockpiles of defense articles (other than in NATO countries) which are to be designated as war reserve stocks for allied or other foreign forces. The United States retains title to stocks so designated. Section 514(a) prohibits their transfer to a foreign country except under authority of the FAA or the AECA, and within the limitations and funds available under those Acts.

Section 6. Overseas management of assistance and sales programs

Subsection (a) of this section replaces the existing section 515 of the FAA with a new section 515 composed of five subsections:

Subsection (a) authorizes the President to assign members of the US Armed Forces to serve under the direction and supervision of the Chief of the Diplomatic Mission in any foreign country for the purpose of performing necessary functions with respect to military assistance and training under the FAA, sales, credits and guaranties under the AECA, and related functions determined necessary by the President.

Subsection (b) authorizes the assignment of personnel under section 515 during the fiscal years 1978, 1979, and 1980 to 25 named countries, and provides that the total number so assigned may not exceed by more than 10% the number justified in the Congressional Presentation materials for the fiscal year in question.

Subsection (c) authorizes the assignment under section 515 of no more than three members of the Armed Forces to any country not listed in subsection (b), except that no more than three additional members may be so assigned upon the specific request of the Chief of Mission.

Subsection (d) prohibits members of the Armed Forces assigned under section 515 from serving as defense attaches. It also prohibits defense attaches from performing security assistance functions, except where the President determines that performance of such functions by an attache is in the national interest and so reports to the Congress. This exception will permit the performance of security assistance functions on an incidental basis by attaches in countries where the small size of the program does not warrant the assignment of additional personnel.

Subsection (e) provides that the costs of the functions authorized by section 515 shall be met from funds available for military assistance under the FAA, including costs reimbursed from charges for administrative services in connection with sales under the AECA. This subsection further provides that the numerical limitations of subsections (b) and (c) shall not apply to personnel performing defense services on a sales basis under the AECA.

Subsection (b) of this section amends section 516(a) of the FAA by conforming the reference to section 515(b)(2) therein to the revision of section 515 made by the Bill.

Subsection (c) of this section amends section 631(d) of the FAA to take into account the new section 515 by deleting the reference to administration of military assistance programs "by the senior military officer of the mission."

Subsection (d) of this section clarifies the requirement in section 43(b) of the AECA that charges for administrative services in connection with FMS sales be adequate to recover administrative expenses for functions which primarily benefit a foreign country. As amended by this subsection, section 43(b) is made expressly inapplicable to administrative expenses which are charged directly to foreign governments as part of the cost of defense services sold under section 21(a) of the AECA.

Section 7. Security supporting assistance

Subsection (a) of this section amends section 531 of the FAA to provide that the limitation to twelve of the number of countries which may receive security supporting assistance shall not apply to programs in countries of southern Africa.

Subsection (b) of this section amends section 532 of the FAA to authorize appropriations of not to exceed $1,887,200,000 for the fiscal year 1978 for assistance to friendly countries and international organizations to support or promote economic or political stability.

Section 8. International military education and training

This section amends section 542 of the FAA to authorize appropriations of not to exceed $35,000,000 for the fiscal year 1978 for the purpose of furnishing military education and training to military and related civilian personnel of foreign countries.

Section 9. Middle East peace

This section contains three paragraphs, each amending section 903 of the FAA, relating to the Middle East Special Requirements Fund, as follows:

(1) This paragraph amends section 903(a) to authorize appropriations of not to exceed $25,000,000 for the fiscal year 1978 for the purpose of meeting Middle East special requirements by furnishing economic and related assistance under part I of the FAA.

(2) This paragraph amends section 903(c) in order to clarify that activities under the Sinai Agreement of October 10, 1975 may be funded from appropriations available for security supporting assistance under section 532 of the FAA. This paragraph also makes clear that funds appropriated under the latter section may be obligated for the purposes of section 903(c) without regard to the prior notification requirements of section 903(b). The authorization of appropriations for such activities is included in the amendment to section 532 contained in section 7 of the Bill.

(3) This paragraph continues the opera-

tion during the fiscal year 1978 of section 903(e) of the FAA. That section provides that prior notification to the Congress of intended obligations of funds under section 903(b) shall not be required with respect to programs contained in the Congressional Presentation materials.

Section 10. Transfers of certain defense articles and defense services for maintenance, repair, modification and overhaul

This section amends section 3(d) of the AECA, relating to prior notice to Congress of the President's intention of consent to third-party transfers of defense articles and services sold under the AECA, to provide that such prior notice need not be given with respect to transfers of defense articles and services exclusively for purposes of maintenance, repair, modification, or overhaul, or transfers under NATO cross servicing managements.

Section 11. Foreign military sales authorization and aggregate ceiling

This section contains three paragraphs, each amending section 31 of the AECA, as follows:

(1) This paragraph amends section 31(a) to authorize appropriations of not to exceed $707,750,000 for fiscal year 1978 for the purpose of carrying out foreign military sales credit and guaranty programs under the AECA.

(2) This paragraph amends section 31(b) to establish a ceiling of $2,219,500,000 for fiscal year 1978 on the aggregate total of credits extended, and the principal amount of loans guaranteed, pursuant to the AECA, and to allocate not less than $1,000,000,000 of that aggregate total to Israel.

(3) This paragraph amends section 31(c), relating to terms and conditions governing repayment by Israel of financing extended pursuant to the AECA, to make that subsection applicable to such financing extended in fiscal year 1978.

Section 12. Licenses for the export of certain major defense equipment

This section amends section 38(b)(3) of the AECA to provide that the prohibitions of that section on the issuance of licenses for the export to non-NATO countries of major defense equipment sold commercially under a contract for $25,000,000 or more will not apply to two additional categories of exports. This section permits commercial sales to be made to Australia, Japan, and New Zealand, our economically-developed Asian allies, on the same basis as sales to our NATO allies. In addition, it authorizes licensing of commercial exports which are in implementation of agreements between the United States Government and foreign countries for the production of major defense equipment. Any such agreement must be certified to Congress, prior to its entry into force, in the manner applicable to the certification of certain proposed export licenses under section 36(c) of the AECA.

Section 13. Authorization of appropriations for the fiscal year 1979

This section reflects the requirements of section 607 of the Congressional Budget Act of 1974 (31 U.S.C. 11c) and authorizes appropriations for the fiscal year 1979 of the sums necessary to carry out programs and activities for which 1978 appropriations are authorized by the Bill.

Section 14. Miscellaneous

This section provides that the amendments made by the Bill shall not affect authorities and limitations applicable to the fiscal year 1977 under provisions of law amended by the Bill. This is a saving provision, intended to take into account the possible enactment of the Bill before September 30, 1977.

Assistance and sales to Greece and Turkey

[To be supplied.]

THE WHITE HOUSE,
Washington, March 28, 1977.

Hon. WALTER F. MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: I am transmitting today a bill to authorize security assistance programs for the fiscal years 1978 and 1979. I consider these programs essential to the attainment of important United States foreign policy goals throughout the world, and to reassure our friends and allies of the constancy of our support.

The programs authorized by this legislation include both military and economic forms of security assistance, with approximately two-thirds of the funds requested intended for nonmilitary programs. In addition, the bill provides for the continuation of our important international narcotics control efforts.

The authorizations I am proposing reflect downward adjustments this Administration has made in several programs in light of the human rights situations in the countries concerned. We are committed to a continuing effort to ensure that human rights considerations are taken fully into account in determining whether our security assistance programs serve our national security and foreign policy objectives.

I am not at this time proposing major changes in the authorities and statutory procedures which now govern security assistance and arms export controls. I have made clear on several occasions my deep concern over the burgeoning international traffic in arms. I am firmly resolved to bring greater coherence, restraint and control to our arms transfer policies and practices. To this end, I have ordered a comprehensive review of our policies and practices regarding both governmental and commercial arms exports.

We have already begun to discuss our preliminary ideas with members of the Congress, and will increase our consultations as we proceed with our policy review. When concluded, our review will provide the basis for the reports to the Congress mandated by sections 202 and 218 of the International Security Assistance and Arms Export Control Act of 1976.

Our goal is to develop, in close consultation with the Congress, policies which respect our commitments to the security and independence of friends and allies, which reflect fully our common concern for the promotion of basic human rights, and which give substance to our commitment to restrain the world arms trade.

The completion of this process within the next few months will give both the Executive Branch and the Legislative Branch a sound foundation on which they can base a thoughtful reexamination of existing law and fashion needed legislative revisions which will complement our common policy objectives, ensure appropriate participation and oversight by the Congress, and provide clear authority for the efficient conduct of approved programs.

In the meantime, I urge the Congress to avoid legislative initiatives which could disrupt important programs or would hinder a future cooperative effort based on a thorough evaluation of the facts and policy considerations. In this spirit, I have requested only minimal changes in statutory authority and have amended my predecessor's budget only where necessary to bring the request into line with basic prinicples of this Administration. I urge the early passage of the enclosed legislation and look forward to joining in a productive effort with the Congress later this year to achieve constructive reform of the security assistance and arms export control laws.

Sincerely,

JIMMY CARTER.

By Mr. SPARKMAN (by request):

S. 1161. A bill to further amend the Foreign Service Act of 1946 to improve the Foreign Service personnel system, and for other purposes; to the Committee on Foreign Relations.

FOREIGN SERVICE PERSONNEL SYSTEM

Mr. SPARKMAN. Mr. President, by request, I introduce for appropriate reference a bill to amend the Foreign Service Act of 1946 to improve the Foreign Service personnel system, and for other purposes.

It has been requested by the Assistant Secretary of State for Congressional Relations and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill be printed in the RECORD, together with the letter from the Assistant Secretary of State to the President of the Senate dated March 23, 1977, together with the explanation of the bill and the cost estimate.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1161

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 431 of the Foreign Service Act of 1946 (22 U.S.C. 881(c)) is amended by inserting "or Reserve officer" immediately after "officer" each time the latter appears.

COMPENSATION OF ALIEN EMPLOYEES

SEC. 2. (a) Subsection (b) of section 444 of such Act (22 U.S.C. 889(b)) is amended by inserting "and any other establishments of the Government, including those in the legislative and judicial branches," immediately following "Government agencies".

(b) Such section 444 (22 U.S.C. 889) is further amended by adding the following subsection at the end thereof:

"(c)(1) The heads of Government agencies including those in the legislative and judicial branches may compensate any current or former alien employees, including an alien employee who worked under a personal services contract, who is or has been imprisoned by a foreign government when the Secretary of State determines that such imprisonment was the result of the alien's employment by the United States. Such compensation shall not exceed an amount that the agency head determines approximates the salary and other benefits to which an employee or former employee could have been entitled had he remained employed during the period of the imprisonment, and may be paid under such terms and conditions as the Secretary of State deems appropriate. For purposes of making payments authorized by this section, agency heads shall have the same powers with respect to imprisoned alien employees (and former employees except as modified below) as given agency heads under the provisions of subchapter VII of chapter 55 of title 5, United States Code. Any period of imprisonment of an alien which is compensable under this section shall be considered for purposes of all other employee benefits to be a period of employment by the

United States Government except that a period of imprisonment shall not be creditable i) for purposes of subchapter III, chapter 83, title 5, U.S. Code, unless the individual either (A) was subject to section 8334(a) of such title during Government employment last preceding the imprisonment, or (B) qualifies for annuity benefits under such subchapter III by reason of other service, or ii) for purposes of subchapter I, chapter 81, title 5 of the United States Code, unless the individual was employed by the United States Government at the time of imprisonment.

"(2) No compensation or other benefit shall be awarded under paragraph (1) of this subsection unless a claim therefor is filed within three years from (A) the date of enactment of this subsection, (B) termination of the period of imprisonment giving rise to the claim or (C) the date of the claimant's first opportunity to file such a claim, as determined by the agency head, whichever is later.

"(3) The Secretary of State may prescribe regulations governing payments under this subsection for the guidance of all agenices."

CITIZENSHIP REQUIREMENT—FOREIGN SERVICE OFFICER—TECHNICAL AMENDMENT

SEC. 3. Section 515 of such Act (22 U.S.C. 910) is amended by deleting "and has been such for at least ten years" at the end thereof.

CAREER CANDIDATE PROGRAM

SEC. 4. Section 516 of such Act (22 U.S.C. 911) is amended by (A) changing the heading to read "ADMISSION TO CLASS 6, 7 or 8", (B) substituting "may" for "shall" in the last sentence of subsection (a) and (C) adding the following subsection at the end thereof:

"(c) Foreign Service officer candidates who have passed examinations described in subsection (a) may be appointed by the Secretary, under such regulations as he may prescribe, for a trial period of service as Foreign Service Reserve officers of class 7 or 8. Such appointments shall be limited to a maximum of 48 months, but may be extended for up to 12 additional months if the Secretary deems it to be in the public interest. Such Reserve officers may receive promotions up to class 6 for satisfactory performance during the trial period. The Secretary shall furnish the President with the names of such Reserve officers who have demonstrated fitness and aptitude for the work of the Service and whom he recommends for appointment as Foreign Service officers in the class corresponding to their Reserve officer class. The Secretary may terminate the services of such Reserve officers at any time under section 638."

REASSIGNMENT OF CHIEFS OF MISSION—TECHNICAL AMENDMENT

SEC. 5. Section 519 of such Act (22 U.S.C. 914) is amended by (A) inserting "or Foreign Service Reserve officer who is a participant in the Foreign Service Retirement and Disability System" immediately after "officer" and (B) striking out "in accordance with the provisions of section 514" and substituting "to another position in accordance with this or any other Act" in lieu thereof.

CITIZENSHIP REQUIREMENT—TECHNICAL AMENDMENT

SEC. 6. Section 522 of such Act (22 U.S.C. 922) is amended by deleting "and who has been such for at least five years" from the introductory portion thereof.

PRESIDENTIAL APPOINTMENTS—TECHNICAL AMENDMENT

SEC. 7. Subsection (b) of section 571 of such Act (22 U.S.C. 961(b)) is amended by (A) inserting "or Reserve officer" immediately after "officer" the first time the latter appears and (B) striking out "a Foreign Service officer" the second time the phrase appears and substituting "such an officer" in lieu thereof.

MISCELLANEOUS CORRECTIONS

SEC. 8. (a) Subsection (d) of section 811 of such Act (22 U.S.C. 1071(d)) is amended by changing "July 1, 1921" to "July 1, 1924" in the table therein.

(b) Subsection (g) of section 821 of such Act (22 U.S.C 1076(g)) is amended by changing "married" to "unmarried" in the first sentence thereof.

DEATH GRATUITIES FOR FOREIGN SERVICE ALIEN EMPLOYEES

SEC. 9. Paragraph (1) of section 14(d) of the Act entitled "An Act to provide certain basic authority for the Department of State", approved August 1, 1956 (22 U.S.C. 2679a(d)), is amended by (A) changing "national" to "employee"; (B) striking "or" following "consular agent"; and (C) inserting a comma and the following phrase immediately before the semicolon at the end thereof: "or an alien employee appointed under section 541 of the Foreign Service Act of 1946 (22 U.S.C. 946)".

EFFECTIVE DATES

SEC. 10. (a) Subsection (c) added to section 444 of the Foreign Service Act of 1946 (22 U.S.C. 889) shall apply to all past, present and future qualified employees, but no monthly compensation or annuity payment under title 5 of the United States Code that may be approved by reason of the enactment of such subsection shall be effective prior to the first day of the first month which begins on or after the date of enactment of this Act or October 1, 1977, whichever is later. Payments that may be authorized under such subsection (c) other than annuity or monthly compensation payments referred to in the preceding sentence, shall be paid from funds appropriated after such date of enactment for salaries and expenses.

(b) The amendment of section 14 of the Act of August 1, 1956 (22 U.S.C. 2679a), made by this Act shall apply with respect to deaths occurring on or after August 1, 1974, and any benefits authorized by this amendment shall be paid from funds appropriated after the date of enactment of this Act for salaries and expenses.

EXPLANATION

SECTION 1—*Chiefs of Mission—Technical Amendment.*

This section will amend subsection 431(c) of the Foreign Service Act to make clear that any Foreign Service Reserve officer appointed as a chief of mission shall continue to receive his or her Foreign Service salary (augmented by the difference between it and chief of mission salary) for the duration of the chief of mission appointment, as this section now authorizes for Foreign Service officers.

SECTION 2(a)—*Authority For Library of Congress And Other Legislative And Judicial Branch Agencies To Compensate Alien Employees Abroad.*

This section would amend subsection 444 (b) of the Foreign Service Act to authorize legislative and judicial branch agencies to administer alien employee programs abroad in accordance with the Foreign Service Act. This subsection now authorizes "other Government agencies" to so administer alien employee programs but the definition of "Government agencies" in section 121(4) of the Foreign Service Act does not cover legislative and judicial branch agencies.

The Library of Congress, which has requested this amendment, employs aliens abroad and it is desirable for it to compensate these employees in accordance with uniform pay scales and benefit plans developed by embassies and other agencies based upon prevailing locality wage rates and compensation practices. Since the Library is not authorized under section 444(b) to utilize authority of the Foreign Service Act for this purpose, it has been necessary for it to seek special authority each year in order to provide fringe benefits paid by executive branch agencies in accordance with local laws and customs.

SECTION 2(b)—*Compensation For Imprisoned Alien Employees.*

This section would add subsection (c) to section 444 of the Foreign Service Act to authorize compensation equivalent to salary and benefits for certain alien employees of the U.S. Government who are imprisoned by foreign governments as a result of their employment by the United States.

There are numerous instances of harassment by arrest and detention of aliens who are employed by our embassies and consulates abroad. Usually in these cases, employees are detained only for a few hours or days and suffer no loss in compensation. However, since World War II, some 40 aliens have been imprisoned because of their employment by the United States Government for such long periods that they have had to be separated from the Service and their salary terminated. Also, in some cases arrests have occurred after the employee's separation from the Service. This might occur following a break in diplomatic relations which forces the U.S. embassy to close and a withdrawal of American personnel. In such circumstances, alien employees are separated and may be arrested sometime thereafter and held for interrogation or reprisal.

Employees and former employees who have been arrested in the past have frequently been charged with treason or espionage because of their association with the United States. The imprisonments are used as a method of harassing the United States and to discourage capable employees from working at our embassies and consulates. Most of the 40 cases of imprisonment occurred in the 1940's and 1950's in Eastern Europe. Others occurred in the Near East following the 1967 war; four former alien employees are currently imprisoned in Laos.

At least four former employees who were imprisoned as a consequence of their employment by the United States have been compensated by the enactment of private relief bills. The Department is convinced that equity requires that all such cases be given fair and uniform treatment by the enactment of the proposed general legislation.

The proposed amendment would authorize compensation to an alien employee or former employee of any U.S. Government agency, if the agency head approved, but only if the Secretary of State determined that the employee was imprisoned by a foreign government as a result of his or her employment by the United States Government. Compensation could be authorized up to the amount which the employee would have received, including normal within-grade increases, had the employee remained in Government employment throughout the period of imprisonment. The presumption would be made that employment would have continued even though the embassy was closed during some or all of the period of imprisonment. The proposed amendment does not authorize compensation for any other losses such as confiscation of property or pain and suffering. The proposed language provides authority to deny or reduce compensation to individuals who may have received other relief, such as through private legislation enacted by the Congress.

An alien would be given credit towards retirement for the period of detention if he or she is covered or later becomes covered by the Civil Service retirement system. Also, an alien would receive compensation benefits under 5 U.S.C. 8100–8150 for disabilities or death caused by imprisonment if the imprisonment occurred before the employee's separation from Government service.

The amendment contains a provision prohibiting payment of any benefit unless a claim therefor is filed within three years from (1) the date of enactment, (2) termination of the period of imprisonment giving rise to the claim or (3) the date of the claimant's first opportunity to file such a claim as determined by the agency head, whichever is later. The Department will, of course, make reasonable efforts to notify all eligible persons of their entitlement under this amendment.

The Secretary of State would be authorized to issue regulations governing payments for the guidance of all agencies. It is intended to authorize payment for periods of imprisonment that have terminated prior to enactment only to an employee or former employee alive on the date of enactment who files a claim within the specified three-year period and only when there is reasonable evidence still available that the claimant was imprisoned as a result of employment by the United States Government. With respect to periods of imprisonment that terminate on or after enactment, it is intended to make authorized payments, as appropriate, to a principal, to dependents while a principal is imprisoned and, upon death of a principal, to next of kin or other person the agency head determines to be entitled to the payment. It is also intended to bar assignment of rights or benefits under this section by a principal or beneficiary.

An individual who, as a result of service to the United States, suffers the harsh treatment of imprisonment, which involves the loss of liberty, time and personal comfort as well as income, deserves at least to be compensated for the lost income during the period of imprisonment. The proposed amendment would make it possible for the United States to pay the compensation that equity demands.

SECTION 3—*Citizenship Requirement—FSO's—Technical Amendment.*

This section would amend section 515 of the Foreign Service Act to delete the ten-year citizenship requirement for appointment of Foreign Service officers. In *Faruki* v. *Rogers*, 349F. Supp. 723 the requirement was declared unconstitutional in a three-judge district court decision in 1972. The Government did not appeal the decision and the Department has not attempted to apply the ten-year requirement since that time.

SECTION 4—*Career Candidate Program.*

This section would amend section 516 of the Foreign Service Act to improve procedures by which aspirants for a Foreign Service officer career are tested on the job prior to award of career status.

At present those who pass the Foreign Service entry exam receive a Presidential commission as a Foreign Service officer at class 8 or 7, but then face a lengthy on-the-job trial period in the junior ranks (which may extend up to either five or seven and one half years, depending upon class of entry). Officers who fail to win promotion to class 5 during the allotted period are "selected-out" under the time-in-class provisions of section 633 of the Foreign Service Act.

The amendment would permit replacement of present entry procedures with a Career Candidate Program, under which a successful examinee would receive a time-limited Foreign Service Reserve appointment to serve a trial period for up to 48 months as a Career Candidate prior to commissioning by the President as a Foreign Service officer. Before expiration of the trial period, a Commissioning Board would evaluate the officer's record to determine whether the candidate had demonstrated a potential to serve effectively as a Foreign Service officer up to and within class 3 over a normal career span. The Secretary would recommend to the President the commissioning as a Foreign Service officer of each Career Candidate judged to possess this potential. Those not "selected-in" to the career service would leave the Department's employ upon expiration of their time-limited Foreign Service Reserve appointments.

In exceptional circumstances (prolonged illness, for example), the normal maximum trial period of 48 months could be extended by the Secretary for an additional 12 months.

Career Candidates would be initially appointed as Foreign Service Reserve officers of class 7 or 8 depending upon education and experience. While still candidates they would be eligible for promotion up to class 6. Successful candidates would be commissioned as Foreign Service officers at that rank. This amendment is needed to permit appointment of successful candidates as Foreign Service officers at the class 6 level, because section 516 now limits appointment of "examination" officers to classes 7 and 8.

If this amendment is enacted, the Department intends to adopt this new approach for commissioning all future Foreign Service officers who enter via the examination process. USIA favors the idea of a noncommissioned period for newly appointed Junior officers subject to discussion of the Career Candidate Program with the exclusive representative of its Foreign Service employees, AFGE local 1812. Until the conclusion of these discussions, USIA plans to continue its present practice of immediately commissioning successful examinees as Foreign Service information officers at classes 8 and 7. Since section 516 applies equally to Foreign Service officers and Foreign Service information officers, this amendment is worded in a manner that would permit USIA to continue its existing practice while permitting the Department to establish the Career Candidate Program.

SECTION 5—*Reassignment of Chiefs of Mission—Technical Amendment.*

This section would amend section 519 of the Foreign Service Act so that it would apply, in addition to Foreign Service officers as at present, to Foreign Service Reserve officers who are participants in the Foreign Service Retirement System. Section 519 now provides for the retirement of a Foreign Service officer upon completion of the officer's service as a chief of mission if the officer is not to be given another assignment, either as chief of mission or in some other capacity.

SECTION 6—*Citizenship Requirement—FSR's—Technical Amendment.*

This section would amend section 522 of the Foreign Service Act to delete the five-year citizenship requirement for appointment of Foreign Service Reserve officers. This amendment parallels the amendment of section 515 that would be made by this bill to remove the ten-year citizenship requirement for appointment of Foreign Service officers because of its unconstitutionality. It is the opinion of the Department of Justice that the constitutionality of the five-year requirement in section 522 is open to substantial question as the result of *Faruki* v. *Rogers*, 349F. Supp. 723 (1972). Consequently, the Department is no longer attempting to apply the five-year requirement.

SECTION 7—*Presidential Appointments—Technical Amendment.*

This amendment would extend the provisions of subsection 571(b) of the Foreign Service Act to Foreign Service Reserve officers. The subsection now applies only to Foreign Service officers and authorizes such an officer who is appointed by the President to a position in any Governmental agency, including the Department of State, to retain his or her status in the Foreign Service and to continue to participation in the Foreign Service Retirement System.

SECTION 8—*Miscellaneous Corrections.*

This section would amend sections 811 and 821 of the Foreign Service Act to correct minor printing errors in amendments of those sections enacted last year as a part of Public Law 94-350.

SECTION 9—*Death gratuities for Foreign Service Alien Employees.*

This section would amend section 14 of the Act of August 1, 1956 (which provides basic authority for the Department of State) to authorize death gratuities to dependents of alien employees of the Foreign Service killed abroad in the line of duty. Gratuities would be equivalent to one year's salary at the time of death.

In 1974 a similar gratuity was authorized for dependents of American Foreign Service employees killed abroad in the line of duty. This amendment would simply broaden the 1974 provision to authorize gratuities for aliens under the same terms and conditions as is now authorized for Americans.

Death gratuities for Americans were authorized in 1974 in recognition of the heightened risks from terrorist acts abroad faced by Foreign Service employees. Alien employees face these same risks as evidenced by the tragic deaths of Ms. Antoinette Varnava, the local Cypriot employee who was killed when she went to the aid of Ambassador Davies immediately after he was fatally shot in Nicosia in 1974, and Mr. Zohair Moghrabi, a Lebanese chauffeur assassinated in Beirut last year with Ambassador Francis Meloy and Foreign Service officer Robert Waring.

Ms. Varnava had been an employee of the Embassy in Nicosia for 10 years at the time of her death and provided the principal support for her father, mother and 14 year old sister. Mr. Moghrabi had served Embassy Beirut for 25 years at the time of his death and left a wife and three minor children. He had also risked his life on several previous occasions in order to evacuate American citizens who became isolated in combat sectors of Beirut.

The U.S. relies heavily on Foreign Service alien employees to provide essential supporting services to embassies, consulates and other U.S. mission offices. Many alien employees spend their entire careers working for the U.S. They perform their duties faithfully and well and deserve fair treatment from the U.S.

We believe the supreme sacrifice of an alien employee killed in line of duty for the U.S. deserves the same recognition that is accorded when an American employee is killed in line of duty. Undoubtedly, the survivors of the generally low-payed alien employees have at least as pressing financial needs as survivors of American employees. These needs should be provided for on an equitable basis and this amendment is designed for that purpose.

The provision provides benefits for survivors of employees killed abroad in the line of duty, whether by terrorist attack or other job-connected cause. This amendment extending the benefit to Foreign Service alien employees would be made retroactively effective to August 1, 1974 in order to cover the death of Miss Varnava in Cyprus. Since that time, we know of three other alien employees of the Department killed abroad in the line of duty.

SECTION 10—*Effective Dates.*

This section establishes effective dates for the bill. Amendments would become effective on the date of enactment except for those described below. In all cases, benefit payments authorized by the bill would be required to be paid from funds appropriated following the date of enactment of this bill.

The amendment of section 444 of the Foreign Service Act to authorize compensation for alien employees imprisoned abroad because of their employment by the U.S. Government would apply to past, present, and future employees.

The amendment of Section 14 of the Act of August 1, 1956 extending death gratuity

payments to alien employees of the Foreign Service would apply to deaths occurring on and after August 1, 1974.

COST ESTIMATE—DEPARTMENT OF STATE SALARIES AND EXPENSES

[In thousands]

Section	Fiscal year— 1978	1979	1980	1981	1982
2(b) Imprisoned aliens	$50	$50	$5	$5	$5
9 Death gratuities	35	10	10	10	10
Total cost	85	60	15	15	15

Section 4 of the bill would provide some savings by speeding the on-the-job evaluation of Junior officers and accelerating the departure of some unsuccessful candidates.

Other sections of the bill would not have an appreciable cost impact.

DEPARTMENT OF STATE,
Washington, D.C., March 23, 1977.

Hon. WALTER F. MONDALE,
President of the U.S. Senate

DEAR MR. PRESIDENT: We enclose herewith for consideration of the Congress a proposed bill, with accompanying explanation and cost estimate, to improve the Foreign Service personnel system and for related purposes. The principal programs and changes proposed in the bill are as follows:

CAREER CANDIDATE PROGRAM

A Career Candidate Program would be authorized that is designed to improve procedures by which aspirants for a Foreign Service officer career are tested on the job prior to their commissioning as Foreign Service officers.

ALIEN EMPLOYEES

Three amendments would affect alien employees abroad:

The Library of Congress at its request would be authorized to use provisions of the Foreign Service Act to compensate alien employees abroad.

Compensation would be authorized for alien employees abroad imprisoned because of their employment by our embassies, consulates, or other offices.

Death gratuities now authorized for American Foreign Service employees killed abroad in the line of duty would be extended to alien employees.

PRESIDENTIAL APPOINTEES

Certain sections of the Foreign Service Act relating to salary and retirement of Foreign Service officers appointed to chief of mission or other executive positions would be broadened to cover other categories of Foreign Service personnel that may be appointed to such positions. These are basically technical amendments which are necessary because of the possibility that a career Foreign Service Reserve officer in AID or a Foreign Service Reserve officer with unlimited tenure may be appointed to an executive position.

The Department requests that the Congress give early and favorable consideration to the enclosed draft bill. We are sending a similar letter to the Speaker of the House of Representatives.

We are advised by the Office of Management and Budget that there is no objection from the standpoint of the Administration's program to the submission of this proposal.

Respectfully,

DOUGLAS J. BENNET, Jr.,
Assistant Secretary for Congressional Relations.

By Mr. INOUYE:

S. 1162. A bill to repeal section 222 of the Communications Act of 1934; to the Committee on Commerce, Science, and Transportation.

Mr. INOUYE. Mr. President, the legislation I am introducing today would delete section 222 of the Communications Act of 1934, as amended.

Recently the Chairman of the Federal Communications Commission recommended that Congress consider deleting that section because, in his words,

It is a statute that has served to impede rather than enhance the competition that it was intended to preserve.

Section 222 governs the interrelationship among communications common carriers providing international record services, and also governs the role of Western Union.

Section 222 which was enacted in 1943 created a statutory antitrust law exemption which permitted Western Union to acquire Postal Telegraph & Cable Corp., the other major entity providing domestic telegraph services at that time.

In order to safeguard against the possibility that Western Union might utilize its newly obtained monopoly to favor its own overseas cable operations at the expense of its competitors, section 222 established four conditions:

One. It required Western Union to divest itself of the international telegraph operations it had "theretofore carried on."

Two. Pending divestiture, it required Western Union to distribute among the international record carriers outbound, unrouted international message telegraph traffic in accordance with a formula.

Three. It dichotomized between domestic and international telegraph service, and designated domestic points—gateways—where international record carriers—IRC—could receive messages destined for international delivery. Section 222 drew the domestic/international line on the basis of geographic rather than political boundaries in order to preserve the status quo.

Thus, for purposes of telegraph services from the U.S. mainland, Hawaii is an international point. Mexico, on the other hand, is a domestic point.

Four. It provided procedures for the division of revenues between the IRC's and Western Union for Western Union's landline haul services, that is, the hinterland pickup and delivery of international traffic for IRC's.

According to the Chairman of the FCC, whatever its merits when enacted, section 222 is a statutory provision whose vitality has been vitiated by subsequent events.

In sum, he said, the statute has produced industry practices and performance that are detrimental to consumer interests, while failing to provide any public interest safeguards that could not be afforded by the exercise of agency authority provided by other facets of the Communications Act.

Mr. President, nowhere is the accuracy of Chairman Wiley's statement more clearly demonstrated than in my own State of Hawaii.

Residents of Hawaii have not only been deprived of the variety of the communications services available to mainland residents, they have also paid proportionately higher prices for the services they do receive.

I might add, Mr. President, that residents of the mainland who wish to communicate with Hawaii are also adversely affected by these inequities.

Chairman Wiley in recommending deletion of section 222 has cited convincing reasons why each of the conditions and restrictions in the statute are irrelevant and counterproductive. In sum, its provisions obstruct rather than promote public interest objectives.

I am therefore today introducing legislation which will implement Chairman Wiley's recommendation that section 222 be deleted, and I shall request the chairman of the Subcommittee on Communications to hold prompt hearings on the measure.

By Mr. MATSUNAGA (for himself, Mr. DURKIN, and Mr. MELCHER):

S. 1163. A bill to amend title 5, United States Code, to improve the basic workweek of firefighting personnel of executive agencies, and for other purposes; to the Committee on Governmental Affairs.

WORKWEEK OF FEDERAL FIREFIGHTERS

Mr. MATSUNAGA. Mr. President, today I am introducing a bill which I have introduced in several past Congresses: a bill to reduce the workweek of Federal firefighters from the current 72 hours a week to 54 hours, a figure more comparable to today's average workweek.

Not many people even realize that there are some 14,000 federally employed firefighters who stand guard at defense bases, veterans hospitals, some civilian airports and other Federal installations.

Federal firefighters face the same, and sometimes even greater, dangers than their counterparts in municipal fire departments. Yet for the past 20 years the Federal firefighter has been working a 72-hour week, about one and a half times as long as the week worked by his municipal counterpart.

Furthermore, he is not compensated for his longer hours by higher pay. In the case of Federal firefighters in Hawaii, a federally employed senior engineer at Hickam Air Force Base in Honolulu receives approximately the same salary as does his municipal counterpart in the Honolulu Fire Department. Comparable figures for hosemen show the two figures within $100 of each other.

Yet, the Honolulu firefighter works only 56 hours a week and is paid 1½ times his normal salary for any overtime he may put in as well as special holiday pay. Furthermore, while it takes 5 years for the Honolulu firefighter to qualify for the top salary, it takes 19 years for the Federal firefighter to qualify for the top Federal salary.

Ironically, since Hickam is close to Honolulu International Airport, the two forces often find themselves fighting the same fire side by side.

This situation is repeated across the country in every State where Federal firefighters work.

Is it any wonder that officials are finding it difficult to adhere to existing Federal personnel standards or to attract

high quality firefighters to the Federal force? Is it any wonder that good, young firefighters are leaving the Federal service to work for municipal departments?

I had hoped that this problem would be solved by the passage of the Fair Labor Standards Act Amendments of 1974.

That legislation extended several overtime provisions to all fire and police personnel, including Federal. Overtime was to be paid for all hours in excess of 60 as of January 1975, with further phased reductions over the next several years. The goal was to require overtime pay, commonly referred to as time and a half, for hours worked in excess of 60. Two facts quickly become clear, however.

First, the Defense Department, which employs most of the Federal firefighters, had no intention of reducing the actual number of hours an individual firefighter would work. It would remain 72 hours a week, but DOD would pay each of them "overtime" for the extra 12 hours.

Second, the Civil Service Commission interpreted the law in such a way that paying 12,000 or more firefighters time and a half for 12 hours each week would not cost the Defense Department very much, only $1.25 or $1.30 an hour extra—a real bargain by anyone's measure.

Clearly, Mr. President, Congress intended in the 1974 Fair Labor Standards Act Amendments that Federal firefighters be required to work fewer hours per week, and I cannot believe that Congress intended for that reduction in hours to be accompanied by a reduction in pay.

I therefore urge timely and favorable action on this measure so that this injustice can be corrected.

By Mr. HART (for himself and Mr. THURMOND) (by request):

S. 1164. A bill to authorize certain construction at military installations, and for other purposes; to the Committee on Armed Services.

MILITARY CONSTRUCTION AUTHORIZATIONS

Mr. HART. Mr. President, by request, for myself and the senior Senator from South Carolina (Mr. THURMOND), I introduce, for appropriate reference a bill to authorize certain construction at military installations and for other purposes. With the understanding that we are in no way bound by the programs or funding levels appearing in this bill, we are privileged to introduce it at this time.

I ask unanimous consent that a letter of transmittal requesting consideration of this legislative measure and explaining its purpose be printed in the RECORD immediately following the printing of the bill.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

TITLE I

SEC. 101. The Secretary of the Army may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and construction:

INSIDE THE UNITED STATES

United States Army Forces Command

Fort Bragg, North Carolina, $4,145,000.
Fort Campbell, Kentucky, $553,000.
Fort Carson, Colorado, $815,000.
Fort Hood, Texas, $7,284,000.
Fort Lewis, Washington, $615,000.
Fort Ord, California, $4,149,000.
Fort Polk, Louisiana, $48,720,000.
Fort Riley, Kansas, $531,000.
Schofield Barracks, Hawaii, $10,189,000.
Fort Stewart/Hunter Army Air Field, Georgia, $10,991,000.
Fort Wainwright, Alaska, $6,985,000.

United States Army Training and Doctrine Command

Fort Benning, Georgia, $25,269,000.
Fort Knox, Kentucky, $15,541,000.
Fort Rucker, Alabama, $9,941,000.
Fort Sill, Oklahoma, $370,000.
Various Locations, $1,810,000.

United States Army Materiel Development and Readiness Command

Picatinny Arsenal, New Jersey, $6,770,000.
Rock Island Arsenal, Illinois, $6,618,000.
Various Locations, $33,939,000.

Ammunition Facilities

Holston Army Ammunition Plant, Tennessee, $4,616,000.
Indiana Army Ammunition Plant, Indiana, $1,009,000.
Iowa Army Ammunition Plant, Iowa, $11,192,000.
Longhorn Army Ammunition Plant, Texas, $555,000.
Louisiana Army Ammunition Plant, Louisiana, $4,345,000.
Milan Army Ammunition Plant, Tennessee, $10,467,000.
Mississippi Army Ammunition Plant, Mississippi, $181,200,000.
Newport Army Ammunition Plant, Indiana, $822,000.
Redford Army Ammunition Plant, Virginia, $203,000.
Riverbank Army Ammunition Plant, California, $584,000.
Sunflower Army Ammunition Plant, Kansas, $2,396,000.
Unspecified, $411,360,000.
Volunteer Army Ammunition Plant, Tennessee, $597,000.

United States Military Academy

United States Military Academy, West Point, New York, $3,047,000.

Nuclear Weapons Security

Various Locations, $7,764,000.

OUTSIDE THE UNITED STATES

United States Army Forces Command

Panama Area, Canal Zone, $2,831,000.

United States Army, Japan

Various Locations, $3,898,000.

Eighth United States Army, Korea

Various Locations, $27,518,000.

Kwajalein Missile Range

National Missile Range, $2,603,000.

United States Army Security Agency

Various Locations, $2,164,000.

United States Army, Europe

Classified Location, $32,000,000.
Germany, Various Locations, $179,109,000.
Italy, Various Locations, $3,770,000.
Various Locations: For the United States' share of the cost of multilateral programs for the acquisition or construction of military facilities and installations, including international military headquarters, for the collective defense of the North Atlantic Treaty Area, $85,000,000. Within thirty days after the end of each quarter, the Secretary of the Army shall furnish to the Committees on Armed Services and on Appropriations of the Senate and House of Representatives a description of obligations incurred as the United States' share of such multilateral programs.

Nuclear Weapons Security

Various Locations, $6,800,000.

SEC. 102. The Secretary of the Army may establish or develop Army installations and facilities by proceeding with construction made necessary by changes in Army missions and responsibilities which have been occasioned by: (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public woks, including land acquisition, site preparation, appurtenances, utilities and equipment in the total amount of $20,000,000. The Secretary of the Army, or his designee, shall notify the Committee on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

TITLE II

SEC. 201. The Secretary of the Navy may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment for the following acquisition and constructional:

INSIDE THE UNITED STATES

Trident Facilities

Various Locations, $121,410,000.

Marine Corps

Marine Corps Base, Camp Lejeune, North Carolina, $12,350,000.
Marine Corps Base, Camp Pendleton, California, $300,000.
Marine Corps Air Station, Cherry Point, North Carolina, $3,550,000.
Marine Corps Air Station, Kaneohe Bay, Hawaii, $160,000.
Marine Corps Base, Twentynine Palms, California, $11,965,000.

Chief of Naval Operations

Naval Academy, Annapolis, Maryland, $165,000.
Naval Support Activity, Long Beach, California, $4,330,000.
Commandant 14th Naval District, Pearl Harbor, Hawaii, $4,200,000.
Naval Support Activity, Mare Island, Vallejo, California, $2,900,000.

Commander in Chief, Atlantic Fleet

Naval Station, Charleston, South Carolina, $180,000.
Flag Administrative Unit Atlantic, Norfolk, Virginia, $90,000.
Fleet Intelligence Center Europe and Atlantic, Norfolk, Virginia, $1,137,000.
Naval Air Station, Norfolk, Virginia, $14,350,000.
Naval Station, Norfolk, Virginia, $3,800,000.

Commander in Chief, Pacific Fleet

Naval Station, Adak, Alaska, $11,000,000.
Naval Air Station, Barbers Point, Hawaii, $7,197,000.
Commander Oceanographic System, Pacific, Pearl Harbor, Hawaii, $7,400,000.
Naval Station, Pearl Harbor, Hawaii, $2,050,000.
Naval Submarine Base, Pearl Harbor, Hawaii, $1,850,000.
Naval Station, San Diego, California, $8,166,000.

Chief of Naval Education and Training

Naval Amphibious School, Coronado, San Diego, California, $3,450,000.
Naval Submarine Training Center, Pearl Harbor, Hawaii, $410,000.
Naval Technical Training Center, Pensacola, Florida, $2,400,000.

Bureau of Medicine and Surgery

Naval Regional Medical Center, Bremerton, Washington, $1,450,000.

Chief of Naval Material

Puget Sound Naval Shipyard, Bremerton, Washington, $11,600,000.
Naval Weapons Station, Charleston, South Carolina, $850,000.
Naval Weapons Station, Concord, California, $1,350,000.
Portsmouth Naval Shipyard, Kittery, Maine, $10,530,000.
Long Beach Naval Shipyard, Long Beach, California, $8,080,000.
Naval Supply Center, Pearl Harbor, Hawaii, $13,400,000.
Pearl Harbor Naval Shipyard, Pearl Harbor, Hawaii, $1,080,000.
Navy Public Works Center, Pearl Harbor, Hawaii, $3,000,000.
Philadelphia Naval Shipyard, Philadelphia, Pennsylvania, $15,300,000.
Mare Island Naval Shipyard, Vallejo, California, $24,100,000.
Naval Weapons Station, Yorktown, Virginia, $2,350,000.
Various Locations, Atlantic Fleet Ballistic Missile Refit and Backfit, $37,650,000.

Naval Security Group Command

Naval Security Group Department, Adak, Alaska, $2,350,000.
Naval Security Group Detachment, Sugar Grove, West Virginia, $900,000.

Nuclear Weapons Security

Various Locations, $20,658,000.

OUTSIDE THE UNITED STATES

Chief of Naval Operations

Naval Support Facility, Diego Garcia, Indian Ocean, $7,300,000.

Commander in Chief, Atlantic Fleet

Naval Facility Antigua, British West Indies, $180,000.
Naval Station, Keflavik, Iceland, $161,000.
Naval Station, Roosevelt Roads, Puerto Rico, $170,000.

Commander in Chief, Pacific Fleet

Navy Fleet Activities, Yokosuka, Japan, $1,850,000.

Naval Forces Europe

Naval Air Facility, Sigonella, Italy, $4,300,000.

Bureau of Medicine and Surgery

Naval Regional Medical Clinic, Pearl Harbor, Midway Island Detachment, $4,350,000.

Naval Telecommunications Command

Naval Communication Area Master Station, Naples, Italy, $1,700,000.
Naval Communications Unit, Thurso, Scotland, $400,000.

Naval Security Group Command

Naval Security Group Department, Rota, Spain, $2,400,000.

SEC. 202. The Secretary of the Navy may establish or develop Navy installations and facilities by proceeding with construction made necessary by changes in Navy missions and responsibilities which have been occasioned by: (1) unforeseen security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Military Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, in the total amount of $20,000,000. The Secretary of the Navy, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

SEC. 203. Notwithstanding any other provision of law, the Secretary of the Navy, or his designee, is authorized to construct at the U.S. Naval Station, San Diego, California, recreational facilities necessary to replace the existing Navy Athletic Field, Naval Station, San Diego, held under lease from the City of San Diego, dated August 9, 1949, and to expend for such construction sums paid to the United States by the San Diego Unified Port District, as current holder of the lessor's interest in said premises, pursuant to an agreement to be negotiated between the Secretary, or his designee, and the Port District for Navy termination of the lease and abandonment in place of its existing facilities on the leasehold in consideration of the Port District payment to the United States of the cost of replacement facilities. However, such lease shall not be terminated and the Department of the Navy shall not be required to relinquish use of any part of the leasehold until the new facilities authorized to be constructed herein are available for use, as determined by the Secretary, or his designee.

TITLE III

SEC. 301. The Secretary of the Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment, for the following acquisition and construction:

INSIDE THE UNITED STATES

Aerospace Defense Command

Peterson Air Force Base, Colorado, $2,500,000.

Air Force Logistics Command

Hill Air Force Base, Utah, $8,152,000.
Kelly Air Force Base, Texas, $5,676,000.
Tinker Air Force Base, Oklahoma, $12,310,000.
Wright-Patterson Air Force Base, Ohio, $4,064,000.
Various locations, $15,928,000.

Air Force Systems Command

Buckley Air National Guard Base, Colorado, $1,100,000.
Edwards Air Force Base, California, $11,585,000.
Eglin Air Force Base, Florida, $7,671,000.
Kirtland Air Force Base, New Mexico, $362,000.
Los Angeles Air Force Station, California, $500,000.
Various locations, $2,826,000.

Air Training Command

Chanute Air Force Base, Illinois, $7,400,000.
Lackland Air Force Base, Texas, $4,700,000.
Randolph Air Force Base, Texas, $334,000.
Sheppard Air Force Base, Texas, $980,000.
Various Locations, $3,380,000.

Alaskan Air Command

Elmendorf Air Force Base, Alaska, $8,386,000.
King Salmon Airport, Alaska, $631,000.
Shemya Air Force Base, Alaska, $3,094,000.

Military Airlift Command

Altus Air Force Base, Oklahoma, $660,000.
Andrews Air Force Base, Maryland, $692,000.
McGuire Air Force Base, New Jersey, $415,000.
Pope Air Force Base, North Carolina, $1,119,000.
Travis Air Force Base, California, $3,560,000.
Various locations, $5,800,000.

Pacific Air Forces

Hickam Air Force Base, Hawaii, $2,140,000.

Strategic Air Command

March Air Force Base, California, $1,387,000.
Offutt Air Force Base, Nebraska, $1,364,000.
Pease Air Force Base, New Hampshire, $910,000.
Vandenberg Air Force Base, California, $1,653,000.
Various locations, $7,600,000.

Tactical Air Command

George Air Force Base, California, $1,548,000.
Holloman Air Force Base, New Mexico, $1,585,000.
Langley Air Force Base, Virginia, $3,649,000.
Luke Air Force Base, Arizona, $9,127,000.
Nellis Air Force Base, Nevada, $5,180,000.
Seymour-Johnson Air Force Base, North Carolina, $3,816,000.
Various locations, $7,517,000.

United States Air Force Academy

United States Air Force Academy, Colorado, $1,740,000.

Nuclear Weapons Security

Various locations, $44,298,000.

Air Installation Compatible Use Zones

Various locations, $2,042,000.

Special Facilities

Various locations, $4,378,000.

OUTSIDE THE UNITED STATES

Pacific Air Forces

Kadena Air Base, Japan, $1,400,000.

Strategic Air Command

Andersen Air Force Base, Guam, $1,453,000.

United States Air Force in Europe

Bentwaters Royal Air Force Station, United Kingdom, $7,327,000.
Ramstein Air Base, Germany, $7,805,000.
Sembach Air Base, Germany, $6,565,000.
Upper Heyford Royal Air Force Station, United Kingdom, $299,000.
Zaragoza Air Base, Spain, $1,825,000.
Various locations, $95,900,000.

Nuclear Weapons Security

Various locations, $10,162,000.

Special Facilities

Various locations, $6,761,000.

SEC. 302. The Secretary of the Air Force may establish or develop Air Force installations and facilities by proceeding with construction made necessary by changes in Air Force missions and responsibilities which have been occasioned by: (1) unforeseen

security considerations, (2) new weapons developments, (3) new and unforeseen research and development requirements, or (4) improved production schedules, if the Secretary of Defense determines that deferral of such construction for inclusion in the next Mili-stall permanent or temporary public works, including land acquisition, site preparation, tary Construction Authorization Act would be inconsistent with interests of national security, and in connection therewith to acquire, construct, convert, rehabilitate, or inappurtenances, utilities, and equipment in the total amount of $20,000,000. The Secretary of the Air Force, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public work undertaken under this section, including those real estate actions pertaining thereto. This authorization will expire upon the date of enactment of the Military Construction Authorization Act for fiscal year 1979 except for those public works projects concerning which the Committees on Armed Services of the Senate and House of Representatives have been notified pursuant to this section prior to such date.

TITLE IV

SEC. 401. The Secretary of Defense may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating, or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities and equipment, for defense agencies for the following acquisition or construction:

INSIDE THE UNITED STATES

National Security Agency

Fort George G. Meade, Maryland, $650,000.

OUTSIDE THE UNITED STATES

Defense Logistics Agency

Defense Property Disposal Office, Ludwigsburg, Germany, $1,650,000.

Emergency Construction

SEC. 402. The Secretary of Defense may establish or develop installations and facilities which he determines to be vital to the security of the United States, and in connection therewith to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment in the total amount of $30,000,000. The Secretary of Defense, or his designee, shall notify the Committees on Armed Services of the Senate and House of Representatives, immediately upon reaching a final decision to implement, of the cost of construction of any public works undertaken under this section, including real estate actions pertaining thereto.

TITLE V: MILITARY FAMILY HOUSING AND HOMEOWNERS ASSISTANCE PROGRAM

AUTHORIZATION TO CONSTRUCT OR ACQUIRE HOUSING

SEC. 501. (a) The Secretary of Defense, or his designee, is authorized to construct or acquire sole interest in existing family housing units in the numbers and at the locations hereinafter named, but not family housing construction shall be commenced at any such locations in the United States until the Secretary shall have consulted with the Secretary of the Department of Housing and Urban Development as to the availability of suitable private housing at such locations. If agreement cannot be reached with respect to the availability of suitable private housing at any location, the Secretary of Defense shall notify the Committees on Armed Services of the Senate and the House of Representatives, in writing, of such difference of opinion, and no contract for construction at such location shall be entered into for a period of thirty days after such notification has been given. This authority shall include the authority to acquire land, and interests in land, by gift, purchase, exchange of Government-owned land, or otherwise.

(b) With respect to the family housing units authorized to be constructed by this section, the Secretary of Defense is authorized to acquire sole interest in privately owned or Department of Housing and Urban Development held family housing units in lieu of constructing all or a portion of the family housing authorized by this section, if he, or his designee, determines such action to be in the best interests of the United States; but any family housing units acquired under authority of this subsection shall not exceed the cost limitations specified in this section for the project nor the limitations on size specified in section 2684 of title 10, United States Code. In no case may family housing units be acquired under this subsection through the exercise of eminent domain authority; and in no case may family housing units other than those authorized by this section be acquired in lieu of construction unless the acquisition of such units is hereafter specifically authorized by law.

(c) Family housing units:

Fort Polk, Louisiana, one hundred units, $3,545,000.

Naval Complex, Adak, Alaska, one hundred units, $8,500,000.

Portsmouth Naval Complex, Kittery, Maine, two hundred units, $8,086,000.

Naval Security Group Activity, Winter Harbor, Maine, thirty-two units, $1,450,000.

Naval Complex, Bremerton, Washington, five hundred twenty units, $24,602,000.

Defense Attache Office, Quito, Ecuador, two units, $105,000.

Defense Attache Office, Wellington, New Zealand, two units, $88,000.

(d) Any of the amounts specified in this section may, at the discretion of the Secretary of Defense, or his designee, be increased by 10 per centum, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress. The amounts authorized include the costs of shades, screens, ranges, refrigerators, and all other installed equipment and fixtures, the cost of the family housing unit, design, supervision, inspection, overhead, land acquisition, site preparation, and installation of utilities.

IMPROVEMENT OF EXISTING QUARTERS

SEC. 502. The Secretary of Defense, or his designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed—

(1) for the Department of the Army, $7,736,000.

(2) for the Department of the Navy, $6,353,000, including $2,500,000 for energy conservation projects.

(3) for the Department of the Air Force, $5,640,000, including $201,000 for energy conservation projects.

EXCEPTIONS TO IMPROVEMENT LIMITATION

SEC. 503. The Secretary of Defense, or his designee, within the amounts specified in section 502, is authorized to accomplish repairs and improvements to existing public quarters in amounts in excess of the $15,000 limitation prescribed in section 610(a) of Public Law 90–110, as amended (81 Stat. 279, 305), as follows:

Fort Bliss, Texas, one unit, $50,000.

Marine Corps Development and Education Command, Quantico, Virginia, thirty-three units, $739,880.

LEASED QUARTERS

SEC. 504. (a) Section 515 of Public Law 84–161 (69 Stat. 324, 352), as amended, is further amended by revising the third sentence to read as follows: "Expenditures for the rental of such housing facilities, including the cost of utilities and maintenance and operation, may not exceed: For the United States (other than Alaska, Hawaii, and Guam) and Puerto Rico, an average of $280 per month for each military department, or the amount of $450 per month for any one unit; and for Alaska, Hawaii, and Guam, an average of $350 per month for each military department, or the amount of $450 per month for any one unit.", and by adding a new fourth sentence as follows: "The Secretary of Defense, or his designee, may exempt from the above average cost limitations, not more than 1,000 units leased for personnel assigned to detached duty.".

(b) Section 507(b) of Public Law 93–166 (87 Stat. 661, 676), as amended is amended by striking out "$405" and "$700" in the first sentence, and inserting in lieu thereof "$435" and "$760", respectively.

MAXIMUM TERM OF FOREIGN LEASES

SEC. 505. Notwithstanding any other provision of law, the Secretary of Defense, or his designee, may acquire by lease, in any foreign country, family housing facilities and real property relating thereto that are needed for military purposes. A lease under this section may be for a period of not more than ten years.

HOMEOWNERS ASSISTANCE ELIGIBILITY

SEC. 506. (a) Section 1013 of the Act of November 3, 1966, Public Law 89–754, as amended (42 U.S.C. 3374), is amended by adding subsection (n) to read as follows:

"In addition to the coverage provided above, the benefits of this section shall apply to otherwise eligible employees and personnel when the Department of Defense has announced a study of a plan for a closure or partial closure at a military base or installation. All references in subsections (a), (b), (c), and (k) to "closure" or words of similar effect shall be deemed to include announced studies of plans for closure at a base or installation."

(b) This amendment is to be effective as of March 1, 1976.

APPROPRIATIONS LIMITATIONS

SEC. 507. There is authorized to be appropriated for use by the Secretary of Defense, or his designee, for military family housing and homeowners assistance as authorized by law for the following purposes:

(1) for construction or acquisition of sole interest in family housing, including demolition, authorized improvements to public quarters, minor construction, relocation of family housing, rental guarantee payments, and planning an amount not to exceed $35,200,000.

(2) for support of military family housing, including operating expenses, leasing, maintenance of real property, payments of principal and interest on mortgage debts incurred, payment to the Commodity Credit Corporation, and mortgage insurance premiums authorized under section 222 of the National Housing Act, as amended (12 U.S.C. 1715m), an amount not to exceed $1,416,440,000.

(3) for homeowners assistance under section 1013 of Public Law 89–754 (80 Stat. 1255, 1290), as amended, including acquisition of properties, an amount not to exceed $3,000,000.

TITLE VI: GENERAL PROVISIONS

WAIVER OF RESTRICTIONS

SEC. 601. The Secretary of each military department may proceed to establish or develop installations and facilities under this Act without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on land includes authority for surveys, administra-

tion, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

APPROPRIATIONS LIMITATIONS

SEC. 602. There are authorized to be appropriated such sums as may be necessary for the purposes of this Act, but appropriations for public works projects authorized by titles I, II, III, IV, and V, shall not exceed—

(1) for title I: Inside the United States, $835,392,000; outside the United States, $345,693,000; or a total of $1,181,085,000.

(2) for title II: Inside the United States, $379,455,000; outside the United States, $22,811,000; or a total of $402,269,000.

(3) for title III: Inside the United States, $213,759,000; outside the United States, $139,497,000; or a total of $353,256,000.

(4) for title IV: A total of $32,300,000.

(5) for title V: Military family housing and homeowners assistance, $1,454,640,000.

COST VARIATIONS

SEC. 603. (a) Except as provided in subsections (b) and (c), any of the amounts specified in titles I, II, III, and IV of this Act, may, at the discretion of the Secretary of the military department or Director of the defense agency concerned, be increased by 5 per centum when inside the United States (other than Hawaii and Alaska), and by 10 per centum when outside the United States or in Hawaii and Alaska, if he determines that such increase (1) is required for the sole purpose of meeting unusual variations in cost, and (2) could not have been reasonably anticipated at the time such estimate was submitted to the Congress.

(b) When the amount named for any construction or acquisition in title I, II, III, or IV of this Act involves only one project at any military installation and the Secretary of the military department or Director of the defense agency concerned determines that the amount authorized must be increased by more than the applicable percentage prescribed in subsection (a), he may proceed with such construction or acquisition if the amount of the increase does not exceed by more than 25 per centum the amount named for such project by the Congress.

(c) When the Secretary of Defense determines that any amount named in title I, II, III, or IV of this Act must be exceeded by more than the percentages permitted in subsections (a) and (b) to accomplish authorized construction or acquisition, the Secretary of the military department or Director of the defense agency concerned may proceed with such construction or acquisition after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either (1) thirty days have elapsed from date of submission of such report, or (2) both Committees have indicated approval of such construction or acquisition. Notwithstanding the provisions in prior military construction authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(d) Notwithstanding the foregoing provisions of this section, the total cost of all construction and acquisition in each such title may not exceed the total amount authorized to be appropriated in that title.

(e) No individual project authorized under title I, II, III, or IV of this Act for any specifically listed military installation for which the current working estimate is $100,000 or more may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 per centum; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 per centum the amount authorized for such project by the Congress, until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for such reduction in scope or increase in cost has been submitted to the Committees on Armed Services of the Senate and House of Representatives, and either (A) thirty days have elapsed from date of submission of such report, or (B) both Committees have indicated approval of such reduction in scope or increase in cost as the case may be.

(f) The Secretary of Defense shall submit an annual report to the Congress identifying each individual project which has been placed under contract in the preceding twelve-month period and with respect to which the then current working estimate of the Department of Defense based upon bids received for such project exceeded the amount authorized by the Congress for that project by more than 25 per centum. The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 per centum in order to permit contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

CONSTRUCTION SUPERVISION

SEC. 604. Contracts for construction made by the United States for performance within the United States and its possessions under this Act shall be executed under the jurisdiction and supervision of the Corps of Engineers, Department of the Army; or the Naval Facilities Engineering Command, Department of the Navy; or such other department or Government agency as the Secretaries of the military departments recommend and the Secretary of Defense approves to assure the most efficient, expeditious, and cost-effective accomplishment of the construction herein authorized. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives a breakdown of the dollar value of construction contracts completed by each of the several construction agencies selected together with the design, construction supervision, and overhead fees charged by each of the several agents in the execution of the assigned construction. Further, such contracts (except architect and engineering contracts which, unless specifically authorized by the Congress shall continue to be awarded in accordance with presently established procedures, customs, and practice) shall be awarded, insofar as practicable, on a competitive basis to the lowest responsible bidder, if the national security will not be impaired and the award is consistent with chapter 137 of title 10, United States Code. The Secretaries of the military departments shall report annually to the President of the Senate and the Speaker of the House of Representatives with respect to all contracts awarded on other than a competitive basis to the lowest responsible bidder. Such reports shall also show, in the case of the ten architect-engineering firms which, in terms of total dollars, were awarded the most business; the names of such firms; the total number of separate contracts awarded each such firm; and the total amount paid or to be paid in the case of each such action under all such contracts awarded such firm.

REPEAL OF PRIOR AUTHORIZATIONS; EXCEPTIONS

SEC. 605. (a) As of January 1, 1979, all authorizations for military public works, including family housing, to be accomplished by the Secretary of a military department in connection with the establishment or development of installations and facilities, and all authorizations for appropriations therefor, that are contained in titles I, II, III, IV, and V of the Act of September 30, 1976, Public Law 94-421 (90 Stat. 1349), and all such authorizations contained in Acts approved before September 30, 1976, and not superseded or otherwise modified by a later authorization are repealed except—

(1) authorizations for public works and for appropriations therefor that are set forth in those Acts in the titles that contain the general provisions;

(2) authorizations for public works projects as to which appropriated funds have been obligated for construction contracts, land acquisition, or payments to the North Atlantic Treaty Organization, in whole or in part, before January 1, 1979, and authorizations for appropriations therefor.

(b) Notwithstanding the repeal provisions of section 605 of the Act of September 30, 1976, Public Law 94-431 (90 Stat. 1349, 1364), authorizations for the following items shall remain in effect until January 1, 1980:

(1) Fargo Building modernization in the amount of $8,000,000 at Boston, Massachusetts, that is contained in title I, section 101 of the Act of October 7, 1975 (89 Stat. 546), as amended.

(2) Pier Utilities construction in the amount of $633,000 at Fort Eustis, Virginia, that is contained in title I, section 101 of the Act of October 7, 1975 (89 Stat. 546), as amended.

(3) Academic Building construction in the amount of $5,315,000 at Fort Huachuca, Arizona, that is contained in title I, section 101 of the Act of October 7, 1975 (89 Stat. 547), as amended.

(4) Solar Energy Plant construction in the amount of $690,000 at Fort Huachuca, Arizona, that is contained in title I, section 101 of the Act of October 7, 1975 (89 Stat. 547), as amended.

(5) Relocate the weapons range from the Culebra Complex in the amount of $12,000,000 for the Atlantic Fleet Weapons Range, Roosevelt Roads, Puerto Rico, that is contained in title II, section 204 of the Act of November 29, 1973 (87 Stat. 688), as amended and extended in section 605(b)(H) of the Act of October 7, 1975 (89 Stat. 545), as amended.

(6) Solar Observation Facilities construction in the amount of $2,011,000 at various locations worldwide, that is contained in title III, section 301 of the Act of October 7, 1975 (89 Stat. 555), as amended.

UNIT COST LIMITATIONS

SEC. 606. None of the authority contained in titles I, II, III, and IV of this Act shall be deemed to authorize any building construction projects inside the United States in excess of a unit cost to be determined in proportion to the appropriate area construction cost index, based on the following unit cost limitations where the area construction index is 1.0:

(1) $42.00 per square foot for permanent barracks;

(2) $45.00 per square foot for bachelor officer quarters; unless the Secretary of Defense, or his designee, determines that because of special circumstances, application to such project of the limitations on unit costs contained in this section is impracticable. Notwithstanding the limitations contained in prior Military Construction Authorization Acts on unit costs, the limitations on such

costs contained in this section shall apply to all prior authorizations for such construction not heretofore repealed and for which construction contracts have not been awarded by the date of enactment of this Act.

INCREASES FOR SOLAR HEATING AND SOLAR COOLING EQUIPMENT

SEC. 607. The Secretary of Defense shall encourage the utilization of solar energy as a source of energy for projects authorized by this Act where utilization of solar energy would be practical and economically feasible. In addition to all other authorized variations of cost limitations or floor area limitations contained in this Act or prior Military Construction Authorization Acts, the Secretary of Defense, or his designee, may permit increases in the cost limitations or floor area limitations by such amounts as may be necessary to equip any projects with solar heating and/or solar cooling equipment.

AMEND MINOR CONSTRUCTION AUTHORITY; INCLUDE DEFENSE AGENCIES

SEC. 608. Section 2674 of title 10, United States Code, is amended as follows:

(1) In the first sentence of paragraphs (a) and (f) after "The Secretary of a military department" insert, "or the Director of the Defense Agency concerned."

(2) In paragraph (b) strike the period and insert after the last word "or the Director of the Defense Agency concerned."

(3) Add a paragraph (g) as follows:

"(g) The Directors of the Defense Agencies will execute this authority by or through a military department designated by the Secretary of Defense as prescribed in section 2682 of this title."

USE OF PROPERTY SALE PROCEEDS FOR NATIONAL GUARD FACILITIES

SEC. 609. (a) The Secretary of Defense, or his designee, is directed to report to the General Services Administration for disposal at fair market value the forty-three acres, more or less, together with any improvements thereon, formerly known as the Air Force San Patricio Fuel Storage Site, San Juan, Puerto Rico. The net proceeds from the sale may be used to construct new facilities for the Puerto Rico National Guard in accordance with Department of Defense criteria.

(b) Section 804 of Public Law 91-142, December 5, 1969, is repealed.

USE OF PROCEEDS FROM TIMBER SALES

SEC. 610. Section 2665 of title 10, United States Code, is amended by substituting the following for the present subsection (d):

"Appropriations of the Department of Defense available for operation and maintenance may be reimbursed during the current fiscal year for all expenses of production of lumber or timber products pursuant to this section from amounts received as proceeds from the sale of any such property."

REVISION IN NUMBER OF NAVAL DISTRICTS

SEC. 611. (a) Chapter 516 of title 10, United States Code, is repealed.

(b) The table of chapters at the beginning of subtitle C of title 10, United States Code, of subtitle C of title 10, United States Code, are each amended by striking out "516. Naval Districts . . . 5221".

SHORT TITLE

SEC. 612. Titles I, II, III, IV, V, and VI of this Act may be cited as the "Military Construction Authorization Act, 1978."

TITLE VII: GUARD AND RESERVE FORCES FACILITIES AUTHORIZATION FOR FACILITES

SEC. 701. Subject to chapter 133 of title 10, United States Code, the Secretary of Defense may establish or develop additional facilities for the Guard and Reserve Forces, including the acquisition of land therefor, but the cost of such facilities shall not exceed—

(1) For the Department of the Army:

(a) Army National Guard of the United States, $44,377,000.

(b) Army Reserve, $41,390,000.

(2) For the Department of the Navy: Naval and Marine Corps Reserves, $19,800,000.

(3) For the Department of the Air Force:

(a) Air National Guard of the United States, $37,300,000.

(b) Air Force Reserve, $10,100,000.

WAIVER OF CERTAIN RESTRICTIONS

SEC. 702. The Secretary of Defense may establish or develop installations and facilities under this title without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529), and sections 4774 and 9774 of title 10, United States Code. The authority to place permanent or temporary improvements on lands includes authority for surveys, administration, overhead, planning, and supervision incident to construction. That authority may be exercised before title to the land is approved under section 355 of the Revised Statutes, as amended (40 U.S.C. 255), and even though the land is held temporarily. The authority to acquire real estate or land includes authority to make surveys and to acquire land, and interests in land (including temporary use), by gift, purchase, exchange of Government-owned land, or otherwise.

SHORT TITLE

SEC. 703. This title may be cited as the "Guard and Reserve Forces Facilities Authorization Act, 1978."

TITLE VIII

SEC. 801. The Secretary of Defense and the Secretaries of the Army, Navy, and Air Force may establish or develop military installations and facilities by acquiring, constructing, converting, rehabilitating or installing permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities and equipment in fiscal year 1979 in such amounts as may be necessary.

SEC. 802. This title may be cited as the "Military Construction Authorization Act, 1979."

THE SECRETARY OF DEFENSE,
Washington, D.C., March 29, 1977.

Hon. WALTER MONDALE,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is forwarded herewith a draft of legislation "To authorize certain construction at military installations and for other purposes."

This proposal is a part of the Department of Defense legislative program for FY 1978. The Office of Management and Budget on March 11, 1977, advised that its enactment would be in accord with the program of the President.

Appropriations in support of Titles I through VII of this legislation are discussed in the Budget of the United States Government for the FY 1978.

Titles I, II, III, and IV of this proposal would authorize $1,968,910,000 in new construction for requirements of the Active Forces, of which $1,181,085,000 are for the Department of the Army; $402,269,000 for the Department of the Navy; $353,256,000 for the Department of the Air Force; and $32,300,000 for the Defense Agencies.

Title V contains legislative recommendations considered necessary to implement the Department of Defense family housing and homeowners assistance programs and authorizes $1,454,640,000 for costs of those programs for FY 1978.

Title VI contains General Provisions generally applicable to the Military Construction Program.

Title VII totaling $152,967,000 would authorize construction of the Guard and Reserve Forces of which $44,377,000 is for the Army National Guard; $41,390,000 for the Army Reserve; $19,800,000 for the Naval and Marine Corps Reserves; $37,300,000 for the Air National Guard; and $10,100,000 for the Air Force Reserve. These authorizations are in lump sum amounts and will be utilized in accordance with the requirements of chapter 133, title 10, United States Code.

Title VIII provides authorization as may be necessary beginning for FY 1979 and meets the basic requirements of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344).

Additionally, included in Title I, pursuant to section 138 of title 10 United States Code, as amended, is authorization for construction of production base support at Army Ammunition Facilities, for which appropriations are being requested.

The projects which would be authorized by this proposal have been reviewed to determine if environmental impact statements are required in accordance with Public Law 91-190. Required environmental statements will be submitted to the Congress by the Military Departments.

Sincerely,

C. W. DUNCAN, Jr.,
Deputy.

By Mr. DOMENICI (for himself and Mr. HUMPHREY):

S. 1167. A bill to establish a research and development effort resulting in the commercialization of native latex rubber; to the Committee on Agriculture, Nutrition, and Forestry.

NATIVE LATEX COMMERCIALIZATION ACT OF 1977

Mr. DOMENICI. Mr. President, during the past decade our Nation has become acutely sensitive to the reality that we are dependent upon foreign sources for most of our petroleum. As critical as this problem is, I fear that it has drawn our attention away from the fact that we depend upon outside sources for many of our critical raw materials.

One such material is natural rubber, a commodity which is vital to our economy, defense, and general well-being. All of the world's supply of natural rubber is manufactured from latex of the Hevea tree, 93 percent of which is produced in Southeast Asia. The United States imports nearly a million tons of this material annually, at a cost of a half-billion dollars.

Natural rubber makes up about 35 percent of our total rubber consumption, the remainder coming from synthetic rubber. Synthetic rubber is made from petroleum.

While the Hevea tree is a tropical species not at all suited to temperate region, there exists another group of plants belonging to the genus Parthenium, which are native to Texas and Mexico, and which contain commercial quantities of a very high quality latex. These plants are commonly called Guayule. Guayule has been recognized for many decades as a latex producer and during World War II the U.S. Government undertook a sizable research and development program to cultivate this plant in the Southwest and manufacture rubber from it. Called the emergency rubber project, this effort resulted in the creation of a wealth of research data on Guayule as well as a million and a half tons of latex.

When the war ended the emergency rubber project was scrapped due to some rather minor processing difficulties, which have since been resolved, and because of the availability of large quantities of inexpensive synthetic rubber. During the past 30 years there have been attempts by private industry to produce Guayule rubber. None were successful. The primary reason for these failures has been an inability to achieve sufficiently high yields per acre of latex to make such operations economical.

It is my firm belief, after considerable study of this matter, that a soundly conceived and aggressively conducted research and development program could result in a commercially viable Guayule latex industry in this country within 5 to 10 years. This industry would not only free our Nation of its dependence on foreign sources of natural rubber, but it would also provide exceptional opportunities for agriculture, industry, and economic growth for depressed peoples—especially American Indians—now living in the arid and semiarid regions of the United States.

I am today sending to the bench, on behalf of myself and my esteemed colleague, Senator HUMPHREY, the Native Latex Commercialization Act of 1977. This bill would establish a program within the Agricultural Research Service to carry out a technology development and transfer effort which will lay the foundation for commercialization of Guayule latex in the United States.

Because the Guayule plant requires about 4 years to mature, an adequate research and development program would require at least that many years to produce useful results. Accordingly, the bill stages the authorization out over a 5-year period. At the end of that period Congress may, of course, renew the legislation contingent upon the success of the project and its nearness to completion.

I urge my colleagues in the Senate to take affirmative action on this legislation and I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1167

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Native Latex Commercialization Act of 1977".

SEC. 2. Congress recognizes that natural latex rubber is a commodity of vital importance to the economy, defense and general well-being of the Nation. The United States is totally dependent upon foreign sources for its supplies of natural (*Hevea*) latex, which total about one million tons per year. Synthetic rubber, which is manufactured from petroleum feedstocks, cannot be substituted for natural rubber. The Congress further recognizes that certain plant species of the genus *Parthenium*, native to Texas and Mexico, as well as other plants, are known to contain commercial quantities of extractable latex. During World War II, through research carried out in the Emergency Rubber Project, the United States demonstrated that Parthenium latex is a promising and realistic substitute to Hevea latex. Further research and development are needed, especially into methods for increasing latex yields, before commercialization of native Parthenium latex by private industry is feasible. Such commercialization would not only relieve the Nation's dependence upon foreign latex sources, but it would also provide a valuable cash crop for arid and semiarid regions of the United States and additional industry and employment opportunities for people of the United States. It is the policy of Congress, therefore, to provide for the development and demonstration of economically feasible means of culturing Parthenium, and other hydrocarbon-containing plant species, for the extraction of commercial latex and other products.

SEC. 3. As used in this Act—

(1) The term "Secretary" means the Secretary of Agriculture.

(2) The term "State" means each of the fifty States, the District of Columbia, and the Commonwealth of Puerto Rico.

(3) The term "commercialization" refers to the stage in the development or advancement of a technology at which point private enterprise is willing to invest in a full scale production facility.

(4) The term "native" refers to hydrocarbon-containing plants which may be cultured in North America, especially members of the genus *Parthenium* (known as guayule).

SEC. 4. The Secretary of Agriculture (hereinafter referred to as the "Secretary") is authorized and directed to coordinate and carry out research leading to and culminating in the commercialization of latex from Parthenium (guayule) or other hydrocarbon-containing plants.

SEC. 5. The Secretary shall conduct, promote, and sponsor basic and applied research, technology development, and technology transfer leading to effective and economical methods for large scale culturing of plantations and the extraction and production of latex from such crops. Such research will include, but not be limited to—

(1) carrying out extensive seed collections from wild plants in Texas, Mexico, and other areas and borrowing or purchasing seeds from other sources;

(2) developing a stockpile of Parthenium seeds, such stockpile to be appropriately classified and stored at a suitable facility;

(3) carrying out breeding and selection programs for the purpose of improving latex yields, expanding insect and disease resistance and broadening the ranges of drought and cold tolerance of the Parthenium plant;

(4) establishing a system of experimental plantings in arid and semi-arid regions of the United States having suitable climatic and soil conditions for the culture of Parthenium;

(5) carrying out specific studies on the effects of irrigation on plant growth and latex yield and survival potential;

(6) developing equipment needed to carry out nursery operations, planting, cultivating, harvesting, transporting the crop, and other necessary agricultural activities;

(7) further refining present extraction and manufacturing technologies; and

(8) analyzing the economic feasibility of private production and manufacture of native Parthenium latex.

SEC. 6. The Secretary shall establish and maintain a bank of all pertinent research data on native latex including extant United States government publications and records from the Emergency Rubber Project. Such data shall be made available to other Federal and State agencies and private persons who are interested or involved in native latex research, development, or manufacture.

SEC. 7. The Secretary is authorized and encouraged to enter into cooperative projects with the government of Mexico in order to accomplish appropriate aspects of the research and development provided for in this Act. Such cooperative projects shall include, but not be limited to, projects to determine the economic feasibility of latex extraction and processing.

SEC. 8. The Secretary is authorized to accept financial or other assistance from any State or public agency to aid in carrying out the provisions of sections 4, 5, and 6 of this Act and to enter into contracts with respect to such assistance and to enter into agreements with any State or public agency for the purpose of demonstrating, transferring, or applying results of research relating to native latex.

SEC. 9. In carrying out the provisions of this Act, the Secretary is authorized to—

(1) make grants to educational institutions and scientific organizations and enter into contracts with such institutions and organizations and with industrial or engineering firms;

(2) acquire the services of biologists, agronomists, geneticists, chemists, engineers, economists, and other personnel by contract or otherwise;

(3) utilize the facilities of Federal scientific laboratories;

(4) establish and operate necessary facilities, pilot plants and plantations to carry out the continuous research, testing, development, and programming necessary to effectuate the purposes of this Act;

(5) acquire secret processes, technical data, inventions, patent applications, patents, licenses, land, and interests in land (including water rights), plants and facilities, and other property or rights by purchase, license, lease, or donation;

(6) assemble and maintain pertinent and current literature and publications, patents and licenses, land and interests in land;

(7) cause onsite inspections to be made of promising projects, domestic or foreign, and, in the case of projects located in the United States, cooperate and participate in their development when the Secretary determines that the purpose of this Act will be served thereby;

(8) foster and participate in regional, national, and international conferences relating to native latex culture or manufacture;

(9) coordinate, correlate, and publish information with a view to advancing the development of native latex technology; and

(10) cooperate with other Federal departments and agencies, with State and local departments, agencies, and instrumentalities, and with interested persons, firms, institutions, and organizations.

SEC. 10. In carrying out the provisions of this Act, the Secretary shall insure that his activities are closely coordinated with the activities of other Federal agencies such as the Department of Interior, National Science Foundation, Department of Commerce, Bureau of Indian Affairs, Federal Energy Administration, Energy Research and Development Administration, Economic Development Administration, Department of Defense, Treasury Department, Federal Preparedness Agency, and others in order to prevent duplication of effort, ensure compatability with ongoing programs and policies, and to fully exploit the opportunities inherent in the culture and manufacture of native latex.

SEC. 11. Relative to the definitions of, title to, and licensing of inventions made or conceived in the course of or under any contract or grant pursuant to this Act, and notwithstanding any other provisions of law, the provisions of sections 9 and 10 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908–9) shall govern.

SEC. 12. The Secretary may dispose of any latex, resin, wax, pulp, and any other by-products resulting from operations under this Act. All moneys received from dispositions under this section shall be paid into the Treasury as miscellaneous receipts.

SEC. 13. The Secretary may issue rules and regulations necessary to effectuate the purposes of this Act.

SEC. 14. The Secretary shall submit to the President and the Congress, no later than December 31, 1979, and each year thereafter through 1981, a report on the status of the research, development, and other work underway under sections 4, 5, 6, and 7 of this Act. Such report shall (1) recommend specific directions for further research, development and other work, and (2) recommend funding levels for various elements of the overall project.

SEC. 15. There is authorized to be appropriated for the fiscal years beginning October 1, 1977, through October 1, 1981, the sum of $60,000,000 to carry out the purposes of this Act, such sum to remain available until expended.

By Mr. ABOUREZK:

S. 1168. A bill to amend the act entitled "An Act to provide for certain payments to be made to local governments by the Secretary of the Interior based upon the amount of certain public lands within the boundaries of such locality," approved October 30, 1976; to the Committee on Energy and Natural Resources.

Mr. ABOUREZK. Mr. President, today I am introducing legislation to amend the Payments in Lieu of Taxes Act (Public Law 94-565) which passed the Congress on the last day of the 94th Congress. Due to the rush to adjourn in the closing hours of the session, two of my amendments adopted in committee were dropped because their adoption would have required a House-Senate conference. If a conference had been required, the entire bill would have been placed in jeopardy because of the obvious lack of time to consider my amendments.

As a result, I am introducing this legislation which contains the two amendments from last year. This bill has two purposes: First, it alters the allocation formula; and second, it adds three types of Indian lands for which a Federal payment will be made, under Public Law 94-565.

Mr. President, let me briefly explain the two parts of the bill. The allocation formula as written in the present law begins with an allocation of 75 cents per acre for all the eligible lands in the county. This basic allotment is modified in two ways.

First, there is a limit based on population. This limit establishes a maximum for payments to the county based on so much per capita of population—the amount per capita is on a sliding scale with decreasing dollar amounts as the population size increases. The other modification to the 75-cents-per-acre payment is that it is reduced dollar for dollar on the basis of any Federal receipts from those eligible lands—such as from timber sales, mineral leases, and so forth—actually received by the county.

As Public Law 94-565 reads, the population limit is applied first and then the offsetting receipts are deducted. The legislation that I am proposing would deduct the offsetting receipts first and then apply the population limit if necessary. This is a more logical sequence of calculations and it can make a good deal of difference to a county which has sparse population and fairly substantial receipts.

For example, Jackson County, S. Dak., includes 120,457 eligible acres and would have a basic allocation of $90,410. It also receives $14,669 in current payments. Since its population is 1,531, the applicable population limit is $76,550. If that limit is applied first, then the offsetting receipts are deducted from the population limit and the county receives $61,881—or $76,550 minus $14,669. However, under my proposed legislation the receipts would be offset against the larger basic allocation—$90,410 minus $14,669—and that result, $75,741, would then be compared to the population limit of $76,550. As a result, Jackson County would receive an additional $13,860.

The second change I am proposing is to add three types of Indian land—BIA Administration land, tribal trust land, and individual trust lands, to those Federal lands now eligible to receive a Federal payment. This change would add an approximately 52 million acres to the approximately 657 million acres currently eligible for payment under Public Law 94-565.

I think this change is necessary because Indian lands are tax-exempt from the local government tax rolls just as lands currently eligible for a Federal payment are. In addition, Indian lands do not generate revenues and fees to be shared with State and local governments as do other public lands where there may be mineral development, timber production or grazing.

As the Interior Committee Report 94-1262 noted—

> The tax exemption of Indian lands has been a controversial issue in many areas of the country—an issue which has had the tendency to increase tensions between Indians and non-Indians. By including Indian lands in H.R. 9719 (Public Law 94-565) the Committee hopes to mitigate the burdens on local governments of the tax exemption of those lands and thus reduce those tensions.

Let me remind the Senate that the payments under Public Law 94-565 go to the countries which contain eligible Federal lands.

I am submitting two tables which I hope will provide some useful information. This information was provided to me by the Department of the Interior.

Table No. 1 lists acreage by State under the jurisdiction of the Bureau of Indian Affairs as of June 30, 1975. If this legislation is enacted, this acreage will be eligible for payment under Public Law 94-565.

Table No. 2 lists the estimated payments in selected States with substantial BIA acreage.

Mr. President, I ask unanimous consent that the tables be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1

Acreage by State:	*Total*
Alaska	$117,121.64
Arizona	19,886,666.69
California	546,695.63
Colorado	755,222.54
Florida	79,347.36
Idaho	827,478.13
Iowa	4,169.25
Kansas	26,561.44
Louisiana	262.23

Total	38,460,609	46,800,711	8,340,102

By Mr. HUMPHREY:

S. 1169. A bill to amend and extend the Agricultural Trade Development and Assistance Act of 1954, as amended; to the Committee on Agriculture, Nutrition, and Forestry.

A PROPOSAL TO STRENGTHEN AMERICAN FOREIGN FOOD ASSISTANCE PROGRAMS

Mr. HUMPHREY. Mr. President, throughout my career in the Congress, I have been deeply involved in our foreign food assistance programs. I am proud to have been an originator of the legislation. From the inception of Public Law 480, I have proposed ways that the program could be structured better to address humanitarian and development needs in the less-developed world. I, therefore, take a certain amount of personal pride in the achievements of our food for peace program over the past 27 years.

Yet, every activity requires periodic review. The successes of Public Law 480 are no reason why continued imagination cannot yield ways to further strengthen and improve this program. And occasionally time or circumstance uncovers certain deficiencies in our food for peace activities.

It is this concern over increasing food requirements of the developing world and the need to provide for economic opportunities in rural areas of such nations that leads me to propose comprehensive changes today in Public Law 480.

The precipitous decline in the volume of food assistance during a year of exceptional need in 1973-74 led us to embark upon a major review of Public Law 480 and the effectiveness with which it was responding to the humanitarian ob-

jectives of the Act. Furthermore, the predominance of foreign policy priorities in the allocation of Public Law 480 title I concessional financing of commodity sales suggested the need to review the balance between the respective market development, foreign policy and humanitarian purposes of the act.

Throughout 1975, I organized several task forces of individuals with experience in foreign food and development assistance to suggest ways to provide for a better balance in the objectives of Public Law 480 in the allocation process. These groups looked at ways to improve the responsiveness of Public Law 480 to the food needs and availabilities of developing nations with an emphasis on meeting humanitarian priorities. The task forces also reviewed ways to strengthen the linkage between food assistance and agricultural development.

The product of this review was S. 1654, a bill which I introduced in the last Congress. This bill embodied many of the concepts which were later included in the International Development and Food Assistance Act of 1975, H.R. 9005, which was enacted in December of that year.

The primary purpose of the bill I am offering today is to extend the program authority for 5 years, refine some of the concepts which were introduced in the International Development and Food Assistance Act of 1975, and provide for certain other changes in Public Law 480 to improve the effectiveness of our foreign food assistance activities.

IMPROVEMENTS IN TITLE I ALLOCATION FORMULA

My bill would modify the title I allocation formula which requires that three-quarters of the funds available for concessional financing of agricultural exports under Public Law 480 be provided to countries with an annual per capita gross national product of $300 or less.

My bill would raise the minimum income criterion which has become increasingly restrictive, due to inflation, and link it to the standard used for development loans to the poorest nations by the International Development Association of the World Bank. This standard, which has recently been raised to $520 per capita gross national product, would be subject to future adjustment as dictated by inflation. The President also would be permitted to reallocate that portion of title I financing which is not needed by the poorest nations.

While I was the author of the title I allocation formula, I recently have become concerned that it may, in fact, lead to a situation where it compels the President to dump commodities on countries which do not at the time require assistance. Since the funding available for Public Law 480 financing remains relatively constant, but unit prices of commodities shipped under the program can vary considerably, the total volume of shipments can swing widely from year to year. Allowing the President some flexibility to allocate commodities on the basis of the need and absorptive capacities of recipient countries would discourage the practice of shipping Public Law 480 commodities in such quantities as to depress the prices and incomes of farm producers in such countries and to impair efforts to maintain incentives for longer term agricultural development.

My bill would place the burden on the President, however, to establish that food assistance is not required by those poorest nations—after every reasonable attempt has been made to make title I financing available to such countries—before he may reallocate any portion of title I. This adjustment will help us develop an appropriate emphasis on the qualitative aspects of food aid rather than continue to restrict our primary concern to the quantitative aspects of food distribution.

ASSURING ADEQUATE FOOD SUPPLIES UNDER TITLE II

Under my bill, the minimum quantity of food required to be distributed under the title II grant programs would be increased annually from 1.3 to 1.6 million metric tons. Of this amount, the minimum to be distributed through U.S. nonprofit voluntary agencies would be increased from the present 1 million metric tons to 1.3 million metric tons.

The purpose of this minimum level is to assure the continued availability of adequate food supplies for ongoing programs conducted under title II. Such programs, mainly for maternal and child feeding purposes, must have some assurance of commodity availability before the recipient nations can commit their own resources and personnel to projects based upon title II donations. The greater continuity in supply which this minimum provides would permit more effective long term programing around specific developmental and nutritional objectives.

Historically, title II programing has averaged well above 2½ million metric tons annually. But recently, the levels were precipitously cut back to a little over 1 million tons. It is my hope that our title II donation programs can be rebuilt and that programing of 2 million tons and above can be reached over the years ahead.

A NEW FOOD FOR DEVELOPMENT PROGRAM

The core of my proposal is a new title III, or food for development program. This would be a refined version of the "grant back" authority provided under the 1975 amendments to the act. This title would permit the President to waive repayment of Public Law 480 concessional loans on a carefully controlled basis, provided that the local currency proceeds be used for agreed upon developmental purposes.

The purpose of the food for development program would be to provide an option to title I concessional financing, under which incentives would be provided to the recipient government to channel additional resources into rural and agricultural development.

I wish to stress that the food for development program is an option to title I and would not replace such assistance. I would further stress that the food for development program should be applied in specific circumstances where the need for such resources is clearly evident, where the resources would represent an addition to rather than a replacement for other developmental resources, and where a carefully worked out plan for utilization of the additional resources would be developed by the recipient government in consultation with the U.S. Government.

This suggests that the U.S. Government should move cautiously into such arrangements and expand such programs only after a few pilot projects have been proven successful. The reason for this caution, as well as the need to refine existing authority for loan forgiveness, is to make sure that this program is constructed in such a way as to provide effective and additional development assistance.

Unless such an explicit procedure is laid out in the authorizing legislation, it is possible that at some point this provision may become little more than an excuse for additional concessionality for commodity loans under Public Law 480 rather than an incentive for channeling increased development assistance into rural and agricultural development.

A new title for Public Law 480 which specifically defines a program of additional development assistance should help establish an increased profile for the linkage between food and development assistance that was implied in the enactment of the "grant back authority" in 1975.

ENDING THE FARM SURPLUS DISPOSAL RATIONALE

The time has come to ask whether Public Law 480 is truly a humanitarian program or whether it remains no more than a vehicle for unloading farm surpluses when we have them. Section 401 permits the President to make commodities available under Public Law 480 only after domestic needs, commercial exports, and an adequate carryover have been provided for. In other words, food-for-peace shipments can be made only when commodities are in surplus to the commercial interest.

Our basic sensibilities suggest that the highest priorities be offered humanitarian needs in the allocation of the resources available under Public Law 480. Yet, if properly administered, Public Law 480 can also serve other objectives without diluting the humanitarian impact of the program. This multiplying of purposes has offered a base of support enjoyed by few other programs in the area of foreign affairs.

All of our actions affecting trade with foreign countries affect our foreign policy. Therefore, Public Law 480 can and does impact on the foreign policy objectives of the United States. The heavy programing of Public Law 480 to Southeast Asia for foreign policy reasons in a period of greater need elsewhere, however, was a gross and insensible disregard for the necessary balance of objectives.

But, a more effective and responsible allocation of resources under Public Law 480 when coordinated with a foreign policy strategy which is based upon reasonable obligations of interdependency, rather than on power manipulations, can greatly enhance our position in the international community. Without such a perspective, no amount of congressional suasion or detailed administrative

requirements can provide for a balanced management of program.

Public Law 480 has been used effectively to join and expand markets for U.S. farm commodities, and again, with proper administration of the program, market development activities need not conflict with humanitarian uses of Public Law 480.

But market development should be clearly differentiated from surplus disposal. We do not maintain long-term customers by offering our product only when we have a surplus. Abrupt changes in availability under the program may only lead customers to develop new supply sources.

Of course no transaction under Public Law 480 is entirely for market development, foreign policy or humanitarian purposes. There is or should be some element of each in every activity conducted under this act. But in those cases where market development may be a predominant objective, programing should be coordinated in a broader and long-term strategy which incorporates all the other tools and considerations relevant to the particular market of interest.

THE HUMANITARIAN PRIORITY OF FOOD FOR PEACE

However, the failure to afford appropriate priority to the humanitarian uses of Public Law 480 in several recent cases suggests the need to reaffirm the primacy of this objective.

I am proposing an amendment to section 401 which would permit the President to allocate some part of the supply of a commodity to meet urgent humanitarian requirements abroad. Just as we do not make our church contribution after all our other temporal desires are provided for, a truly humanitarian food aid program must be more than disposal of unwanted surpluses.

Another amendment I am proposing would permit the President to value, for the purpose of reimbursement to the Commodity Credit Corporation, a commodity acquired under domestic price support programs, at the world price rather than at the acquisition price. This is designed to provide flexibility in programing price support commodities which are acquired at prices considerably higher than world prices. Otherwise, the programing of such commodities may very quickly absorb the food aid budget and thereby disrupt normal program operations.

FOR BETTER OVERSIGHT: A SPECIAL TASK FORCE

My bill also establishes new procedures for periodic evaluation of title II and title III program operations. Such a cross-country review can be a useful mechanism to locate strengths and weaknesses in programing, to apply successful approaches in one region to programs in another and to help both the Congress and the President to make constructive changes in the operations of Public Law 480.

Finally, I am proposing that the President create a task force to immediately begin a comprehensive review of the handling, storage, transportation and administrative procedures under Public Law 480. I am deeply concerned about allegations of improprieties by businesses which contract services under Public Law 480. I feel that constructive changes in the operations of Public Law 480 might well be developed through such a review.

For those reasons, my bill would direct the President to establish a special task force to study the organizational arrangements on the administration of Public Law 480, criteria and procedures for the allocation of concessional financing under title I, quality control and storage of Public Law 480 commodities, and contractor services provided under this act.

This task force would submit a report, along with recommendations, to the Congress after 18 months of study.

Mr. President, the proposals I am offering today, I believe, represent a positive step forward in making Public Law 480 an even more effective vehicle for food and development assistance. My bill is the culmination of 3 years of intensive study which included consulations with a wide range of people involved in food and development assistance.

The consideration of the extension of the Public Law 480 offers an opportunity for innovation and imagination with respect to our food-for-peace program. I ask my colleagues to support these efforts and join in strengthening the legislative structure of the activities we all proudly describe as "food for peace."

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1169

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 103(b) of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1703(b)), is amended to read as follows:

"(b) assure that, insofar as possible, all sales under this title are for dollars (or to the extent that sales for dollars under the terms applicable to such sales is not possible, sales for foreign currencies on credit terms no less favorable to the United States than those for development loans made under section 201 of the Foreign Assistance Act of 1961, as amended, and on terms which permit conversion to dollars at the exchange rate applicable to the agreement): *Provided*, That if the President determines that foreign currencies of a specific amount are needed for uses specified in subsections (a), (b), (e), and (h) of section 104 and in title III of this Act, the agreement for credit sales to such country shall (1) provide for the expenditure of such currencies over a specified period not in excess of 60 months, and (2) contain a specific accounting of the uses to which such foreign currencies will be applied. Such payment may be considered as an advance payment of the earliest installments, when received by an agency of the United States Government or, when an agreement pursuant to title III is signed.".

CONFORMING AMENDMENT

SEC. 2. Section 106(b)(2) of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1706(b)), is amended as follows:

(a) by inserting "pursuant to the provisions of title III," in the first sentence thereof immediately after "carry out programs"; and

(b) by inserting immediately before the period at the end thereof "when specifically provided for under a food for development program pursuant to title III of this Act".

REVISION OF THE TITLE I ALLOCATION FORMULA

SEC. 3. Section 111 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1711), is amended by:

(a) striking out "with an annual per capita gross national product of $300 or less" in the first sentence thereof and inserting in lieu thereof "determined as the poorest countries on the basis of the eligibility criteria established for development loans of the International Development Association of the International Bank for Reconstruction and Development";

(b) striking out the second sentence thereof;

(c) by striking out in the third sentence thereof "with a per capita gross national product of $300 or less" and inserting in lieu thereof "determined as the poorest countries on the bass of eligibility criteria established for development loans of the International Development Association of the International Bank for Reconstruction and Development"; and

(d) by striking out in the third sentence thereof "significantly changed circumstances occurring after the initial allocation" and inserting in lieu thereof "inability to effectively program such commodities after having made every reasonable attempt to make available financing of sales of agricultural commodities under the authority of this title to such countries".

REVISION OF TITLE II MINIMUM VOLUME

SEC. 4. Section 201(b) of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1721(b)), is amended as follows:

(a) by striking out "1,300,000" and inserting in lieu thereof "1,600,000"; and

(b) by striking out "one million" and inserting in lieu thereof "1,300,000".

SALE OF TITLE II COMMODITIES TO INCREASE PROGRAM EFFECTIVENESS

SEC. 5. Section 206 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1726), is amended by striking out "purposes specified in section 103 of the Foreign Assistance Act of 1961" and inserting in lieu thereof "increasing the effectiveness of the programs of food distribution and increasing the availability of food commodities provided under this title to the neediest individuals in recipient countries".

FOOD FOR DEVELOPMENT PROGRAM: OBJECTIVE AND CRITERIA

SEC. 6. Section 303 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1692), is amended to read as follows:

"SEC. 303. (a) In order to establish a strong relationship between United States food assistance and efforts by developing countries to increase the availability of food for the neediest individuals in such countries, the President is authorized to encourage the use of the additional resources represented by the concessional financing of agricultural commodities under this Act for agricultural and rural development by permitting the funds accruing from the local sale of such commodities which are used for specified development purposes to be applied against the repayment obligation of governments receiving concessional financing under this Act. The agreement between the United States Government and an eligible developing country government which provides for repayment of the loan obligation to the United

States accruing from the concessional sale of United States agricultural commodities by the use of funds from the sale of such commodities in the participating country for specified development purposes shall be called a 'Food for Development' program.

"(b) The overall goal of assistance under this title shall be to increase the access of the neediest individuals in the recipient country to a growing and improving food supply through activities designed to improve the production, protection, and utilization of food, and to increase the real level of income of the poorest majority in the small farm and rural sector of the recipient country. Assistance authorized under this title shall place the greatest emphasis on activities which effectively assist small farmers, tenants, sharecroppers, and landless agricultural laborers, by expanding their access to the rural economy through services and institutions at the local level, including integrated health delivery systems, increasing employment opportunities, spreading productive investment and services to small towns and outlying rural areas, and otherwise providing opportunities for the poor who are dependent upon agriculture and agriculturally related activities to better their lives through their own efforts.".

FOOD FOR DEVELOPMENT PROGRAM: OPERATIONAL REQUIREMENTS

SEC. 7. Title III of the Agricultural Trade Development and Assistance Act of 1954, as amended, is amended by adding at the end thereof new sections 304 through 309 as follows:

"SEC. 304. (a) Whenever the President, in consultation with the Government of a developing country, determines that such developing country meets the criteria specified in subsections (b) and (c) of this section and could usefully benefit from the sale of United States agricultural commodities (including processed and blended foods) for the purposes of generating funds or distributing such commodities for agricultural and rural development, and improving food distribution and use within such country, the President may designate such country as eligible for a Food for Development program.

"(b) In order to be eligible for a Food for Development program under this section, a country must (1) have a need for external resources to improve its food production, marketing, distribution, and storage systems; (2) meet the criteria used to determine basic eligibility for development loans of the International Development Association of the International Bank for Reconstruction and Development; (3) have the ability to utilize effectively the resources made available by the sale of food commodities under this section for the purposes specified in clause (1); and (4) indicate the willingness to take steps to improve its food production, marketing, distribution, and storage systems and the measures described under subsection (c) of this section.

"(c) In determining whether a country is eligible under subsection (b) of this section for assistance under this title, the President shall consider the following: the priority of agriculture within the total development plan, the financial, foreign exchange, manpower and other resources allocated to the agricultural sector, and the adequacy of planning; the quality and extent of the rural infrastructure, especially farm-to-market roads and improved land; adequacy of rural institutions; the orientation of necessary services, such as agricultural marketing, credit extension, and research devoted to small farmer needs; emphasis on labor-intensive production systems and techniques; the extent of both public and private mobilization of rural savings; and the geographic organization of development.

"SEC. 305. (a) A country designated as eligible and wishing to participate in a Food for Development program shall formulate, with the assistance of the United States Government and where appropriate, international agencies as well as United States voluntary agencies or private entities, a multiyear use proposal which shall be submitted to the President. Such proposal shall indicate the annual value of agricultural commodities proposed to be financed under the authority of title I of this Act pursuant to the provisions of this title, and a specific accounting of the intended uses of the funds generated from the sale of such commodities, on an annual basis for each year such funds are to be disbursed. Such proposal shall also specify the nature and magnitude of problems to be affected by the effort, present targets in quantified terms, insofar as possible, and a definition of the relationships and linkages between the various projects or activities to be supported.

"(b) The multiyear utilization proposal for any Food for Development program shall include, but not be limited to, a statement of how assistance under such a program will be integrated into that country's overall development plans and with other forms of bilateral and multilateral development assistance, including assistance made available under section 103 of the Foreign Assistance Act or under any other title of this Act.

"(c) In his review of any utilization proposal for a Food for Development program the President shall be satisfied that such assistance complements, but does not replace, funds which might have otherwise been made available under section 103 of the Foreign Assistance Act of 1961, or any other program of bilateral or multilateral assistance, or under the development program of the country desiring to initiate a Food for Development program.

"SEC. 306. (a) Whenever a utilization proposal has been agreed upon by the President and the participating country, the Commodity Credit Corporation is authorized to furnish credit under the authority of title I of this Act to the participating country for the purchase of a specific annual value of agricultural commodities to be delivered over a period of not greater than five years, as the case may be, at terms no less favorable to the United States than the minimum rate required by section 201 of the Foreign Assistance Act of 1961 for loans made under that section.

(b) Notwithstanding any other provision of this Act, no payment except as provided for under this title shall be required of the recipient government as a part of any agreement to finance the sale of agricultural commodities pursuant to a Food for Development program.

"SEC. 307. Funds generated from the sale of agricultural commodities by any participating country under this title shall be held in a special account where practicable to be disbursed for the specific uses described in the approved multiyear Food for Development program of such country. The amount of funds disbursed for such purposes shall be considered as an advance payment of the earliest installments of the loan obligation to the Commodity Credit Corporation at rates of exchange applicable to the agreement unless the amount of the disbursement for such purposes creates an outstanding balance in the special accounts established above which cannot be disbursed, within a period of two calendar years through normal program operations budgeted for the participating country's Food for Development program operations. Payments may not be credited against the repayment of the loan obligation to the Commodity Credit Corporation until such outstanding balance is reduced.

"SEC. 308. Not more than one year after the signing of an agreement with any country under this title and each year thereafter for the period of agreement, the government of the participating country, with the assistance of the United States Government, shall submit a comprehensive report to the President on the activities under the Food for Development program for such country, including but not limited to, a specific accounting for funds generated, their specific uses, and the outstanding balances at the end of the most recent fiscal year. Such report shall summarize the utilization proposal for the Food for Development program; and compare results with projected targets. Such annual report may also include recommendations for modification and improvement in the uses of funds under the Food for Development program of such country. The President shall suspend shipments under a Food for Development program for which no such report has been received after ninety days following the date on which such report is due.

"SEC. 309. Each year the President shall review the disposition of all agreements providing for the use of the proceeds from the sale of agricultural commodities pursuant to this title for which such funds had not been fully disbursed the preceding year. The results of such review shall be included in the annual report to the Congress required under section 408(a). If the President finds that such currencies are not being disbursed according to the provisions of such agreement, he shall not extend financing for sales under this title during the following fiscal year or until the situation is remedied, whichever occurs first.".

AVAILABILITY REQUIREMENTS FOR DISTRIBUTION OF COMMODITIES

SEC. 8. Section 401 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1731), is amended by inserting "(a)" immediately after the section designation; by striking out the second sentence; and by adding at the end thereof the new subsection (b):

"(b) No commodity shall be available for disposition under this Act if such disposition would reduce the domestic supply of such commodity below that needed to meet domestic requirements, adequate carryover, and anticipated commercial exports as determined by the Secretary of Agriculture at the time of exportation of such commodity. If the President determines and so reports to the Congress with his reasons therefor that any part of the available supply should be used to carry out the humanitarian objectives of this Act, he may allocate any such portion of such supply for distribution under this Act and such distribution shall be made to meet the following priorities: (1) disaster relief, (2) established programs under title II, (3) agreements under title III, and (4) other humanitarian food assistance programs.".

VALUATION OF COMMODITIES ACQUIRED THROUGH PRICE SUPPORT PROGRAMS

SEC. 9. Section 403 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1733), is amended by—

(a) inserting "(a)" immediately after the section designation; and

(b) adding at the end thereof a new subsection (b) as follows:

"(b) Notwithstanding any other provision of law, in determining the reimbursement due Commodity Credit Corporation for all costs incurred under this Act, commodities from Commodity Credit Corporation inventory, which were acquired under a domestic price support program, shall be valued at the export market price therefor, as determined by the Secretary of Agriculture, as of the time the commodity is made available under this Act.".

SEC. 10. Section 408 of the Agricultural

Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1734), is amended by adding at the end thereof a new subsection (c) as follows:

"(c) Beginning October 1, 1978, and at each five year interval thereafter, the President shall submit to the Congress a comparative cross-country evaluation of programs conducted under title II and under title III. Such evaluations shall cover no fewer than five countries sampled from the developing regions (Asia, Africa, Latin America, and the Caribbean), and shall assess the impact, achievements, problems and future prospects for programs under these titles.".

SEC. 11. Section 409 of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1736c), is amended by striking out "December 31, 1977" and inserting in lieu thereof "December 31, 1982".

SPECIAL TASK FORCE ON THE OPERATION OF PUBLIC LAW 480

SEC. 12. (a) It is the sense of the Congress that attention be given to handling, storage, transportation, and administrative procedures in order to make improvements in the operation of Public Law 480. Toward this objective, the President shall appoint a special task force of individuals familiar with the operation of programs conducted under Public Law 480 to review and report upon the operation of this Act.

(b) Such review shall include, but not be limited to, organizational arrangements for the administration of Public Law 480, or parts thereof, title I allocation criteria and procedures, quality control including handling and storage through the first stage of distribution in the recipient country, and regulation of businesses and organizations to which services are contracted under Public Law 480.

(c) No later than eighteen months following enactment of this Act, the President shall transmit to the Congress the report of such task force along with administrative actions he has or intends to take as a result of such report, and recommendations, if any, for legislative changes.

By Mr. KENNEDY:

S. 1170. A bill to strengthen the surplus commodities provision of the Older Americans Act of 1965, and for other purposes; to the Committee on Human Resources.

NUTRITION PROGRAM FOR THE ELDERLY

Mr. KENNEDY. Mr. President, practically every Member of this Chamber, I am sure, has at one time or another visited a nutrition program for senior citizens in his home State. These programs, under title VII of the Older Americans Act, are very popular with the elderly, within their communities, and, I might add, with the Congress. Since 1971 when I introduced the title VII legislation creating the nutrition for the elderly program, every State has joined. There are now 6,000 congregate sites serving over 400,000 meals daily.

In Massachusetts, I have watched our program expand to include facilities serving more than 6,200 elderly daily. Whether in populated Boston or the small town of Andover, the title VII project can be assured of a full dining room of participants eager for the hot meal, entertainment and socialization that these programs offer.

Since 1974, the nutrition programs have been able to supplement their food budgets with commodities from the USDA. The use of commodities has helped many States in their continuing struggle to meet the rising food costs and still serve well-balanced, nutritional meals.

However, lately I have heard reports about financial problems these commodities can also cause. Some of the specific items included in the commodity bulks are substances which cannot be included frequently in the meals for older persons. The infrequent use of such foods causes projects to be faced with storage, transporting and vendor costs. Such costs are reducing the benefits from the commodities program.

This bill would extend the commodities program through fiscal year 1978 to coincide with the authorization period of the title VII program. In addition, it would give the States the option to receive cash in lieu of such commodities. The cash would be financed under section 32 of the Agriculture Adjustment Act which currently supports the commodities program. This would allow the States to choose the benefits of the cash or commodities to serve the particular needs of their elderly. This option has been given to the States under the child care food program and has proven effective.

Mr. President, we are all aware of the effectiveness and worth of the title VII nutrition program. This bill will allow the States more flexibility in determining how the program can best serve their elderly.

By Mr. SCOTT:

S. 1172. A bill to amend the Federal Food, Drug, and Cosmetic Act to provide for the reasonable evaluation of the effects of certain food additives upon human health; to the Committee on Human Resources.

FOOD ADDITIVES AMENDMENT OF 1977

Mr. SCOTT. Mr. President, I send to the desk a bill to amend the Federal Food, Drug, and Cosmetic Act to provide for the reasonable evaluation of the effects of certain food additives upon human health, ask that it be printed and referred to the appropriate committee. The proposal relates to the Federal Government's proposed ban on saccharin, which was based on the findings of a Canadian experiment that the artificial sweetener, when fed in large amounts, caused cancer in some rats. As many of my colleagues have indicated, removal of saccharin from the marketplace would impose hardships on many millions of people who depend on it as a sugar substitute.

In my opinion, it is contrary to the general public interest for the Food and Drug Administration to interfere with individual freedom of choice by banning the artificial sweetener on the basis of highly questionable laboratory testing of rats. We are told that the human equivalent of the massive saccharin dosages fed to the rats would require several hundred diet soft drinks or packets of the sweetener being consumed daily by humans, which I believe is unreasonable. As all of us know, virtually any safe substance produced for human consumption can be lethal or very harmful if ingested in excessive quantities. It has been suggested that citizens generally should be informed of the benefits and risks of using saccharin and allowed to make their own personal decisions. This seems preferable, in my opinion, to allowing the Government to ban a substance without clear and convincing evidence of its significant risk to human health.

Certainly we need to protect public health but not unduly restrict individual choice. An editorial in the current issue of U.S. News & World Report makes the point that—

Americans need not be treated like a mindless mass, with the most personal decisions stuffed down people's throats through restrictive legislation . . . The proper approach with saccharin is to tell people in plain English what may be the risk of using it, and let the people decide for themselves whether the risk is worth taking.

My proposal is aimed at restoring "a rule of reason" to the regulation of food additives. It would require that the Secretary of Health, Education, and Welfare consider whether the benefits derived from reasonable use of an additive outweigh the risk of its continued use. Other provisions provide that the Federal authorities consider "the probable amounts of such additive which can reasonably be expected to be consumed by man," the scientific data available, and "the validity of any tests conducted with regard to such additives."

Mr. President, I hope commonsense will prevail. The proposed ban is untenable, in my opinion, and should be reversed without delay. I ask unanimous consent that several editorials related to saccharin and a copy of my bill be included at this point in the RECORD.

There being no objection, the bill and editorials were ordered to be printed in the RECORD, as follows:

S. 1172

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Food Additives Amendment of 1977".

SEC. 2. Section 409(c) of the Federal Food, Drug, and Cosmetic Act is amended by adding at the end thereof the following new paragraphs:

"(6) Notwithstanding an affirmative determination under the proviso of paragraph (3)(A) of this subsection, the Secretary shall establish a regulation for any additive if he finds that such additive does not present a significant risk to human health. In establishing a regulation under this paragraph the Secretary shall consider among other relevant factors—

"(A) the probable amounts of such additive which can reasonably be expected to be consumed by man,

"(B) the totality of all scientific data (including human experience) which is available in relation to such additive,

"(C) the validity of any tests conducted with regard to such additives, and

"(D) the risk of continued use of such additive relative to the benefits of such continued use.

"(7) Except in a case where the Secretary determines it to be in the immediate public interest to prohibit an additive which has been found to induce cancer in animals, he may not prohibit such additive until such time as a determination has been made under paragraph (6).".

[From U.S. News & World Report, Apr. 4, 1977]

WHY BAN SACCHARIN?

(By Marvin Stone)

How capricious does our Government intend to be—and how far can it be allowed to go—in limiting freedom of choice by individual citizens?

That question is at the heart of the controversy over saccharin, which the Food and Drug Administration proposes to ban because of evidence that it is a cancer-causing agent in force-fed Canadian rats.

Saccharin is the only noncaloric sweetener still legal in this country and is used by virtually every American—in tooth paste, soft drinks, canned fruits and vegetables, gelatin mixes, candy, chewing gum, medicines.

Since its discovery in 1879, saccharin never has been known to produce cancer in humans, so it is not surprising that the FDA has fallen under attack as being arrogant, absurd, unscientific and irrational.

At the moment, whether any or all of that is true is beside the point, because of the Delaney Clause. This 1958 amendment to the Food and Drug Act directs removal from the market of any food additive shown to cause cancer in people or animals. The FDA has no choice, because of the results of the Canadian tests, but to follow the letter of the law.

Because of the public's uproar, hearings have started in Congress to weigh the pros and cons both of the Delaney Clause and of the dangers of saccharin itself.

Experts who testified in late March in favor of banning saccharin stand foursquare behind the Canadian tests in which 17 of 200 rats contracted bladder tumors after being fed saccharin equivalent to human consumption of 200 to 1,200 diet sodas a day. The FDA itself feels the tests are scientifically valid, but the real difficulty, it is admitted, is gauging the implications for humans.

It is the suspicion of some that the FDA, as one arm of the Government, is using its palpably unpopular saccharin decision to bludgeon another arm, the Congress, to do away with the Delaney Clause once and for all. If this be so, it is cruel to use as a weapon the apprehensions of the country's 10 million diabetics who need and use saccharin medically, and of tens of millions of others who sincerely believe that heart disease and cardiovascular ailments are far more common threats to their health than saccharin-induced cancer.

From the start, the whole saccharin mess has been surrounded by a hypocrisy on the part of the Government. What is wrong with allowing Americans to make themselves aware of the arguments for and against the use of saccharin and then leaving them alone to make a free choice—much as they now are free to make a choice whether to smoke tobacco or, for that matter, whether to take the risk of driving on highways that claim 45,000 lives a year?

Surely people in Washington have learned by now that, when common sense has fled from Congress and the bureaucracy, public outrage soon surfaces, and sometimes prevails. Prohibition of whisky, well intentioned as it may have seemed, failed as unenforceable. More recently, seat belts with ignition interlocks provoked a citizen revolt strong enough to force repeal.

The Delaney Clause, while meritorious on the whole, needs to be changed to provide more flexibility. It offers no alternative to an outright ban on saccharin and as such prohibits voluntary decision making.

Americans need not be treated like a mindless mass, with the most personal decisions stuffed down people's throats through restrictive legislation.

The proper approach with saccharin is to tell people in plain English what may be the risk of using it, and let the people decide for themselves whether the risk is worth taking.

As matters stand, the "state" is interfering in decisions that individuals should be making. At best this is capricious and condescending. At worst it is a growing danger and has gone far enough.

[From the Richmond Times Dispatch, Mar. 12, 1977]

KNEE-JERK PATERNALISM

The federal Food and Drug Administration's decision to ban saccharin is a brilliant demonstration of the stupidity of knee-jerk government paternalism. At the mere suggestion that the artificial sweetener might be capable of causing cancer in human beings, the FDA ordered it removed from the market.

And one possible result of the FDA's efforts to "save" people from cancer could be more deaths from heart attacks and other diseases related to obesity. Saccharin, after all, is vitally important to people who need to control their weight.

That the FDA decision was based upon a suggestion rather than overwhelming evidence or incontrovertible scientific fact is clear. The agency acted in response to Canadian studies showing that "very large amounts of saccharin fed to rats produced bladder cancers in some of the animals." No tests have linked saccharin to human cancer, and some experts find it difficult to believe that the average person would ever consume enough of the sweetener to cause this disease. At any rate, many medical experts believe that its importance in the fight against heart disease, diabetes and other ailments related to or affected by diet far outweighs any risks of cancer that it might pose.

The FDA insists that it had no choice but to ban the sweetner, since the so-called Delaney Amendment, which Congress adopted in 1958, provides that nothing which has been found to cause cancer in any species of animal shall be added to food. Well, Congress should change the law. Decisions concerning food additives should be based not upon rigid statutes but upon scientific and medical judgments.

[From the Norfolk Virginian-Pilot, Mar. 14, 1977]

WHY SACCHARIN?

An emotional argument could be made that the Food and Drug Administration is picking on diabetics with its planned prohibition of saccharin. A more dispassionate case could be made that the artificial sweetener is being railroaded on flimsy evidence.

Last week the Federal agency and its Canadian counterpart simultaneously announced intentions to ban saccharin as a potential cancer hazard. The process in Washington, including receiving public reaction, would stall the actual prohibition until midsummer.

The governments' initiatives were based on a Canadian study indicating some tendency to cancer among laboratory rats fed gargantuan quantities of saccharin. That would appear to conflict with the forthcoming report of a study, sponsored by the FDA, showing that monkeys fed massive doses of saccharin exhibited no ill effects.

The laboratory rats were fed 5 per cent pure saccharin in their diets, about 800 times the average human exposure. To absorb the equivalent in diet soda a human would have to drink 75 gallons of it every day. While the average American intake of saccharin is eight pounds yearly (against 126.4 pounds of sugar and other caloric sweeteners) it would take 140 pounds—the contents of 1.5 million of those little packets served in restaurants—to equal the amount the rats ate.

Saccharin, which isn't metabolized by the body, is 200 to 700 times sweeter than sugar. With the banning of cyclamate in 1969 it became the only artificial sweetener on the market. Merchandising of a substitute being developed from orange and grapefruit rinds appears to be about a year away. While three-fourths of American saccharin consumption goes into dietetic soft drinks, the principal beneficiaries are the 10 million diabetics and others who, for medical or weight reasons, must restrict sugar intake. As an alternative to a blanket ban on saccharin the FDA is consideing reclassifying it as a drug, rather than a food additive, so that those who need it can get the artificial sweetener by prescription.

While the proof of saccharin's dangers seems scanty, the FDA's response cannot be held excessive. Under the 1958 Delaney Amendment to the Food, Drug, and Cosmetic Act it is required to proscribe any ingredient used as a food additive which can be shown to cause cancer in animals or man. While its intent is laudable, the rule's force is draconian. The generous interpretation of the FDA's action is that it is a subtle hint to Congress to put a little give in the Delaney Amendment. If so, the point has been made.

[From the New York Times, Mar. 11, 1977]

THE BITTER VERDICT AGAINST SACCHARIN

The Food and Drug Administration had no option but to ban the use of saccharin in foods and beverages when Canadian tests showed that some rats fed large amounts of the substance developed cancer. Since 1958 there has been a statute—the Delaney clause in the basic F.D.A. statute—which flatly bans any food additive that, in its words, "is found to induce cancer when ingested by man or animal. . . ." The law admits no qualifications. For example, the fact that reputable research with monkeys disclosed no abnormalities after they had been given large doses of saccharin for 6½ years cannot even be taken into account.

Saccharin has been used for about 80 years, with no evidence that it has ever produced a single cancer in a single human being. The rats whose tumors caused the F.D.A. to act were fed diets containing 5 percent saccharin. A human would have to drink 800 twelve-ounce bottles of diet soda every day of his life to ingest a quantity of saccharin comparable to that fed the unfortunate rats. Yet diabetics and others who cannot or should not ingest normal sugar are being denied their last known legal sweetener on the basis of that unrealistic "test of safety."

The defects of the Delaney clause go beyond the fate of saccharin—or, earlier, of cyclamates which were banned on similar evidence. The unqualified nature of the Delaney clause prohibits rational decision-making. In effect, it says that if any risk of cancer can be demonstrated, then that is that. There is no room for weighing the benefits of saccharin or whatever other substance is involved against its costs. Yet such cost-benefit analysis is basic to any sensible judgment.

The saccharin decision points up the weaknesses of the Delaney clause, which has long needed replacement by a more balanced effort to protect the public against carcinogens.

By Mr. DOLE (for himself and Mr. MELCHER):

S. 1174. A bill entitled the Critical Lands Resource Conservation Act of 1977; to the Committee on Agriculture, Forestry, and Nutrition.

CRITICAL LANDS RESOURCE CONSERVATION ACT OF 1977

Mr. DOLE. Mr. President, today, I introduce the Critical Lands Resource Conservation Act of 1977, and I am pleased that the distinguished Senator

from Montana (Mr. MELCHER) has joined me as cosponsor of this timely and important legislation.

GREAT PLAINS WIND EROSION

The persistent drought conditions throughout the Western United States have had an especially disasterous impact on agricultural lands in the Great Plains States. Producers in this region face not only the loss of their crops; they are also threatened with the loss of their topsoil as spring winds rip across the Plains and grow into duststormss reminiscent of the 1930's.

In the first 3 months of 1977, 3.8 million acres of Great Plains cropland have suffered wind erosion, and an additional 17 million acres are so dry and unprotected that they are now in a condition to blow. The U.S. Soil Conservation Service estimates that the average annual soil loss in the Great Plains is running in excess of 14 tons per acre per year. This is 10 tons per acre more than what SCS considers to be an acceptable rate of soil loss.

Clearly, if erosion of this magnitude is allowable to continue, the future productivity of the wheat belt will be placed in serious jeopardy.

PLOWUP OF FRAGILE LAND

Drought and wind erosion have plagued the Great Plains since the pioneer farmers began to plow up the midgrass and shortgrass prairies 100 years ago. But all indications suggest that the problem has grown much worse in the last 3 years. The recent trend toward fence row to fence row production has resulted in the cultivation of many thousands of acres of fragile land which should have been left in permanent vegetative cover. Wheat prices have plummeted from their peak in 1973–74, and carryover stocks have grown to an alarming size, but much fragile, erodable land remains in production.

SOIL CONSERVING COVER

The Critical Lands Resource Conservation Act addresses the conservation needs of the Great Plains by encouraging farmers to seed marginal cropland in permanent vegetative cover. Specifically, my legislation authorizes the Secretary of Agriculture to enter into 2-year contracts with landowners in the area eligible for the Great Plains conservation program to convert up to 50 percent of their cropland from soil depleting crops, such as wheat, to soil conserving cover crops.

Cooperating farmers will receive up to $30 per acre per year for their set-aside, but they may neither graze the land nor harvest crop except when the President declares a disaster resulting from drought or other natural catastrophes. Contracts may be renewed for 1-year periods upon agreement between the Secretary and the landowner.

COSTS AND BENEFITS

In practice, my legislation may easily result in the conversion of 10 to 15 million acres of marginal wheatland into such soil conserving cover crops as alfalfa, sweet clover, or rye grass. Assuming an average payment of $15 per acre, the program will cost the Treasury from $150 to $225 million.

The price tag is high, but the return on our investment will fully justify the cost. In addition to the substantial conservation benefits, the program will serve as an incentive to curb wheat production at a time of oversupply and weak demand. The diversion of 10 to 15 million acres of marginal cropland means a reduction of our total annual wheat production of 150 to 300 million bushels. This compares with a wheat surplus currently running at 1.1 billion bushels.

I should also point out that although my program may require direct payments in excess of $200 million. It also involves indirect savings in the form of price support and disaster payments which would no longer be paid out on wheat harvested from marginal cropland.

Mr. President, the Great Plains region is the breadbasket of this Nation and all the other nations which depend on American wheat. It is time we took positive action to protect the essential soil resource of this region and assure its continued productivity. I urge my colleagues to take timely and affirmative action on the Critical Lands Resource Conservation Act of 1977.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1174

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act be cited as the "Critical Lands Resource Conservation Act".

SEC. 2. Notwithstanding any other provision of law:

(a) The Secretary is authorized and directed to formulate and carry out a program with owners and operators of land in the Great Plains area as described in section 16(b) of the Soil Conservation and Domestic Allotment Act to reduce runoff, soil and water erosion, and otherwise to promote the conservation of soil and water resources in such area through the conversion of cropland from soil depleting uses to conserving uses including the production of soil conserving cover crops.

(b) To effectuate the purposes of this Act the Secretary shall enter into agreements for a two-year period with an owner or operator as described in subsection (a) whereby the owner or operator shall agree to devote to a soil conserving cover crop a specifically designated acreage of cropland on the farm up to 50 per centum of the acreage which had been planted to soil depleting crops in any of the two years preceding the date of the agreement. The agreement shall be renewable for annual periods thereafter subject to the mutual agreement of the owner or operator and the Secretary. In such agreements the producer shall agree (1) to plant a legume, or if not adapted to such area, an annual, biennial, or a perennial cover crop, as specified in the agreement; (2) to divert from production such portion of one or more crops designated by the Secretary as he determines necessary to effectuate the purpose of the program; (3) not to harvest any crop from or graze the designated acreage during the agreement period, unless the Secretary determines that it is necessary to permit grazing or harvesting in order to alleviate damage, hardship, or suffering caused by severe drought, flood, or other natural dissaster, and consents to such grazing or harvesting subject to an appropriate reduction in the rate of payment; (4) to give adequate assurance, as specified by the Secretary, that the land was not acquired for the purpose of placing it in the program: *Provided,* That this shall not prohibit the continuation of an agreement by a new owner if an agreement has once been entered into under this Act and that the foregoing provision shall not prevent a producer from placing a farm in the program if the farm was acquired by the producer to replace an eligible farm from which he was displaced because of its acquisition by any Federal, State, or other agency having the right of eminent domain; (5) to forfeit all rights to further payments under the agreement and refund to the United States all payments received thereunder upon his violation of the agreement at any stage during the time he has control of the land if the Secretary determines that such violation is of such a nature as to warrant termination of the agreement, or to make refunds or accept such payment adjustments as the Secretary may deem appropriate if he determines that the violation by the owner or operator does not warrant termination of the agreement; (6) upon transfer of his right and interest in the farm, during the agreeemnt period, to forfeit all rights to further payments or grants under the agreement and refund to the United States all payments or grants received thereunder unless the transferee of any such land agrees with the Secretary to assume all obligations of the agreement; (7) not to adopt any practice specified by the Secretary in the agreement as a practice which would tend to defeat the purposes of the agreement; and (8) to such additional provisions as the Secretary determines are desirable to effectuate the purposes of the program or to facilitate the practical administration of the program, including such measures as the Secretary may deem appropriate keep the designated acreage from eroding and free from weeds and rodents in accordance with good conservation systems.

(c) In consideration for such agreements the Secretary shall make an annual adjustment payment to the owner or operator for the period of the agreement at such rate or rates not in excess of $30 per acre as the Secretary determines to be fair and reasonable. The Secretary may use an advertising and bid procedure in determining the lands in any area to be covered by agreements and the payment rate to be made to the producers thereof. The Secretary and the owner or operator may agree that the annual adjustment payments for the agreement period shall be made either upon approval of the agreement or in such installments as they may agree to be desirable: *Provided,* That for each year any annual adjustment payment is made in advance of performance, the annual adjustment payment shall be reduced by 5 per centum.

(d) The Secretary may terminate any agreement under this Act by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree with the owner or operator to such modification of agreements as he may determine to be desirable to carry out the purposes of the program or facilitate its administration.

(e) The Secretary may, to the extent he deems it desirable, provide by appropriate regulations for preservation of cropland, crop acreage, and allotment history applicable to acreage diverted from the production of crops to establish vegetative cover for the purpose of any Federal program under which such history is used as a basis for an allotment or other limitation or for participation in such program.

(f) In carrying out the program, the Secretary shall utilize the services of local, county, and State committees established under section 8 of the Soil Conservation and Domestic Allotment Act, as amended, and the technical services of the Soil Conserva-

tion Service and soil and water conservation districts.

(g) In case any producer who is entitled to any payment or compensation dies, becomes incompetent, or disappears before receiving such payment or compensation, or is succeeded by another who renders or completes the required performance, the payment or compensation shall, without regard to any other provisions of law, be made as the Secretary may determine to be fair and reasonable in all circumstances and so provide by regulations.

(h) The Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers, including provision for sharing, on a fair and equitable basis, in payments under this program.

(i) The Secretary shall prescribe such regulations as he determines necessary to carry out the provisions of this Act.

(j) There are hereby authorized to be appropriated for the period beginning October 1, 1977, and ending September 30, 1981, such sums as may be necessary to carry out the program provided for in this Act. The Secretary is authorized to utilize the facilities, services, and authorities of the Commodity Credit Corporation in discharging his functions and responsibilities under this program, including payment of costs of administration: *Provided*, That the Commodity Credit Corporation shall not make any expenditures for such purposes unless the Corporation has received funds to cover such expenditures from appropriations made to carry out this Act.

By Mr. HASKELL:

S. 1176. A bill to require the Administrator of the Environmental Protection Agency to exercise his authority under the Safe Drinking Water Act to make grants for certain demonstration projects; to the Committee on Human Resources.

SAFE DRINKING WATER ACT

Mr. HASKELL. Mr. President, I am introducing today a simple bill to extend for 1 year section 1444 of Public Law 93–523, the Safe Drinking Water Act. My legislation also changes the discretionary language of section 1444.

Section 1444 pertains to special study and demonstration project grants which, among other things, would assist in the development of projects which demonstrate new methods, approaches, and technologies for providing a dependably safe supply of drinking water to the public.

Moneys authorized under section 1444 total $25 million for fiscal years 1975 through 1977. Yet, I understand the Environmental Protection Agency has not requested appropriations for funding section 1444 programs.

Mr. President, the list of damages from the current Western drought continues to grow. This, compounded by the administration's reevaluation of previously authorized water projects in the State of Colorado, has left me searching for ways to reap every benefit possible from our State's water. I feel we have no choice but to pursue such a course. I must emphasize that in Colorado water is relatively scarce and precious.

Recently I have been studying proposals to recycle municipal wastewater and feel this approach to water conservation has substantial potential. Yet, such proposals are not receiving Federal assistance. As I have stated, the Administrator of EPA has the authority to render assistance in the form of grants.

The Safe Drinking Water Act expires this year. I do not know whether the entire act merits extension. Very likely, it will be revised by those who have had a chance to work with it over these past 3 years. My purpose here is to extend section 1444 for 1 year at the previous year's authorization of $10 million and to change the discretionary language to require the Administrator of the Environmental Protection Agency to make grants for sound, innovative projects such as the recycling of municipal wastewater for potable use. I believe the time is appropriate to get on with this promising technology.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1176

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (a) of section 1444 of the Public Health Service Act (42 U.S.C. 300j–3(a)) is amended by striking out "The Administrator may make grants" and inserting in lieu thereof "The Administrator shall offer grants".

(b) Subsection (c) of section 1444 of the Public Health Service Act (42 U.S.C. 300j–3 (c)) is amended to read as follows:

"(c) For the purposes of making grants under subsections (a) and (b) of this section, there is authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1978.".

ADDITIONAL COSPONSORS

S. 49

At the request of Mr. MATHIAS, the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 49, a bill to establish a Small Business Administrative Review Court.

S. 76

At the request of Mr. STONE, the Senator from Alabama (Mr. ALLEN) was added as a cosponsor of S. 76, a bill to amend title XVIII of the Social Security Act to authorize a payment under the medicare program for certain services performed by chiropractors.

S. 79

At the request of Mr. HELMS, the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 79, a bill to restore the enforceability of gold clause contracts.

S. 87

At the request of Mr. BUMPERS, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 87, a bill to amend title II of the Social Security Act to increase to $4,800 the amount of outside earnings permitted without deductions from benefits thereunder.

S. 146

At the request of Mr. GOLDWATER, the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of S. 146, a bill to repeal the earnings limitation of the Social Security Act for all workers age 65 and over.

S. 175

At the request of Mr. SCHWEIKER, the Senator from Kentucky (Mr. FORD) was added as a cosponsor of S. 175, a bill to provide a special program of financial assistance to Opportunities Industrialization Centers and to other national community based organizations.

S. 506

At the request of Mr. HUMPHREY, the Senator from Alaska (Mr. GRAVEL) was added as a cosponsor of S. 506, the Wage Supplements for Handicapped Individuals Act.

S. 597

At the request of Mr. BENTSEN, the Senator from Montana (Mr. MELCHER) and the Senator from Utah (Mr. GARN) were added as cosponsors of S. 597, a bill to amend the Federal Water Pollution Control Act.

S. 672

At the request of Mr. HUMPHREY, the Senator from New Jersey (Mr. CASE) was added as a cosponsor of S. 672, the Solar Energy Government Building Act.

S. 694

At the request of Mr. KENNEDY, the Senator from Oklahoma (Mr. BARTLETT), the Senator from Illinois (Mr. STEVENSON), the Senator from Washington (Mr. JACKSON), the Senator from Minnesota (Mr. ANDERSON), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 694, a bill to adjust the status of Indochinese refugees to that of lawful permanent residents of the United States.

S. 803

At the request of Mr. HELMS, the Senator from Utah (Mr. GARN), the Senator from Hawaii (Mr. MATSUNGA), the Senator from Utah (Mr. HATCH), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Nevada (Mr. LAXALT) were added as cosponsors of S. 803, a bill to amend the Internal Revenue Code of 1954 to provide that certain liens for taxes shall not be valid unless actually entered and recorded in the office in which the lien is filed.

S. 856

At the request of Mr. STONE, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of S. 856, a bill to amend the Internal Revenue Code of 1954 to allow a deduction to individuals who rent their principal residences for a portion of the real property taxes paid or accrued by their landlords.

S. 1046

At the request of Mr. SCHWEIKER, the Senator from Idaho (Mr. MCCLURE) and the Senator from Indiana (Mr. LUGAR) were added as cosponsors of S. 1046, a bill to amend the Federal Food, Drug and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives and to permit the marketing of saccharin until such an evaluation can be made of it.

S. CON. RES. 14

At the request of Mr. MATSUNAGA, the Senator from Idaho (Mr. CHURCH) and

the Senator from New Jersey (Mr. CASE) were added as cosponsors of Senate Concurrent Resolution 14, urging the Canadian Government to reassess its present policy of permitting the killing of newborn harp seals in Canadian waters.

AMENDMENT NO. 40

At the request of Mr. MCCLELLAN, the Senator from New Jersey, (Mr. WILLIAMS) was added as a cosponsor of amendment No. 40, intended to be proposed to S. 11, a bill to provide for the appointment of additional district court judges.

AMENDMENTS SUBMITTED FOR PRINTING

CODE OF OFFICIAL CONDUCT—SENATE RESOLUTION 110

AMENDMENT NO. 164

(Ordered to be printed and to lie on the table.)

Mr. BAKER submitted an amendment intended to be proposed by him to Senate Resolution 110, to establish a code of official conduct for Members, officers, and employees of the U.S. Senate, and for other purposes.

AMENDMENT NO. 165

(Ordered to be printed and to lie on the table.)

Mr. BENTSEN submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

AMENDMENT NO. 166

(Ordered to be printed and to lie on the table.)

Mr. STEVENS submitted an amendment intended to be proposed by him to Senate Resolution 110, supra.

SENATE RESOLUTION 127—SUBMISSION OF A RESOLUTION WAIVING THE CONGRESSIONAL BUDGET AND IMPOUNDMENT ACT WITH RESPECT TO CONSIDERATION OF S. 36

(Referred to the Committee on the Budget.)

Mr. CHURCH submitted the following resolution:

S. RES 127

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 36, a bill to authorize appropriations to the Energy Research and Development Administration for fiscal year 1977 for the purpose of research and development of new forms of energy, energy conservation techniques, and conversion of energy. Such waiver is necessary to permit consideration of the ERDA authorization for fiscal year 1977, which was reported by the Committee on Energy and Natural Resources prior to May 15, 1976, but which failed to become law during the last session of Congress. If consideration of S. 36 is prevented, ERDA will be unable to reprogram above amounts contained in relevant appropriations bills; will be unable to initiate, with specific Congressional direction, the National Energy Extension Service for which appropriations have already been made; and, will be unable to initiate, with specific Congressional direction, certain solar energy projects. In addition, certain other provisions relating to a small grants program for appropriate technology, measures dealing with employee and organizational conflicts of interest will not be authorized without passage of S. 36.

NOTICES OF HEARINGS

NOTICE OF CHANGE OF HEARING DATE FOR OUTER CONTINENTAL SHELF LEGISLATION

Mr. JACKSON. Mr. President, I wish to announce for the benefit of Senators and other interested parties a change in the hearing date for S. 9. The hearing originally scheduled by the Committee on Energy and Natural Resources for April 21 has been changed to April 25 at 10 a.m. in room 3110, Dirksen Senate Office Building.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. HASKELL. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Subcommittee on Energy Research and Development of the Senate Energy and Natural Resources Committee.

The hearing is scheduled for April 1, beginning at 9:30 a.m. in room 3110, Dirksen Senate Office Building. Testimony will be heard from the following witnesses: Dr. Armand Hammer, chairman of the board and chief executive officer, Occidental Petroleum Corporation; a representative of the Congressional Budget Office; a representative of the General Accounting Office, and John McCormick, Washington representative of the Environmental Policy Center. This is the third in a series of hearings on this legislation.

Those wishing to submit a written statement for the hearing record or who wish further information on the hearing should contact Ben Yamagata of the subcommittee staff on extension 4–1076.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. MATHIAS. Mr. President, on behalf of the distinguished chairman of the Committee on Governmental Affairs, the Senator from Connecticut (Mr. RIBICOFF) I wish to give notice that the Committee on Governmental Affairs has scheduled hearings on S. 826, a bill to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy. As part of those hearings, it will consider how the proposed reorganization will effect programs within the Federal Government dealing with nuclear waste management.

While the main focus of the hearings will be on the literal impact of the reorganization in terms of macrostructure, the issue of what internal reorganization within the new Department of Energy will occur will also be addressed. In addition, proposals will be considered on what the nuclear waste program structure should look like in the near future if we are to attain the goal of dealing with this waste problem.

Testimony will be received from Federal agencies and public witnesses. Included in the latter will be Prof. Mason Willrich who recently completed a study on nuclear waste for the Energy Research and Development Administration. Hearings are scheduled in Washington on April 8, 1977, in room 3302, Dirksen from 9 a.m. to 5 p.m.

Members of the Senate and other interested parties wishing to testify or submit statements for the Record should have their staff contact Joseph E. diGenova, minority counsel, Subcommittee on the District of Columbia, on extension 47114 or 44654.

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION, AND FEDERAL SERVICES

Mr. GLENN. Mr. President, the Subcommittee on Energy, Nuclear Proliferation, and Federal Services will hold hearings on April 1, 4, and 6, commencing at 10 a.m. on each day in room 3302, Dirksen Senate Office Building. The hearings on April 1 and 6 will focus on S. 897, the Nuclear Nonproliferation Act of 1977, while that of April 4 will focus on the forthcoming report on nuclear proliferation and safeguards prepared by the Office of Technology Assessment.

SUBCOMMITTEE ON HOUSING, INSURANCE, AND CEMETERIES

Mr. CRANSTON. Mr. President, I wish to announce that the Committee on Veterans' Affairs, Subcommittee on Housing, Insurance, and Cemeteries, will hold public hearings on May 3 and 5 from 9 a.m. to 12 noon in room 6202, Dirksen Office Building for the purpose of receiving testimony of S. 718, a bill to provide veterans with cost disclosure information relating to the conversion of government-supervised insurance to individual commercial life insurance policies. The hearings will be chaired by the distinguished Senator from Florida (Mr. STONE), the chairman of the subcommittee.

Further information may be obtained from the committee office, room 414, Russell Office Building, telephone 224–9126. Members of the public and other interested parties wishing to testify at these hearings should contact Mr. Craig Wolfson of Senator STONE's staff at 224–1538.

PARKS AND RECREATION SUBCOMMITTEE

Mr. ABOUREZK. Mr. President, I wish to announce for the information of the Senate and the public, the scheduling of a public hearing before the Parks and Recreation Subcommittee of the Senate Energy and Natural Resources Committee.

The hearing is scheduled for April 21, 1977, beginning at 10 a.m. Testimony is invited regarding S. 658, a bill to designate certain lands for inclusion in the National Wilderness Preservation System.

For further information regarding the hearings you may wish to contact Mr. Thomas Williams of the subcommittee staff on extension 47145. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Parks and Recreation Subcommittee, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.

ENERGY COSTS AND THE ELDERLY

Mr. CHURCH. Mr. President, the Senate Committee on Aging will conduct a hearing on "The Impact of Rising Energy Costs on Older Americans" on April 5 and 7, 1977. The hearing will begin at 10 a.m. in room 1202, Dirksen Senate Office Building on April 5, and at 10 a.m. in room 1224, Dirksen Senate Office Building on April 7. This hearing is a continuation of hearings held in 1974 and 1975 on this issue. Testimony will be taken from consumers and Federal agencies in the special impact of rising energy prices on the elderly and steps which need to be taken to avert a recurrence of the events of this past winter.

ADDITIONAL STATEMENTS

U.S. CANAL ZONE AND PANAMA CANAL: CONTROL WITHOUT SOVEREIGNTY IS DOUBLE-SPEAK

Mr. HELMS. Mr. President, as Members of Congress are becoming increasingly aware, the question of the continued sovereign control by the United States of the U.S. owned Canal Zone and Panama Canal has become a matter of both national and international interest. One feature of this interest has been the publication of perceptive articles by eminent authorities, among them Hanson W. Baldwin, a distinguished military historian, outstanding strategist, and former military editor of the New York Times.

In the first of a recent series of two articles in a Waterbury, Conn., newspaper, he stresses the strategic value of the Panama Canal, emphasizes the Caribbean-Gulf of Mexico as our "soft underbelly," and refutes some of the current criticisms of the canal's "continuing and far-reaching importance" to the United States.

In the second article of this series, Mr. Baldwin condemns the 1974 Kissinger-Tack "agreement of principles" under which the current diplomatic negotiations for a new Panama Canal Treaty are being negotiated, emphasizes some of the ruthless violations of human rights by "neo-Marxist dictatorship" of Panama, describes Panamanian threats of violence as "overdrawn," asks whether it is more important to avoid "confrontation and condemnation" than to "retain control of the canal," and concludes that "if we refuse to defend highly important or vital interests merely to avoid the blackmail threat of violence we are finished before the crisis erupts."

Mr. President, the United States is a great and powerful Nation and Panama is small and weak. What is needed in the current Isthmian situation is a combination of courage and caution, because surrender of U.S. sovereignty over the Canal Zone means loss of control over the Panama Canal. As Mr. Baldwin says, "control without sovereignty is double-speak."

Mr. President, as the two indicated articles by Mr. Baldwin should be of unusual interest to all Members of Congress and the Nation at large, I ask unanimous consent to have them printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[The Waterbury Sunday Republican, Feb. 6, 1977]

PANAMA CANAL VITAL TO U.S. INTERESTS

(By Hanson W. Baldwin)

The future of what should be America's "Mare Nostrum"—the Caribbean Sea-Gulf of Mexico—will be profoundly affected by one of the first crucial foreign policy decisions of the Carter Administration.

That issue is the Panama Canal—its security and control, and its sovereignty.

Not since Fidel Castro took over Cuba and established a Russian-supported and Russian-armed Communist bastion within 60 miles of our shores has there been any foreign policy issue so close to home and so important to basic American political and strategic positions as the current and long-continuing negotiations with the Republic of Panama about a new Canal treaty.

The terms of such a treaty will have significance that will extend far beyond the operation of the canal, the status of the narrow strip of land around it—the Canal Zone (until now considered U.S. sovereign territory), or its effects upon Panama itself or other Latin-American nations. The ultimate stakes could well be control of a vital sea area—all of that vast, island-dotted watery space to our south across which most of the main north-south, east-west air and sea trade routes of the Western Hempishere flow.

Not since the Monroe Doctrine was first enunciated 150 years ago has there been such a major threat to its validity as there is today. Ever since Castro came to power, the Doctrine has been more honored in the breach than in the observance. Soviet MIGs flying from Cuban fields, Soviet submarines calling at Russian-built Cuban bases, Cuban troops armed with Russian weapons, transported by Russian planes to African Angola, and Russian-trained Cuban guerrillas, infiltrators, agents provocateurs, and "training" and "aid" missions in various Latin-American countries, including Panama, Guayana, Jamacia and Puerto Rico are all signs of a spreading infection.

The area that Alfred Thayer Mahan and all succeeding generations of strategists have considered in the vital interest of the United States to control is now often laced by the vapor trails of Russian jets or the unseen passage of Soviet submarines.

IMPORTANT FOR TRADE

There is no doubt about it; the Monroe Doctrine today is in considerable peril.

The Caribbean Sea-Gulf of Mexico is an area of tremendous geographical and economic, and hence of strategic, importance to the United States. Across its waters, or through its skies flows a very sizable portion of the lifeblood of U.S. industry and commerce—coffee and manganese from Brazil, bananas and tropical fruits from Central America and the islands; copper from Peru and Chile; bauxite from Jamaica and Surinam; oil from Venezuela.

Some 13 major global trade routes funnel through the Canal. About 16.8 per cent of U.S. trade passes through the Canal and it has been estimated that of all cargoes transiting Panama in ships of all flags, some 70 per cent is bound to or from U.S. ports.

The Canal-Caribbean-Gulf area provides access by sea and air to our vital Gulf Coast ports and the increasingly important offshore oil and gas fields in the Gulf, to the mighty Mississippi, jugular vein of the nation, and to the "soft underbelly"—the very soft underbelly—of the United States.

The present-day military importance of the Canal is too often dismissed. Two principal criticisms of its alleged lack of utility are made: It could, it is said, be instantly destroyed in a nuclear war, and its locks are not wide enough to accommodate "modern" vessels.

Both statements are false, irrelevant or over-simplified. In a nuclear war, the Canal and for that matter, many other areas in the United States and overseas would simply have no relevance, either as targets or as positive military assets. But the Canal does have major and continued importance in non-nuclear conflicts or confrontations, which are, by far, the most likely contingencies of tomorrow.

During the Cuban missile crisis, Marines and supplies from the West Coast were ferried through the Canal to the Caribbean; if they had had to pass around Cape Horn they would never have arrived in time to influence the outcome. During the Vietnam War, one-third of all sea-borne cargoes bound for Vietnam transited the Canal, after loading at Gulf or Atlantic ports.

ADEQUATE FOR NAVY

Today, with our Navy greatly reduced in numbers, we face the same situation we did before World War II—a one-ocean fleet with two-ocean responsibilities.

Contrary to impression, every vessel of the United States Navy, except for 13 first-line aircraft carriers, can transit the Canal, including all our missile-firing and attack submarines, all our anti-submarine and escort forces, our amphibious vessels and our support and supply craft—a factor of great importance when a crisis is brewing.

There has long been, moreover a once-started, but still dormant plan to build, within the present zone a third set of locks (or a sea-level Canal), wider than the 110-foot width of the present locks and possibly of greater depth, which would accommodate, at some future time, when and if traffic needs demand it, not only the world's largest naval vessels, but some of the huge ore carriers and supertankers.

Contrary, therefore, to popular impression, the Canal does have continuing and far-reaching importance to the United States. And the new Panama Canal Treaty, at least in the terms in which it is being discussed, would be bound to have major political, strategic and psychological effects upon the entire Caribbean Sea-Gulf of Mexico area and upon our relations with Latin America.

This is because, for the first time since the Panama Canal was built in the early part of this century by U.S. engineers and with U.S. money and the Canal Zone was bought outright with taxes provided by U.S. citizens, we propose to transfer sovereignty over the Canal and the Zone to Panama in the biggest "give-away" in our history.

The basic treaty—the Isthmian Canal Convention of 1903—explicitly ceded a 10 mile strip of territory across the isthmus from the new Republic of Panama to the United States, "in perpetuity." The treaty provided that in the Zone, the United States would exercise "all the rights, power and authority . . . which it would possess and exercise if it were the sovereign of the territory . . . to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority."

This fundamental provision, which ceded full sovereignty over the Canal and the Canal Zone to the United States (an interpretation which has been twice supported by the U.S. Supreme Court and was, initially, fully accepted by Panama) still stands, although other provisions of the original treaty have been revised or modified many times, always

at the expense of the American taxpayer and for the benefit, not of the United States—but of Panama.

[From the Waterbury Sunday Republican, Feb. 20, 1977]

DECISION ON CANAL'S FUTURE AT HAND

(By Hanson W. Baldwin)

We have now reached, because of the "waffling" of past administrations and long continued concessions, a point-of-no-return, when we must put up or shut up.

In 1974 Henry Kissinger unwisely signed a "statement of principles" to govern negotiations for a new Panama Canal zone treaty. Kissinger agreed that the concept of perpetuity should be eliminated and, in effect, that the new treaty should end—after a fixed but undecided period of time (the year 2000 is generally mentioned)—U.S. sovereignty and control over the Canal and the Zone.

Ever since, negotiations with Panama have been conducted—despite strong and strengthening protests in Congress and among many sections of U.S. public opinion—within the framework of these limitations.

After a virtual hiatus most of last year because of the presidential campaign and the interjection of the Canal issue into it, the negotiations are to resume momentarily under the auspices of a new administration. Our protagonist, however, is still the same radical demagogic dictator, who has ruled Panama's 1.5 million people for the past eight years.

Omar Torrijos seized power in a coup and has retained it by armed force (the support of the Panamanian National Guard, the only military-police power in the country) and by the bland promises of pie-in-the-sky—ultimate sovereignty over the Canal and the Zone. He has not hesitated to rule roughshod; he has exiled some dissident business men, completely controls a fully censored press and he has outlawed all political opposition. His government has become a kind of neo-Marxist dictatorship, not only in its domestic policies, but in its close and cordial relationships with Castro and Moscow. Only one party—Torrijos' "Peoples Party"—is permitted; there are numerous known communists among its leaders.

Torrnjos has staked his political future on taking over the Canal and he may well have unleashed forces he cannot control. His bargaining style continues in the Latin Political tradition of making Uncle Sam a whipping boy; it is a mixture of open threat and nationalistic bluster. But what he considers his aces in the hole are the prediction—indeed the promise—that unless a treaty ceding ultimate sovereignty to Panama is concluded this year, the United States will face armed confrontation (i.e. rioting mobs, terrorist and sabotage activity, guerrilla war, even a kind of low-key Panamanian "Vietnam"); and we shall also face the united condemnation of al the Latin-American nations.

Both threats are, in my view, overdrawn—particularly the latter. But the question still remains:

Is it more important to avoid confrontation and condemnation than it is to retain control of the Canal, a security asset of tremendous importance in its own right but of even greater significance to the future of that vital area—the Caribbean Sea-Gulf of Mexico?

DISASTROUS CONSEQUENCES

The psychological and political consequences of the abandonment of sovereignty by the United States in the Zone—in the face of repeated threats by a minor dictator openly backed by Castro and Russian communism—to our naval base at Guantanamo Bay, Cuba, to other U.S. base rights overseas and to our strategic position in the Caribbean could be disastrous. The questions that would inevitably be asked are:

Is the United States a paper tiger?

Where, after Vietnam and Angola and now, Panama, would we draw the line, if not at our own back door?

It is certainly true that rioting mobs tomorrow, as in the past, are an ever present possibility in Panama; Latin volatility and Communist provocateurs, aided by trained Cuban infiltrators, insure that. Sabotage and terrorism, if supported by Cuba and/or Russia, could become serious; some bombing incidents involving the automobiles of Zone residents who oppose the transfer of sovereignty have already occurred. But serious sabotage of the Canal itself, even if it could be accomplished, would be an irrational act. For Panama, it would kill the goose that laid the golden egg.

A large-scale guerrilla war, another Vietnam, is highly unlikely. We want no more Vietnams, but surely Panama does not want a Central American Vietnam either, and the great majority of Panamanians are not the dedicated and disciplined fanatics that we faced in the jungles of Southeast Asia.

In any case, if we are to avoid confrontation all over the world by concession and retreat, if we refuse to defend highly important or vital interests merely to avoid the blackmail threat of violence we are finished before the crisis erupts.

RISK IS NECESSARY

As to Latin-America, we must risk its wrath. But it will be far from unanimous—no matter what some Latin American spokesman say, pro forma, for public consumption. Fundamentally the nations of Latin-America and the Southern Hemisphere have always respected strength. Many of them are highly dependent on the waterway, and some of them, quite satisfied with the low rates and efficiency of American operation of the Canal, mistrust the probable instability and uncertainty of Panamanian rule.

There is, too, very considerable uneasiness about Communist influence in Panama and the close ties Torrijos has established with Castro. The memories of Angola and the fears of Russian imperialism within the Western Hemisphere are vivid.

During last Fall's political campaign, both President Ford and Jimmy Carter avoided the real issue in the Panama negotiations which is the question of U.S. sovereignty and the security of our "soft underbelly." Neither of them referred to the major problem of the Canal issue—the strategic importance of the Caribbean, and both of them said they would maintain "control" of the Canal.

The exact words of now President Carter, which are today most germane, were:

"I would never give up complete control or practical control of the Panama Canal Zone. But I would continue to negotiate with the Panamanians."

In other words have your cake and eat it, too. Give up sovereignty, perhaps, but maintain security and control. It's a nice trick, if you can do it.

We lost our great airfield in Libya and our entire military investment there after a change of regime. We were denied overflight or refueling bases during the last Mid-East war, even by our allies. After the Cyprus crisis both Turkey and Greece either limited U.S. operations at our bases in those countries or closed them down.

Sovereignty means control. Control without sovereignty is double-speak.

FORMATION OF NEW YORK STATE ALLIANCE TO SAVE ENERGY

Mr. PERCY. Mr. President, this morning's New York Times reported a March 28 meeting in New York City at which Senators JACOB JAVITS and DANIEL MOYNIHAN joined in launching the New York State Alliance to Save Energy. The meeting included a number of distinguished business and government leaders, including the mayors of New York City, Buffalo, Syracuse and Yonkers and the chairman of Consolidated Edison. On behalf of Senator HUMPHREY and myself I congratulate our distinguished colleagues for their initiative and foresight.

Like the national Alliance to Save Energy, whose honorary co-chairmen are Vice President MONDALE and former President Ford, the New York State Alliance to Save Energy will be a nonpartisan effort. The purpose of the New York organization, according to Senators JAVITS and MOYNIHAN, is to emphasize to the public the need for energy conservation and to develop public and private energy-saving measures. The New York State Alliance will also develop educational material on energy conservation and encourage organizations and individuals to put energy-saving programs into effect.

Mr. President, I ask unanimous consent that the full text of the March 29 New York Times report of this event be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ENERGY GROUP BACKED FOR NEW YORK STATE: GOVERNMENT AND BUSINESS LEADERS MOVE TO ESTABLISH AN ALLIANCE TO ENCOURAGE CONSERVATION

(By Emanuel Perlmutter)

A step toward the formation of a New York State Alliance to Save Energy was taken yesterday at a meeting of Senators Jacob K. Javits and Daniel Patrick Moynihan with business and governmental officials.

The Senators said at the meeting, in the Ford Foundation's headquarters at 320 East 43d Street, that they would announce the appointment of an executive board for the alliance within two to three weeks.

The organization, Mr. Javits and Mr. Moynihan said, will emphasize to the public the need for energy conservation and will develop public and private energy-saving measures. It will also develop educational material on energy conservation and encourage organizations and individuals to put energy-saving programs into effect.

The national alliance, of which President Carter and Vice President Mondale are honorary co-chairmen, has asked that similar units be set up by the states. Thus far, only Illinois and New York have taken steps to do so.

BEAME VOICES SUPPORT

Mr. Javits and Mr. Moynihan said the state alliance would operate independently but within the framework of the National Alliance to Conserve Energy. The establishment of the national group was announced last month by Senator Hubert H. Humphrey, Democrat of Minnesota and Senator Charles H. Percy, Republican of Illinois. Like the national group, the state body will be bipartisan.

Mayor Beame, who attended yesterday's

meeting, said that "the alliance will be a great help to the Northeast, which is so dependent on foreign oil—New York City joins in heartily."

Others at the meeting who also expressed approval of the alliance's aims were Mayors Stanley M. Makowski of Buffalo, Lee F. Alexander of Syracuse and Angelo R. Martinello, of Yonkers. Approval was also expressed by Alfred B. DelBello, the Westchester County Executive; Edward Egan, the Erie County Executive; Robert A. Low, New York City's Environmental Protection Administrator, and James A. Fitzpatrick, the chairman of the New York State Power Authority.

Representatives of business organizations included Charles F. Luce, the chairman of the Consolidated Edison Company; Dorothy Gregg, vice president of the Celanese Corporation, and Andrew Craig, an Albany banker.

AIRCRAFT ILLEGALLY CROSSING INTERNATIONAL BORDER

Mr. GOLDWATER. Mr. President, the Federal Government has given little more than lipservice to the problem of aircraft illegally crossing the international border into Arizona. Almost daily crossings are made by aircraft transporting illegal narcotics into our State and this constitutes a critical threat to the security and safety of the citizens of this Nation and the inhabitants of Arizona.

Recently, Mr. President, the House of Representatives of the State of Arizona adopted a resolution urging the President and the Congress to marshal all possible resources to handle this growing problem. I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

HOUSE RESOLUTION 2003

A resolution urging the President and Congress of the United States to marshal all the resources at their command to prevent aircraft illegally crossing the international border into Arizona and to take immediate measures to ensure the security of the international border

Whereas, the federal government has given little more than lip service and has shown an insufficient commitment toward containing and solving the problem of aircraft illegally crossing the international border into Arizona; and

Whereas, innumerable successful daily crossings of the international border by aircraft transporting illegal narcotics present a significant and pressing problem in Arizona; and

Whereas, the importation of such large quantities of illegal narcotics by air is an immediate, critical and ominous threat of the security and safety of the citizens of this nation and the inhabitants of Arizona in particular; and

Whereas, the situation of international political and social unrest in many countries south of the boundaries of the United States poses a threat to our security; and

Whereas, the threat of aircraft of a foreign power hostile to the interests of the United States crossing the international border into Arizona is a real threat to national defense and the security of Arizona; and

Whereas, the United States has hundreds of miles of unguarded border on its southern boundaries. Therefore,

Be it resolved by the House of Representatives of the State of Arizona:

1. That the Members of the House of Representatives respectfully request that the President and the Congress of the United States marshal all the resources at their command to prevent illegal flights of aircraft across the Arizona border into the United States.

2. That the Members of the House of Representatives respectfully request that the President and the Congress of the United States take immediate measures to ensure the security of its international border as an intrinsic component of national defense.

3. That the Secretary of State of the State of Arizona transmit a duly certified copy of this resolution to the President of the United States House of Representatives and to each Member of the Arizona Congressional Delegation.

TELEVISION COMMERCIALS

Mr. GOLDWATER. Mr. President, over the Christmas holidays last year, I had an opportunity to watch more television than is my custom, and I was impressed at how many commercials appeared under the sponsorship of the Federal Government. It struck me that the enormous bureaucracy which has been amassed by the Federal Government required an unusual amount of visual and auditory explanation. As a result, I wrote to the Comptroller General of the United States and asked him for the figures on how much the Federal Government spends each year in television commercials and how much was spent by the Federal Government in preparing its own presentation.

Mr. President, I discovered that there is no one place where this information is available, and the Comptroller General was compelled to question each of the Federal agencies involved before it could present accurate figures. Consequently, I have only recently received the Comptroller General's report. It shows that for the fiscal year 1975, an estimated $199 million was spent by 31 agencies in television production. Of this amount, an estimated $53,287,700 was expended for in-house advertising rather than for work done by private agencies.

Mr. President, without getting into the merits of the Federal Government spending nearly $200 million of the taxpayer's money to explain itself to the taxpayer, I should like to underscore the fact that the Federal Government is competing with private industry to the extent of more than $53 million a year—just in the television area alone. And I say without fear of contradiction that the work represented by the $53 million could have been performed cheaper and better by private industry. At a time when the private sector of our economy is in desperate need of support, it strikes me that here is one place where the Government could lend a hand. There is no reason why the Federal departments have to do their own television work when it could be done better in the private sector.

SNUFFING A FLAME OF TRUTH

Mr. GOLDWATER. Mr. President, some days ago the Senate passed a piece of legislation that destroyed the so-called Byrd amendment which allowed us to buy chrome from Rhodesia. I imagine it made many Members of this Senate happy, but I think they will live to see the day when they will regret ignoring the real plight of Rhodesia which is an attempt to obtain recognition of all the people living there and their government, and outside governments never help when they stick their meddling hands in. Mr. James J. Kilpatrick certainly one of the finest observers on the American scene has written cogently on this matter, and I ask unanimous consent that his article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SNUFFING A FLAME OF TRUTH

(By James J. Kilpatrick)

The House and Senate voted with a whoop and a holler last week to repeal the Byrd Amendment on Rhodesian chrome. An exultant President signed the bill the next day. "This puts us on the side of what's right and proper," he said. It was a fatuous remark, but no more than what we are learning to expect from Mr. Carter.

Until it was snuffed out a few days ago, the Byrd Amendment was the one bright flame of truth in a murky world of diplomatic falsehood. As such, it was a great embarrassment.

During the five years of its existence, the Byrd Amendment provided the only breath of integrity in the U.N.'s fetid swamp. The amendment openly, unapologetically, without shame or subterfuge, authorized the importation of Rhodesian chrome. The amendment was in palpable violation of the United Nation's sanctions against trade with Rhodesia. So long as it remained on the books, the amendment made Uncle Sam a kind of pariah.

With this irritating splinter removed, the United States may again be as deceitful, as filled with hypocrisy, as everybody else. And this will be a tremendous relief. For the past ten years, since the U.N. imposed these punitive sanctions, none of the leading members of the U.N. has paid the slightest attention to them. Visitors to Salisbury have marveled at the evidence of worldwide commerce. Every major nation of the world has violated the sanctions in every conceivable way.

Rhodesia produces the finest metallurgical chrome in the world: and for the past ten years, despite the U.N. embargo, Rhodesia has sold every ton that could be mined. The ore has gone to Russia, to England, to Germany, and of course to the United States. The ore will continue to find its way into the channels of steel production worldwide. The only difference, now, is that the cheating will be unanimous.

Mr. Carter, maintaining his fatuity record in this regard, referred the other day to the "illegal" regime in Rhodesia. The regime at Salisbury is precisely as "illegal" in its origin, neither more nor less, than Mr. Carter's regime in Washington. As we were reminded to the point of saturation throughout 1976, the U.S. came into being by means of a unilateral Declaration of Independence from Great Britain. Our forefathers were rebels, traitors, revolutionaries. And not to put too fine a point upon it, they were racists also—dedicated to denying the black slaves the most elementary human and civil rights.

In the name of conscience, in the name of history, how can the Americans of that inheritance denounce an "illegal, racist regime" in Salisbury? The government of Rhodesia is no more illegal than any other government born of revolution; and it is no more oppressive or undemocratic than dozens of other regimes that are cordially welcome in a family of nations.

The whole business is disgraceful. Mr. Carter has won repeal of the Byrd Amendment. His next step will be to obliterate the tiny Rhodesian Information Service that has been operating modestly in Washington for the past decade. Not a single dissenting voice is to be permitted. Root and branch, the last vestige of a Rhodesian presence is to be stamped out.

This is the scenario: The peaceful, inoffensive government of Ian Smith, under which the blacks of Rhodesia have attained the highest standards of health, education and personal income in southern Africa, is to be toppled. The country then is to be delivered into the hands of power-hungry terrorists, Marxist in their orientation, who will set up a one-party dictatorship in the fashion of Zambia, Mozambique and Angola. The native blacks will have no effective voice in their destiny; they will be worse off than they are now. Most of the white Rhodesians will leave, and a long dark night will begin.

In that dreary prospect, repeal of the Byrd Amendment fits perfectly. In the U.N.'s essentially dishonest atmosphere, polluted by a double standard of international morality, the Byrd Amendment was too good to survive. Let it go. Asking the U.N. to tolerate truth is asking too much.

GOLD CLAUSE FREEDOM BILL

Mr. HELMS. Mr. President, I ask unanimous consent that the distinguished Senator from Alaska (Mr. STEVENS), the minority whip, be added as a cosponsor of S. 79, a bill which would restore the enforceability of gold clause contracts.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, since I introduced this legislation, I have received a number of expressions of support from various sources. Officials of utility companies have expressed interest in gold clause contracts as a possible means of reducing the cost of capital. Scholars have pointed to the legal consistency of S. 79 with the legislation which restored the freedom to own and hold gold.

In addition to previous statements by former Treasury Secretary Simon and Federal Reserve Board Chairman Burns, I received a letter last fall from House Banking Committee Chairman REUSS stating—

Regarding your interest in legislation which, if enacted, would repeal the Joint Gold Clause Resolution, I certainly can see no objection to its repeal at this time.

In an effort to explain more fully the operation of gold clauses, I asked the Library of Congress to investigate recent foreign experience in financial instruments.

Mr. President, I ask unanimous consent that a paper prepared for me by the Congressional Research Service entitled "Foreign Bond Issues Containing Gold Clauses," be printed in the RECORD at the conclusion of my remarks.

Mr. President, I also ask unanimous consent that a brief bibliography of statements and materials on this topic be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Library of Congress, Congressional Research Service, Economics Division, Washington, D.C.]

FOREIGN BOND ISSUES CONTAINING GOLD CLAUSES

In response to your inquiry of October 1, 1976, on the subject as above, we have located two current French bond issues which contain gold clauses. In the strict sense, these are not true "gold clauses" since they do not provide for payment in gold. They could more appropriately be called "gold indexation clauses" whereby the value of the security fluctuates, in effect, with the value of gold on the free market.

The basic particulars of the two bond issues are as follows:

1. Four and one half percent State loan of 1973.—The loan was authorized in principle by section 2 of Law 73-965 of October 16, 1973 (Journal Officiel de la République Française (J.O.), October 17, 1973, p. 11179). The statute also established a maintenance-of-value (MOV) guaranty based on the price of gold, and provided for the exemption of capital gain and interest on the loan from income taxes.

The detailed provisions applicable to the loan were promulgated by Decree 73-967 (J.O., October 17, 1973, p. 11186). The bond issue floated in part for the purpose of retiring, by conversion, a portion of an earlier similar loan (3½ percent State loan of 1958, J.O., June 14, 1958, p. 5586) which was called in its entirety in October 1973. The conversion provision applied only to those 1958 bonds that were not redeemed by their holders for cash during a 10-day period at the end of October 1973.

The new bonds, drawing interest at 4½ percent and issued for a term of 34 years, were exchanged at par for those of the 1958 issue in denominations of 100, 500, 1,000, and 10,000 francs, issued, at the option of the holder, to bearer or in registered form. Interest in the amount of 4.50 francs for every 100 francs of nominal value is payable annually on June 1. The retirement of the bond issue takes place through annual (June 1) redemptions of a portion of the issue in accordance with an amortization schedule. The bonds to be redeemed each year are drawn by lot. In addition, the Government may call, beginning with June 1, 1983, all or any portion of the bonds then still outstanding. The bondholders, on the other hand, may use their bonds at any time for the payment of certain taxes.

The redemption value for any of the above mentioned transactions (regular amortization, accelerated retirement, or use for payment of taxes) is determined on the basis of the gold indexation clause, incorporated in the decree (section 9). The Minister of the Economy and Finances is charged with determining the redemption value twice a year, with effect on June 1 and December 1 for redemptions taking place during the respective subsequent six-month period. The redemption value is equal to the nominal value multiplied by a coefficient which equals the average price of the 20-franc gold piece (Napoléon d'or) on the Paris free gold market during the 100 business days immediately preceding, respectively, May 15 and November 15, divided by 36 francs (presumably the value—in "new francs" of 1960—of the Napoléon d'or at the time of issue of the 1958 series). In any event, the redemption price is not lower than 250 francs for each 100 francs nominal value, the apparent redemption value of the 1958 bonds at the time of the October 1973 conversion.

2. Seven percent State loan of 1973.—The loan was issued under the general authorization of section 25 of the Budget law of 1973 (J.O., December 21, 1972, p. 13222), empowering the Minister of the Economy and Finances to incur bonded indebtedness to cover the budget deficit for 1973, and a decree of the Minister (73-46, J.O., January 11, 1973, p. 503) providing in detail for the bond issue.

The MOV guaranty of this series is not tied directly to gold but instead to the ratio between the official gold content of the franc and that of the unit of account (U.A.) of the European Economic Community, the latter equal to the pre-1971 devaluation gold content of the U.S. dollar (0.88867088 grams fine). The guaranty becomes effective when this ratio as it exists on January 1 of the year in which the transaction involving a bond takes place has lower value than the same ratio as it existed on the day of issue (January 16, 1973). The adjustment coefficient, applicable to both the redemption value and interest payments, equals the result obtained by dividing the day-of-issue ratio with the latest January 1 ratio. In effect, if the gold content of the franc decreases—everything else remaining equal—the adjustment coefficient is greater than 1 and the redemption value in current francs is greater than the nominal value.

In the event that the latest January 1 ratio cannot be determined for any of five specific reasons listed in the decree, the MOV coefficient is to be determined on the basis of the "gold content" of the franc as evidenced by the franc price of a 1-kilogram gold ingot on the Paris free gold market. The actual coefficient is equal to the result obtained by dividing the average price of gold during the 30 business days immediately preceding the 1st of January of the year in which the bond transaction takes place by the average price of gold during the 30 business days preceding January 1, 1973. As in the case of the MOV guaranty based on the U.A.-based ratio, this secondary guaranty becomes effective only if the adjustment coefficient is greater than 1. Otherwise, the bonds are redeemed or the interest is paid at naminal value.

The issue consists of non-callable bonds, issued at par at a nominal value of 1,000 franc, falling due in 15 years, and bearing 7-percent interest payable annually on January 16. No interest accrues after the due date of January 16, 1988. Income from these bonds is not tax-exempt, nor may they be used by their holders for payment of taxes.

A translation of the two decrees is in preparation and will be forwarded to your office separately.

FPC VICE CHAIRMAN WATT TALKS SENSE ABOUT ENERGY

Mr. HELMS. Mr. President, on March 14, 1977, Mr. James G. Watt, Vice Chairman of the Federal Power Commission, delivered an important address at the annual meeting of the American Paper Institute held in New York City.

As a Federal Power Commissioner, Mr. Watt is down in the trenches, so to speak, in this Nation's battle with energy shortages. But he is no defender of the disastrous energy policies that have caused these shortages. He understands that not until we have returned to the marketplace and deregulated the price of new natural gas, for example, will the problem of the natural gas shortage be resolved.

The allocation of our resources, he rightly insists, should be based on voluntarism, private initiative, individual choice, and freedom in the marketplace. He concludes:

> The keystone of any realistic National Energy policy must be the return to the free market system.

Mr. President, had Government leaders allowed the free enterprise system to work, instead of imposing unnecessary and harmful regulations, many of our current energy difficulties would have been avoided. Commissioner Watt has provided the chart and the compass that will lead this Nation out of the morass of controls that now clog our system. I would like the Members of the Senate to have the benefit of his understanding and insight, Mr. President, and I ask unanimous consent that his address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE POLITICS OF ENERGY SUPPLY AND DEMAND

(Excerpts from Remarks made by James G. Watt, Vice Chairman, Federal Power Commission, before the American Paper Institute, Inc., in New York City, New York, on March 14, 1977)

The number one domestic problem in America can be summarized in a single word, energy. The Nation and its leaders have been embroiled in political battles for several years as we have attempted to develop a meaningful National energy policy. So far, we have failed in this attempt, and the costs of our failure have been staggering in terms of inflation, unemployment, economic recession, political conflict, and most damaging of all an uncertain future.

I approach this general subject from my point of view as a Federal Power Commissioner. Our Commission has had a significant impact on the energy situation. We do not, however, have a strong role in ultimately formulating the Nation's energy policy.

For many years our energy leaders, Government and private, have been warning that coming fuel shortages would restrict the growth of our economy and that immediate action needed to be taken to accelerate exploration and development of our domestic sources of oil, gas, coal and uranium. They further warned that we needed to reduce the growing dependence on foreign oil. With the exception of a very small population, those warnings were not given serious attention. In fact, the Nation's leadership charted a political course that stimulated foreign oil imports and brought about Federally controlled, artificially low prices for natural gas that encouraged the wasteful consumption of this premium fuel. That same leadership brought about a political environment that thwarted the efforts to develop our coal reserves, limited nuclear energy development, and in general discouraged the conservation of energy. The theme in those years was cheap energy with little regard for the future. Today, we are reaping the harvest which has grown from the seeds of neglect, poor judgment and a disregard for proper conservation of our natural resource base.

This summary of the past and where we now are is not easy for me to present. I have traditionally been an optimist—one who pumps "sunshine" and joy. And, yet, in being realistic about the National energy scene, we must admit that there is not a glowing report to be given. For my entire professional career, I have been an advocate and a defender of the private enterprise system. I have been a spokesman for voluntarism, private initiative and individual choice as well as freedom in the marketplace to determine the allocation of our resources.

Today I am going to present concepts and use terminology that just a few years ago would have been anathema to me and to many in this room. But the times have changed and through the failure of the Government leadership to allow voluntarism and the free market forces to work, we find ourselves in a desperate situation that is going to require some unusually harsh courses of action.

We can look to mandatory allocation of natural gas supplies, mandatory conservation of energy, and increased taxes on the use of energy. We will need to aggressively expand energy research and development programs; adopt a realistic coal use program; conduct our foreign affairs in accordance with our dependency on foreign oil; and accelerate development of nuclear energy.

I think it is important that we look briefly at a few statistics which show the relative use of our various sources of energy. Petroleum makes up 46 percent of our energy base (40–50 percent foreign imports.) Natural gas is contributing over 28 percent of the energy consumed in America. Coal contributes almost 20 percent, nuclear power over two percent and hydro power, about four percent.

The paper industry is the fourth largest industrial consumer of energy in America. It is the number one industrial user of fuel oil. Those figures, as prepared by your API, are quite revealing. It is interesting to note that 45 percent of the energy used by the paper industry comes from waste products. That is great! Yet, much more of the energy needed hopefully will come from waste products and conservation so that you can reduce your dependency upon costly fossil fuels.

Narrowing our focus further, it is interesting to look at natural gas uses. There we see that approximately 16 percent of the natural gas is used for electric generation. Thirty-seven percent is used for household and commercial purposes, with industry using about 45 percent of the natural gas flowing in America today.

We have come through one of the harshest winters on record. We stretched the capacity of our natural gas facilities and limped through this winter with tremendous costs to our economy and to our people. The hardships brought about by the cold winter were complicated by two factors. Number one, we did not have the transportation facilities to deliver sufficient quantities of natural gas. And number two, we did not have enough natural gas to meet needs in those areas hit by the cold, harsh winter weather.

Why did we not have sufficient capacity for the delivery of the needed natural gas? The answer to that is simple. We could not afford to build the capacity to deliver gas in the quantities that would have been needed in January and February. It would not be economically advisable to commit such huge sums of capital to build facilities which would lay idle as excess capacity during almost 99 years out of 100. No one proposes that we build transportation facilities to meet the harshest one winter in a hundred.

The second cause of the suffering we experienced during this cold winter can be addressed, and indeed must be addressed, and that relates to the supply of natural gas. For many years the Federal policies encouraged the expanded use of natural gas for less than efficient purposes. As a result, in 1968, for the first time in our history, we consumed more natural gas than we added to our reserves. Every year since then we have consumed more gas than we have found in the 48 contiguous States. The result has been a development of two markets. A Federally regulated and controlled interstate market and the non-controlled, free intrastate market.

Today, gas in the Texas intrastate market is selling for about $2.00. In the interstate market 56 percent of the gas flows at 29½ cents, with new gas being sold at $1.44. That disparity has forced the private sector to invest its money in the intrastate market so that they can get the better return on their dollar.

The answer to this aspect of our energy problem is very simple. We must return to the marketplace and deregulate the price of new natural gas.

We were able to get through the cold, harsh, hostile winter of 1977 because of the voluntary cooperation of the American people. It is always thrilling to me to see how the people of this Country rally when there is a legitimate, serious crisis at hand. The voluntary measures taken by the consuming public to conserve natural gas was tremendously important to our success. In addition to that, the producers and the pipelines, both interstate and intrastate, pulled together in a remarkable way. They were able to deliver significant quantities of gas to those areas which were hit so hard. It is also necessary to give thanks to the Country of Canada for their sale to the United States of additional supplies of natural gas. The voluntary efforts of the business community and the people of this Country bailed us out again. It is indeed a remarkable characteristic and capability of this Nation.

In evaluating the aftermath of this harsh winter, it appears to me that Federal regulation of the price of natural gas and its sale in interstate commerce has been necessarily so substantially altered by the Commission's efforts to get through the crises of this winter, that we can never go back to the "old" way—that is, the way of operating prior to January 1977. It is necessary for Congress to bring about a substantial overhaul of the Natural Gas Act of 1938. Some of us have been advocating that it be significantly amended. The President is now proposing a reorganization of the entire Federal energy family along the very similar lines that President Ford asked the previous Congress to consider. In addition, President Carter will soon send his National Energy Policy to the Congress for consideration.

Unfortunately, the needed National energy policy has been trapped in the politics of Washington for a good number of years. Because of the cold winter, I believe Congress will have their attention focused again on the need of a realistic National energy pol-

icy. I am hopeful, as I know you are, that President Carter's program to be announced about April 20 will receive the proper attention. I, of course, do not know what President Carter is going to recommend, but we can speculate. If it is a realistic program, it will be controversial on the Hill and be subjected to a lot of flack by those who are nearsighted and unwilling to bring about the necessary adjustments and required sacrifices. But sacrifices will need to be made if we are going to have a strong and free system in the years ahead.

I believe the keystone of any realistic National Energy policy must be the return to the free market system. I believe that is the key to any successful program. I am confident that most of you in this room share that view, thus I am not going to dwell on it any further.

Because of the politics of today, however, deregulation will probably not be the first and foremost element of the President's program. For political purposes he will probably make conservation the number one issue. No one can be against the conservation of energy. However, if the program is to be realistic, there must be proper attention given to programs needed to encourage the addition of new sources of energy as well as the conservation of existing energy sources.

We can expect mandatory conservation requirements.

As I have indicated earlier in these remarks, the phrase "mandatory" is offensive to my philosophical background. But those who believe as I do, must be flexible enough to adjust to the changing circumstances. We have already, as a Nation adopted some mandatory conservation measures.

With regard to another offensive term, let me talk about mandatory allocation. This phrase is one that I personally have objected to for many years. Since serving about a year and a half at the Federal Power Commission, I've heard the lawyers argue and debate about the authority of the Federal Power Commission to allocate the natural gas resources to the different areas of the Country and for different purposes.

I have agreed with all of those who have told how offensive it is for the Government to allocate resources. I have heard those who have challenged the legal authority of entities such as the Federal Power Commission to order allocation. But I have been realistic enough to look at the track record and have recognized that the Federal Power Commission for some period of time has been allocating natural gas resources. I have been voting for the allocation of natural gas resources between and among competing pipelines and competing purposes. I assume those cases will be taken to Court. I believe the courts will find as I have, through reason or rationale, that the Natural Gas Act of 1938 did contemplate that under the proper conditions the Federal Power Commission can allocate directly or indirectly natural gas. I suggest that President Carter's program will recommend further allocation authorities for his proposed new Department of Energy and I suspect that without any serious question Congress will approve such allocation authority.

The argument should then be made, "Why not allow the allocation of our energy sources to be made in the free market?" I have advocated for many years that that is the very best place for allocation of any resource. Unfortunately, we are not at the beginning of a new ball game. We are in the last inning of a ball game and we are behind. We had artificial, unreasonable controls brought about by the political forces which do not support the free market solution to these type of problems. In my opinion the political leadership of 1977 will not allow the adjustments to a true free market solution to our problems. It is not easy to predict how traumatic that adjustment might be. Thus, I think it is likely that the political leadership will opt for an imperfect, artificial regulation and allocation of our resources in an effort to define and limit the traumatic impacts that might result even though it is recognized that it will result in an artificial, arbitrary and not fully adequate solution to our needs.

The challenge that we are facing is to develop policies which will endure in the long run. That is difficult because it requires sacrifices in the short run. The test is whether our political leadership will be willing to pay the price in the immediate for the benefit of the future. Fortunately, the founding fathers of America and the succeeding generations of leadership were willing to sacrifice and pay a price so that we might live in a land of freedom and a land of abundant supply. I am hopeful that future generations can look back to 1977 and say that the political leadership was unselfish and was willing to make personal sacrifices, both political and real, in an effort to provide for our future. That's the test that is before America. That is the test that will resolve the supply and the demand of energy in the years ahead.

PRIVATE FIRST CLASS MICHAEL D. PUTNAM

Mr. THURMOND. Mr. President, all too often many are inclined to be unjustly critical of the "younger generation." Recently, I read an article in the Leader, Lexington, S.C., entitled, "To America I Say, Thank You." Pfc. Michael D. Putnam, Company B, 10th Battalion, 2d Basic Combat Training Brigade, Fort Jackson, S.C., made these remarks at his unit's graduation. The remarks of this young soldier so impressed me, I wish to share them with you.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Lexington (S.C.) Leader
Mar. 16, 1977]

"TO AMERICA I SAY, THANK YOU"

(EDITOR'S NOTE: The following was presented by a trainee, PFC Michael D. Putnam, Co. B, 10th Bn., 2nd Basic Combat Training Brigade during his unit's graduation.)

It wasn't too many years ago that I sat in front of my television set and watched the Vietnam conflict unfold before my eyes. I saw the miserable conditions that the American Soldier had to endure. And I asked myself, what kind of man is willing to go to the other side of the world to fight a guerrilla war in swamps and jungles?

There's but one kind of man who has done that through the ages: The American Soldier. No man wants to leave his home to fight. But a man, if he is truly a man, will do what he knows is right in his heart. The American Soldier has always done what he must do, not just what he would like to do. Through these sacrifices America has climbed to its pinnacle of greatness.

I'm proud to say that we have been given freedoms far exceeding those of any other country in the world. And we got those freedoms from the blood, sweat and tears of our forefathers who weren't afraid to fight for and possibly die for something they believed in.

To me, the key idea is that my freedoms were given to me. I haven't earned a thing! Someone else earned them for me. A man can only take so much before he must put something back.

A few months ago I took a careful look at my life and realized I had not done my share of putting something back into America for what I had taken out. My life had been easy. I've always had plenty to eat and a warm place to sleep.

And to America I say, thank you. But for a "thank you", to mean anything, it must have a backbone. So I'm backing up my "thank you" with an enlistment in the United States Army. Some people may think that unnecessary. I don't! I believe it is a very small token of putting something back into America.

If I can't give my country a few years of my life, I don't deserve to stand before you today and call myself an American. I take great pride in being an American; something I will never treat lightly.

During my Army career I will strive to better myself as an American Soldier and be prepared to defend and give my life for my country so those that follow may enjoy the same freedoms that were bestowed upon me.

BIG SKY BASKETBALL

Mr. CHURCH. Mr. President, last week marked a very high spot for Idahoans and college basketball. March 17 was the second round of regional play in the NCAA basketball tournament and Big Sky Conference champion Idaho State faced traditional basketball power UCLA. When the last buzzer sounded that night, what many sportswriters called the upset of the year was complete. A superbly prepared Idaho State team had beaten the heavy favorite UCLA by the score of 76 to 75.

Despite the fact that ISU was overlooked by almost everyone all year, they had compiled an outstanding 24 and 4 record and had won the tough Big Sky Conference tournament. All of Idaho can be proud of the play of Idaho State, which was led by a young man from the small town of Aberdeen named Steve Hayes.

The Idaho Statesman has recognized this proud moment in Idaho sporting history with its editorial "Idaho State's Finest Hour." Mr. President, I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Idaho Statesman, Mar. 19, 1977]

IDAHO STATE'S FINEST HOUR

No team had defeated UCLA in a Western Regional NCAA Tournament in 11 years—until Idaho State University did it Thursday in a heart-stopping game, the upset of the year in college basketball.

The result was not so surprising to Idaho State's followers as to the Bruins and the national media. Idaho State, after all, had a fine 25–4 record and had lost only one game since Dec. 11.

This victory was no fluke. Had Idaho State not been forced to send two starters to the bench in foul trouble in the first half, UCLA might not have led at halftime.

UCLA had won the Western Regional Tournament 10 consecutive times and won the national tournament eight of those 10 years. Idaho State wasn't just playing a fine basketball team loaded with individual talent; it was tangling with a dynasty.

A skinny kid out of Aberdeen, Idaho, and a bunch of players unknown to the national sportswriters took command in the second

half and built an eight-point lead with two minutes to play.

It seemed that everything UCLA threw up in the final two minutes went in and the pressure bothered the Bengals. But Idaho State never lost its composure. The Bengals dropped in nine of 10 free throws in the pressure-packed final minutes including four in a row by a freshman.

The entire state of Idaho has reason to be proud of the Idaho State team and its coach, and the spirit and tenaciousness they showed.

Coach Jim Killingsworth pointed out that the national media tend to underestimate the Big Sky Conference. While other teams with less impressive won-lost figures made it into the national rankings, the Bengals went almost unnoticed.

Part of the magic of college basketball is that teams from smaller schools can challenge the better-known powers. Montana, the Big Sky champion team of two years ago, took UCLA down to the wire before bowing by three points.

Idaho State had been to the NCAA basketball tournament nine times before, eight times from the old Rocky Mountain Conference. Twice, in 1954 and 1959, the Bengals finished third in the West. Going into Thursday's game, Idaho State had a 7–10 record in NCAA play.

This is the best showing in history by an Idaho college basketball team, except for College of Southern Idaho's junior college championship teams. It is also the best in an NCAA tournament for a Big Sky team.

Idaho hats are off to the fine Idaho State team and its coach. They have proven that they deserve to be in the regional championship game, that they can play with the best teams in the nation. A lot of Idahoans will be cheering for them today against Nevada Las Vegas.

PERMANENT TAX CUTS NEEDED

Mr. ROTH. Mr. President, within the next few weeks, the Senate will begin its consideration of H.R. 3477, the so-called Tax Reduction and Simplification Act of 1977. I believe this legislation, particularly its provision for $50 tax rebates, is ineffective, inequitable, and insulting, and one of the most expensive April Fool's jokes ever played on American taxpayers.

I believe that a permanent, across-the-board tax rate reduction for all workers is the best way to stimulate long-term economic growth. The Congressional Budget Office, the Joint Economic Committee, and a substantial body of economic experts agree with me that temporary tax rebates are not as effective as permanent tax reduction in providing long-term economic expansion.

A 10-percent reduction in all tax rates would expand the economy faster, create more jobs, and result in a smaller deficit than the $50 rebate program, and I intend to offer this proposal as an amendment to the tax bill. I urge my colleagues to carefully consider this proposal, reject the tax rebate proposal, and enact instead permanent tax reductions for all workers.

I ask unanimous consent that four articles regarding permanent tax reductions be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Los Angeles Times, Mar. 26, 1977]

KEY SENATORS DELAY CARTER'S TAX JOBS BILLS

(By John H. Averill and Paul Steiger)

WASHINGTON.—Key Senate Democrats have begun dragging their feet on President Carter's tax rebate program and other economic stimulus measures, partly out of concern over inflation and partly because of resentment over Carter's opposition to major water projects.

As a result, final congressional action on the tax rebate and on related jobs and public works spending almost certainly will be delayed until after Congress' April 8–15, Easter recess.

Consequently, even if the Senate ultimately approves the Carter package, rebate checks may be delayed until June—a month later than Carter wants them to go out.

As of now, Senate Majority Whip Alan Cranston (D-Calif.) said Friday, he can count enough votes to win passage of the $50-a-person tax rebate, but Republican senators are mobilizing to exploit Democratic dissension and defeat it.

"It's a horse race," Sen. William V. Roth, Jr. (R-Del.), a member of the Finance Committee, said in an interview "The more time that has passed, the less support the rebate has had."

Roth and his GOP colleagues are pushing for a permanent 10 percent tax cut for individuals as a substitute for the rebate. They contended that such a move would do more to stimulate employment, production and investment than the Carter plan for a one-time payment to households with adjusted gross incomes of less than $30,000 a year.

Chances are considered slim that the Republicans, outnumbered 62 to 38 in the Senate, could obtain a majority for their proposal. But by joining with disaffected Democrats, they could muster enough votes to defeat the rebate measure.

In the Senate Finance Committee, the bill squeaked by on a 9-8 vote, with several Democrats voting for it only after last-minute calls from Carter and a repeat appearance before the committee by his chief economic adviser, Charles L. Schultze.

At least one of those Democrats, Sen. Floyd K. Haskell of Colorado, already has said that he will vote against the measure on the Senate floor.

Like many other liberals, Haskell fears the rebate may raise anxiety about inflation without doing much to reduce unemployment, and he dislikes a provision in the tax measure that would increase to 12 percent from the current 10 percent the tax credit given to businesses for investment in capital equipment.

In addition, although Haskell has not mentioned this in connection with the tax bill, his state is one in which Carter wants to kill a water project.

So is Louisiana, the state of the Finance Committee chairman, Democrat Russell B. Long. Long has not been shy about recording his displeasure at Carter's stance on dams and other water projects. Delay on the tax measure, Long said recently, would give the President time for "thoughtful reconsideration" of the projects.

Long's committee, which completed work Tuesday on the tax rebate package, is not expected to file its report with the full Senate until Monday. Debate on the measure is not scheduled to begin until late in the week and certainly will carry over until the first week in April.

Unless the Senate approves the tax package before it recesses—a problematical prospect, given the number and variety of amendments expected to be offered on the Senate floor—the Treasury will not be able to mail the bulk of the rebate checks before June, a Treasury official said.

Even after Senate passage, the bill would have to go to a House-Senate conference to iron cut differences between the separate versions of the measure. But the Treasury is prepared to start the check-writing process as soon as the Senate approves the rebate.

Another key Democratic senator whose state has water projects on Carters' list of 30 to be halted unless persuasive arguments can be mounted in their defense, is John L. McClellan of Arkansas.

McClellan is chairman of the Senate Appropriations Committee. At his suggestion this week, the committee decided not to bring to the Senate floor a $19.8 billion measure funding public works, job programs and antirecession aid to the states. Carter has requested this spending as part of his program to stimulate the economy.

Senate Majority Leader Robert C. Byrd (D-W. Va.) said in an interview that he had originally planned to begin Senate debate Friday on the appropriations measure but had agreed to a postponement at McClellan's request.

Now, Byrd said, "I'll wait until I hear from Sen. McClellan and he tells me he is ready to take it up."

McClellan could not be reached for comment. But a committee aide said that the senator and other members of the committee here concerned that the measure might add to inflation and wanted to wait for later price and employment statistics. In addition, he said, authorization bills spelling out the manner in which the funds were to be spent had not been passed.

There was no mention of concern over water projects, the committee aide said.

[From the National Observer, Mar. 19, 1977]

THE TAX-CUT FIGHT

(By Robert W. Merry)

The Carter Administration wants to give you $50 this year in the form of a tax rebate to help stimulate the economy. The House of Representatives wants to give you the $50 only if you make $25,000 or less, and then phase it out so if you make $30,000 or more you won't get anything. Either way, Delaware's Republican Sen. William Roth thinks it's a bit paltry, as he made clear the other day when the Carter Administration's economic big three appeared before the Senate Finance Committee.

Peering down at Treasury Secretary Michael Blumenthal, Budget Director Bert Lance, and Charles Schultze, chairman of the Council of Economic Advisers, Roth said: "What bothers me is that this $50 rebate really creates no incentive for any middle-class family to put a down payment on a house, or a car, or a refrigerator, or even a TV set. What's needed is a permanent tax cut across the board. Help the lower end of the economic ladder, yes, but you also have to lower taxes for the upper brackets. That's where the productivity is, that's where the capital formation will come."

ENOUGH LOYALTY

Roth's admonition actually addresses two major issues surrounding the proposed rebate, which is the main element in Carter's $13.8 billion tax-reduction package. One issue is whether the economy needs a permanent tax cut rather than the proposed one-shot rebate. The other is whether the tax cuts should be concentrated at the lower rungs or made all the way up the economic ladder.

While few congressmen—even Democrats—appear enthusiastic about the rebate, the new Democratic Administration apparently commands enough party loyalty in Congress to get its way on that issue. But it's close. When the issue came up in the House last week, a Republican effort to substitute a

permanent tax cut for the Carter proposal lost narrowly—194 to 219. Many Democrats broke ranks to express the view that the rebate is an inadequate economic stimulus.

But the other question—who should get the tax breaks?—provides Roth and his congressional allies with their toughest fight. An egalitarian spirit is evident in Congress, helped along by Carter's own Populist rhetoric, and congressmen have little disposition towards easing the tax burden shouldered by business or by individuals with incomes exceeding about $25,000.

WE WILL SUCCEED

But Roth remains undaunted, convinced that permanent, across-the-board tax cuts—and substantial ones—will soon be recognized not only as good economics, but as the best possible politics. "The Carter program will be hard to stop this session," says Roth. "But eventually we will succeed. People want less for Government and more for themselves, and the national mood is beginning to fit the economic realities."

Roth's economic argument is that the national economy is burdened by tax policies that stifle incentives to produce; the policies tax away too much of the fruits of production. Remove the tax shackles he reasons, and production will increase and the economy will expand, generating more jobs and more tax revenues for Federal coffers.

Roth admits that his argument runs counter to the conventional economic wisdom of both Democrats and Republicans. The Democratic wisdom concentrates on creating new demand so new production will follow. Many Democrats also favor income-redistribution policies, and across-the-board tax cuts don't satisfy that egalitarian instinct.

WHY DO PEOPLE PRODUCE?

Republicans, meanwhile, have been the party of "fiscal responsibility"—balanced budgets. The result, says New York's Republican Rep. Jack Kemp, is that Republicans have ended up being the tax collectors for Democratic programs, an untenable political position.

For nearly five years Kemp has been fighting for tax policies that stimulate increases in supply rather than demand, and he brings to the battle an enthusiasm he once devoted to gridiron battles when he was a pro-football quarterback. "The conventional wisdom," says Kemp, "is that there is an unlimited source of tax revenue out there and that people produce because other people buy. Well, people produce not just because people buy, but also for after-tax income, after-tax profit, after-tax rewards."

Tax away those rewards, says Kemp, and you will stifle productivity—which, he adds, is exactly what has happened. But Kemp's solution—remove the tax shackles and restore the rewards of production—runs counter to that egalitarian spirit in Congress, which looks askance at tax breaks for business and the affluent. The House made that clear when it cut off the Carter tax rebate at $30,000; it also knocked out Carter's proposed investment tax credit for business. Stimulating demand remains the central congressional strategy.

Still Kemp continues to push his supply-side proposals, reminding his colleagues that there is a recent precedent—John Kennedy's revenue policies of the early 1960s. He notes that the Kennedy-sponsored across-the-board tax cuts in 1964 were expected to result in a six-year Federal loss of $89 billion, but that increased production actually created a six-year revenue gain of $54 billion. That could happen again, says Kemp.

Although Kemp acknowledges that his point of view is a minority of a minority in Congress, he says he has patience. "When I feel a little bad about things not moving as quickly as I would like," he says, "I take solace in realizing we're bucking 30 years of prevailing economic thinking. You don't win against those odds overnight."

[From the Washington Star, Mar. 23, 1977]

TAX REBATE: A SMALL PLUM OF DOUBTFUL GOOD

(By Charles Bartlett)

The "let's vote this one for Jimmy Carter" spirit in which the $50 rebate is being pushed through Congress is no harbinger of confidence in the administration's economic strategy.

While the anxiety to back Carter on his first major proposal is holding Senate Democrats in line, many now doubt the efficacy and timeliness of the rebate. Some members fear the small plum will swell the public's hostility toward their pay raise. Constituents already make visits home less pleasant by saying, "You gave us $50 and took $13,000 for yourselves."

The case for the rebate has not been improved by the revival of inflation. President Carter and articulate associates like Charles Schultze and Bert Lance have been saying this was "the only feasible way" to get quick stimulus. The worry now is that a pep pill face the economy with another siege of stagflation.

The Republicans feel the issue is made to order for them. The President's great concern is obviously to preserve tax revenues so that he will have a better chance of balancing the budget before the next election. He will also have more funds for new programs, a prospect which unites the Republicans into urgent pleas for a tax reduction.

Few seriously disagree with Reginald Jones of General Electric who sees no hope that a one-shot rebate will inspire the average working man to step up his spending. Most agree that the 1975 rebate went into savings and the payment of debts. The case for a permanent tax cut is made by inflation's cruel distortion of the tax burden on the average family.

This opportunity to combine good economics with good politics has forged Senate Republicans into a solidarity which is rare for them. But they will lack the numbers to beat the rebate on the floor unless they gain support from the Democrats who share their misgivings on the rebate. But the Democrats are also being coalesced by their inclination to stand with the President on his first major proposal. They are privately voicing their doubts but most will be apt in the end to vote with the party.

This situation may, in the view of Sen. William Roth, R-Del., offer the Republicans a launching pad for a sweeping new courtship of the middle classes. Roth wants an across-the-board tax cut that will be shared by all whom he calls "the people who keep America moving." He believes the Republicans can win the support of those who feel oppressed by government by joining on initiatives to ease the feeling of the middle class that it is being pulled downward by inflation.

Confidence is diminishing in the assertions by administration spokesmen that there can be no serious gains in the rate of inflation this year because of the slack capacity in the economic system. Business Week points out that living costs are being adversely affected by the spread of anticipatory pricing and the secretary of the Treasury, Michael Blumenthal, concedes that the nation can talk itself into a new bout of inflation.

Blumenthal continues to maintain that investor confidence is the key to the expansion, but the administration has been missing opportunities to build confidence. One example: the small manufacturers who comprise the National Industrial Conference are convening in Washington this week and they are getting none of the attention from the White House to which they have been accustomed.

In fact their letters asking the President to send them a message of greeting have gone unanswered. The Carter staff has refused to give them their usual briefing on administration policies. While several Cabinet officers will address them, these small entrepreneurs may wind up feeling they are the enemies when they are critically needed as allies.

The last Democratic President, Lyndon Johnson, worked overtime to strike a rapport with the business community. He put much time into making the businessmen more aware of the problems he faced. Similar exertions by Carter would do more than the $50 rebate to build confidence.

[From the Wilmington (Del.) Morning News, Mar. 18, 1977]

ROTH TAX CUT DEFEATED IN FAVOR OF $50 REBATE

(By Pat Ordovensky)

WASHINGTON.—The Carter administration's $50 tax rebate survived its stiffest test by a single vote yesterday, because three Democratic senators said they aren't ready to end the honeymoon.

By a vote of 9 to 8, the Senate Finance Committee rejected a move led by Delaware's Sen. William V. Roth Jr., to replace the rebates with an across-the-board income tax cut.

Minutes later, an identical vote killed another Republican effort, led by John G. Danforth of Missouri, to cut taxes only on the first $18,000 of everybody's income.

Both were straight party-line votes. Roth and Danforth were supported by all seven committee Republicans, plus Sen. Harry F. Byrd, the Virginia independent. All nine Democrats at the meeting voted to keep the rebates, although three said they were doing so reluctantly and only because the White House asked.

The two decisions mean that President Carter's plan to send a $50 check to most federal taxpayers this spring, as the keystone of his economic stimulus package, probably will become law in a couple of weeks.

Aides to Roth said the Delawarean would push his tax cut again when the bill reaches the Senate floor next week, but his chances are not expected to be as good as they were in committee. The House already has passed a bill authorizing the rebates, phasing them out at incomes between $25,000 and $30,000.

Roth's proposal, which would have cut all individual and business tax rates 10 percent, drew oral support but no votes from Democratic Sens. Abraham A. Ribicoff of Connecticut, Floyd K. Haskell of Colorado, and Daniel P. Moynihan of New York.

Each of the three said, in effect, that he is personally cool to tax rebates but wants to give Carter's economic team a chance to prove itself.

"I'm impressed with the arguments of Sen. Roth," Ribicoff told the Treasury Department's man at the committee meeting. "I support rebates with a great deal of skepticism because I've never known any economic advisers to any president to be correct."

Ribicoff's reservations were echoed by Haskell, who said he was voting for the rebates only because "the administration is entitled—at least in the beginning—to support from the Democratic side."

Moynihan, who was President Ford's U.N. ambassador before running for the Senate, expressed similar sentiments and asked the administration for a certain amount of candor" in telling the committee if the rebates don't work.

In an effort to keep his wavering Democrats in line, Committee Chairman Russell B. Long of Louisiana brought in the president's

chief economic adviser, Charles L. Schultze, to make a final pitch for the rebates before the voting began.

Schultze conceded that Roth's tax-cut proposal would stimulate the economy as much as the rebates but warned that it would "mortgage revenues far into the future."

Such a long-term revenue cut, Schultze said, would "substantially reduce the possibility of significant tax reform later" and would hinder Carter's attempts to balance the budget by 1981.

Roth rejected that argument, as he did when Schultze appeared before the committee last week, citing the experience of the Kennedy administration in the early '60s when a tax cut stimulated the economy to the extent that federal revenues increased.

"We need long-term movement in the economy to get jobs in the private sector," said Roth, insisting that a one-shot, $50 rebate will not be enough.

A permanent tax cut, the Delawarean said, could permit middle-income taxpayers to make downpayments on new homes, cars or refrigerators, creating jobs in the construction, automobile and appliance industries.

"What's wrong with helping the $20,000, the $30,000 or even the $40,000 guy?" Roth asked Schultze. And he reminded the committee, "Congress didn't turn down $13,000 for themselves."

To buttress his arguments, Roth distributed four pages of statistics to each committee member, including a projection from the Congressional Budget Office that his proposal would create 920,000 new jobs by the end of 1978.

UPGRADING OF VIETNAM-ERA DISCHARGES

Mr. THURMOND. Mr. President, yesterday the Carter administration announced plans to upgrade less than honorable discharges received by service personnel during the Vietnam era—August 4, 1964 through March 28, 1973.

Mr. President, I ask unanimous consent that my press release on this subject, dated Friday, March 25, 1977, be inserted in the RECORD at this point in my remarks.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

THURMOND PRESS RELEASE, MARCH 25, 1977

Senator Strom Thurmond (R-SC) said today that the Carter Administration, without advance fanfare, appears to be on the verge of implementing a program for exonerating Vietnam era deserters.

Thurmond said it is his understanding that a review process of all such cases is about to begin without any announcement from the White House.

Specifically, he said, the plan, which appears now to be imminent, would return administrative control of deserters at large to the military. Deserters could then report to designated military process centers where in most cases, they would probably be given less than honorable discharges. However, Thurmond said, the Administration is to guide these individuals, next, to Discharge Review Boards. These Boards are authorized by Congress but are supposed to review bad discharges, without any form of command instructions.

"In this case," Thurmond said, "The Discharge Review Boards would be instructed. As presently planned by the Administration, their goal would be to upgrade all of the discharges. The instructions, which are being formulated for the Boards, mandate such an upgrading of bad discharges if the deserter (1) received a decoration, (2) was wounded, (3) completed an assignment in Southeast Asia, or (4) completed alternate service to a military tour. Furthermore, they may also qualify for an honorable discharge from a Review Board if '. . . such action is appropriate based on all of the circumstances of a particular case.' These criteria would include age, education, economic background or other factors," Thurmond said.

He added, "I believe the pardon of draft dodgers was a mistake an I believe this administrative move designed to grant honorable discharges to many of the deserters would also be a mistake."

Thurmond, the senior Republican on the Armed Services Committee, said he favored a case-by-case review for all deserters. However, he said, they should be considered on their own circumstances without a pre-determined plan to excuse these offenses.

Mr. THURMOND. Mr. President, since this release was prepared, the actual details of the plan have been made public. The key points in the plan are as follows:

First. Eligible personnel have 6 months to apply for review.

Second. Deserters are eligible to participate in this program. However, deserters from a combat zone are not eligible.

Third. If upgrading of a discharge is initially denied, counsel will be appointed upon request without charge.

Fourth. Persons separated for reasons involving violence, criminal intent, or use of force are not eligible.

Mr. President, the Defense Department has also announced that the following guidelines will be applicable in this program.

Provided there are no compelling reasons to the contrary, individuals who received undesirable discharges for service during the Vietnam era will have their discharges upgraded automatically if they meet any one of these criteria:

First. Was wounded as a result of military action.

Second. Received a military decoration, other than a service medal.

Third. Successfully completed an assignment in Southeast Asia or in the western Pacific in support of operations in Southeast Asia.

Fourth. Completed alternative service or was excused from completion of alternative service under the clemency program instituted September 14, 1974.

Fifth. Received an honorable discharge from a previous tour of military service.

Sixth. Had a record of satisfactory active military service for 24 months prior to discharge.

Mr. President, a review of this action indicates these criteria take any discretion away from the Boards of Review. Certainly the Congress, in passing the law authorizing these Discharge Review Boards, did not intend for the Boards to have no discretion in making the decision whether or not to upgrade a discharge. The administration has defeated the purpose of having such Boards by dictating to the Board when they will upgrade.

The announcement further states that, if the above criteria are not met, the following additional factors to be considered in this regard include:

First. Age, general aptitude, and length of service at time of discharge.

Second. Education level at time of discharge.

Third. Whether entered the military service from a deprived background.

Fourth. Possible personal distress which may have contributed to the acts which led to discharge.

Fifth. Whether entered military service upon waiver of normally applicable entrance standards.

Sixth. Whether the actions which led to discharge were alleged at the time to have been motivated by conscience.

Seventh. Whether was discharged for abuse of drugs or alcohol and, if so, any contributing or extenuating circumstances.

Eighth. Record of good citizenship since discharge. Boards will be encouraged to give weight to this factor when a good record is shown.

Mr. President, it is obvious that these criteria and instructions require very strong reasons for the Review Boards to deny an upgraded discharge to anyone who applies.

The Department of Defense estimates around 462,000 people, including 3,000 deserters, stand to be affected by this policy. These discharges were given under standards of law and discipline that were in effect during the Vietnam era. It is my understanding that these standards have not changed since that time.

Again, I would like to emphasize that I favor a case-by-case review as is currently provided in the law. However, it is obvious to me that this is a neatly disguised way for the administration to give a blanket upgrade in discharge to all people dishonorably discharged, as well as deserters.

Mr. President, I strongly oppose this move. It is merely a compounding of the error made when the President pardoned the draft dodgers. Such a move by the administration cheapens the honorable discharges received by the thousands of men and women who served their country proudly and did what was expected of them in wartime. I fear that such a precedent as set by this action can only bring disastrous results to this country in any future conflict. I sincerely hope I am wrong.

In conclusion, Mr. President, I ask unanimous consent that a press release of the Fleet Reserve Association, dated March 28, 1977 entitled "President Carter's Plan To Forgive Vietnam Deserters Is Opposed by Navy Enlisted Association," be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

PRESIDENT CARTER'S PLAN TO FORGIVE VIETNAM DESERTERS IS OPPOSED BY NAVY ENLISTED ASSOCIATION

President Carter's plan to forgive Vietnam era deserters and issue honorable discharges to them is being strongly denounced by the Fleet Reserve Association. The FRA is composed of over 130,000 career enlisted personnel of the Navy, Marine Corps and Coast Guard.

FRA National President Thomas T. Heaney, a retired Navy Chief Radarman, expressed total disbelief upon first learning of the "devious Discharge Review Board plan" for upgrading military discharges of the deserters. He said, "The Discharge Review Board system was established by the Congress. The purpose of the Board is to review bad military discharges impartially without influence or instructions from the Commander-in-Chief or military commanders. President Carter's plan knocks such impartial action into a cocked hat."

The plan, soon to be announced by the Department of Defense, calls for Vietnam era deserters to report to designated personnel control centers. At these centers the deserters will receive "less than honorable discharges from the respective Service. These discharges will be promptly referred to the Discharge Review Boards for upgrading under guidelines established by the White House.

The guidelines, which are being formulated for the Boards, mandate the deserter's bad discharge will be upgraded if he has (1) received a decoration, (2) was wounded, (3) completed a tour in Southeast Asia, or (4) completed alternate service to a military tour. Additionally, those deserters who do not meet any of these criteria may qualify for an honorable discharge from a Review Board if ". . . such action is appropriate based on all circumstances of a particular case." These criteria would include age, education, economic background or other factors such as the deserter's conduct during desertion.

The enlisted Association's leader said, "The granting of honorable discharges to military deserters especially by a pre-determined, assembly-line operation is a travesty of the Discharge Review Board system and mocks the valiant military service of every Vietnam veteran."

At past Fleet Reserve Association national conventions, the delegates assembled approved a clearly-worded resolution calling for each case of draft-evasion or desertion to be individually judged on its merits under existing laws or the provisions of the Uniform Code of Military Justice.

UNFINISHED BUSINESS OF THE WAR

Mr. McGOVERN. Mr. President, on February 9 several Members of both the House and the Senate collaborated with three private groups to sponsor a discussion of outstanding issues between the United States and Vietnam.

The speakers at these sessions were able to share an impressive amount of information in a comparatively short period of time. Virtually all major issues growing out of our involvement in Vietnam—the MIA question, human rights, the question of reconstruction aid, and the broader lessons we should draw from this experience—were described in expert presentations that were both concise and complete.

Because I think it will be of great help to my colleagues as we are called upon to consider these issues in the days ahead, I ask unanimous consent that the transcript of the discussions on February 9 be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

RESOLVING THE UNFINISHED BUSINESS OF THE WAR

(Testimony before Members of Congress, their aides, and the public, February 9, 1977)

(Sponsored by: Senators Mark Hatfield, and George McGovern; Representatives, Jonathan Bingham, Ron Dellums, Tom Harkin, Elizabeth Holtzman, George Miller, Toby Moffett, Stephen Solarz; and Friendshipment—Coalition for a New Foreign and Military Policy National Council for Universal and Unconditional Amnesty)

WELCOMING REMARKS

Rep. GEORGE MILLER (D. Calif.): Leaving Viet Nam did not end our obligations. There is still unfinished business from this war. We have a duty to many human beings. This government will have to come to grips with many questions which I am sure, for a lot of reasons—mostly political—we have chosen to put on the back burner. We are here today to see what we can do in terms of normalization of relationships with the people of Southeast Asia. We are here to examine how we may again try to bring moral leadership to our government, which must extend a helping hand, which must normalize trade, which can provide an economic base to the nearly destroyed Viet Nam. We must help heal the wounds of war caused by carrying on some of the worst experiments known to man in terms of warfare. We must help make the Vietnamese people whole and recognize that we have got to extend the best of the American people in terms of help.

The people that we have brought together this morning to talk on these subjects you will find to be outstanding experts with long backgrounds. We will have many points to make to the staff and to the press who will hopefully start this movement. The need has been demonstrated that we have got to take an active role and there are some things we have to do.

We need this kind of political presence by our government, which has been unknown to the people of Southeast Asia for the past 21 years.

I now would like to introduce Congressman Richard Ottinger, Democrat from New York.

Rep. RICHARD OTTINGER: Thank you very much, George. I have been deeply concerned ever since the termination of the war that we have left a great many wounds in the aftermath. After every other war that we participated in, we spent huge amounts of money and effort trying to reconcile ourselves with our former enemies, to try to rebuild the damage that was wrought. This is the one war where we have not done that. I was privileged to be on the Committee for Missing Persons of which Mr. Montgomery was the very able Chairman. I did it out of a concern for the families still suffering, not sure about their loved ones, but also because I recognized this as an avenue for resolving our differences with Viet Nam and to build a new relationship. Mr. Montgomery, Pete McCloskey, Ben Gilman and I went to Hanoi last December. We were the first official delegation to go to Viet Nam after the war's end in April. We came away with the strong impression that the Vietnamese were anxious to normalize relations. There was very little bitterness in the aftermath of the war. They looked to the United States for reciprocal gestures. They wanted a negotiated settlement that would resolve all the outstanding problems and to start things on the right track. Unfortunately, our experience was that Secretary Kissinger was still very much involved in fighting the war; his own personal ego was involved in his failure to bring the war to a successful conclusion, and there was no real desire on the part of the Department of State to move forward even though at a meeting with President Ford, the President himself seemed more favorably inclined. We have a new President, and he has said he is anxious to start negotiations for normalization of relations with Viet Nam. He will be sending a delegation shortly to commence those negotiations directly with Viet Nam, taking up a very stagnant dialogue that had been started with the insistence of our Committee under the Ford Administration. I think that we will be talking with Andy Young on the issue of permitting Viet Nam's admission to the United Nations, perhaps even vote for it the next time it comes up, and that we will proceed toward a reconciliation that I think is very long overdue.

The President with respect to some of the wounds here, has started on the path of pardoning draft resisters. Many of us are urging him to go further, to remove the wounds remaining in the U.S. and regularize the status of people who deserted.

I am going to circulate for signatures a resolution designed to strengthen the President's hand in starting the negotiations. It is a resolution I think we can get a great many people in Congress to subscribe to. It reads, "A Resolution on Resolving the Unfinished Business of the Vietnam War."

Resolution

"Whereas the American people, following the tradiiton of our nation, have shown willingness to heal the wounds of war and achieve reconciliation with the Vietnamese people as soon as possible; and

"Whereas President Carter and the Vietnamese government have expressed desires to begin negotiations on the unfinished business of the war, including an accounting of American POW/MIA's; and

"Whereas the House Select Committee on Missing Persons in Southeast Asia recommended in its "Final Report" the early resumption of negotiations with Vietnam on the POW/MIA's and other bilateral problems; now be it therefore

Resolved that it is the sense of the House of Representatives that the President and the Secretary of State should take the following actions as a matter of high priority:

"(a) Initiate high-level negotiations with the Government of Vietnam on all outstanding problems of bilateral relations, including an accounting of the POW/MIA's and establishment of normal relations with Viet Nam;

"(b) Support legislation to lift the trade embargo against Viet Nam; and

"(c) Refrain from exercising the veto in the Security Council against Vietnamese membership in the United Nations."

Co-sponsors of House Resolution "to resolve the unfinished business of the Vietnam War": Mr. Beilenson, Mr. Dellums, Mr. Edwards (Calif.), Mr. Fraser, Mr. Harkin, Ms. Holtzman, Mr. McHugh, Mrs. Meyner, Mr. Rosenthal, Mr. Solarz and Mr. Studds.

I hope the country has progressed far enough to express its sentiment which would then be reflected by a large sentiment among members of Congress to support the President in taking this kind of constructive action to heal the wounds of war. I congratulate you and all the participants for putting on this Conference. There is still that feeling that it was a terrible thing we were involved in. We killed thousands and thousands of people and we caused a great deal of havoc here at home, and now that the actual fighting is over, we have not forgotten all the wounds that were inflicted, and we are committed to effecting a real reconciliation in the aftermath of probably the worst tragedy this country has ever been involved in. Thank you.

Rep. GEORGE MILLER: Thank you, Dick. One

of the things that struck me as we thought of putting this Conference together was that it brought home the insanity of war, whether in Viet Nam or anywhere else, and I hope that as you listen to people talk about the possibilities of normalization, the possibilities of extending relationships, that you might ask, "why the war?" If we can do it now, why not 15 years ago? I think it is an important question, because I worry about the next time around, and we ought to think about this Conference before we think of going to war again. There is a very, very human side. We talk in terms of normalization, of relationships between governments. It is governments that start wars, and it is people that die in them. I think our first speaker today, Gloria Emerson, has probably had as indepth an experience in the human side of the conflict and in the aftermath as anyone. She took her experiences in Viet Nam seriously and after our withdrawal, didn't let them drop, didn't go on to another assignment, continued to be involved. I had the pleasure of listening to her on national radio in anticipation of the President's Proclamation, talking about her book, Winners and Losers, what it meant in terms of individuals and families and human relationships. So I look forward to her presentation this morning, and would like to introduce Gloria Emerson.

GLORIA EMERSON: I first went to Viet Nam in 1956 and returned 15 years later as a correspondent for the New York Times, and was there in 1970, 1971 and 1972. I then left the New York Times in order to join the anti-war movements, because I did not want to live the rest of my life as a "good German."

The problems facing Viet Nam are so huge, they are hard to describe. The figures of the casualties of the war have dropped on us like huge black stones. I can only speak about the South, which I suspect has an enormous problem facing it. I find to my astonishment that I am on the side now of William Colby, who directed the pacification program in Viet Nam before he became Director of the Central Intelligence Agency. He and I had never agreed on anything before, but in an article for the Washington Post, William Colby has written, "Yes, let us bind up the nation's wounds over Viet Nam, but let us not believe that the task will be ended when the American dimension is complete. The burdens borne by Americans were small compared to those of the Vietnamese." William Colby is for reconstruction of Viet Nam, and I am for reconstruction of Viet Nam. Civilian war casualties from 1965 to 1973 were roughly 1,435,000; civilian war casualties from 1973 to 1975, close to 400,000; refugees in the South from 1965 to 1973, over 10 million.

Let me throw out this one figure: 83,000 paraplegics in the South. The need of the Vietnamese is for hospitals, schools, etc. We alone gave them 26 million bomb craters. Imagine a small agricultural country seeking to bring the farms back to life, farmers returning to the rice paddies, with 26 million bomb craters. Think of the number of mines that we left there: they were scattered like salted peanuts. The Vietnamese are a courageous and resilient people. We can do ourselves honor by helping them, since so much of the damage was inflicted by us. In the South, nothing is as it was 15 years ago. When I returned, whole villages were gone that had been there before. The intangible damage was to the society. The South was chaotic, diseased, greedy and distorted, it bore no resemblance to the South I had once known.

It is up to the new Congress to help, to lift the trade embargo and to begin the task of aid to Viet Nam. The war is over, and we don't have a genuine peace. If members of Congress will have the courage and foresight and ability to bring aid to Viet Nam, then after all the years of anguish, we will at last have the peace all of us have worked for for so long. Thank you.

ARTHUR GALSTON: I would like to speak today as a biologist. I have been a professor at Yale for 22 years and before that spent 10 years at Cal Tech. My specialty is plant physiology, which means that I am concerned with the effect of chemicals on the growth of plants. When we started our defoliation program in Viet Nam, I, among other scientists, became alarmed by the implications of what was called the largest ecological roulette game ever played by man. I believe that the resulting damage done to Viet Nam and to the environment on which all of that civilization depends, is still inadequately calculated.

I have been to Viet Nam twice, in 1971 to examine herbicide damage, and in 1975 to go to the North to aid in the setting up of a research laboratory in plant physiology to aid their agriculture. I was the first American professor to arrive there after the war ended—this was not planned—but I came two weeks after the end of the war to a nation drunk with peace. It was the first time in a whole generation that they had no enemy to fight that day, except starvation, disease and the binding up of the wounds of war. I went that year sponsored by an organization called the Scientists' Institute for Public Information (SIPI), headquartered in New York (Margaret Mead and Barry Commoner are among its leading members). SIPI had set up a scientific Aid to Indochina Taskforce which we hoped would help in the reconciliation between our two countries. Now, what is it that we are trying to do, and why is there a necessity for scientists to become involved? It is instructive to note that the opening to China was made by a ping pong team, and it seems that frequently in the healing of international wounds, athletes, musicians and scientists can build a bridge that frequently leads to larger efforts. I firmly believe science is an international effort and should not know national boundaries. Ideologies, however different, must still work on the basis of the same scientific truths; thus I feel that I am in a profession that is uniquely equipped to help bind up the wounds of war.

Gloria Emerson stole some of my thunder when speaking of the more than 20 million bomb craters. Each one of these bomb craters is about 15 feet deep and 45 feet across. Since almost 90% of the people of Viet Nam work on farms, and there is a population in the North and South of about 50 million people, more than 40 million people are working on farms, having to face the possibility than an elaborate agriculture, which depends on the conservation of water as it flows from high to low areas, is destroyed. The water flow is very carefully calculated, and the contours designed to maximize productivity to feed all those people. These 26 million bomb craters of that size are preventing the flow of water, and will interfere very seriously with the ability of the Vietnamese nation to feed its own people. It would not be only charity and an act of kindness, but also good common sense to send over some earth-moving equipment to help fill up those 26 million craters. This would benefit these Vietnamese people tremendously and would make us heroes over night.

I am also concerned by the fact that during the war, more than 100 million pounds of assorted noxious chemicals were sprayed over an area about the size of the State of Massachusetts. Now, these chemicals were alleged to be harmless, but those of us who knew what sort of testing had been done on them pressed for further data. During the war, further tests were thus carried out at the behest of the military, and it became apparent that in Agent Orange, made up of two chemicals called 2,4–D and 2,4,5–T, there is an impurity called dioxin, and in the parts per billion of body weight range, this chemical is able to cause serious malformation of developing embryos in laboratory animals such as mice and rats. Now, if biologists know anything, it is that whatever is toxic for mice has a good possibility of being toxic for humans. All you do is to calculate how many milligrams per gram of body weight need to be ingested to get an equivalent dosage. Simple calculation told us that a Vietnamese woman drinking two liters of water per day (less than average), would have consumed a toxic dose of dioxin in those regions which were heavily sprayed. There is thus little doubt that some damage was done to embryos, producing some stillbirths and fetal malformations. Just as we sent an Atomic Bomb Casualty Commission to Hiroshima to pick up the pieces and assess what damage we had done to the Japanese people after that catastrophe, so it is appropriate that we send a body of experts to obtain information and render aid to Viet Nam. Did we, or did we not cause this kind of misery to unborn infants? And what is the residual danger? All indications are that these toxic dioxins, which we ban in this country, are present in the Vietnamese soil in a quantity of about 600 pounds, slowly being released into the water, slowly finding their way into the fish and shellfish, and slowly poisoning the people who eat them. This is an on-going ecological danger, and in this Decade of the Environment, we ought to realize that the environment in Viet Nam is part of the same fragile web that binds us all together. Much of the upland forests, containing marketable timber, has probably been made useless—a serious blow to a country with not much to export, a country which could have used lumber as a main source of cash. I will only mention that the defoliation operations carried out in the mangrove areas to open up the estuaries, has unexpectedly resulted in the complete and total devastation of those areas. The mangrove is a special kind of plant which lives in an estuary where it has to deal with both fresh and salt water. The herbicides that were sprayed have killed virtually 100% of those plants. They have not come back. It will take half, if not a full, century before substantial repopulation occurs.

Why should we be concerned with that? Fish and shellfish that are eaten by the Vietnamese find a home in the environment of the mangroves for an important part of their life cycle. Deprived of that, they will go elsewhere. This will deprive the Vietnamese of a very important source of protein in the form of fish and shellfish. Is there something we can do about that? I think trained biologists could go over there to help in re-establishing the mangrove communities, and to try to develop other varieties that might be more resistant to the herbicides.

Among fellow scientists I find enthusiasm for this kind of constructive effort; I would hope that in the near future our government will make it possible for those who wish to actively participate in the reconstruction of Viet Nam to do so. At a conference I had with Prime Minister Pham Van Dong during my last visit I was reminded that the French, who had been the last colonial power in Viet Nam, were now very much accepted an even loved for the good work which they were doing in the rebuilding, especially of hospital facilities. It is not in the Vietnamese nature to carry a grudge for a long time. Let us show them our friendship in concrete ways; I think it will be in our national interest to do so. Thank you.

Rep. GEORGE MILLER: I would now like to turn the meeting over to Cora Weiss, Na-

tional Coordinator of Friendshipment who helped us put together this Conference so some of the issues would be brought out to a broader spectrum of the American public.

CORA WEISS: On behalf of the sponsoring Congresspersons, Friendshipment, the Coalition for a New Foreign and Military Policy, and the National Council for Universal and Unconditional Amnesty, I want to thank you Mr. Miller, Senators McGovern and Hatfield, and the other members of Congress who helped make this day possible. This is the opening of a two-day session sponsored by the three Coalitions to bring the issues of the legacies of the war to the Administration, to the new Congress, and to the American people. It is possible to heal the wounds of war, both at home and abroad, to bring the veterans and the men home who are not welcome yet, and to extend a hand to repair the damage to Viet Nam. To prove that the American people have the capacity for reconciliation, we have invited Angus MacDonald to be with us. I am sure that he never dreamed we would be sitting at the same table or that I would be introducing him as an expert. Mr. Angus MacDonald is Staff Director of the House Select Committee on MIA's.

ANGUS MACDONALD. The committee itself expired at the end of the 94th Congress on January 3, but I have been asked to speak here having been the staff director of that committee for its entire tenure.

At the outset, I would like to clarify the numbers game. Several careless or uninformed statements by public officials over the years have obfuscated the numbers game and I think we need to know that before we get into the issues. We are talking about 2500 Americans, comprised of 1100 killed in action, bodies not recovered, and 1400 listed as POW or MIA. Since 1973, of the 1400 missing and prisoners, 650 have been presumed dead by the military secretaries, using as their basis Title 37 of the U.S. Code which vests in them the responsibility and authority for adjudicating these cases. Therefore 750 are still carried as MIA or POW. An early priority for the Committee was to determine whether any of the 36 still listed as prisoners of war were in fact being held by the Indochinese nations. The leadership of Vietnam and Laos both assured the committee directly and personally, as well as through public statements, that all of the prisoners were returned in 1973 and that they held none. The conclusion of the committee that no Americans are being held was derived from a very exhaustive investigation.

Included in this investigation were discussions with international officials with access to Indochinese leaders and to the countryside, a study of the hazards of ejection from aircraft, the difficulties of survival in a hostile area, and discussions with returning prisoners of war. In total, a detailed look at evidence that any Americans might be alive. We concluded that none were being held prisoner from that war. We then looked at those still missing in action, to see, from the data contained in many of these cases, what type of accounting might be received from the Indochinese nations.

No contact was made whatever with the Cambodians, despite repeated efforts at their Embassies abroad, through Peking, asking intercession of the Chinese, correspondence with Norodim Sihanouk and several efforts on their part. Cambodian officials quite recently have stated through third parties that they hold no live Americans.

We are concerned that the American people have an accounting and how much might be provided.

We found that a number of our losses occurred at sea, 50–80 miles offshore. Obviously, the Vietnamese could not account for those. We found that a number of nonhostile casualties still listed as missing in action were lost in friendly rear areas where no enemy forces were known to be operating. They could not account for those. About 40% of the missing could not be accounted for, not counting the individual cases we did review. We did go through a broad sampling of individual cases and almost daily had contact with the service casualty officers who were thoroughly familiar with the details in all of the individual cases, something that is not public knowledge because of the Privacy of Information Act.

We concluded that the combined Indochinese powers could account for only a small sample of the 2500 Americans for whom we would like return of remains or information.

We know, for example, that the PRG, in 1973 at the time of the Paris Peace Accords, announced that 40 American prisoners had died in captivity. Those remains have not been returned. We know also that the Vietnamese announced in September of last year (1976) that 12 Americans died in attacks in the 1965–1968 time frame. There is no way they could positively identify and publicly announce the names if they did not have the remains. There are other instances when I.D. cards of American personnel have been published, and we know from that that they must have custody of those remains.

The committee concluded from an exhaustive look at these cases that the Indochinese could return the remains of 150 Americans. That is a small sample of the 2500 who are missing. But in addition to the 150 remains, we concluded they could provide reports on a number of individuals or incidents. The Hanoi government in 1966 issued instructions throughout its own forces in the North and in the South, along the Ho Chi Minh Trail and the Plain of Jars in Laos, as well as to the Viet Cong, instructing them to mark the location where any Americans were buried, to sketch maps and forward them to Hanoi. We believe this was done, and for more than a decade the Vietnamese have been collating the information relating to our missing. We also recognize it is a small sample of the 2500.

The committee's final report attempted two things. First, to bring the American peoples' expectations of what an accounting might be into a realistic ball park; and at the same time we hoped to convince the Indochinese governments that we do not expect 2500 but actually a small number. We believe they can do this and believe they could do it in a short time span once the relationships between our governments change. The evidence shows us that the Vietnamese cannot account for most of them, and it clearly shows us that they are deceased. In many cases, it is a circumstance of loss, passage of time, the fact the individual has never shown up, or has never been seen by another American. Title 37 provides these as an adequate basis for the Military Secretary to render a presumption of death.

After World War II, when 78,000 remains were not recovered, and after Korea, when 8,000 remains were not recovered, the presumptive findings of deaths were rendered within one year after the return of prisoners and the end of hostilities. It has now been four years.

The case review process was intruded upon by two significant events. The first was in July 1973, with a District Court injunction against unsolicited reviews. This court decision was announced in February 1974. The Department of Defense attempted to articulate the meaning of the court decision; some case reviews were begun on an unsolicited basis then. But then a moratorium was agreed with the Select Committee that no unsolicited case reviews would take place during the tenure of the Committee. The Committee cannot believe that Americans are being held as prisoners and recommended that the Department of Defense lift the moratorium and that the military secretaries reinstitute the case review process.

There are many segments of the population opposed to this, saying that if we presume the missing dead, it would militate against an accounting by the Vietnamese government. We believe this is not true at all. We believe that on the basis of the three remains returned to the Select Committee in December 1975, two had been presumed dead; the two Marine remains returned to Senator Kennedy staffers in March 1976 were both obviously deceased. The 24 Americans which were accounted for in December 1975 by the Chinese were comprised of 21 presumed dead (some of these dating back to the Korean War). Indeed, of the names of the 12 announced in September 1976, one was declared dead on the day of his incident, and five others had since been presumed dead. In short, the administrative status in which our government holds the individual missing has in the Committee's view, no relevance to the ability or willingness of the Indochinese to render an accounting. That ability is already there, we believe, except in Laos, where a small accounting might be rendered, and in Cambodia where the number is very small. The willingness to render such an accounting appears to stem from the relationships between our nations.

The Committee, in March of last year, strongly and unanimously urged Kissinger to begin talks with the Vietnamese. A week later he said the President had approved the recommendation and he began a 6 to 8 month dialogue with the Foreign Ministry in Hanoi resulting in an inconclusive meeting in Paris in November. But it was a meeting and it was the first one. We hope now that additional talks will take place in order to achieve, first of all, what the Committee was created for, related to the MIA's, recognizing it is a two-way street and this could take place only within the context of normalization of relations. In Paris, Congressman Bingham said the Vietnames could not expect grant aid, calling attention to an amendment he himself had introduced that would lift trade restrictions with Viet Nam. Coming from Bingham, it is a very, very important statement.

The temper that we have seen on the Committee both from those who support and oppose the report, urge one thing: the accounting. They generally oppose granting aid, but this does not close the door. Several comments have been made here today in the humanitarian area of admission to the United Nations, etc., which could be considered.

Prosthetics, for example, for the large number of paraplegics in Viet Nam. One of my assistants had his leg shot off on his second combat tour in Vietnam. He has noted that the United States has the greatest expertise in the world on prosthetic devices, and this is an area that should and could be explored. The Committee has sent to Hanoi and to Vientiane brochures prepared by plastic surgeons in the United States who have done marvelous work in South America and Africa, repairing damage from disease and birth defects, and this would certainly apply to those suffering in war time. Both the Vietnamese and Laotians are considering the issue. They have not rejected it, though they are perhaps wary. Perhaps this would be a very small venture, but an important one. There are many other areas in humanitarian assistance

which can be explored, but only once direct talks have begun.

Last Monday the Select Committee met with President Carter. I was not present. Mr. Ottinger was, however, and you have heard him say there was hope that the President would move rapidly in normalizing relations. If I could send one personal message to the Vietnamese, I would say the one important block that exists to normalization is the MIA question, and their capability of responding. If they carried it out, I think it would remove a great stumbling block to further dialogue between our nations.

CORA WEISS: Thank you. For those of you seated here, the Sense of Congress Resolution has already been signed by a number of members of Congress. Mr. Ottinger has agreed to circulate it, and any of you who are intending to visit your Representatives may take a copy to get the endorsement of your Congressperson.

Our next speaker is Max Ediger, of the Mennonite Central Committee, who worked in Viet Nam for many years and who remained following the end of the war for 13 months. He then returned to this country and went back recently to Viet Nam, traveling from Hanoi to Da Nang. He will relate his findings from the trip.

MAX EDIGER: On January 4 of this year I had the privilege of being one of three Mennonites to make a two week visit to Viet Nam. This was the third Mennonite delegation to visit Viet Nam since the war ended on April 30, 1975, and is a continuation of a 23 year involvement of the Mennonites in this small country. We visited both North and South Viet Nam, and were able to see several of the reconstruction projects we have been involved in to date, and also set up plans for further contributions to an irrigation project in the Da Nang area.

A variety of observations can be made. One is that steps are being taken by new authorities to move from a system whereby education is available only to those who can afford it, to education for all. In 1971 I was involved in a scholarship program for refugee students in an attempt to give some of them more of an opportunity to attend school. A large number of refugee children had to get jobs to help support their families. Others simply did not have enough money to pay school fees. Education now is free, and efforts are being made to ensure that all children can get at least 10 years of education. One school we visited has increased from 24 classes with 1200 students in 1975 to 50 classes with 2673 students today. Few children can now be seen roaming the streets with nothing to do. Schools are being made available for them. In resettled areas in the countryside, one can also see many small cement and brick schools. These buildings are erected by the government so that children in the countryside also have easy access to classrooms. Every province now has its teacher training school so that sufficient teachers will soon be available. However, many problems still remain. There is a shortage of desks and chairs. Books are scarce and teaching aids are not adequate. Building materials for rebuilding bombed schools or for building much needed new classrooms are in short supply. Such problems are the result of an economy which was shattered by war, and, in the case of the South, which was made dependent on foreign aid.

Da Nang was once a crowded city of about 1.2 million people. A large number of people were refugees from the war, and were unemployed. Now the population is down to about 500,000, a size more fitting to the facilities available. The majority of the people who left Da Nang have returned to their old villages in the countryside. Others have been given work in a new carpet factory which employs about 1000 formerly unemployed women, and others in a cotton cloth industry. Those who have returned to their old villages continue to face many hardships. Unexploded mines and other munitions litter their fields. Well trained military units first sweep the fields to try to clean them, but the farmers are still being killed. The fertilizer factory which once produced the much needed fertilizer was dependent on raw materials from the United States and therefore can no longer keep up with the demand. Thus the farmers are having difficulty preparing the soil.

Drought is still another problem. To deal with this latter problem, irrigation systems are being built. We visited one such site where 50 kilometers of canals are being dug, and an 18 pump station installed to serve a 2000 hectare area. Almost all of this work must be done by hand. This will not only insure against drought, but will also increase production from two crops a year to three crops. The United Nations estimates that last year Viet Nam was only able to produce 7.6 million tons of the 8.8 million tons of rice needed to feed the population because of the vast destruction of soil and facilities inflicted by the past war. With the cut off of U.S. aid, the food situation was critical. Thus, major steps had to be taken to start increasing production. It is a major task, and is hindered by a shortage of materials such as cement, seeds, fertilizers, and by damaged transportation systems.

The price of rice in Da Nang has dropped from 100 xu per kilo before the war ended to 12 xu per kilo. In Saigon, food prices may be considerably higher since Saigon is still suffering from major over-population and other war-related problems. The church continues to function freely and normally. In fact, in Da Nang, the government has helped the Protestant church rebuild five of their structures destroyed by bombing. Elsewhere in Viet Nam, we heard similar reports from Catholic, Buddhist and Protestant church leaders.

One can sense a certain feeling of relaxation among the people which was not there during the war. It is as though they are slowly getting used to the fact that bombs and artillery shells no longer fall.

We walked the streets of Hanoi and visited with people. We walked the streets of Da Nang and along the new irrigation canals of a resettled area. Never did we meet with any hostility. The people were friendly, and eager to know who we were. Many times we were told that the Vietnamese do not consider the American people as an enemy. This is the message I bring back from a country and a people which has suffered so much death and destruction in this most unfortunate war. We, who have suffered comparatively little, have an opportunity and an obligation to return this gesture of friendship and good will.

CORA WEISS: I would now like to turn the chair over to Representative Elizabeth Holtzman of Brooklyn, who has been a strong pillar in Washington representing the majority will of the American people throughout the war, the people who always thought the war was wrong.

Rep. ELIZABETH HOLTZMAN: I am glad to be here. I was thinking about this conference, and it occurred to me that after World War II our country was very magnanimous. Perhaps it was easy to be magnanimous in victory.

The question with respect to Viet Nam is perhaps one that tests the quality of our country's ethical fiber in a more serious way. How do we respond in defeat? How do we respond when we recognize that we have made a mistake?

Can we as a country finally learn the lessons that will prevent another Viet Nam from taking place? Can we recognize the individuality of countries, of peoples around the world? Can we learn to live in peace and friendship with those who reject our domination?

Can we live in peace and recognize the complexity, variety and richness of different national experiences in the world? If we do not learn that lesson, I am afraid that we will not have learned one of the most important lessons of the Viet Nam war. It was a narrow-minded Cold War mentality that denied the geography, history and variety in the world that got us into the war in the first place.

So I congratulate those who convened this conference, and I hope it is the beginning of an important effort to make this country aware of the lessons of Viet Nam, what we can do to avoid that mistake in the future, and what we can do to enhance the cause of peace and friendship in the world.

I am very pleased now, to introduce someone who comes from the Center for Veterans Rights. The legacy of the war was not only in the traumas and suffering and destruction in Viet Nam, but also here to those who fought and those who survived. Mr. Ron Bitzer, who is a counselor at the Center for Veteran's Rights will speak on that subject.

RON BITZER. I worked for about three years with disabled veterans in California. About 12 years ago I came with about 300 people to picket the White House, to protest the American policy of creating victims in Viet Nam. That was at the beginning of the publicized bombing in Viet Nam. Last Saturday I came with about 200 people to picket the White House to protest the American perpetuation of American victims from Viet Nam—the deserters, who were not pardoned; the veterans with bad discharges, who are supposed to be the subject of a Pentagon study; veterans who are disabled and not able to get adequate treatment from their government.

There are Viet Nam veterans who have not been able to gain any access to federal programs for assistance. They may end up on local welfare rolls. The V.A. reports 100,000 veterans have died since discharged from the Viet Nam era. Incarceration is increasing among Viet Nam veterans: sometimes as much as 25% of the prison population consists of Viet Nam veterans, half of whom have bad discharges. The unemployment rate has remained higher among Viet Nam veterans than the national average. It is appropriate that the appeal for reconciliation include the problems of American victims of Viet Nam. But you may ask, why do we need to include this today, because of the veterans organizations. The American Legion and others lobbied against it and 80,000 veterans got cut off from benefits this past year in California. Statistics will show that one out of four veterans is a Viet Nam vet; one out of 12 benefit dollars goes to a Viet Nam vet. And in testimony before the Senate Veterans Affairs Committee, it has been stated that the Viet Nam war was the most crippling war this country has fought because of our ability to rescue people from the field.

Those concentrating on these problems, which veteran organizations have been reluctant to accept, have been trying to bring the problems to the attention of the government. A main point I want to make here is not to ask for a lot of money. We cannot even get inside the Veterans Administration to ask for rehabilitation assistance. Organizations and self-help groups in California have been shut out of the V.A., we have letters saying, "No more! You cannot come in and argue claims in this agency." It has been a year since I have been able to see a claims file for a Viet Nam veteran

in the Veterans' Administration in Los Angeles.

Look at H.R. 200 introduced by Congressman Bingham which provides for judicial review of V.A. decisions; and Sen. bill No. 364 introduced by the late Sen. Hart which similarly would provide judicial review of V.A. decision. It is my understanding that Sen. Cranston wants to hold hearings in the field. The Veterans' Administration essentially functions above the demands of justice. These people know their decisions don't have to be subject to review by courts; and if this were possible, some of us would have some recourse to what we see coming down from that agency. I might also add that attorneys are shut out of the V.A. because they cannot charge more than $10 to handle a V.A. claim.

I would also like to suggest that important legislation has been introduced by Congressman Lester Wolff (H.R. 2231), which would provide for accelerated educational benefits. Tuition is now running $6,000/year at some schools. The G.I. Bill provides $300/month for a single person. This would provide for accelerated use of the G.I. Bill so the veteran could get more monthly payments over a shorter period of time. It would also provide much needed counseling for veterans dropping out of school and having readjustment problems that would be of a lower grade than psychosis.

But that is only the disability concern. I would like to introduce Barry Lynn of the United Church of Christ who will address the problems of the Carter pardon.

BARRY LYNN: The first official act of President Carter was to issue a pardon which covered most, but not all, of the Viet Nam era draft resisters. I was talking to a deserter in Toronto who said, "I know that Jimmy Carter is a very religious man; I just wish he wasn't such a selective redeemer."

He said that because the vast majority of people who need amnesty in this country, some 800,000 individuals, were not covered by the President's action. I would like to talk this morning not about the people who were covered, but about those who were not. There are some 4–6–10,000 military absentees still at large, so-called "deserters". We can't even say that the Defense Department knows for sure how many are in that category, but between four to ten thousand from the Viet Nam era. The word "deserter" conjures up images for us, most of which come out of old Audie Murphy or John Wayne movies. In fact, deserters from the Viet Nam war did not "desert"—in most cases—even from Viet Nam. Because frankly, there were precious few places you could go if you deserted from Viet Nam.

Unless you had been trained as an interrogator and were able to speak Laotian or Vietnamese and live in those rural villages, there were no neutral countries to which you could go. People deserted the Viet Nam war when they were on Rest and Relaxation in Japan or in Hawaii. Or they deserted from the military when they first received their orders to go to Viet Nam. So the old red herring about people who leap out of the fox holes and cause the death of their fellow soldiers is not an accurate portrayal of the deserters from the Viet Nam war. A draft resister often refused to step over a line at an induction center to become part of the military. All that most Viet Nam deserters did was refuse to step onto a plane that would take them to Viet Nam. They had a change in their political ideology or moral philosophy a few months or years later than did the draft resisters. For these persons not to be covered is a crime and a shame. Civilian war protesters were not covered by Mr. Carter's pardon either. These are the people who poured blood on draft files, or who did not obtain the proper permit for demonstrations, some of them in this very building. Some of them allegedly desecrated the American flag by using it in anti-war demonstrations. They were not covered. The greatest number not covered were the 750,000 Viet Nam era veterans who suffer the stigma of a less than fully honorable discharge. The United States is the only civilized nation that still retains characterized forms of discharge from military service.

We have honorable, general, undesirable, bad conduct, and dishonorable discharges. Only the last two given are the result of a trial. This means the other 92 percent of these discharges are given administratively. If you are lucky, you have a hearing, but even if you have a hearing you have few due process protections. You don't have the right to cross-examine the witnesses against you, because they are not there at the hearing. You have no verbatim transcript so you can appeal the decision against you. There are no judicial officers to make rulings on the admissibility of evidence. And recall that 92% of the people with bad discharges—so-called bad paper—received them purely administratively. They are disproportionately poor, black, Spanish-speaking or members of other ethnic or racial minorities. Even if you were "lucky" enough to be court martialed during the Viet Nam war and given procedural rights, you soon discovered that you didn't have very many substantive rights.

For example, Dr. Howard Levy was a doctor who refused to train Green Beret medics in Viet Nam. He said that Viet Nam was a racist war and that he was not going to train anybody to do anything to help perpetuate it. He was charged and convicted at a court martial. He had all the procedural rights, but the problem was he was convicted for an offense called "conduct unbecoming an officer and a gentleman." We don't have a parallel crime in civilian life. How many people here never flashed a peace sign? In the military that is a crime, a violation of Article 82 of the Uniform Code of Military Justice that prohibits "provoking gestures."

I would like to tell you about the Phu Cat Three, supporters of George Wallace in the Presidential Campaign. They went to Viet Nam, one had only three weeks to go in his tour of duty. One day they came across some Korean allies skinning a Vietnamese prisoner. They were so disgusted they went back to their commanding officer, threw their guns down and said they would not pick them up again. And they didn't. The Air Force told them, "If you won't pick up your guns, why don't you go on patrol without them." They did: one night, two nights, three nights. Finally, it became such an embarrassment to the United States Air Force that they were simply court-martialed for disobeying the order of a non-commissioned officer, given years in the stockade and all still have bad conduct discharges.

All of the persons who received less than honorable discharges are not ideological protesters. Many were given discharges for trivial or no offenses. There are 75,000 people who now have a less than honorable discharge because the Army decided they had a "character or behavioral disorder"—a finding on the part of the service that the person was mentally ill. Why they didn't discover that before inducting the person into the military, I don't know. It is a very good question to ask. Twenty thousand were convicted for minor offenses after serving time in civilian jails. However they were then given less than honorable discharges after release from jail, as a guaranteed lifelong punishment on top of their jail term. And it is a punishment.

Ron talked about the number of people in prison. They are in prison because they cannot get jobs. The less-than-honorable discharge virtually guarantees you will be unemployable for life and also frequently means you will be denied your Veterans Administration benefits. This too is a crime and a shame.

When America wants to be decent, it can be decent. In 1865 when Andrew Johnson authorized that all Union deserters and draft evaders be given amnesty, it happened quickly, and as an act of compassion and decency. When Australia, four years ago, granted universal unconditional amnesty to its Viet Nam dissenters and protesters, it acted decently and humanely. And the least we can ask out of this new Administration and new Congress is that they act as decently, humanely and justly. Thank you.

Rep. ELIZABETH HOLTZMAN: I will now introduce Sister Mary Luke Tobin, who is the Citizen Action Director of Church Women United.

MARY LUKE TOBIN: I would like to share with you some reasons for my concern for a restoration of normal relations of our country with Viet Nam.

I have visited Saigon twice; once in the summer of 1970, and again in the spring of 1974. On both occasions, it was my privilege to meet a number of church leaders, particularly in the Catholic community. I visited churches, schools and homes, where I was delighted to be introduced to these friendly people, and to admire their confidence that one day they would have a peaceful and strong country. I was greatly enriched by this encounter, as I'm sure other Americans would be also. Therefore, I was more than pleased to learn last fall that Clergy and Laity Concerned had issued an invitation (signed by 180 prominent persons in the U.S. church community) to seven Christian and Buddhist leaders to visit our country. This opportunity will allow church groups and other interested persons to hear how the Vietnamese people have fared since the cessation of hostilities, particularly in the practice of their religion.

I would like to meet the new Cardinal of Viet Nam, and also the Archbishop of Saigon, whom I have long admired. It is he who fostered peace meetings at his Cathedral every Christmas during the war.

Last May, that Archbishop wrote to the editor of a Catholic periodical, saying:

"Since the liberation of South Viet Nam, the Church here has shown its good will and cooperation with the Revolutionary authorities in the construction of Viet Nam. . . . The Catholics here wish to testify that while fully being Christians, we are equally Vietnamese citizens. We are convinced that the Revolutionary authorities are effectively respecting our faith." These words of Archbishop Binh have been repeated by him on several other occasions.

I am fully persuaded that, if these persons were free to accept our invitation and would be granted visas to visit us, it would be an enriching experience for all who would have the privilege of meeting with them. Many persons would be enabled to hear them recounting their histories during and since the war, but also share in the fruits of their religious insights and experience. Isn't it amazing that during the war, we had contact with so many friends and now when the Vietnamese are not our country's enemies, we can't freely visit?

We would like to know how the work of reconstruction is going on. We are learning that it is very difficult. Like me, you probably read in last Sunday's New York Times the description of the work of a French Sister invited by the government to assist in the rehabilitation of prostitutes. I read that they have very few sewing machines to teach these women a skill, and to teach them to write is very slow for lack of tools; there is only one ball point pen to 10 persons. There is a great need for materials to heal wounded, injured people, and to repair and rebuild a devastated land. The need is now—and

equipment from the U.S. would be helpful. I regreat an embargo which keeps our land of plenty from generously sharing with these war-impoverished people.

In 1973, Church Women United, on whose staff I serve, were among the first to extend a hand of reconciliation to the people of Viet Nam. We helped a Vietnamese Roman Catholic Sister to open a *House of Peace* in Saigon, where women, weary and distressed by war conditions, could find a haven in the city. Church Women United gave support to the project, and in 1974, I visited that simple and beautiful house of meditation and counsel in the heart of Saigon. I don't know if Sister Tho Thi Anh is still there. I'd love to have her come to visit us, and to hear her describe her ministry to women in that home. I have heard, through her relatives in the U.S. that for a year after the fall of Saigon she was teaching at the University. She could share so much with us, and we could learn from her. Before leaving this country, she said, "The challenge of our time is for the unification of humankind. Shall we be able to make the effort to bring together the occupants of this small planet? There will be no East nor West but one single family of citizens of the earth."

I would like to learn if her perceptions have changed—and to invite her to continue the dialogue with us. We cannot even exchange mail freely.

I recall the meeting in Canada during the war when several Catholic priests came to Quebec from North Viet Nam. It took one of these priests five days to travel from his home to get to the plane because of the hundreds of bridges which had been destroyed. All of this is one more clue to the immense task of rebuilding. I learned much from these quiet, thoughtful priests from the North, as well as from Mme. Cam, a perceptive lawyer and assembly member.

I hope that anything which smacks of vindictiveness would be unworthy of us. We have always been prompt to reconcile ourselves with those who have been against us in wars. Surely this small nation should be no exception.

We profess to be religious people. The Judeo-Christian faith says we are to love our neighbor, and that our neighbor is worldwide—this is all the more reason why we should reach out to the farther neighbor in love and friendship.

One of the best thing we could do for a true reconciliation at this time would be to have the kind of mutual sharing, exchanges, and awareness of the gifts of other peoples which would help build a world of peace now.

Rep. ELIZABETH HOLTZMAN: We will now hear from Don Luce Co-Director of Clergy and Laity Concerned.

DON LUCE: There is now a railway that extends from Hanoi to Saigon. There wasn't a major epidemic of cholera or bubonic plague or any of the other many possible diseases because of massive immunization programs. Saigon's million man army has been integrated into the work force as the farm land is put back into production and new hospitals built. People have found jobs as they returned to their farms. All these things happened without the blood bath that our State Department officials in Saigon said would happen. There wasn't a list of a million that were blacklisted to be killed by the "long dagger of communism." There wasn't a list of a thousand, or a list of a hundred. All of us should really feel very good about this. Perhaps we should feel sad that we fought the war for so many years because our leaders said it was going to happen, and we should certainly be happy that it didn't happen. Maybe it is understandable that our officials said there would be this blood bath. They must have thought: what is going to happen to the jailers at the tiger cages? What is going to happen to the generals that planned the scorched earth policy? What is going to happen to the war profiteers, the people who made money, and the people who sold the goods that were supposed to be given to the refugees? Yet there wasn't a blood bath.

A lot of people are talking about the re-education camps. The question has been raised, are the re-education camps a violation of people's human rights? I have been asked to speak about this. The number of people we thought would be endangered involved over a million men in the Saigon Army, more than 140,000 men who were policemen on the streets of Saigon, as well as the secret policemen all around the country. Another 150,000 had worked in the civil service in Saigon, about half a million worked directly for Americans. Of that number there are presently between 40 and 60 thousand in the re-education camps. This represents about 5 percent of the people that we predicted would be killed in a blood bath. These are people that are in camps now; there are other people who have gone through the camps. These people have been restored to their full civil rights as they have left the camps. I find it ironic that the Vietnamese government has had a better policy in terms of restoring civil rights to the people in South Viet Nam that planned the war and ran the prisons than our government has had toward the Americans who protested the war! A far wider range of civil rights has been restored to these people than we have to our own citizens who protested the war.

It has been said that we can't visit the re-education camps. This is not true. Marc Riboud, a French journalist and photographer was in 5 camps: he has protographed the camps, including one camp which has 26 of the Saigon generals. The photographs have been reproduced on pages 31 and 32 of *Time* Magazine, February 16, 1976 (shows two pages of photographs on the re-education camps). Victor Umbricht, who was the special representative of the Secretary General of the United Nations, visited them three times. Cora Weiss visited one of the camps. We have visited the camps and, as Sister Mary Luke Tobin pointed out, Americans were in these camps at a time when a Vietnamese Buddhist nun was not permitted to visit our country (from Canada). Americans who have been in the camps as prisoners have reported back. Jay Scarborough spent five months in a camp near Pleiku, and I would like to quote briefly from his report.

"The captured soldiers were treatcd humanely, no physical or mental torture no denials of the essentials of life—food, clothing, housing and medical care. There has been no blood bath. I cannot see that anything has happened in South Viet Nam to justify the imposition of the embargos. To me, and to the Vietnamese it smells of vindictiveness."

I am not saying that the camps are enjoyable, but I am saying that the condtions as they have been reported by many Americans who have spent many months in Viet Nam since the end of the war, people who have visited the camps, the conditions are far, far better than we expected they would be.

One of the Vietnamese religious leaders is Venerable Don Hau. Barbara Fuller, here today from Michigan, talked with this famous Buddhist monk about religion and relations with the United States. He said, "We Buddhists long for friendship with the American people; our country is so heavily devastated by the war; innumerable houses, pagodas, churches have been destroyed, and as head of the Buddhists I am actively participating in the reconstruction of our country. We must turn injured men into strong men, we must cure the sick and malnourished, we must rebuild houses and we ask you to extend your help."

I think the real suffering and danger in Viet Nam is from unexploded mines, and from the diseases that we left behind. It is from the buildings that were bombed and haven't yet been rebuilt. We as Americans have the technology and the resources to help in that reconstruction. If we really want to find out what is going on, within the religious community, and in Viet Nam, we can do as Sister Mary Luke suggested, invite some of the religious leaders there to come to our country, some of the cultural people, some of the writers. In 1974 I visited North Viet Nam with the Catholic Bishop of Gary, Indiana, Andrew Grutka, and with the Methodist Bishop from Chicago, Paul Washburn. At the end of the trip, we met with the Prime Minister Pham Van Dong. He said, "It is really wonderful that Bishop Grutka could say Mass in our beautiful cathedral in Hanoi, that Bishop Washburn could preach, and it would also be wonderful if some of our Vietnamese priests and other religious leaders could visit your churches and your synagogues."

I think we have to ask ourselves why are we so afraid of what a Buddhist nun would say in Providence, Rhode Island, or the kind of dance that Vietnamese dancers would dance in Des Moines, Iowa. Why are we so afraid?

I would like to close with a positive thought. Dick Hughes spent eight years in Viet Nam with the Shoe Shine Boys and a year after the new government arrived. He said, "When my scheduled flight left Tan Son Nhat Airport in August 1976, I not only felt a debt to the Vietnamese people, I knew the kids that I loved were finally finding people who cared."

Rep. ELIZABETH HOLTZMAN: I would like to introduce Cora Weiss, coordinator of Friendshipment and an inspiration in this whole effort.

CORA WEISS: I would like to wind up this session and thank Representatives Holtzman, Miller, and Harkin, who discovered the tiger cages on Con Son Island with Don Luce in 1970, and try to tie together some of the things that we can do having heard this testimony.

It is clear that the Vietnamese people are no longer the enemy, if indeed, they ever were. It is clear that they need our help, and we have a moral, legal and historic obligation to help them. If we are to send prosthetic devices to the many who need them, we have to apply for a license from the Treasury and Commerce departments and wait perhaps up to nine months before being granted a paper permission. This is because there is an embargo on trade, an embargo imposed by an executive order on April 30, 1975 which can also be removed by executive order. As members of Congress you can support a resolution such as H.R. 3047 which calls for the unconditional lifting of the embargo.

You ask if you can have a Buddhist nun come to the U.S. She cannot come as long as the embargo against Viet Nam exists, nor can anyone else come to share their life experience in Viet Nam. I have a xerox of a letter returned from the United Nations post office addressed to Viet Nam. Apparently at the United Nations post office they feel that there is an embargo on mail. There is not, officially, but very few letters get through. There is no reason for that. There are thousands of Vietnamese who want to be in touch with their families and take a chance that their letters will get through to their loved ones when they drop it in the mail box.

The U.S. Congress can appropriate funds for international agencies who are doing extraordinary rehabilitation work in Viet Nam, including UNICEF.

The U.S. Congress can support the Sense of Congress Resolution which is being circulated, and here are some of those supporting it: Holtzman, Studds, Ben Rosenthal, and Don Fraser, and I assume Harkin doesn't want to be left out (Harkin signs) so there it is, and so it grows. A Sense of Congress Resolution could be circulated throughout

the House on both sides to show the Congress and the Administration that we support what we consider to be the goodwill of the new Administration as it has been expressed on so many occasions.

We have been asking the American people to express their sense of conscience and send money to help heal the war wounds. Whether to the AFSC, Mennonite Central Committee, Church World Service, the Bach Mai Hospital fund, or the coalition Friendshipment, there are tens of thousands of contributions that say yes, we feel we have an obligation to give and heal the wounds of war. A check for $1450 which will build one bed in the new hospital at the site of My Lai arrived today and I share it with you. It was given by the family and friends of a 10 year old Cleveland boy who died in a tragic fire this year. The memorial for him is to build for life in Viet Nam. It is a very moving gesture.

I think it is a clear indication that the American people do say that it is our obligation to repair the damage that we wrought and we should not lose time in doing it.

If President Carter could pick up the telephone and respond to what Mr. MacDonald has stated very clearly is the readiness of the Vietnamese people to negotiate the outstanding issues of the war including the accounting for the MIA's, it wouldn't take so many years to finally say the war is over. It is easy and noble, and it is part of our historic tradition. The American people seem clearly to want it. There is no need to wait. Our presence today and the 100,000 signatures on the appeal for reconciliation which we will present to the President tomorrow, are clear indications that there is nothing to fear in reconciliation. It has been said that it took until 1977 to end the Civil War in the United States and install a southern president in the White House. We don't have that long to wait to end the war in Viet Nam.

[Testimony of James Armstrong, Bishop, Dakotas Area, United Methodist Church before the Congressional Briefing, Feb. 9, 1977 sponsored by the Coalition for a New Foreign and Military Policy, Friendshipment and National Council for Universal and Unconditional Amnesty, Washington, D.C.]

APPENDIX

STATEMENT ON VIETNAM: NORMALIZATION AND RECONCILIATION

If the United States of America is to regain moral initiatives in the formation and implementation of foreign policy, it must radically revise its stance in the face of the reality of Vietnam.

We have seized political and economic initiatives with the Soviet Union and the Peoples Republic of China—initiatives affecting more than one billion people living in the communist world.

At the same time we have self-consciously retreated from the acceptance of moral responsibility in the war-ravaged nation of Vietnam, where some 40,000,000 persons seek to restore their devastated homeland.

We have refused to grant diplomatic recognition.

We have vetoed United Nations membership (violating the will of every other member nation).

We have imposed a trade boycott.

We have limited the flow of humanitarian aid, so that less aid is permitted to enter Vietnam today than was shipped to North Vietnam during the war years.

We have reneged on Article 21 of the Paris Agreements, assuring substantial reconstruction funds, and have turned our backs on President Nixon's guarantee of $3¼ billion over a five-year period for reconstruction purposes.

We have used the MIA issue as justification for our recalcitrance, yet Congressman Montgomery's committee, having visited Vietnam and investigated the matter as thoroughly as possible, reports that there is no evidence that any of our MIA are alive. Two obvious facts need to be noted: (1) there remain hundreds of thousands of Vietnamese MIA who are subjects of the Vietnamese governments concerned response; and (2) the U.S. Armed Forces, based in Southeast Asia with the most sophisticated of electronic equipment enabling it to trace and maintain contact with our aircraft, doubtless knew and knows far more about our MIA than did and does the "enemy" with no equivalent instruments of detection. The time has long since passed for us to stop using and manipulating the MIA issue for our own political purposes.

The time has come for reconstruction and genuine reconciliation. There cannot be one without the other.

Following World War II the United States virtually rebuilt Japan and West Germany. The issues in that war were clearly drawn. Germany's Third Reich was intent upon seizing Europe, destroying the Jew and imposing a one-thousand year reign on the civilized world. Japan attacked a sleeping Pearl Harbor and sought to bring all of Asia under its control. The Axis nations launched history's most savage war against the human race. And we made possible the dramatic recovery and reconstruction of those Axis nations—for our own military, economic and political purposes.

Now Vietnam awaits our response. The issues were never clear in that conflict. The United States aborted the Geneva Agreements of 1954 and resultant elections and procedures that would have made possible the determination of the Vietnamese people. We supported and underwrote a series of corrupt military governments in Saigon. With unprecedented air and fire power we violated the "law of proportionality" more flagrantly than in any war known to history. We ravaged a culture and the agricultural base of a rice-bowl economy. And now we refuse to help a nation, broken in body but not in spirit, rebuild.

Everything noble in our Judeo-Christian tradition suggests that we have but one choice in the matter: reconstruction and reconciliation. Precedent, as in the case of Germany and Japan, suggests it. Justice, in the light of the nature of the Vietnamese war, requires it.

The Old Testament prophet cried, "Have we not one God? Hath not one Father created us all? Why then do we deal treacherously every man against his brother?" And the apostle insisted that God "has entrusted us with the message of reconciliation." If we are to be faithful to the best in our past, we will help reframe a broken world for the sake of the future of humankind.

PUBLIC FINANCING OF SENATE ELECTIONS

Mr. MATHIAS. Mr. President, on March 7, I was proud to introduce, along with several distinguished colleagues, a bill that I am confident will prove to be a landmark in this Nation's political history.

That bill, the Public Financing of Senate Elections Act of 1977, is designed to rid congressional elections of the evils of big money. The need for reform could not be more clear.

Watergate confirmed the old canard that America has the best political system money can buy. Milk producer's contributions were followed by a shift in milk price supports. Ambassadorships were sold outright. Businessmen and labor leaders were dunned incessantly, while other special interest groups hedged their bets by giving to opposing candidates.

There were a lot of complaints about the Presidential campaign of 1976, but there was one old-time affliction that brightened the election by its absence: big money. This election was not bought. It was not swayed by heavy transfusions of cash. The winner owes nothing to persons or organizations for anteing up six-figure campaign contributions. To a rare degree in American politics, the average voter was the millionaire's equal.

This revolutionary change was brought about by the Federal Election Campaign Act of 1974, which I cosponsored. The new law remedied these abuses. It set limits on contributions to candidates for Federal office, and on the amount a Presidential candidate can spend in a general election. It provided funds to Presidential candidates of the major parties through voluntary $1 tax checkoffs. It established disclosure requirements, consonant with Justice Brandeis' maxim that sunlight is still "the best of disinfectants." The law was designed, simply, to remove large cash gifts from the proceeds of electing a President.

The new law not only proved itself in the election, but was upheld in its basic principles by the Supreme Court. The Court emphatically affirmed the law's fundamentals: disclosure, spending and contribution limits, and public financing. Its decision recognized the compelling public need to protect the integrity of the electoral process by restraining the influence of the very wealthy on political campaigns and public policy.

But we must finish the job of ridding our elections of big money by bringing public financing into congressional and Senate campaigns. The bill that I am cosponsoring, along with Senators CLARK, CRANSTON, SCHWEIKER, and KENNEDY, accomplishes that. The Supreme Court has ruled that, without providing public funds, the Congress cannot limit spending. The bill we are proposing provides public funding and limits total spending in Senate elections.

The last election illustrated the need for these added reforms. Barred from spending large amounts on Presidential campaigns, special interest groups have diverted their cash resources to campaigns for the House and Senate. Special interest groups poured $22.6 million into congressional campaign in 1976, as against $12.5 million in 1974. The rush is on to buy stock in the U.S. Congress.

Our bill deals only with Senate elections, but a companion effort is being made in the House under the bipartisan leadership of Congressmen MORRIS UDALL and JOHN ANDERSON. The Senate bill provides financing and sets spending limits for both primary and general elections.

In the primaries of each party, candidates would be able to qualify for matching funds if they raised a threshold amount of 5 percent of their spending limit or $50,000, whichever is less. The funds would match all contributions under $100 until the candidate reached his spending limit.

In the general elections for the Senate,

candidates of major parties would be entitled, upon their nomination, to receive a lump-sum grant of 25 percent of their spending limit. In addition to that grant, they would receive matching grants, again for all contributions under $100, until the spending limit for the general election is reached. The bill defines a major party for these purposes as a party whose candidate received 25 percent or more of the vote in the preceding election for the Senate seat. If only one party candidate received 25 percent or more of the vote, the next highest party candidate with 15 percent of the vote or more would qualify as a major party.

Spending limits are set as a factor of the number of voters in the State, for most States. In the primary elections, candidates accepting public funds would be limited to spending the amount calculated by multiplying the voting age population times 15 cents, or, in those States where the voting age population is relatively low, the spending limit is set at $225,000. For general elections, the limit is 20 cents per voter or $300,000, whichever of those figures is the largest. Spending limits would be removed if one of the candidates chose not to accept public funds and then surpassed the spending limit. This provision is designed to remove the spending advantage of the candidate with large personal wealth or very great financial support.

Candidates of minor parties and independents could also receive matching public funds in a general election. They must raise a threshold of 25 percent of the spending limit or $250,000, whichever is the smaller before becoming eligible. That threshold is designed to be high enough to discourage frivolous candidates from getting public funding while being low enough to keep the system open to serious challenges from outside the existing parties.

For Maryland, with a voting age population of 2,822,000 the spending limits for Senate campaigns will be $423,000 in the primary and $564,400 in the general election. The 5-percent threshold for matching funds in the primary is $21,650 and the grant to major party nominees and the threshold for third party nominees or independents are both $141,100.

The entire cost of the Senate bill is estimated at $38 million per election or $19 million a year.

In the 1972 Presidential election, millions of dollars changed hands, much of it surreptitiously. Admittedly, that election was an aberration. But its evils were in a familiar pattern. The new Federal Election Campaign Act has taken those evils out of Presidential campaigns. But they linger on in congressional elections. The bill I am cosponsoring will end them altogether.

SOCIAL SECURITY: U.S. UMBILICAL CORD

Mr. CHURCH. Mr. President, a major issue during the 1976 Presidential campaign was the need to streamline Government.

In the final analysis, I believe that most people will make their judgment about the effectiveness and efficiency of Government on the basis of their personal relationships with agencies affecting their daily lives.

Does the Postal Service deliver their mail on time? Does the Veterans' Administration treat veterans courteously and fairly when they raise a question about their pension or compensation payments? What type of service do elderly Americans receive from the social security offices located throughout the country?

As the chairman of the Senate Committee on Aging, I am especially concerned that social security is administered effectively and impartially. Social security affects the lives of almost every American family in one form or another. Nearly 33 million persons now receive monthly benefits. More than 100 million workers will pay social security tax in 1977.

Throughout its history social security has enjoyed a reputation for excellence. But it has been tarnished somewhat in recent years, particularly because of problems encountered in administering supplemental security income.

Major changes have occurred since social security was first enacted more than 40 years ago. Social security, of course, is not solely a retirement program for the elderly. It also provides disability, survivor, hospital, and medical protection. In addition, social security administers a portion of the black lung benefit program and SSI.

It is vitally important that agencies, such as the Social Security Administration, be sufficiently flexible to adapt and respond to the changing dynamics in our society.

A recent series of articles by Haynes Johnson, of the Washington Post, describes some of these forces at work as they affect Government, with particular attention to the Social Security Administration.

His articles, it seems to me, provide further compelling reasons for enactment of the Social Security Administration Act. This bill, which I plan to reintroduce soon, would again establish the Social Security Administration as an independent, nonpolitical agency under the direction of a three-member governing board appointed by the President with the advice and consent of the Senate.

Mr. President, I commend the first three articles by Haynes Johnson on "The Bureaucracy" to my colleagues, and ask unanimous consent that they be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 27, 1977]

DAYS OF ENDLESS STRUGGLE, DROWNING IN A SEA OF PAPER

(By Haynes Johnson)

As everyone in every organization knows, the views from the top and the bottom are different. The same is so in the federal government.

From the top, officials look down and see a bureaucratic jungle, unresponsive, entrenched, self-protective, slothful, pawns of the ubiquitous special-interest groups that affect, if not control, legislation. A senior White House aide looks at a chart of a key government agency taped to his office wall, gesutres vigorously toward the hand-lettered names of high officials on it, and says decisively, "We're going to clean them all out."

From the bottom, workers look up and see more regulations, more programs, more paperwork, more hostility from politicians and public. They see Presidents and Cabinet officers come and go. It really doesn't make any difference who's on top, they almost always will say they are the government. They still have their work to perform, and that work has become increasingly complex and frustrating. They are drowning in a sea of paper, fighting merely to keep up.

A new employee, four months on the job dealing with citizens' claims in a district office, recites the various forms needed to file one case—the 401 and 85–10 and ID info and tie-up RC and the a–27, b, d, and c, among others.

Inarticulately, but accurately, she defines the problem: "There's a lot of rules and regulations because people write laws and file lawsuits and stuff, and if you got rid of the rules and regulations you could get rid of the paperwork, but you can't get rid of the rules and regulations because people have made them. So really, it's like an unending cycle. There's nothing you can do."

Catch 22, real life, every day, every office. To read regulations that come out of one department alone—HEW—each week is equivalent to wading through twice as many words as "War and Peace." Words, it hardly needs to be said, that lack the clarity of a Tolstoy. Words, in fact, that are almost incomprehensible if you do try to wade through them. Who can master them? No one. Who even tries?

From the top, a new Cabinet secretary comes into power determined to move aggressively and quickly. He's going to reorganize his department and set, he hopes, a new tone for a new administration. The enterprise is carried out in melodramatic secrecy. One of a handful of trusted advisers describes the process as akin to receiving sealed wartime orders to be opened only at sea. Preparation of charts for the reorganization is even secretly shepherded out of his department, and done at the Pentagon, through a private and personal arrangement with the Secretary of Defense.

Why? Because they believe if word of the plan leaks it will be blocked by the bureaucracy and the special interest groups that want to maintain the status quo.

From the bottom, where the repetitive, grinding work is performed, those far-off decisions in Washington aren't the immediate concern. The problems are more mundane—and more critical. They involve such seemingly simple things as obtaining file cabinets and qualified clerk typists. Neither is easy to come by. The harassed office managers wind up fighting within the bureaucracy itself. They often lose.

"We have these old claims," one says, "and we have thousands and thousands of these folders. So I ordered 12 file cabinets about a year and a half ago. I still haven't got those cabinets. You can't get supplies.

"I'll tell you very confidentially how we get around it. Not having those cabinets probably cost the government a thousand dollars each, because what happened was we had put the files in cartons but we have to go looking through them. Well, you know how much clerical time can be lost when these things get all mixed up.

"So frankly what I do, even if it's not strictly legal, is work out a deal with a guy. You say, 'Look, I'm not allowed to buy, I'm only allowed to rent, but when the rent price reaches the purchase price it's mine. Okay?' But why should I have to do that? . . .

"I can understand the claimants yelling at me, the Germans shooting at me, but my own government, why are they doing this to me?"

Now file cabinets and clerk-typists and frustrated employees like the one who says he reaches the point where he throws a case into the trash can ("that's one case you don't have to worry about") may not seem matters of great moment in the world of Washington. Or even, to be more lofty, about democracy and government and the rights and responsibilities of citizens and society.

Yet that is what this story is all about.

In time, both top and bottom express the same kinds of fears and frustrations about how government works. They are both captives of the bureaucratic machinery of which they are integral parts, and which they themselves have helped to build. Who is to blame? Everyone and no one. US or them. This is true even of the best of them.

* * * * *

Max Stamler would agree with that judgment and its implicit challenge. He's a bureaucrat, who resents the term. He's been around a long time, and speaks from the bottom looking up. Over his years with Social Security he's witnessed stunning changes in the role of government and public attitudes about it.

"I've learned one thing," he says, "it's that I don't feel the people on top know more than I do. Maybe it's because they are so high up that they don't see the obvious things."

Another personal lesson: "If I were President, I'd put the decision making as close to the people as the guy who's going to get punched in the nose if it doesn't work."

Max Stamler knows something about that feeling: from where he sits, in his midtown Manhattan Social Security office, each day is an endless struggle. He oversees some 150 employees who in turn serve 90,000 of the most diverse cross-section of the citizenry, everyone from bankers and brokers to junkies and mental patients. A quarter of a billion dollars in benefits is processed each year out of that office alone.

Until very recent years Social Security stood as the brightest ornament in the ever-expanding federal establishment. It was the best, the elite, a model of what government could do for the citizens it serves. Social Security no longer enjoys that reputation, but it still touches more and more people personally. And more and more is being asked of it.

As Stamler correctly says, "We are the government, as far as the people are concerned. We are the United States government."

What Stamler will also tell you is that working for the government today bears no resemblance to the government he knew. "Here's an agency that needs to get the best possible employee," he says, in disgust. "Here's a system that almost dooms you to the worst."

* * * * *

What's remarkable is that Social Security carried out its mission so well for so long. In fact, its very success led to its present problems—that and the insatiable demands placed on it by everyone, from every side; from politicians and Presidents and people in general.

In the early days, the mission was simple. Deliver the right checks in the right amount to the right person at the right address and on time. Social Security did everything asked of it, and did it superbly. And Social Security kept getting more and more benefit programs assigned to it and more and more complicated personal records to process and maintain.

The roll grows longer and gets more complex.

Payments for half a million sufferers of black lung disease, now running at $79 million a month . . . for 835,000 young people drawing survivors' benefits much of that billion dollars a year going to finance higher educations . . . for millions of Medicare claimants, the largest government health insurance programs, $22 billion a year.

All were moving along, all seemingly going well, until Social Security came face to face with a real crisis it couldn't control. Looking back on that time three years ago, agency officials say the danger signals should have been clear. The agency was overconfident, suffering from what one person calls "organizational menopause." And its crisis came at a time when its work force was changing, when public attitudes about government were becoming more cynical, and yet when greater demands to administer more difficult programs were still being placed on government agencies like Social Security.

But that's hindsight.

Three years ago Social Security began administering another massive program, one that put the agency for the first time in the federally subsidized welfare business. The program, called Supplemental Security Income (SSI), gave the agency responsibility for another 4 million people—the aged, the blind and the disabled on state welfare rolls.

Almost everything went wrong. Many of the state and local welfare rolls turned out to be hopelessly in error; case after case had to be reconstructed from scratch. Dealing with the new claimants themselves often came as a shock. In all of its experience, Social Security had dealt only with those who had paid their money into the system through payroll taxes. Those, in other words, who had earned their benefits. Now, picking up the welfare load, they were dealing with the core of the urban poor.

The program itself was supposed to be simple to administer. Thus, the claim in Congress. But the law implementing it had nightmarish elements.

States were given the right to supplement the basic eligibility requirements in ways that often created impossible situations. For example: in California a person eligible for the federal welfare payment could get additional money. If he was living alone, taking meals twice a day in a restaurant, he'd get extra money. But when he stopped having two meals in a restaurant and started cooking at home, the financial grant would be adjusted—up or down.

"Well, that's monstrous," says a Social Security administrator. "From the standpoint of the federal government administering it, that's just a monstrous thing to attempt to do. It's inherently bad, but it's even worse—because here's Congress saying don't you dare make a mistake in the process."

Social Security strained and began paying its welfare checks, but for the first time it failed. "All of a sudden we wake up and find all hell's broken loose," the agency executive recalls. "The press, the Congress, the advocacy groups of the poor are raising hell because we didn't get those checks delivered on time to those people.

"And here's an agency that if it never did anything else right it had a 40-year record of delivering checks and delivering them on time—by the hundreds of millions."

At local offices mob scenes occurred as welfare clients filled the corridors, halls, and massed outside. There were threats and violence—and finally armed guards. Social Security people began working around the clock, 30,000 of them, to try to bring order out of the program. A decision was made to get those checks out—fast. "It was pay now and ask questions later," one person says. "Because here was a program directed toward humane treatment of people, and here was an agency whose basic mission was to put cash in the hands of people."

After intensive efforts for more than a year, and great strains and pressures on personnel, Social Security thought it was winning its battle.

* * * * *

Arizona—"Operations instructions were hurried, inaccurate and subject to constant change. Today, some 2½ years from date of enactment, our operating manuals remain without subject indexes."

But the greatest impact has been on Social Security itself, and particularly on those local offices in the great urban areas where employees deal most directly with the public. Until Social Security began administering its welfare program armed guards had not been posted inside those district offices. Today, three years later, they are still there. They have become permanent fixtures.

In the New York offices of the Social Security Administration the stories become familiar; the job is one frustration after another, and it's getting harder. There isn't time to keep up adequately with the changing manuals issued to explain the changing, programs. Dealing with the public these days can be difficult; drug addicts and mental cases, occasionally abusive or threatening, sometimes shouting, sometimes throwing paper in the faces of employees, are not uncommon. Personnel turnover is high, good replacements are harder to come by.

Office managers find themselves exploding in anger—not at the public, but at the government itself, a government that imposes intolerable burdens on its work.

"If you were to ask me what are the largest barriers you have to overcome in order to do an efficient job," one said, "you know what my answer would be? The Civil Service Commission and the General Services Administration. These agencies, the Civil Service Commission and the GSA, they do not serve us. They're there but they're there to block us. It's like they're in business for themselves. And their sole preoccupation is to keep themselves in power without rendering service."

Then you will be told one horror story after another about problems in hiring clerical workers or getting office equipment or leasing new space.

"You just don't have the time," says Richard Ferguson, the Harlem office manager. "For every demand that you satisfy there are three which are made in addition. You find that you're really going backwards. You're not really keeping up. Sometimes you think you are, other times you're just overwhelmed. I just don't see where you can keep up this kind of pace under these kinds of conditions and still be effective.

Ferguson, a soft-spoken man who carefully masks his emotions, told of spending months trying to untangle a problem. Cabinets, again. A shipment, arrived damaged and unusable. They're still sitting there, with no replacements in sight. He finished telling his story, was silent a moment, and then calmly offered a kind of soliloquy.

"That's the frustration when you're in the government dealing with the government. I'm ordering this stuff because I need it, because it helped me to do my job better, but . . ."

His voice trailed off.

Several weeks after that conversation, new word came down from Washington. It hit Ferguson's Harlem office hard. In a reorganization move directly affecting Social Security, the agency would be given a new program—aid for dependent children. Another welfare program had been assigned.

Ferguson's employees were more than upset. "I had to reassure them it doesn't mean anything to us right now," he says he told them at a staff meeting. Then he added, in his same quiet way: "You know I'm sure that any office that went through the trauma we went through in 1974 would feel the same way."

[From the Washington Post, Mar. 28, 1977]

SOCIAL SECURITY: U.S. UMBILICAL CORD

(By Haynes Johnson)

Down a long corridor, behind doors marked "secured" and "alarmed," stands the center

of the real world of government today. Quite clean, uncluttered, unharried, not at all the picture of the bloated bureaucracy so pressed on the public mind of late. Certainly not a word that George Orwell ever envisioned when he conjured up his nightmarish specter of an obstrusive, omnipresent government structure where Big Brother was always watching. Not many people there in fact: just a faint humming sound emanating from banks of machines in gray casings.

That is the part of government that never stops, that continues moving on its own momentum, that grows and changes no matter who sits in the White House or occupies the Cabinet officer's chair or wins a seat in Congress. It is impersonal, inanimate, faceless—and indispensable.

We are all linked to those machines, and to that system. It is, in a way, the umbilical cord of our society, the line that reaches out and directly affects our lives.

"Every night we pass every personal record we have in our master file through the system," a government employee explains. "It's constantly changing, and all the records are kept current and active."

That means the records of 330 million Americans who have received Social Security numbers since 1936. Death will not keep your basic life's story from stopping. Long after you yourself have gone, your records will continue actively whirring through the Social Security system's computers.

"With a Social Security number we can tell your name, your father's name, your mother's name and her maiden name," the employee says. "We can tell your date of birth, your place of birth, where your Social Security card was issued, your address at the time your card was issued, your phone number at the time, your race and your sex. If you never do anything else, we'll have that information on you.

"If you go to work we'll know when and for whom you worked. We'll know when you changed jobs and what the address of your employer was, and how much money you're making. It's all on magnetic tape, all your earnings records. We've got it. We can tell if you're married, divorced and have children under 18. If you go on Medicare, we can tell what drugs you're taking and what your medical bills are. We can also tell your doctor's name and his address.

"The file will show evidence of when you died, and how you died, and from what, and where you're buried. We have better, more complete records than IRS. And today we have a better record on who your employers are than IRS—who the corporate officers are, who stockholders are.

"Where you're standing now comprises the largest computer operation in the free world. That excludes our intelligence agencies—and the Russians. Now you can see why we don't let people in here. It needs to be kept confidential."

This story is not about the potential abuses of that information system, but a small aside is in order.

I had walked into a New York Social Security office and found the person in charge exceedingly edgy. The FBI was there, interviewing one of his employees. It turned out the employee had been running a racket. He was selling Social Security cards to illegal aliens and others who wanted a new identity. Because he had access to the computer system, and knew how to use it, he would summon up names and numbers of people who had died.

Then he would type those names and numbers on Social Security cards—stolen from the office—and sell them at the highest price on the underground market. By the end of the day, the employee had confessed. Case closed. "But it shows you," the office manager said, "that the opportunity is much greater now for someone who knows the computer system, and who can use it, to abuse it."

The problem with Social Security is not corruption, although public and press focus more extensively on that aspect of government than any other. Its problems are far more complex and critical.

Simply put, the basic question is: will Social Security, the agency that most directly touches the lives of most Americans, continue to perform its mission well? That is no longer clear. Other questions flow quickly from that. Can Social Security effectively manage its complex machinery and its people, given the rapid changes affecting them both—complex changes in technological requirements and in attitudes of government employees about their jobs? Neither is clear.

Has the agency been asked to do too much? Has government been trying to do too much? Has anyone a real solution to the present self-defeating process by which government chokes on government-inspired red tape and regulation?

These are not esoteric questions. They go to the core of any look at government and the bureaucracy today. And they raise again the harder question—does a change in national leadership make any real difference? Social Security provides a case study of how increasing pressures can adversely affect one of the most vital and best-established government agencies.

Let it be said that Social Security employees, from the highest executives down, are remarkably candid, and open in conceding their mistakes and discussing their problems. That is a tribute both to the quality of the employees and to their agency's long tradition of excellence in public service.

Almost without exception they will tell you that public confidence in the agency has eroded significantly—and that they have lost confidence in how effectively they perform their jobs.

"Most of this decline occurred in the three years that I've been there," says ruefully Bruce Cardwell, the commissioner of Social Security. "In the last three years the agency has kind of been beaten down. It's had some outright failures, failures it can't alibi. And they were probably the first failures in its experience. When you fail at something, particularly when you've always been successful and you're proud of your record, it hurts. It hurt me."

By that, he refers specifically to Social Security analysts' failure to anticipate the true long-term cost of their system. It now appears that without huge increases in payroll tax rates in the future, possibly as high as 50 to 75 percent, Social Security won't be able to pay promised benefits. That has led to headlines about Social Security going broke, and citizen fears about an impending crisis threatening retirement and other benefits.

The second notable failure, examined in yesterday's article, was Social Security's experience with administering a new federal welfare program for the nation's aged, blind and disabled.

In its first two years of operation, starting in 1974, Social Security overpayments in the Supplementary Security Income (SSI) program were totaling about $2 billion. In addition, difficulties in dealing with welfare case loads for the first time caused serious morale problems in Social Security offices across the country.

"We're still in the backwash of that shock," Cardwell says. "The error rates are going down a little bit, the program's coming under control. But I have to tell Congress it's about as low as it's going to get. In a program like this you have to face up to the fact that at any one time at least 15 per cent of the payments are going to have something wrong with them. And the Congress, at this stage, won't accept that."

Beyond these agency failures, Social Security faces more general problems that afflict virtually every government agency today. Bureaucratic tangles arising from new laws creating new and increasingly complex programs, changes in attitudes about work itself among employees, the rapidity with which new tasks are given to the agency by Congress, which in turn is reacting to ever-rising public demands for more government action for more and more groups—all these are among them.

Social Security is typical in another sense. It has grown and grown and grown. Not so dramatically in its number of employes, although 84,000 now work for it, but in the space required to do the job. That's what government is all about, too. Overall, federal government growth has been more in buildings and dollars than in people: the federal civilian work force has remained almost constant for a generation while the money it spends and the space it occupies have multiplied beyond reckoning.

Twenty-four years ago the Social Security Administration moved its national headquarters from downtown Baltimore to the suburbs. You can chart its great changes since and see how government has grown by merely looking at the Social Security complex in suburban Woodlawn. The agency now occupies 19 buildings there, eight of which the government owns, the others leased. Some 20,000 employees work in that self-contained government city. They are ants in the U.S. factory.

Now a 20th building is going up at Woodlawn. It will be the biggest of them all. When completed, it will contain 350,000 square feet of space. It will become the first building ever designed and constructed solely for computers.

When Social Security was being created back in the New Deal days, some of its early leaders studied the way the English civil service maintained its records. The most they were able to keep track of the British advised the Americans, was 3.5 million individual records. The Americans' experiment with Social Security could never succeed: it was too large an undertaking to maintain on paper. For years, all of Social Security's records were written on paper and kept on bamboo strips. Huge tubs, filled with bamboo strips were everywhere. Then came the computer.

With typical American confidence in technology, our God of the Good Life, the computer held the key to the future. Oh, yes, the world of the computer wasn't perfect: every day tapes of records get misplaced in Baltimore, and sometimes lost. But a master set is kept, under tightest security, in a limestone cave in Pennsylvania. And, it was recognized, computers came with other built-in liabilities: they contributed to citizens feeling increasingly removed from their government. Orwell's Big Brother now seems more than a distant fictional phantom.

But Social Security could not function on its present scale if the government didn't rely very heavily on computers. Inevitably, that dependence will be greater in the future. Fine and well. But now another kind of shock is setting in at Social Security. To quote Cardwell again:

"You hear people say they fear computers will start talking to each other and do terrible things to us all. It is spooky, and it's very complex. I think managers most everywhere today do not have full control over computers. Just as you don't have full control over your automobile. You can start it and stop it, steer it and drive it, and that's about it. You'd have a hard time converting its load-carrying capacity, and you'd have a helluva time repairing it when it broke down.

"Managers now are in the same position vis-a-vis the computers. They don't know enough about them to make them do what they want, so they have to rely on someone who says he does. That's like your reliance on the automobile mechanic. You're learning

more and more he probably doesn't know how to do it. The same thing is showing up in the computer business."

The most vivid recent example of computers going awry—or, to put it another way, of those operating them misusing the machinery—came in Social Security's traumatic experience over its SSI welfare program. Computers were spewing out erroneous information resulting in massive over- and underpayments. That led, in turn, to what became at times violent reactions from a public caught in the maw of the machines.

It still takes more than machines to run the U.S. government—and the Social Security system. There, the complaints are clear. People who work for the agency express frustration with their jobs, weariness with bureaucratic idiocies, anger at being asked to take on more tasks than are reasonable, or possible. It isn't that they are incompetent or uncaring. It's the depth of their feeling and their essential belief that give special weight to their words.

A top-level administrator, a softspoken person with years of distinguished government service, voices a common emotion:

"I can really understand a federal official ignoring poor performance instead of facing up to it and trying to do something about it. While it's possible, it's not highly likely that he's going to be successful, and even if he is successful it's going to consume hundreds of hours of staff time. I've see the most piddling cases around here that have consumed—well, in my opinion, just scandalous amounts of staff time.

"For example, we have appraisal forms which I think are just atrocious. A person is rated on ability and productivity and oral communications. I just ignore them by never making any out."

The middle-level bureaucrat, who worked his way from the bottom in Social Security and always felt great pride in its mission, tells of going to a conference of agency office managers from around the country. He was supposed to explain the latest way to compute widows' benefits. "They all laughed at me." he said. "It just cries out for a need to simplify the Social Security laws. It's enough to make you go bananas."

The manager, a lawyer by training, reflects on the changes in the manuals given to workers dealing directly with the public: "When I think of a GS-9 or GS-11 responding to questions from the public about these programs, I say to myself, 'My God, I couldn't even answer them myself and I've been working as a lawyer for many years'."

The veteran administrator, who looks out at the bureaucracy of which he is a part, says:

"One of the things I see about the bureaucracy is its capacity to accept mediocrity. Maybe all institutions do this. The average manager in the government at the upper-management levels is today, and has been for a long time, dissatisfied with the system for hiring, for placing workers. Most of them think it's terrible. You'd find very few who would compliment it.

"Take that same group of people and ask them how the government procures and utilizes office space and they'd all just scream. 'It's terrible, terrible. It's excessively complicated, excessively expensive, excessively slow. It's wasteful.' There's a whole host of criticisms. Ten years ago if you asked them that you'd have gotten the same answer as today. They believe that 10 years from now they'll still give the same answer. They don't see themselves as having any responsibility or any opportunity to do anything about it.

"In fact, what they're doing is to condition themselves to survive those shortcomings. They're constantly patching and repairing."

These are among the reasons why Cardwell will reflect on his agency's problems and say:

"Where it comes out is this: Everybody's got to hold onto that ledge just a little longer. It's 20 stories below and you're dead if you fall. So you just hang on as long as you can."

CARDWELL: VIEW FROM THE TOP

As commissioner of the Social Security Administration, Bruce Cardwell oversees 84,000 federal employees working across the country. Their jobs more directly affect the lives of more Americans than those of any other federal agency. In this segment of a conversation with Haynes Johnson, Cardwell gives an appraisal of his agency today.

No other agency has enjoyed a better reputation for general efficiency of operation, sensitivity to the public interest, than Social Security. The image always has been it was an agency that had a considerable esprit, a good feeling about itself, a healthy self-respect. I don't think that's any longer true. I don't want to be pessimistic about it, but I doubt that it's healthy today.

I think what is occurring is the result of a multiplicity of very complex developments in and around the agency. One of them is Watergate, and the general public disillusionment with and cynicism toward government in general. Others involve such things as the rapidity with which new assignments have been given Social Security, the complexity of those assignments, the failure to appreciate the complexity of those assignments by the agency itself and by the people who made those assignments in the legislative and executive branches.

But also there's the theoretical—and to me it's not theoretical, it's real—change in the attitude of the American work force toward what they want out of and from work.

The concentration of so much of the agency's work in urban areas—and I've got to be careful how I say this because it could seem offensive to a lot of people—but it's highly probable that these urban areas no longer produce through their educational systems workers who are really qualified to do the work required. Yet they're the only workers you have. And those workers have now been mixed in with the original workers. Today, they're probably dominant. They just behave differently about their work.

Then the federal classified system—how you pay people, what you call them, how you title them—which was devised many years ago and reached its peak in the 1940s and 1950s, hasn't changed. It hasn't kept pace with these demands. Agencies like Social Security have a problem because that outside system determines what salaries they can pay, whom they can pay, what titles they can apply. The general working conditions under which they work have not kept pace with the changing fabric of American work force.

Just take the union movement. The government doesn't know anything about government-management relations. It'd made one mistake after another. Today a supervisor of 100 people doing reptitive work should know something about management-labor relations. He should know something about how to motivate people, why people behave as they do, know something about the process for dealing with disciplinary problems. It's very complex. He isn't up to his job. And he isn't up to his job because the people you can hire for those salaries haven't been prepared for those jobs.

I'm not trying to indict anybody but I really think it's a very serious problem. And it's a problem we're really going to pay for downstream.

GOVERNMENT GONE AWRY

(By Haynes Johnson)

For decades, Social Security has administered the largest retirement program in the world. It has delivered with great efficiency and elan billions of dollars each month to tens of millions of Americans.

Several years ago Congress decreed that Social Security also should get into the welfare business. In 1974 the agency began administering a Supplemental Security Income program. Immediately, it became embroiled in problems and controversy. Its offices were besieged with a new class of claimants. Its record of efficiency was shattered. Its morale deteriorated.

Two months ago a new administration came to power. In the process of its first attempt to reorganize the government—an effort to bring order out of disorder, to streamline the workings of the bureaucracy—Social Security was directly affected. The agency was given administrative oversight for still another segment of the huge welfare population—some 11 million parents and children receiving billions of dollars each year under the Aid to Families with Dependent Children program.

The news was a shock.

"This just says to us we're heading more and more into the welfare business," one employee said. "And that's not what we need."

Another was more explosive. "Christ, another program. Who needs it? Does anybody understand what's happening to us? The President doesn't understand. OMB (the Office of Management and Budget) doesn't understand. Hell, we've had it with reorganizations—illogical reorganizations that we don't understand, yet we're supposed to explain them to our people and make them understand and accept it."

Not everyone in Social Security reacted negatively. Some see it as a challenge that the agency will master. But the move reinforces a point that keeps being hammered home during these last months of exploring the world of government through the limited perspective of one of its agencies. As someone along the way remarked, "The system is corrupting itself."

He didn't mean corruption in the simple sense we write about in the newspapers—theft, bribery, fraud, greed. He meant government is growing out of control all right, but not because of any single factor. It has become a victim of forces that inexorably propel it into greater and greater endeavors, creating greater and greater problems. "The whole society is involved in a rip-off, if you want to put it that way," he said.

The experience of Social Security would seem to bear that out. "We've been considerably frustrated at all levels," one of its managers says, "as public expectations about our role are continually being raised and we're continually being asked to perform tasks that we think we're not equipped to perform."

That doesn't take into account the reasons for the current reorganization, of which Social Security was only a part, nor the complexities in carrying it out.

The reasons are simple enough—the desire of new managers in a new administration to see if they can make the government work better. That was the pledge from Jimmy Carter on down. And the difficulties are clear enough, too—can anyone really make a difference?

The target, in this case, was not Social Security but the sprawling department that reaches into every corner of our lives. Social Security happens to be only one of that department's many tentacles.

As a symbol of the government, and the bureaucracy, the Department of Health, Education, and Welfare stands alone.

"No enterprise that I know of, government or otherwise, has ever grown as fast and reached out into so many areas," says a bureaucrat who has watched HEW change from within since the 1950s. "That may be

a reflection of something else, of what's happening in society generally.

"Life in America, and life in the Western world, has just become very complex. The dynamics of change are very rapid, perhaps even overwhelming. HEW's a reflection of that. HEW today is now self-propelling. It has a motion and thrust all its own. You can change the leadership and the tempo will pick up. Its effort may pick up or decline, depending on the quality of its people, but there's a certain amount of activity that's inevitable now. It just propels itself along. That's true of the whole government, though.

"Look at the uncontrollability of the federal budget. Look at the Congress. The Congress is continually looking for new space. Its appetite for new offices is insatiable."

As Social Security Commissioner Bruce Cardwell pointed out in an article in Monday's Post, another change is affecting American society. It's changing attitudes about work itself, found in every corner and segment of society today, in or out of government.

In that same period of HEW's growth, as more and more demands were placed on it with more and more bureaus created to oversee more and more programs, the obvious occurred. Morale declined, errors increased, service to the public suffered.

"I don't know how to get the bureaucracy back to where I used to recognize it, particularly in these big departments," says an HEW official.

"My general impression over the 25 years and various agencies I've been in is that the bureaucracy has gotten slower. They have reacted to what's happening in government by going into their holes. They're digging in, bunkering down."

He has only one solution: "Unless you get cues down through the bureaucracy that this is government under pressure and we've all got to behave differently, we aren't going to make it. To get control you've got to shake up the bureaucracy. And you've got to move fast."

That is what happened to HEW—and Social Security—in these early days of the Carter administration. How it was accomplished, and under what circumstances, tells a great deal about government today. And it raises as many questions as it answers.

When Joseph A. Califano Jr. took over as HEW Secretary two months ago he found many changes from the government he had known during his days in the Pentagon and the White House in the 1960s. The power of Congress had increased greatly, and the congressional staffs were vastly more influential. Government regulations had become unbelievably complex, and programs more intertwined and unmanageable. The bureaucracy was both dispirited and distrustful. And it was much more difficult to exercise authority. In his department alone Congress had enacted thousands of things that an HEW Secretary couldn't change. The only way to get change was through legislation. That meant asking Congress' permission. You were a pawn, a hostage, whichever way you moved.

Califano was determined to move swiftly in carrying out the President's—and his own—public pledges to reorganize his department. He was confident, too, that by realigning and eliminating overlapping functions, better administration could be achieved at far less cost.

He had another concern: any attempt to change HEW's structure would have to be done under tightest secrecy.

It hadn't taken him long to learn that virtually everything he did leaked instantaneously from the bureaucracy to congressional sources, special-interest groups and the press.

"I have come to the conclusion that everything I sign is a public document within 24 hours of the time I sign it," he says. "The only things that may not be public documents that fast are the memoranda I send to the President, because we hold them so tightly here. But everything else—excerpts from letters I've written, memos out of my office—I have to assume will leak."

Califano wanted to make certain his plans for HEW were secure. As someone who worked with him on the project put it: "To be brutally frank, if you let it seep out on you you'll never get it done." He meant that various interest groups could combine with their respective allies on the Hill to throttle it.

The security surrounding Califano's reorganization move is a measure of how difficult it can be to change government today. There are 145,000 employees in HEW. Aside from Califano, only five persons in all of HEW knew what was being contemplated. They were pledged to tightest secrecy.

After extensive private meetings the reorganization plan was finally put together. Califano faced another problem. He had to have briefing papers and charts ready before presenting the idea to the President.

"I had no sense I could get copies of briefing papers, plus all those charts, put together over here at HEW without having it leak all over hell," he recalls.

He went to Harold Brown, the new Secretary of Defense, whom he had known in his own Pentagon period. Brown agreed to have the charts and papers prepared at the Pentagon.

On March 2 Califano briefed the President at the White House. For more than an hour he went through the details before an audience composed of Carter, Vice President Mondale, OMB Director Bert Lance and presidential aides Jack Watson, Stuart Eizenstat and Harrison Welford.

The President was pleased, the plan was approved. Five days later Califano briefed the Cabinet and then announced the reorganization to the public as "the most far-reaching in the department's 24-year history."

Califano's first thoughts about his reorganization centered strongly on the Social Security Administration. He was thinking of moving two critical and controversial welfare programs—Medicaid and AFDC—into Social Security. The agency already had been given a federally subsidized welfare program for the nation's aged, disabled and blind (SSI). It also was administering Medicare.

One of his advisers objected. "I told him at that meeting, 'Hey, boss, you're putting 97 per cent of your money under one guy,'" he recalled, "'Do you really want to do that? When you do that you're creating a super-super agency head.'"

In the end, Medicare was transferred from Social Security as part of the formation of a new health-care administration. Social Security administratively was given AFDC to go along with its other welfare benefits program, SSI. That put HEW's cash-assistance programs under a single administrator, just as health-care functions were being placed together under a separate unit. It would eliminate fragmentation, Califano reasoned. It was logical. It should simplify management functions and save as much as $2 billion in the next two years.

It was also believed that putting the two programs under Social Security would lead to substantial reductions in error rates off SSI and AFDC. Social Security alone had been working intensively to cut errors, with marked success; rates in SSI have been cut at least in half. The cost had been high—a billion dollars in incorrect payments in its first two-year period—but about a third of that money has been recovered or settled. Still, error rates in both programs remained high. Latest figures for SSI show an 8 per cent payment error. For AFDC it's a 9.1 per cent rate.

The long-term impact of AFDC on Social Security is unclear, in part because the entire question of welfare reform is being studied within HEW. State and local governments still pass out their AFDC welfare payments in offices across the country. But Social Security now is assuming overall quality control as well as seeing that federal guidelines are carried out. If fraud exists, it's the ultimate responsibility of the federal government to root it out.

Probably the greatest concern within Social Security is that the AFDC program—with 11 million beneficiaries getting $9 billion a year—ultimately could turn into another SSI experience.

Califano and his top advisers had discussed the impact of these moves on Social Security. They had weighed morale and other factors. They were aware, as one said, that people there "generally felt the SSI experience was more than they ever wanted to face again."

Califano says, "I guess I was not as aware of the problems with SSI." He had visited the agency's headquarters in Baltimore and came away with several strong impressions.

"My instinctive reaction was how incredibly big it is," he says, "with those 300 or more million people on those computer tapes, and how incredibly dreary some of that work must be for the individuals. I felt sorry for the people that were reading those microfilms.

"I've done my share of legal research, reading old documents on microfilm, and it's, grim, tough. It sears your eyes. But I was impressed, I guess, that they've come a long way from a few years ago. Then you couldn't have a radio when you were sitting there. They've got much more frequent breaks now. They've learned that that pays off."

What has not been learned, it seems clear, is something more fundamental. Perhaps the HEW reorganization will turn out to be the model for the rest of government. Perhaps it will save billions of dollars, although that is doubtful. Perhaps it is a hopeful beginning, for Carter, Califano—and the country.

This reorganization does not touch, however, nor was it intended to, some of the deeper problems of government. It does not address questions of pressures from the top building on the workers below, on outside demands for more and more programs and more and more laws and more and more regulations, on complexities of declining morale and technological tangles.

It certainly does not address the personal frustrations felt by many people on the front line of government today.

"We're being asked to deal with things that a bureaucrat isn't really trained to do," says a government employee. "Look at the SSI program, for instance. (The federal welfare program for the aged, the blind and the disabled is now run by Social Security). In California a federal bureaucrat out in a district office has to go and see if your aunt changed living arrangements from month to month to determine if she stays on welfare or if her SSI benefits go up or down. We have to go in and ask her if her cooking arrangements are different from last month to next month. No way!

"If you don't and we find out by our quality control that her cooking arrangements have changed and she should get less money, that's an error. I don't think anybody understands the complexity of that. I don't think anybody understands the federal bureaucrats can't do that without errors. We'll never get those errors down, I think, below 15 per cent. That's almost an impossible situation."

Too often, employees react all too similarly. They do just enough to get by. "You don't get your psychic income out of the office," one says. "You do the best you can,

and try not to get too frustrated. You gut it out."

As we have been reporting these past three days, Social Security is an agency with a great record of public service presently experiencing considerable strains. Some of its wounds are self-inflicted. Most are not. What makes it so signal a case is the irony of its dilemmas. One stands out sharpest of all. Social Security has become a victim of its own achievements.

"It's the rewards for success," says an HEW official who participated in shaping the current reorganization plans. "Every one of those programs that was given to Social Security was given not because it made so much logical sense to put them in there. In many cases it didn't. They were put there because of the fact that here was an organization that had a reputation of being able to get things done.

"Generally speaking, there was no problem you couldn't give Social Security. They brought Medicare up from nothing to on board in a period of 18 months after the law was passed. That was an unbelievable administrative task. I don't know of any other example of a new program getting off the ground like that. And when SSI was given to them, wasn't the decision based upon the fact that they could do it? That was the only place that could do it?"

Of course Social Security workers say that, precisely, was part of the problem. They speak about reaching—or overreaching—the saturation point in terms of programs, services and benefits. They speak of programs eventually turning inward and becoming self-destructive. They speak of struggling to simplify legislative fiats affecting those programs. "I don't think Congress is interested in simplification," one person says wearily, "because the law is so filled with provisions that protect somebody. I really don't think anybody is interested."

From the top echelons at HEW the perspective differs. The most critical problem Social Security faces, you'll hear, lies with its computer systems technology. "My assessment of the problem of morale and the image of Social Security going downhill over the last five or six years," that same official says, "is that 90 per cent of it is tied to systems problems. And I don't thing they recognize that. I think they blame it on overwork. But the overwork is because they haven't been able to get the systems to respond in time to do the work. So people end up having to do it."

Again, the irony: Social Security officials say so much of their time is spent on technology—on worrying more about machines than people—that its proudest traditions are in danger. It was Social Security's greatest source of pride to be thought of as the people's friend, the agency closest to the citizen. For a number of the reasons we've been suggesting, that public and personal role grows more difficult.

One more observation. In all the public talk about the excesses of government, a great deal of time and attention are spent on fraud and scandal in administering programs. Politicians seize on that. They pledge to remove welfare cheaters and reduce cost overruns. Fine enough. What doesn't receive as much attention is perhaps the greater corruption—the attempt to do more than is prudent or possible and the failure to account for the real costs of placing greater burdens on government.

This is a story without an end.

No final clarion message emerges from this glimpse into government. In months to come, other agencies and organizations will be examined. Perhaps other lessons will be learned. But Social Security alone provides disturbing evidence of government gone awry. And the words of one of its managers are worth pondering.

"My own personal conviction," says Robert Bynum, associate commissioner for program operations, "is that the President and Congress ought to be very, very careful about enacting new programs to take care of what is apparent as a need without very, very thoroughly and carefully looking at everything else that's already on the books that somebody else has responsibility for. And somehow in that process they must insist that you undo some things that have been done.

"If we don't do that, if this President and this Congress don't somehow get a grasp on how to do that over the next four years, then we are truly going to reach a chaotic kind of situation in this country."

HEAD START PROGRAM

Mr. ABOUREZK. Mr. President, I want to call to the attention of the Senate three recent newspaper articles which discuss the Head Start program and the successes it has registered. I ask unanimous consent that these three articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 27, 1977]

THE VALUE OF HEAD START

Contrary to reports downgrading the value of Head Start and similar programs, recent evidence from 96 major and minor studies has led Bernard Brown, an educational psychologist in the United States Office of Child Development, to conclude that "the score is 96 to zero" in favor of compensatory programs for disadvantaged preschool children.

The current evidence, Dr. Brown said, shows that "early intervention" can raise intelligence quotients and lead to improved school performance and better social adjustment.

The most effective programs appear to involve participation by parents. In one such program, in Nassau County, instructors made twice-a-week home visits to show parents how to teach their children. At first, the children's I.Q.'s were in the low 90's, below normal. Once in school, the children tested above normal, with I.Q.'s betwen 107 and 108. They learned more than a control group and had fewer behavioral difficulties.

The revised assessment is based in part on work by Frances H. Palmer, a professor of psychology at the State University of New York at Stony Brook. Professor Palmer studied compensatory education in Harlem and reviewed nine other studies by different researchers. All 10 studies were "longitudinal": They tested the same children at intervals for many years.

According to Professor Palmer, evaluations made shortly after the end of the special programs failed to confirm any appreciable benefits. Followup in subsequent years, however, often showed substantial delayed effects. "Where school-age results are available, they are consistently encouraging," Professor Palmer said.

[From the Chicago Tribune, Feb. 28, 1977]

EFFORTS LIKE HEAD START PROVE A BOON TO CHILDREN

(By Joan Beck)

There's one enormous, exciting bright spot in all the discouraging statistics about increasing school failure, decreasing reading levels, and the inability of public schools to turn disadvantaged children into achieving young people.

The good news is: Early learning and preschool enrichment programs like Head Start, Home Start, and hundreds of others, really work. They are highly successful in cutting down the rate of school failure, in raising intelligence quotients, in boosting reading and math achievement later on, and in helping children to become socially and academically competent.

Scientists at the annual meeting of the American Association for the Advancement of Science in Denver last week took a hard look at 96 long-term studies of the effectiveness of early learning on disadvantaged and other children. The results, as Bernard Brown, of the United States office of child development, put it: 96 successes to 0 failures.

Not one study—all of which met rigorous scientific standards—failed to show significant gains for the children involved as compared to similar youngsters not in the program.

This vast accumulation of solid evidence of success shows clearly that we do have a good, workable answer to the question of how to help children do well in school and after. And it's an answer soundly based on neurological facts about brain growth and psychological findings about child development.

The promise of early learning programs—which sparked great enthusiasm in the late 1960s—has been obscured in recent years by the controversy over integration and busing as a way to help disadvantaged youngsters. A preliminary assessment of results [now considered to be statistically faulty] suggested that early learning gains faded gradually after the children reached elementary school unless they got followup enrichment.

There may be some leveling off of gains in IQ and academic achievement in the early grades, according to studies reported at the AAAS meeting. But big gains do persist. And new, long-term studies are picking up a kind of rebound, or sleeper effect, that in some cases increases the academic advantage even into the junior high school years.

Early learning programs differ in their emphas's, methods, and aims. Some last only a summer, others two to three years. Some involve parents. Some start at birth, others not until age 3 or 4. Some, particularly many with Head Start funding, find the children's need for health care and good nutrition so overwhelming they can pay little attention to mental stimulation. And not every child in every program does better than comparison youngsters without such opportunity.

But generally, the studies reported to the AAAS—and research on Head Start programs compiled by George Washington University and published in December—show a pattern of benefits.

Children who have had early learning programs have higher IQs than comparison youngsters—ranging from 7 to 10 points in most studies up to 30 to 40 points in one report. Much greater percentages of the youngsters test out at grade level or better in reading and math. Many fewer flunk—3 per cent compared to 32 per cent of classmates in one study.

Some of the most successful programs—28 of them reported to the AAAS—focus on enriching a young child's life and learning opportunities by working with parents in the home.

Head Start now gets about $450 million a year and can reach only about 15 per cent of children eligible by poverty guidelines. Other programs take only a small percentage more.

Those who want to help children should take a long, hard look at early learning programs. They are not politically controversial. They don't aggravate racial tensions or disrupt families or communities. They don't waste money or children's time on long bus rides. By cutting down on special and remedial education and flunking, they are a cost-benefit bargain. And most of all—they are successful.

[From the Denver Post, Feb. 24, 1977]

CHILDREN "SHOWED LASTING GAINS"—RESEARCHERS CITE STUDIES IN DEFENSE OF HEAD START

(By Art Branscombe)

The educators who five or six years ago said early childhood education programs such as Head Start did no lasting good were wrong, a panel of researchers insisted at an American Association for the Advancement of Science session Wednesday.

"More than 96 studies show long-term gains in cognitive development," said Dr. Bernard Brown of the U.S. Office of Child Development (OCD), who arranged the panel meeting to present results of new research.

Children involved in Head Start and Follow Through, a kindergarten-3d grade follow on program, not only showed lasting gains in IQ and achievement, but were much less likely to land in costly special education classes, panelists said.

The earlier studies of such children indicated the academic achievement gains made by Head Start children at ages three and four tended to "fade out" once they entered regular school.

Those studies were done too soon and, in some cases, had flows in their evaluation methods, the panelists in Denver agreed.

Their "longitudinal" studies—lasting in some cases for 10 years now—show not only that the children's early gains persist, but also that there are sometimes "sleeper" gains which only appear four or five years after the programs have ended.

Dr. Francis Palmer, of the State University of New York at Stony Brook, N.Y., reported on a research program which began in 1967, ran for three years before it ran out of funds, then was resumed in 1975 with funds provided through the Denver-based Education Commission of the States.

By 1975, the 233 children—all boys and all black—who had been in the Head Start program in the late 1960s were mostly in 5th grade. They averaged 5.3 to 5.5 (fifth year, fifth month) in reading, compared with 5.0 for "control" children who hadn't had the Head Start program.

In arithmetic, he reported, the children who had had the early childhood help averaged 5.3 years; compared with 4.6 years for the control students.

"Most significant," he added, "is the fact that only 22 per cent of the experimental program children, but 45 per cent of the controls, are at least a year behind in grade level . . .

"There is absolutely no question but what we've made a rather compelling effect."

Dr. Victoria Seitz of Yale University reported on "sleeper" effects discovered in a 10-year-long study of New Haven, Conn., children, most of whom went through both Head Start and Follow Through programs, starting in 1967.

An earlier report in 1974 revealed, she said, that boys among the 350 students involved had made gains in math, general information and IQ, but girls seemed unaffected.

Her latest testing of the students shows there is "no fadeout"—boys in the 6th and 8th grades still are outperforming those who didn't have Follow Through.

But it also shows girls in the 8th grade are "significantly" outdoing the control group which didn't have Follow Through.

Dr. Robert D. Hess, of Stanford University, reported on results from 28 "home-based" early childhood programs, in which parents are taught how to teach their children.

These research results show that kids who began with an IQ of 70–80 (normal is 100) averaged a gain of 13.6 points; those with starting IQs of 81–85 averaged 13.2 points gain; those with IQs of 86–90 gained 10.2 points; those with IQs to start of 91–96 gained 6.3 points and those with IQs of 97–110 gained 3.2 points.

"The children who began relatively low gained the most," he noted.

And followup evaluation in eight programs showed most of the gains persisting for up to four years, he added.

Brown, after pointing out that 96 studies which have come across his desk at the Office of Child Development show cognitive gains, noted that five of them also show "major effects" in reduction of the number of children placed in special education or retained in grade.

"Today, we are gathering the first fruits of these longitudinal studies," he asserted. "This portends a rich harvest.

"The adverse effects of poor environment on children can be overcome. The question no longer is does (early childhood education) work, but how does it work? And what can make it work better?"

MOBILIZING MATURE MANPOWER

Mr. PERCY. Mr. President, I would like to briefly discuss a valuable resource which we are wasting each day. I am speaking of the talents of older Americans. More than 4,000 Americans reach the retirement age of 65 each day. On retirement day they are automatically treated as "old" by employers, Government agencies, and society in general. Retired persons are denied the right to continue working at the job they spent many years learning, the job they know best.

People do not just suddenly become aged on their 65th birthday. People age gradually during their lifetime; some more rapidly than others. Growing evidence indicates that forced retirement accelerates the aging process. It has been proven that emotional, psychological, and physical problems can be brought on or even aggravated when an older person has been forced to leave his job and the job market.

Mandatory retirement results in an enormous waste of human talent. Polls have shown that thousands of workers in this country would prefer to continue to be productive members of society. Forced retirement can even be considered a denial of rights without due process, according to several local court decisions across the country. The issue may eventually come to the U.S. Supreme Court. If the judicial branch does not reckon with the issues of mandatory retirement, then Congress must.

A phased retirement policy should be considered. There is ample precedent for such a policy in other countries. Such a policy would reduce drastically the "retirement shock" experienced by millions of retired persons in this country. The time has come for us to look into and resolve the injustices of mandatory retirement.

I recently learned about a retirement plan from a Washington, D.C., resident, Morton Weiss, which I think deserves mention. He calls his phased retirement plan, "Mobilizing Mature Manpower."

An editorial about Mr. Weiss' plan was published in the the Cincinnati Enquirer. I ask unanimous consent that the editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE CREATIVE USE OF RETIREMENT

(By Morton D. Weiss)

Just because a man hits 65 and leaves a payroll is no sign his brain or imagination ceases to function. Yet society's principal message to him, all too often, is simply, "go fishin."

For some men (and their wives), enforced idleness is too much. Psychologists compare what sometimes to a business executive in retirement, for example, with the deep-sea diver for whom the pressure lifts too suddenly and the "bends" result.

Such groups as the American Association of Retired Persons have given the problem a lot of attention in recent years, of course. But a lot more, we believe, needs to be given.

So we were pleased to learn of an idea put forward in Washington by Morton D. Weiss, 71, retired government research and finance expert, for the creative use of retirees with lively minds and proven ability. Mr. Weiss' plan is called Mobilizing Mature Manpower and is simply this: Permit retirees from the scientific community and such agencies as the Commerce Department to rent office space, at a nominal fee, in a private building downtown, then let them use it as they see fit.

Mr. Weiss' thesis is that able, creative minds, spent in many years on the job, "need time to reflect, and retirement gives them that time. But then they also need to come together, and when that happens, the results could be plans, projects and ideas in the national interest."

Maybe such an approach would prove impractical, though on its face it seems to have a lot of logic. In any case, Mr. Weiss, married to the former Dena G. Morgenstern of Cincinnati, is actively pursuing it with private interests in the nation's capital. The federal establishment has surely spawned many a "pilot project" with what seemed a lot less potential than this idea. Moreover, Mr. Weiss' experiment would cost a pittance of even the most humble federal undertaking.

We wish him well, then, in his proposed venture. Certainly not all good ideas from Washington have to flow from the public sector (and treasury).

TRIBUTE TO JULIUS HOBSON

Mr. BAYH. Mr. President, on Wednesday, March 23, America lost one of her true pioneers in the struggle for racial equality. In the true sense of the word, Julius Hobson was a fighter. He fought in many different arenas, and he never really lost a battle. His battles were not easy ones, but Julius Hobson would have wanted it no other way. His successes attest to the fact that once he set out to right a wrong, no amount of opposition was insurmountable. The lawsuit which brought an end to tracking in Washington schools as well as the picket lines that eventually led to the hiring of minorities in downtown department stores can be attributable to the efforts of Julius Hobson. And his final and ultimate battle with multiple myeloma and acute leukemia must also be considered a victory for this courageous warrior. For Julius refused to succumb to the illness. The day before his demise, he was busy at work in his District of Columbia Council office. A man with this display of energy and courage never loses a battle, because he refuses to be defeated.

All Americans can learn a lesson in courage as a result of the example set by Julius Hobson. Ours is a country of bold and courageous leaders. And surely, Julius Hobson, who for over 20 years fought the battles for equality and captured the imagination and the respect of thousands of his fellow citizens, will find his duly deserved place in history. May the memory of Julius Hobson live on as a shining example of what can be accomplished through hard work and determination, and most importantly, as a symbol of the kind of affection he had for his country. An affection that led him to challenge America to be great. His memory shall live on in the light of his country's greatness.

THE BUREAUCRATIZATION OF NATURAL RESOURCES

Mr. HATCH. Mr. President, a group that seeks to further the power of bureaucrats under the guise of protecting the public interest has issued what it claims is a study. The group is called "Exploratory Project for Economic Alternatives," and its study is called "Public Trusts: A New Approach to Environmental Protection." Its "new approach" is the old reactionary one of expropriating property rights. According to the Washington Post, the group proposes to make nonowners of natural resources the legal beneficiaries of the resources and to make the present owners legally responsible for managing the resources in the interests of others. How could this work? What kind of law would it be that required a dispossessed owner to manage his former property in the interest of those in whose name he has been dispossessed?

If it is a good idea to revoke private property rights in natural resources and place them in the hands of public trustees with legal responsibility to manage them in the interests of the people, why confine the scheme to natural resources? Why not extend it to every other property right? The American people have as much stake in human resources as they do in natural resources. Does that mean that we should deprive people of their property rights in their own labor and place these rights in the hands of public trustees to manage everyone's labor in the public's interest?

Let us look closer at this proposal to hold all natural resources in public trust. How will these public trustees know what is a natural resource and what is not? Will the category include all existing resources with a market value, or will it also include rainwater and wind and energy from the Sun? How will these trustees know to discover new resources and new uses of existing resources? If something like what is being proposed was put into effect a hundred or more years ago, we would have whale oil and wood stoves in the public trust today and be quite ignorant of oil, internal combustion engines, and solar heating.

Let us look at another question, because absurd proposals such as this are continually originating in think-tanks, from which they find their way through bureaucratic interests, or through press and staff, to the Congress. That question is what criterion will the public trustees use as a basis for their decisions. How will they know if the benefits of their actions exceed the cost? It is well known that Government officials neither advocate nor use the net-benefits criterion as a basis for their decisions. The group that sponsored the study wants to move us "away from a future dominated by the values of giant corporate and bureaucratic institutions." In their view bureaucratic institutions must not include the Government, because their proposal, whether intended or not, will serve to expand the self-interest of Government by expanding the demand for the services of Government.

The energy crisis, like most other crises, is just another product of an old political strategy. One hundred and eighty years ago James Madison described the strategy as "the old trick of turning every contingenly into a resource for accumulating force in the Government."

In their advertising campaigns designed to create and market crises, think-tanks, bureaucrats and their political allies have an enormous advantage, because they can claim to represent the public interest. But what is the public interest? It is today what it has always been: the interest of those who speak in the name of the public. For a long time now the public interest has served as a mask for the aggrandizement of Government power.

The public's interest has been greatly served by private property, in energy as in all other fields. Private property in the ownership, production, and consumption of energy has provided Americans with the most abundant and least expensive energy in the world. Today this great achievement is said to be a failure, because private property has provided Americans with too much cheap energy. Now the bureaucratic forces of Government are in action to drive away cheap energy and to confiscate it as a new source of tax revenue for Government.

There was never any energy problem in America until Government got involved in regulating it, in fixing prices, in scheduling extraction rates, in taxing away profits, in blocking energy development in the name of everything that can be invoked. The price of gasoline was always cheap in the United States until the last few years during which Government action at home and abroad began battering the wellhead profits of the oil companies. Crude-oil earnings have been hurt by price controls, by revocation of the depletion allowances, and by confiscation abroad of crude-oil producing properties. All of this was done in the name of protecting people from big oil, and it has all served to build the power and income of Government at the expense of the people's energy pocketbooks. Now that Government has driven up the cost of gasoline, it has set the stage for a new attack on the private property rights of energy owners. The "Exploratory Project for Economic Alternatives" wants to extend this attack to the property rights of all natural resource owners.

Mr. President, as Prof. Douglas North at the University of Washington and other distinguished scholars who have spent their lives in study have discovered it was the development of private property rights that produced the economic growth that gave the peoples of Europe and Norh America their fabled living standards. Elsewhere in the world the whole idea of progress is to achieve what we have achieved, to catch up with the West. Yet, in the West, the achievement which is the goal of the rest of mankind is said to be a failure. We are said to need more of what the rest of the world is struggling to free itself of—exploitative government.

Human progress has flowed from human action unleashed from the tenacles of Government. Where Government enters, progress declines. Government acquires rights at the expense of the rights of citizens. Every Government program constitutes a threat to private property rights. The revocations and abrogations that accompany every governmental program drive up the cost of production and reduce output below what it otherwise would have been. Furthermore, the added costs of added threats to private property rights reduce the incentive and inclination to invest and reinvest in the acquisition of additional private property. As Prof. Michael Jensen and William Meckling of the University of Rochester have made clear, in deciding how they will invest their assets and use their time and energy, private citizens form expectations about the likelihood of revocation and abrogation of their rights, based on what they see happening to others throughout the system.

As Government continues to exploit productive private producers in order to increase the rate of return earned by political entrepreneurs, individuals will increasingly forego making socially desirable productive investments, because of the threat to their property rights. Because opportunities throughout the country that are not taken are hard for politicians in Washington to see, we fail to consider the negative consequences of numerous Government actions. But there are many signs that the energy industry is in decline directly as a consequence of governmental action.

The corporate form of economic activity was a great advancement, because it allowed resources to be mobilized for productive purposes which otherwise would not have been undertaken. Today the corporate form of ownership is under attack by those who want to redistribute the ownership of resources from the present set of owners to a new set of owners that wants to own without working and saving to acquire ownership. Why work to acquire if it is easier to politically organize and acquire through political confiscation? Government is not adverse to facilitating this process, because it stands to gain the power in a concentrated form that now exists in fragmented form in the individual property rights of numerous owners.

As corporate rights recede, the value of owning such rights will also. The value of any right depends upon how permanent it is. Once in this country we saw

the function of Government as protecting private rights. Today we see the function of Government as revoking and abrogating private rights in the name of the public interest. As this process proceeds, potential investors will become increasingly convinced that the rights of owners to have the assets of corporations managed in their interest are tenuous. As they perceive this, they will stop investing in corporations. The dead hand of Government will have fallen on one of the legal wellsprings of economic progress.

We may be closer to this than we think. A population of people will always contain entrepreneurs. When entrepreneurial behavior no longer pays in productive economic life because economic rights and income claims are dispensed by Government, entrepreneurial skills will cease to be supplied to the private sector. The skills that innovate and renew will not be supplied in the absence of secure private rights to what they produce.

Mr. President, we speak increasingly about Government solving economic problems, but the great economic achievements that we have enjoyed were made possible precisely because they were never problems of Government. Our achievements resulted from private persons and private firms solving problems in which they saw a payoff. The resourcefulness of a Nation resides in its people, not in its government or "public trustees." This resourcefulness still exists in spite of depredation by Government and bureaucratic interests. Just this week I heard the president of Mercedes-Benz of North America describe his firm's development of a turbo-diesel that will allow passenger cars to travel 75 miles to a gallon. This single private development is a greater contribution to energy conservation than anything that has been done in the past couple of years in Washington.

I want to point out what it means for Government or public trustees to take over the operation of the energy systems upon which the country depends. It means that private activities will be replaced by Government activities in the 10,000 firms that explore for and produce oil and gas, in the 250 domestic companies which refine oil, in the 200,000 gasoline station operations, in the 5,000 coal mines, in the 3,000 utility systems, in the thousands of companies that manufacture energy using products, in the thousands of companies that supply equipment essential to the production of energy from nuclear reactor vessels to drilling rigs to mine roof bolts.

What constitutes responsible management of energy supplies is their use in ways that produce profits. If energy uses do not produce profits, then they do not produce satisfaction for the users or energy, and human welfare is lessened. People will not spend their money in ways that do not produce satisfactions for them, and individuals themselves are the best judges of how to allocate their money between competing desires in order to maximize their satisfaction from their income. Government cannot step into this private process without reducing the satisfactions that people derive from their incomes.

People look best after their own property and their own income. They are notoriously bad about looking after the property of others, as most homeowners who have ever rented their homes know. The interests of Government consist primarily of the interests of those who are in Government. They will use the power that Government acquires over property to transfer that property and the income that it produces to other uses that those in Government see as in their interests.

As Government has become more involved in protecting the public interest and solving society's problems, its claim to the national income has grown. Today Government takes about 40 percent of the goods and services that are produced every year from the private owners who produce them. Today the burden of Government on producers is greater than the burden that feudal lords placed on serfs. Serfs, on the average, only owed one-third of their incomes to their noble masters. Today, the free democrat owes on average 40 percent of his income to masters who are not even noble.

Mr. President, a representative of the people is one who fights to expand private property rights, not to restrict them.

As Prof. Craig Roberts and other noted scholars have shown, there is a lack of coincidence between the public's interests and the interest of government. Behind various moral guises hides the vested interests of government. Private property rights are what protect people from the interests of government. That is why the advance of governmental interests breaks down the property rights of private individuals. This process is reactionary and the anthithesis of human progress. For too long statists have gone unmasked, while skepticism has been applied only to the private sector. It is time to apply the logic of skepticism universally.

In my closing remarks I want to point out that many products of think tanks are more inimical to the public's interests than saccharin, and if the Government can ban saccharin in the name of the public's interest, it can ban the products of think tanks as well. The freedom of ideas does not expand with the expansion of government. Only those ideas that serve the interests of government expand.

Today in the United States the budget of government is larger than the value of the national income of France or Germany. It is six times the size of the GNP of Sweden and 50 percent of the total production of the Soviet Union. In the United States government takes from Americans in taxes a sum greater than the combined value of every marketable good and service that the total population of France can produce in 1 year. Does anyone really believe that the American people receive in return from Government services equal in value to the total production of the French nation? No one believes this. Yet it does not stop us from continually expanding the size of government. That is what shows whose interests are represented in Washington.

CLEARINGHOUSE FOR COMMUNITY EDUCATION

Mr. CHURCH. Mr. President, several years ago I introduced legislation to create a national community education system in this country. Fortunately, the community education concept was included as a part of the Elementary and Secondary Education Amendments of 1974.

Community education is a special program that utilizes the public school plants for the benefit of the entire community, regardless of age. The traditional neighborhood schools open their doors during after-hour periods for recreational, social, cultural, and educational activities for the very young to the very old. Since 1974, 94 school districts, universities, and State education agencies have received community education awards amounting to $3.5 million. These awards could well be the model upon which we can build a nationwide community education program.

The 1974 legislation also called for the establishment of a national clearinghouse on community education. I was pleased to learn that the clearinghouse contract has been awarded and the clearinghouse will soon be an operative body. I ask unanimous consent that the HEW press release describing the clearinghouse be printed in the RECORD.

There being no objection, the press release was ordered to be printed in the RECORD, as follows:

HEW NEWS

Award of a $146,000 contract for the creation of a Federal Community Education Clearinghouse was announced today by HEW's Office of Education.

The clearinghouse will be operated by Informatics, Inc., Rockville, Md., under a one-year contract with the Office of Education's Community Education program. Its creation fulfills a legislative mandate of the 1974 Community Schools Act which calls for "a clearinghouse to gather and disseminate information received for community education programs, including information regarding new programs, methods to encourage community participation, and ways for coordinating community education programs with other community services."

The clearinghouse will maintain:

A response/referral service linking a person requesting information with the appropriate resources around the country. Approximately 2,000 documents will be collected, put into a computer data bank, and made available to users located anywhere in the United States.

A catalog listing all the resource material available in the response/referral data bank, including an expanded annotation of each item.

A toll-free hotline for quick, direct access to the clearinghouse offices.

Regularly scheduled meetings with community educators to ensure responsiveness to their needs.

Community education is a program that uses public school facilities for educational, recreational, cultural, and social activities for the community at large. Each program varies considerably, depending on the needs, interests, and concerns of the community it serves.

At the Federal level, community education is funded under the Special Projects Act of the Education Amendments of 1974 (Sec. 405). Awards amounting to $3.5 million were made for the first time during the 1976–77 school year to State and local edu-

cation agencies and institutions of higher education.

RISING COST OF HEALTH CARE

Mr. BELLMON. Mr. President, in the past 10 years, total health expenditures in this country have grown from $42 to $140 billion, or from 5.9 to 8.6 percent of our gross national product. If present trends continue and if we undertake no new Government programs, this will grow to $240 billion, or over 10 percent of GNP by 1982. In 1977, the cost of health care—excluding such expenses as eyeglasses, drugs, and dental care—is estimated to be $640 per person, or $2,560 for a family of four. This represents 18 percent of gross income for a family at the median income level of $13,700 annually.

Hospital costs represent about 60 percent of total health expenditures and have been increasing at an alarming rate. In the past decade, hospital costs have increased three times faster than the Consumer Price Index. For example, the average semiprivate room rate increased 16.4 percent in 1975 and at an annual rate of 15.6 percent for the first 6 months of fiscal year 1976. Between 1965 and 1976, physicians' fees increased 92 percent and semiprivate room charges rose 211 percent—compared to the Consumer Price Index increase of 71 percent. Only half of these hospital cost increases are attributable to increased services and utilization of facilities.

There is a growing feeling among many health care specialists that inadequate planning and retrospective reimbursement mechanisms have encouraged undisciplined expansion of hospital costs. These policies have promoted excessive capacity, unnecessary duplication of equipment and facilities, underutilization, and a tendency to hospitalize persons who could be treated on an outpatient basis. For example, the Institute of Medicine estimates that there is a surplus of over 50,000 acute care beds and that, on an average day, over 200,000 beds are unfilled. These 50,000 beds each cost about $40,000 to create and about $20,000 annually to maintain.

Spiraling health care costs are creating tremendous pressures on public and private spending. Expenditures for medicare and medicaid, for example, have doubled every 5 years. This significant pressure causes those of us in Congress, who are responsible for the overall level of Government spending, grave concern because it makes it additionally difficult to balance the budget and to contain the inflation which destroys the quality of life for so many of our citizens.

REDUCED INTEREST RATES FOR ENERGY-SAVERS

Mr. McGOVERN. Mr. President, it is refreshing to read that a commercial lending institution is innovative enough to advance its own program to those concerned with energy conservation. The Northwestern National Bank in Sioux Falls, S. Dak., is one of our largest banks. Under the leadership of C. P. Moore, it is also one of our most progressive banks. Known throughout the State for its interest in the credit needs of agricultural producers, it has now initiated a program of low-interest loans for those householders who seek home improvements aimed at insulation as well as other energy saving purposes.

As a tribute to the bank and for the information of other Senators, I ask unanimous consent that an article appearing in the Sioux Falls Argus Leader on March 12, 1977, entitled "Bank Offers Reduced Interest Loans for Energy-Saving Home Improvements" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BANK OFFERS REDUCED INTEREST LOANS FOR ENERGY-SAVING HOME IMPROVEMENTS

Northwestern National Bank of Sioux Falls has committed $1 million, to make reduced interest rate loans for energy-saving home improvements, according to C. P. "Buck" Moore, bank president.

The bank will reduce the interest rate 20 per cent on loans for a variety of energy-saving home improvements, ranging from insulation of ceilings and walls to total revamping of heating and cooling systems. Moore said that the reduced interest loans would be offered for all valid home improvement energy conservation purposes and the bank would be open to consumer ideas on the subject.

Some of the improvements qualifying for the loan program include ceiling, wall and floor insulation; storm windows and double glazing; storm doors; basement foundation insulation; window and door weather stripping; new or rebuilt furnaces; heat pump or electric heating systems; fireplace damper integrity, including reclaimers and flue dampers; duct and heating pipe insulation; solar heating or solar home design projects, efficient hot water heaters; and roofing.

Moore stressed that the bank would prefer to make loans for major home improvement projects in order to increase the opportunity of having a significant impact on improving the energy efficiency of the area's housing stock.

The bank also will direct borrowers to other private or public agencies which process home rehabilitation funds for energy-saving purposes and to local agencies which administer federal grant funds for these same purposes, if it would appear that a particular borrower might qualify for specialized assistance.

The reduced rate loan program, which is effective immediately, will run through October 1977, with provision for continuation if loan demand requires it.

SERVICE IS THE SECRET OF STEVEN NAGAMINE'S SUCCESS

Mr. MATSUNAGA. Mr. President, the largest family-owned chain of restaurants in Honolulu—a city noted for its great variety of good restaurants—is the Flamingo chain owned by the Nagamine family. Although millions of island residents and visitors have enjoyed the good food, reasonable prices, and good service which characterize all of the Flamingo restaurants, not many are familiar with the inspiring story of Steven Nagamine, the founder of the Flamingo restaurant chain. I was therefore, very pleased to find an article about Mr. Nagamine in the recently published progress edition of the Honolulu Star-Bulletin, especially since the story reveals the secret of Mr. Nagamine's remarkable success—service to the public.

An immigrant who came to this country from Okinawa at the age of 17, Steven Nagamine spent years learning the restaurant business. At one point, the unskilled youngster worked as a steward on the interisland ferry which was then the only means of transportation between Hawaii's major islands.

Finally, in 1950, Mr. Nagamine and his wife realized the dream of many years when they opened their own little restaurant, the Cafe Flamingo. Even then, however, success did not occur overnight. They had no money to advertise the new restaurant and so, with their eight children, they passed out inexpensive reproductions of the Flamingo menu in downtown office buildings. They all worked in the restaurant, waiting on customers and clearing tables.

Today, at age 72, Mr. Nagamine is a millionaire. He is the owner of 5 popular restaurants which employ over 200 people and are ably managed by his sons and daughters. Although he has reached an age and station in life when he could fully retire to leisurely pursuits, he can be found every day in the Cafe Flamingo where he devotes much of his time serving his old customers—simply because he enjoys serving others.

Unlike most millionaires, Steven Nagamine has not forgotten his humble beginning, and there are many who can attest to his generous helping hand during times of dire need.

With the thought that my colleagues will find Steven Nagamine's story as inspiring as I did, I ask unanimous consent that the news article from the Honolulu Star-Bulletin be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Honolulu Star-Bulletin, Feb. 22, 1977]

A FLAMINGO IN FLIGHT

(By Dick Habein)

Steven Nagamine, 72, is still waiting on tables—just like he did more than 25 years ago when he opened the Flamingo restaurant on Ala Moana Boulevard.

He couldn't serve all the customers then and he certainly can't now. His business has grown tremendously and currently serves some 5,000 meals a day. Nagamine's is probably the largest family-owned restaurant operation in Hawaii.

Nagamine immigrated to Hawaii from Okinawa in 1923. He was 17 years old and an unskilled worker. He spent years working for many hotels and restaurants, including the Kewalo Inn, the Moana and Royal Hawaiian hotels, and the Blaisdell.

He even put in a stint as a steward aboard the boats ferrying among the Islands for the Interisland Steamship Navigation Co.

In December 1933, Nagamine married Thelma Akamine of Hilo. They now have four sons and four daughters.

It was in 1950 that the Nagamines opened their first restaurant, the Cafe Flamingo on Ala Moana Boulevard. Simply furnished, it offered moderately priced luncheons and dinners.

At first business was slow. But Nagamine began to show the flare that eventually would make him a millionaire.

He adopted the least expensive form of advertising available—printed menus listing each day's offerings at his restaurant. These were passed out by hand in downtown offices.

It took months of walking around but eventually the first Flamingo took flight.

Since then the Nagamines have seen a flock of successful Flamingo restaurants open. The Kapiolani Flamingo opened in 1959. The Chuckwagon with its "all-you-can-eat" buffet became part of the chain in 1967.

The Nagamines ventured into Waikiki with the Royal Lanai in 1970. It operated successfully until last year when it was razed for a new development.

Last September, the family went downtown and purchased Arthur's and the coffee shop next door in the Davies Pacific Center on Merchant street.

And later this year, there'll be a new Flamingo on Kapiolani boulevard across from KGMB-TV in the former Evergreen and Green Turtle location.

The Flamingo chain employes more than 200 persons and at least two dozen of the employes have been with the company for 25 years. Sprinkled among the staff are a number of relatives of the Nagamine family.

At 72, Steven Nagamine still works daily at the Cafe Flamingo, serving customers and cleaning tables.

Daniel, the Nagamines' son, oversees the entire restaurant operation as secretary and general manager. His mother is the company's vice president.

THE BATTLE OVER OAHE

Mr. ABOUREZK. Mr. President, the Oahe irrigation project in my home State of South Dakota is presently being reviewed by the Carter administration and by the locally elected Oahe Board.

There appeared in Corporate Report an article by Bill Wagner which explains in detail the background concerning this important public works project. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE BATTLE OVER OAHE

(By Bill Wagner)

In April of 1971, nearly every South Dakota politician of prominence packed the stage of the Huron, S.D., High School auditorium beneath a huge muslin banner bearing the slogan "United For Oahe." The even so heralded was not an airline promotion for the sun-drenched beaches of a mid-Pacific island. It was far more serious. The Oahe in question was a half-billion-dollar irrigation project that had been on the drawing boards since the 1940s and was now threatened by President Richard Nixon's impoundment of funds for various water-resource development programs.

The dignitaries had all gathered to voice their support of a plan to irrigate 190,000 acres of the parched prairie in stretches of the unbelievably flat James—or "Jim"—River Valley of east-central South Dakota, between Huron, home of the Humphrey Drug, and Aberdeen, home of the Fisher quints. Water—and irrigation—were, as the Aberdeen *American News* regularly proclaimed, South Dakota's "golden future."

Not long after the state was settled, folks noticed that the crops could stand a lot more water during the dry years. Years later came the construction of the massive, multipurpose dams on the Missouri River. Hopes for irrigation spiraled, with all eyes on a ready supply in the newly created reservoirs. The Oahe Irrigation Project was to be the linchpin and showpiece of all the water-resource projects. It is a large project as such projects go—and perhaps the last to be authorized by Congress. Every year, 440,000 acre-feet of water (an acre-foot of water, as the name implies, is an acre of water a foot deep) would be pumped out of the Oahe Reservoir just north of Pierre, through a series of canals and reservoirs to the irrigation area more than 100 miles from the Missouri River.

Construction of the $10-million pumping plant near the Oahe Dam began in the summer of 1974. Four massive pumps will lift 1,200 cubic feet of water per second 95 to 175 feet in the project's Pierre Canal. Work on the pumping plant will be completed this summer. Work is also underway on the first stretch of the Pierre Canal. It will include cuts as deep as 97 feet. Contracts have been awarded for work this spring on the next stretch of the Pierre Canal, and extensive preliminary activity is in progress toward the completion of the 171-mile canal system.

There had been little serious opposition to the Oahe project. That night in Huron, the state of South Dakota and her public officials were truly "united for Oahe"—as strongly for it as they were for God, motherhood, Mount Rushmore and the ring-necked pheasant.

There was, in fact, to be near unanimous support for the project until 1972 and 1973. Then something happened. People began getting tough on the matter of the environment. In Washington, D.C., environmentalists and their supporters moved a bill through Congress that required environmental impact statements on Oahe-like projects. Though today's project opponents concede that they could have learned just what the project was all about had they made a Herculean effort, the impact statement furnished the first detailed look at the project for many of the area's residents. Residents learned, among other things, that plans called for irrigating 190,000 acres by gutting 110,000 acres of productive farmland for project reservoirs, canals and wildlife "mitigation" areas (so called because that land would compensate for flooded wildlife habitat).

By 1976, the forces opposed to the project, spearheaded by a group called the United Family Farmers (UFF), managed to elect five of the six members of the Oahe Conservancy Sub-District Board, the governmental entity responsible for the management of the project once it is finished by the U.S. Department of the Interior's Bureau of Reclamation. The opponents were saying that the lost acreage wasn't worth it as well as offering what could only be called a plethora of other arguments.

Project supporters, on the other hand, still insist that the Oahe project will be the promised bonanza for the state. It will boost corn production, they say, by about 11.6-million bushels a year, corn silage by 180,000 tons and alfalfa by 80,000 tons. Another 30,000 acres or so would be given to irrigated cash crops such as sugar beets and potatoes. This increase, they point out, would represent nine per cent of the state's corn output and two per cent of its alfalfa produciton. The feed crops thereby produced would allow the production of an additional 135,000 beef cattle and 200,000 hogs. Another 720,000 tons of sugar beets could be harvested.

There are, of course, other benefits cited by project supporters. Maybe the most significant is the pork barrel aspect of the plan. The millions of dollars left behind by the contractors will spur local retail sales and irrigation-related industries. Understandably, the Aberdeen and Huron chambers of commerce are among the most ardent Oahe supporters, as is a state business group, the Greater South Dakota Association.

The Bureau of Reclamation, meanwhile, says this:

"In a state dominated by her agricultural production, that means that South Dakota can expect a $170-million increase in annual trade resulting from irrigation development in the Initial Stage, Oahe Unit. As part of that figure, farm sales of agricultural products will increase by about $92 million annually. The processors and first-handlers of agricultural products can expect an annual increase of $24 million because of Oahe Unit development. Retailers will note a $25-million increase in annual trade. Non-farm wholesale trade will increase by $24 million, and selected services will increase by $5 million."

And there's more, according to the bureau: increased municipal water, water-based recreation opportunities and wildlife habitat.

In sum, the bureau says, "the Oahe Unit is about South Dakota and South Dakotans working together to utilize the state's greatest natural resource, the waters of the Missouri River."

That last statement, however, has to be described as hyperbole, critics argue. For one thing, it is not, strictly speaking, a South Dakota project. It is a federal project, pure and simple, using federal dollars provided by the entire nation and using the federal government's power of eminent domain to condemn the 110,000 needed acres. Nor are South Dakotans by any means "working together" for the project. There is now massive opposition from farmers in the project area, something almost unheard of in such endeavors.

In 1976, the United Family Farmers and environmentalists barely missed placing on the general election ballot a non-binding referendum question on whether the project should continue. The measure passed the state house of representatives, but was shy just a few votes in the senate. The proposed referendum was one of the key issues facing the legislature in 1976.

The UFF came back in the 1976 general election to win five of the six board seats up for grabs in the Oahe Conservancy Sub-District. All those seats were in the rural areas of the 15½-county sub-district. The Oahe board contest was billed as more than a mere local election. For instance, Sen. George McGovern, a long-time project advocate, entered the lists with a statement in June arguing that the right outcome of the November vote might well be the solution to the drought eating away at much of his state's agricultural wealth.

According to the senator, "The long-term answer to the periodic challenge of drought is irrigation. It will be up to South Dakotans who participate in the elections to the Oahe Conservancy Sub-District Board this fall—and in the project itself—to determine if we are to have water on the land or not—and perhaps, end forever the economic and personal tragedy of drought that is playing itself out in the dried-up crops of many counties in our state today."

That statement drove the UFF bananas. Particularly distracted was the group's feisty young executive director, Curt Hohn, who only two years earlier was McGovern's trusted administrative aide in the Aberdeen area. Hohn replied in the UFF house organ, *Oahe Facts & News:* "First of all, even if the Oahe Project were in operation today it would only irrigate .4 per cent of the farm land in South Dakota. 99.6 per cent of the land would be just as dry as it ever would be. Brown and Spink counties, the site of the Oahe Irrigation Project, would find less than one-fifth of the farm land in Spink County getting water and less than one-tenth of the farm land in Brown .... McGovern misses the mark when he implies drought and irrigation as the issues in these directorship campaigns."

It was during his association with McGovern, Hohn has said, that he first became opposed to the Oahe project. One of his assignments for McGovern was to take a look at the Garrison project in North Da-

kota. "The bureau officials told me that this is what we could expect in South Dakota," Hohn said, "and, frankly, that was enough for me."

Above and beyond its political and propaganda activities, the UFF has initiated sophisticated and expensive legal action in the federal courts to halt the Oahe project. But in the most recent attempt, U.S. District Court Judge Fred Nichol told the UFF that their challenge should be waged in a political, not legal, forum.

Part of the UFF case in an earlier action was a broad-based challenge of the benefit-cost ratio used by the Bureau of Reclamation to justify the project. In that action, Robert J. Barbera and Phil Carver of Johns Hopkins University testified as follows:

"The Bureau of Reclamation has developed the reputation of altering a benefit-cost analysis to improve the appearance of the projects under its control. At many points in the analysis it is necessary to make value judgments. If a consistent aim is applied to these judgments, the outcome of the analysis will be affected. This is what the Bureau of Reclamation has done in the case of the Oahe project."

The bureau claims that the project will return more than $2 in benefits for every dollar spent. The Johns Hopkins economists say the figure is much less, as low as 17 cents on the dollar. Projects such as Oahe are supposed to show at least a dollar of benefits received for each dollar spent.

An understanding of the determination of benefits is vital in considering water-resource projects. Oahe's troublesome twin, the Garrison Irrigation Project, has often been lambasted as just another pork barrel raid on the federal treasury, with only the sketchiest attention devoted to benefit-cost questions. A key issue here is the discount rate applied to a project.

Think of the discount rate as interest, but not precisely so. Discounting takes into account that a dollar in hand today is worth more than a dollar to come a year from now, if only because that dollar in hand could be placed in a bank to draw interest. The dollar offered a year from now is really worth 92 cents if the interest rate is eight percent. The 92 cents has been discounted, using its present value. Such a cost determination is usually crucial to water-resource projects because the bulk of the construction costs come early in the project's history while the benefits follow much later.

There are at least two schools of thought on the discount rate. One holds that the rate should be what it costs the federal government to borrow the money. The other insists that the rate should be below the federal cost of borrowing lest inadequate investment be made for the needs of future generations.

Ordinarily, the federal Water Resources Council determines what the discount rate is supposed to be. When the Oahe project was evaluated in 1965, the rate was 3⅛ percent. The Water Resources Council recently recommended a rate of 6⅞ percent. By 1974, the rate for new projects had climbed to 5⅞, using the average of current bonds to determine the figure, but, through a grandfather clause, the rate was frozen at 3¼ percent for projects, like Oahe, authorized but not constructed. At the 4⅞ rate, then in effect for new projects, benefits would only be 69 cents on the dollar, according to the Johns Hopkins economists, "employing our most favorable assumption."

A long-time critic of what Hohn calls "funny money" is Dr. Russell Berry, associate professor of economics at South Dakota State University in Brookings. It has been a lonely course for a state employe. His efforts have been greeted with scorn, ridicule and possibly promotion-withheld for saying and writing that the project makes little economic sense. Cloistered in a cubicle in SDSU's Scobey Hall, the slight, balding professor looks every bit like a prairie Mr. Chips. His office is crammed with data, charts, studies, congressional reports and other documents questioning the assumptions of the project advocates.

Berry maintains, for one thing, that increased corn production does not necessarily mean increased cattle production. It means more corn, period. To this day, South Dakota agricultural messiahs ponder hard the problem of what to do about the fact that the state "exports" both large quantities of feed grain and young cattle to be fed. "Oahe irrigation is not necessary to increase livestock production," said Berry. "South Dakota farmers export corn and cattle by the trainload." That was a few years back, when the elderly scholar may have been just warming up to the controversy.

By last spring, Berry had come up with additional points concerning the project. Focusing tightly on his target, he found so much "funny money" that the figures almost jump off the gray pages of his Xerox copies. For instance:

The project will cost more than $2,000 per acre "just to deliver water to the high point on the farm. This $2,000, if placed in trust at eight per cent simple interest, would earn about $160 a year. This is a yearly subsidy to landowners—not necessarily to farmers. If the average irrigated farm has 200 acres, the yearly subsidy will be $32,000 per farm. Many farms will have 300 acres, and hence the yearly subsidy will be $48,000 per farm!"

"Only 600 to 700 of South Dakota farms will receive these subsidies. Is this the best way to provide drought insurance?"

"Only about half the land in the Oahe area is owned by farmers—the rest is rented. Landowners who are lucky will receive huge windfall profits, but these will not be passed on to the next generation of farmers. They will pay full value for the land."

"While the bureau says that spending $2,000 per acre will make the land worth $3,000, the landowner is to pay only 10 per cent of the costs! Why so little if the cost is so beneficial?"

"The bureau, in its latest benefit-cost study, used a farm interest rate of nine per cent. However, because farmers own about 80 per cent equity in their business, 80 per cent of the interest cost was called 'equity earnings' and treated as profits. Thus the effective interest was reduced to 1.8 per cent. This is a clear violation of economic principles."

"Are there other subsidies? Yes. The 600 to 700 irrigators will be furnished water 'free.' But this water is not free. The 2.3 acre-feet of water to be used to irrigate an acre of land could produce 787 kilowatt-hours of electric energy. If this energy can be used to deliver peak power, it will be worth 2.5 to five cents per kilowatt-hour, or $20 to $40 per acre."

"The bureau recently reduced its estimated farm prices from 94 per cent of parity to 76 per cent (1910 to 1914 equals 100). But at the same time, the bureau increased irrigated corn yields from 82 to 152 bushels an acre—an 85 per cent increase! Can this yield be justified? The evidence is lacking."

"The bureau claims that the Oahe project will increase direct net farm incomes by $95 an acre. This is grossly inflated by high yields and livestock. Studies by economists at SDSU of 16,000 acres privately irrigated from the Oahe Reservoir showed that direct net increases were only $22 an acre even at 1973 prices and costs—the most favorable since the Korean War."

Naturally enough, the Bureau of Reclamation has a few things of its own to say about Berry's criticism. As far as complaints that the discount rate is far too low, the bureau maintains that it is only following the law. That is a recurring theme during a conversation with Everett Jennewein, the bureau's economist on the Oahe project. Speaking of the discount rate, he says, "They [Congress and the Water Resources Council] have established the law. We have to abide by it. Russell Berry can talk about theory, but we have to follow the law." Jennewein says the bureau's provision for "equity earnings" is accurate, though Berry refuses to understand it. (Berry, by the way, is not alone. The United Family Farmers, on the advice of its banker members, reject it out of hand as well.)

Jennewein concedes, though, that the bureau has increased the projected yields in its latest benefit-cost analysis. "Our earlier figures were way too low. We didn't know that much about it," he says. He adds that the figures on increased production were worked out by a bureau team cooperating with irrigation specialists from South Dakota State University.

Likewise, the bureau remains convinced that the project will add to the area's livestock wealth through increased availability of feed. Commenting on Berry's point Jennewein says "Russ Berry knows the answer to that as well as anyone else . . . stability." Stability of supply will encourage feeder cattle operators to come into the area.

But in addition to the charge of "funny money," there is quite a bit of talk of funny politics as well. Hohn and his colleagues say the residents of the area never had a chance to vote on the project per se. Their claims seem to have been vindicated by last fall's conservancy broad elections. Project boosters say there were all sorts of "votes" on the project, though they shy away from arguing that there was ever a "yes" or "no," up or down vote on the project when the detailed scope of the project was known to the electorate.

There have been votes, but not on the project itself. When the conservancy subdistricts were formed, contracts needed the approval of 60 per cent of the voters in a district. That requirement was quietly removed a few years later. Only one legislator voted against the change—Jay Swisher of Groton, just east of Aberdeen in Brown County. He was one of three or four early project opponents.

To this day, Swisher remains a skeptic, though not as active an opponent as some others. He apparently prefers making money on his large farm-ranch just a few miles from the proposed project area. "There is money in cattle," he says, adding, however, that a fully integrated system is needed as he tells of dreams some day to own his own packing plant. He likes dry-land farming and wonders out loud about studies that conclude it takes several generations before farmers become proficient irrigators.

Swisher believes the bureau's projected corn yields of 160 bushels per acre are way too high. "There have been years up here when we've had just the right amount of moisture and at just the right times. We only got 120 bushels an acre then. We can't get any more than that here because of the shorter growing season. Irrigation can't do anything about that," he says.

Also, Swisher doubts that whatever additional feed is produced will have much of an effect on cattle feeders. The economics of the industry, he believes, favors feeder operations near packing plants, and the economics of that industry dictates their presence near population centers.

At the bureau's Oahe project office in Huron, there was almost a feeling of calm and serenity only a few weeks after the conservancy district election. Preston Funkhouser, the project's manager, said there had been "no official reaction" to the election. "There will be new board members, and we will work with them," he said.

For its part, the new board has begun a long "review" of the project that includes a series of field hearings. The outcome of that

review could be just possibly shaded by the new manager of the Oahe Conservacy Sub-District—none other than Curt Hohn. The appointment of the UFF director was bitterly assailed by some project supporters, though it seems fair to say that a wait-and-see pcsture—much the same as Funkhouser's—has been adopted by *all* parties.

What they're all waiting for comes later this spring, when the board submits its formal testimony to the appropriations committees of Congress. The board is bound to ask for certain modifications in the project, though the precise nature of these modifications remains to be seen. The key question is whether Congress will accept them.

The new board will be careful to stress the reasonableness of the modifications, hoping to throw the monkey of killing the project off its back. Proponents will be grappling with the same monkey. They will want to accept as many modifications as possible, keeping in mind that if the project is altered too much, a whole new congressional authorization will be needed. If that happens, forget about the project.

South Dakota public officials seem to be waiting for the board's next move along with everyone else, doubtlessly aware of the now clearly established opposition from a large share of the farmers the project is intended to benefit. One possibility is that the legislature will abolish the conservacy subdistricts and make the state the responsible entity. But such a move would be adamantly resisted, smacking as it does of changing the rules after the game has been played.

At midpoint through its session, however, it was doubtful the legislature would even find the time to consider such a purely esoteric matter as South Dakota water resources. Only a few days after performing the politic gesture of requesting presidential action to help drought-stricken state farmers, that body was to begin its deliberations on the future status—of Taiwan.

(On February 18, President Carter announced a federal review of 19 water-development projects throughout the United States. The President said he would recommend that Congress discontinue the funding for the 19 projects, which include both Garrison and Oahe.—The editors)

FOREIGN ASSISTANCE SUBCOMMITTEE TO REWRITE BILATERAL AID BILL

Mr. HUMPHREY. Mr. President, during last week's hearings on the administration's fiscal year 1978 request for our bilateral development aid programs, I announced the intention of my Foreign Assistance Subcommittee to rewrite the Foreign Assistance Act of 1961.

As I noted in my remarks opening those hearings:

The Foreign Assistance Act of 1961 is now 16 years old. Many of its provisions reflect the concerns of a very different era of American foreign relations. Some of its provisions are obsolete and the Act has been amended so many times that it has become an administrative nightmare. Congress must bear a large burden of the responsibility for this state of affairs. Often, legislative actions of the authorizing Committees in the Congress are contradicted by legislative actions taken by the appropriating Committees. Therefore, if AID is to respond to the "New Directions" mandate effectively, then Congress itself must bear the responsibility for removing many of the obstacles to successful development efforts that we ourselves have created. I believe we agree that both branches of government have been responsible for the many problems plaguing the Agency today.

In noting that the new AID Administrator, Gov. John Gilligan, is himself undertaking a complete and major reevaluation of the Agency, I also had some suggestions as to areas this reevaluation might focus on and indicated that my subcommittee desired to work very closely with AID in this effort.

Mr. President, I ask unanimous consent that the full text of my statement during the March 24 hearings be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR HUBERT H. HUMPHREY

We resume hearings this morning on Fiscal Year 1978 development assistance programs. Our principal witness is the Administrator of the Agency for International Development, John J. Gilligan. John, I want to once again congratulate you on your confirmation by the Senate. I look forward to working closely with you in significantly strengthening our bilateral aid efforts.

I was very pleased to read in your prepared statement that you intend to undertake a thorough examination of the Agency's organizational structure; that you are concerned over the balance of personnel between Washington and the field and will be moving to correct this problem. And one of your priority considerations will be to review staffing and programming requirements in light of the "New Directions" policy.

It is important that we work very closely together in this effort. I believe we have mutual concerns over the future direction of the Agency, in light of the number of problems which plague its operations.

As you are well aware, the Foreign Assistance Act of 1961 is now 16 years old. Many of its provisions reflect the concerns of a very different era in American foreign relations. Some of its provisions are obsolete and the Act has been amended so many times that it has become an administrative nightmare. Congress must bear a large burden of the responsibility for this state of affairs. Often, legislative actions of the authorizing Committees in the Congress are contradicted by legislative actions taken by the appropriating Committees. Therefore, if AID is to respond to the "New Directions" mandate effectively, then Congress itself must bear the responsibility for removing many of the obstacles to successful development efforts that we ourselves have created. I believe we agree that both branches of government have been responsible for the many problems plaguing the Agency today.

It is time to replace the Foreign Assistance Act with a new law to govern our foreign aid effort. Because of the deadlines established by the Budget Act, we do not have time to prepare new authorizing legislation this year. However, in the coming months, the Executive branch and the Congress should work together to draft new foreign assistance legislation for introduction in the Second Session of this Congress.

Working together, we can develop legislation which reflects the goals and priorities of our aid programs in the 1970s and beyond. Together we can write legislation which is more satisfactory to the Congress and to the Administration and which facilitates the administration of these important programs.

As the Agency, under your leadership, undertakes this comprehensive in-house reevaluation, I would offer some of the following suggestions:

First, the Food and Nutrition account represents 55 percent of total AID resources. Yet, I am concerned we are not getting the job done. I am concerned that we are lacking the expertise required for improving food production in developing countries. It is my understanding the next two years will afford your Agency an excellent opportunity to remedy this situation. It has come to my attention that during this period of time there will be a significant turnover in Agency personnel due to retirements. You should begin looking at what your requirements are for ag economists, technicians and agronomists.

Second, our population activities are often-times frustrated because they do not relate to other requirements which have a bearing on the success of these activities. I am specifically referring to family planning efforts which must be integrated into health, education and nutrition programs. It might be more appropriate for our nutrition programs to be integrated into population, health and education efforts. Children represent the social security system in many developing countries. We have to guarantee the survival of a minimum number of children if parents are to have incentives to decrease the size of their families.

Children also represent a valuable labor force for the rural peasant farmer. Therefore, population control activities must also relate to our efforts at increasing food productin in the developing countries. A peasant farmer does not require as many children to assist him in the cultivation of crops if he is moved to the next level of technology—from hand cultivation to use of animal traction.

Third, in the area of education, while I believe there is still a need to build up the administrative and management capabilities of recipient government institutions which are responsible for delivering essential services to their populations. However, I believe we must be much more selective in the process of determining what a recipient country's needs might be and the aptitude of the individual selected for advanced education. All too often, the educational interests of individuals do not match up with needs in developing countries.

And, finally, we must begin to re-evaluate the relationship of AID to the private and voluntary organizations, who represent an important factor in our development efforts. This relationship with the Agency must be strengthened. But serious consideration must be given to organizational changes which might be required within the Agency to facilitate the more effective use of PVOs.

These are just a few of the concerns I have and represent only a surface examination of the many issues and problems facing the Agency. I use these examples only as being illustrative of the tremendous job we all have cut out for us.

I invite your comments on these matters and stand ready to work with you. You may begin your testimony.

DEPARTMENT OF LABOR ACCEDES ON FARMWORKER REGULATIONS

Mr. CHURCH. Mr. President, I was very pleased to learn that the Department of Labor has agreed with my request to further extend the comment period for its proposed new regulations on alien farmworkers, and to hold field hearings to take additional comments on the significant consequences they will have on livestock and other farm operations.

These proposed regulations, Mr. President, would increase the time requirements for filing job orders for workers with the U.S. Employment Service, require written plans for employment of domestic migrant labor, and require single-family housing be provided for workers with families.

The Department of Labor announced its proposals on January 25, permitting

comment only until February 24. This deadline was extended until March 28. On March 4, I wrote to the Secretary of Labor, asking for an additional extension to "assure that all concerned have the maximum opportunity to be heard."

The problems of foreign workers are complex and controversial. In my own State of Idaho, the history of delay and difficulty even in the present certification process has had a serious impact on the availability of farm labor. No one wants to return to the abuses documented under the old Bracero program. On the other hand, any action in this area should not be made precipitously.

I am pleased that the Secretary has responded so positively to my request to have, in the Department's words:

A fuller opportunity to obtain the detailed and considered views of all parties likely to be affected by the proposed regulations.

I ask unanimous consent that my letter to the Secretary, the Department's announcement and the proposed regulations be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MARCH 4, 1977.

Hon. RAY MARSHALL,
Secretary of Labor,
Washington, D.C.

DEAR MR. SECRETARY: I am writing to urge you to provide all possible consideration and critical review of the proposed regulations by the U.S. Employment Service regarding certification of foreign labor for agricultural and livestock employment.

These regulations increase time requirements for filing job orders with the Employment Service, require written plans for employment of domestic migrant labor, require single family housing be supplied workers with families, and impose other provisions that will drastically increase the paperwork and cost in these business communities.

It is my understanding that after these proposed regulations were announced on January 25, Department officials met with Senator Robert Byrd, and the time for comment was extended from February 24 until March 28. I also understand that it is the Department's intention to proceed with these regulations but to delay their effective date until after this year's harvest.

The problems of foreign workers are complex and controversial. In my own State of Idaho, the history of delay and difficulty in the present certification process has had a serious impact on the availability of farm labor. On the other hand, no one wants to return to the abuses documented under the old Bracero program.

Given the fact that the Department of Labor has already decided not to implement these regulations until at least after this year's harvest, I would therefore urge you to extend the time for comment and response even further. A substantial extension of time for comment beyond the present closing date of March 28 would assure that all concerned have the maximum opportunity to be heard.

Sincerely,

FRANK CHURCH.

HEARINGS PLANNED ON PROPOSED RULES FOR TEMPORARY FARM JOBS FOR ALIENS

The Department of Labor is planning six public hearings this spring on a proposed revision in its regulations on the employment of aliens for temporary farm jobs, it was announced today by Assistant Secretary of Labor Ernest G. Green.

Green said "our decision to hold these hearings stems from the widespread public interest in the proposed regulations after they were published earlier this year."

The one- or two-day hearings will be held in areas where significant numbers of U.S. migrant farmworkers or foreign workers live or are employed, according to Green. The six areas selected are Denver, Colo.; Belle Glade, Fla.; Springfield, Mass.; Plattsburg, N.Y.; San Antonio, Tex.; and Martinsburg, W. Va.

Green explained that most temporary alien farmworkers during the past few years have been employed in the apple harvest in New England, New York, Maryland, Virginia, and West Virginia; in the woods industry in Maine; in sugar cane cutting in Florida; and in sheep raising in various western states.

In addition to local workers and aliens, migrants from Florida and Texas are also frequently employed in the apple harvest.

Green said the Labor Department is making a second extension of the comment period, this time until April 15, and that a notice to this effect is scheduled to appear in the Federal Register today.

He said the Department is suspending until after the hearings any plans to implement during the 1977 harvest season the proposed regulations originally published Jan. 25. Instead, the Department will operate under the existing regulations as published in the Code of Federal Regulations (20 CFR 602.10, 10a and 10b).

Green explained that public hearings will afford the Labor Department a fuller opportunity to obtain the detailed and considered views of all parties likely to be affected by the proposed regulations.

He added that representatives of farm employers, workers, crew leaders and others with special interests or expertise in issues related to the temporary employment of alien farmworkers will have an opportunity to testify or to provide supplementary statements for the record.

Green said these hearings would assist the Department in its dual responsibility of both safeguarding job opportunities for American workers and of assuring that adequate labor supplies are available to farm employers to meet harvest and other needs.

He said the Department's objectives is to assure that whatever regulations are issued at the close of the hearings for application in the 1978 harvest season "will treat all interested groups in an equitable manner consistent with the provisions of the immigration law."

Green said further details on the aliens farmworker regulations will be published in the Federal Register as soon as final plans are formulated.

Hearing dates and locations will be announced in each of the six areas as they become known.

[Department of Labor Employment and Training Administration (20 CFR Part 655)]

TEMPORARY EMPLOYMENT OF ALIENS

LABOR CERTIFICATION PROCESS FOR TEMPORARY AGRICULTURAL AND LOGGING EMPLOYMENT

Notice is hereby given that the Employment and Training Administration of the Department of Labor is proposing to amend its regulations governing the labor certification process for the temporary employment of aliens in the United States in agricultural (including sheepherding) and logging occupations. The regulations proposed in this document, when finalized, are intended to replace the current regulations at 20 CFR 602.10, 10a and 10b.

Interested persons are invited to submit comments on the proposed regulations to the Assistant Secretary for Employment and Training, Attention: William B. Lewis, Administrator, United States Employment Service, Room 8000, Patrick Henry Bldg., 601 D St., N.W., Washington, D.C. 20213, until February 24, 1977.

Among the proposed changes from the present regulations, are the following substantive changes: 1. The requirements governing sheepherding have been integrated with the requirements for other agricultural occupations.

2. The relationship between employers and their agents, such as associations of employers, have been set forth with greater clarity.

3. The period of recruitment of U.S. workers through the Federal-State employment service system has been lengthened from 60 to 90 days, or longer under certain conditions.

4. Provisions have been added governing fraud and willful misrepresentation with respect to temporary labor certifications and applications therefor.

5. A provision has been added that, if an employer has used foreign workers for each of the previous two years, the labor certification application must include a recruitment plan designed to reduce the employer's dependence on foreign workers.

6. The requirements involving deductions from workers' pay have been simplified.

7. The amount which an employer may charge a worker for providing the worker with three meals per day has been increased.

8. The provisions governing workers' disability insurance have been made clearer and more flexible.

9. The amount of work which an employer must guarantee to offer a worker has been increased from three-fourths of the workdays to at least 5 eight-hour days of work per week.

10. Provision is made for the publication of adverse effect piece rates at a later date.

11. The procedure, which was previously set forth in the Employment Security Manual, whereby, under certain conditions, an employer was permitted to pay less than the adverse effect rate to physically handicapped U.S. workers over 60 and under 18 years of age who could not produce normally, has been set forth in the regulations.

Accordingly, it is proposed to amend Title 20 of the Code of Federal Regulations, by adding a new Part 655 to read as follows:

PART 655—LABOR CERTIFICATION PROCESS FOR THE TEMPORARY EMPLOYMENT OF ALIENS IN THE UNITED STATES

SUBPART A—LABOR CERTIFICATION PROCESS FOR TEMPORARY AGRICULTURAL AND LOGGING EMPLOYMENT

Sec.

655.1 Scope and purpose; definitions.
655.2 Temporary labor certification applications (general).
655.3 Contents of job offers.
655.4 Assurances.
655.5 Recruitment plan.
655.6 Recruitment efforts.
655.7 Action on temporary labor certification applications by local office.
655.8 Temporary labor certification determinations.
655.9 Adverse effect rates.
655.10 Temporary labor certification applications involving fraud or willful misrepresentation.
655.11 Invalidation of temporary labor certifications.
655.12 Failure of employers to comply with the regulations under this subpart.
655.13 Petitions for higher meal charges.

AUTHORITY: 8 CFR 214.2(h)(3)(i); Wagner-Peyser Act of 1933, as amended, 29 U.S.C. 49 et seq.

§ 655.1 Scope and purpose; definitions.

(a) Section 214.2(h)(3)(i) of the Immigration and Naturalization Service Regulations (8 CFR 214.2(h)(3)(i)), issued under the Immigration and Nationality Act, requires, in suppot of a petition for the ad-

mission of an alien into the United States to perform certain temporary labor:

Either a certification from the Secretary of Labor or his designated representative stating that qualified persons in the United States are not available and that the employment of the beneficiary will not adversely affect the wages and working conditions of workers in the United States similarly employed, or a notice that such a certification cannot be made shall be attached to every non-imigrant visa petition to accord an alien a classification under Section 101(a)(15)(H)(ii) of the Act.

(b) The temporary labor certification procedure is designed to prevent the use of foreign labor at the expense of the wages and working conditions of United States workers similarly employed. Thus, temporary foreign workers may only be used to meet shortages which occur in a particular occupation or industry. In the long run, normal adjustments in wages and working conditions should bring sufficient United States workers to an occupation.

(c) The regulations in this subpart set forth the process by which temporary labor certifications may be applied for, and by which they may be granted or denied.

(d) *Definitions of terms used in this subpart.* For the purposes of this subpart:

"Administrator" means the chief official of the United States Employment Service or the Administrator's designee.

"Adverse effect rate" means the wage rate which the Administrator has determined must be offered and paid to foreign and U.S. workers for a particular occupation and/or area so that the wages of similarly employed U.S. workers will not be adversely affected. The Administrator may determine that the prevailing wage rate in the area and/or occupation is the adverse effect rate, or that a wage rate other than the prevailing wage rate is the adverse effect rate.

"Area of intended employment" means the area within normal commuting distance of the place (address) of intended employment. If the place of intended employment is within a Standard Metropolitan Statistical Area (SMSA), any place within the SMSA is deemed to be within normal commuting distance of the place of intended employment.

"Employment and Training Administration (ETA)" means the agency within the Department of Labor (DOL) which includes the United States Employment Service (USES).

"Employer" means a person, firm, corporation or other organization which currently has a location within the United States to which U.S. workers may be referred for employment, and which proposes to employ a full-time worker at a place within the United States or the authorized representative of such a person, firm, or corporation. For purposes of this definition an "authorized representative" means an employee of the employer whose position or legal status authorized the employee to act as the agent for the employer in labor certification matters. Neither the term "employer" nor "authorized representative" shall mean an association of employers which acts as the agent of a group of employers for temporary labor certification purposes.

"Job opportunity" means a job opening for employment at a place in the United States to which U.S. workers can be referred.

"Local employment service office" means an office of a State employment service agency which serves a particular geographic area within a State.

"Notice of Findings" means a notice which sets forth the bases upon which a Regional Administrator intends to deny a temporary labor certification unless the bases are satisfactorily rebutted.

"Regional Administrator, Employment and Training Administration (RA)" means the chief official of the Employment and Training Administration (ETA) in a Department of Labor (DOL) regional office.

"Secretary" means the Secretary of Labor, the chief official of the U.S. Department of Labor, or the Secretary's designee.

"Temporary labor certification" means the determination by the Secretary of Labor, pursuant to 8 CFR 214.2(h)(3)(1), that (1) there are not sufficient U.S. workers who are qualified and available to perform the work and (2) the employment of the alien will not adversely affect the wages and working conditions of similarly employed U.S. workers.

"United States Employment Service (USES)" means the agency of the U.S. Department of Labor, established under the Wagner-Peyser Act of 1933, which is charged with administering the national system of public employment offices and carrying out the functions of the Secretary under the Immigration and Nationality Act.

"United States worker" means any worker who, whether U.S. citizen or alien, is legally permitted to work permanently within the United States.

§ 655.2 Temporary labor certification applications (general).

(a) An agricultural or logging employer anticipating a labor shortage may request a temporary labor certification for temporary foreign workers by filing, or by having an agent file, a temporary labor certification application, signed by the employer, with a local office of a State employment service in the area of intended employment. However, if the temporary labor certification application is filed by an agent, such as an association of employers, the agent may sign the application. If an agent is used, the application must be accompanied by a letter from each employer, signed by the employer, which authorizes the agent to act on the employer's behalf and which states that the employer assumes full responsibility for the accuracy of the application, for all representations made by the agent on the employer's behalf, and for the fulfillment of all legal requirements arising from the temporary labor certification.

(b) Every temporary labor certification application shall include: (1) A copy of the job offer used by the employer (for each employer) in the recruitment efforts for both U.S. and foreign workers. The job offer for each employer shall state the number of workers needed by the employer, and shall be signed by the employer. The job offer shall comply with the requirements of § 655.3. If the State agency informs the employer that workers, who are fluent and/or literate in Spanish and who are not substantially fluent and/or literate in English, will be recruited for the job opportunities, a copy of the job-offer written in Spanish shall be submitted;

(2) The assurances required by § 655.4 of this subpart;

(3) If applicable, the recruitment plan required by § 655.5; and

(4) Documentation showing the employer's efforts to recruit U.S. workers as required by § 655.6.

(c) A temporary labor certification application shall be filed in sufficient time to allow the local office to attempt to recruit U.S. workers through the Employment Service intrastate and interstate clearance systems for 90 calendar days, unless the RA has notified the employer in writing at least 30 days prior to the filing of the application that more than 90 days will be needed; the RA, however, shall never specify a period in excess of six months, and shall offer the employer assistance in recruiting U.S. workers. This 90-day period (or longer period if applicable) shall be in addition to the time necessary for the employer to secure foreign workers by the date of need if the temporary labor certification is granted. The Department of Labor, however, may grant or deny the temporary labor certification prior to the ending of the 90 calendar days (or longer period if applicable).

§ 6655.3 Contents of job offers.

(a) Each employer's job offer shall state that: (1) The employer will provide housing without charge which will meet either the full set of Department of Labor, Employment and Training Administration standards set forth at 20 CFR Part 620 or the full set of Department of Labor, Occupational Safety and Health Administration standards set forth at 20 CFR 1910.142;

(2) The employer, either on its own or in combination with other employers will provide housing to U.S. workers who are women and to those who need family housing;

(3)(i) If applicable, the worker will be eligible for workers' compensation for injury and disease arising out of and in the course of the worker's employment; or

(ii) If the worker will not be covered by the State workers' compensation law the employer will provide, at no cost to the worker, insurance covering injury and disease arising out of and in the course of the worker's employment, and that the insurance will provide benefits at least equal to those provided under the State workers' compensation law;

(4) The employer will furnish, without cost to the worker, all tools, supplies and equipment required to perform the work including all necessary protective clothing and special footwear and that, if any of these items are provided by the worker, the employer will reimburse the worker for the cost;

(5) The employer will provide the worker with three meals a day, and shall state the cost of the worker for such meals. The cost shall not be more than $3.25 per day unless the RA has approved a higher cost pursuant to § 655.13.

(6)(i) The employer will provide or pay for the worker's transportation and daily subsistence from the worker's home or place of last employment, whichever is applicable, to the place of employment provided the worker works for 50 percent or more of the contract period, and that the amount of the daily subsistence payment will be at least as much as the amount the employer will charge the worker for three meals a day at the place of employment;

(ii) Whether the employer will advance payment to the worker for the costs of transportation and subsistence en route;

(7) If the worker completes the contract period, the employer will provide or pay for the worker's transportation and daily subsistence from the place of employment to the place from which the employer recruited the worker (home or last place of employment, whichever is applicable) unless the worker has immediately subsequent employment with an employer who has contracted with the worker to pay for the worker's transportation and daily subsistence expenses to that employer's worksite.

(8) The employer will provide transportation between the worker's on-the-job site living quarters and the place where the work is to be performed without cost to the worker, and that all such transportation will be in accordance with all applicable laws and regulations.

(9) The employer, unless the prevailing practice in the area of intended employment is for the employer to pay for all travel time as work-time, will pay the worker the adverse effert rate (or the adverse effect rate's piece rate equivalent) for all travel time to work in excess of one-half hour and for all travel time from work in excess of one-half hour.

(10)(i) The employer guarantees the worker the opportunity to work for 5 eight-hour

workdays out of each week, and that, if, under the guarantee or otherwise, the employer affords the worker employment on a day on which the worker refuses to work because of the worker's religious convictions, the employer will not dismiss the worker for not working on that day;

(ii) If the worker is afforded less employment than guaranteed, the worker will be paid an amount equal to the amount which the worker would have earned if the worker had worked for the guaranteed periods;

(iii) If the worker will be paid on a piece rate basis, the employer will use the worker's average hourly earnings to calculate the amount due under the guarantee; and

(iv) That any hours which the worker fails to work when the worker has been afforded the opportunity to do, and all hours of work performed, will be counted in calculating the period of guaranteed employment;

(11) (i) The employer will keep accurate and adequate records of all the worker's earnings and hours of emplyoment, including records showing the nature of the work performed, the number of hours of work offered each day by the employer and worked each day by the worker, the time the worker began and ended each workday, the rate of pay, the amount of work performed, the worker's earnings, and the amounts of and reasons for any and all deductions made from the worker's wages;

(ii) If the number of hours worked by the worker is less than the number offered, the records will state the reason therefor;

(iii) The records, including field tally records and supporting summary payroll records, will be made available for inspection and copying by representatives of the Secretary of Labor, and by the worker or the worker's representatives; and

(iv) The employer will retain the records for not less than three years after the completion of the contract;

(12) The employer will furnish to the worker at or before each pay day, in one or more written statements:

(i) The worker's total earnings for the pay period, broken only by straight-time and overtime;

(ii) The worker's hourly rate or piece rate of pay;

(iii) The hours of employment which have been offered to the worker;

(iv) The hours worked by the worker;

(v) An itemization of all deductions made from the worker's wages; and

(vi) If piece rates are used, the units produced daily;

(13) The employer will comply with all applicable Federal, State and local laws, including employment-related safety and health laws;

(14) (j) If the worker will be paid by the hours, the employer will pay the worker the adverse effect rate; or

(ii) If the worker will be paid on a piece rate basis, the piece rate will be based on the normal efforts of average U.S. workers and will be designed to produce average hourly earnings at least equal to the adverse effect rate, and that, if the piece rate does not result in average hourly earnings at least equal to the adverse effect rate, the worker's pay at each pay period will be supplemented so that the worker's earnings are at least as much as the worker would have earned if the worker had been paid the adverse effect rate;

(15) The frequency with which the worker will be paid (in accordance with the prevailing practice in the area of intended employment, or at least biweekly whichever is more frequent);

(16) If the worker abandons employment before the end of the contract period, or is terminated for cause, the employer will not be responsible for providing or paying for the subsequent transportation of the worker;

(17) (i) If, before the expiration date specified in the work contract, the services of the worker are no longer required for reasons beyond the control of the employer due to a fire or other Act of God which makes the fulfillment of the contract impossible, the employer may terminate the work contract;

(ii) The employer will make efforts to transfer the worker to other comparable employment. If such transfer is not effected, the worker will be returned home or to the worker's last place of employment, whichever is applicable, at the employer's expense; and that

(iii) Any deductions made from the worker's pay by the subsistence to the place of employment will be refunded to the worker.

(18) The employer will make those deductions from the worker's paycheck which are required by law:

(b) The job offer shall specify all deductions, not required by law, which the employer will make from the worker's paycheck. All deductions shall be reasonable. If the employer intends to deduct the cost of the worker's transportation and daily subsistence to the place of employment, the job offer shall state that the worker will be fully reimbursed for such deductions upon the worker's completion of 50 percent of the worker's contract period.

(c) The job offer shall also contain all the provisions contained in any contract which the employer agreed to in the previous year which conferred benefit upon foreign workers additional to those set forth in paragraphs (a) (1) through (a) (18) and (b) of this section.

(d) (1) The job offer may also contain a provision that physically handicapped U.S. workers over 60 years of age and/or under 18 years of age who are unable to produce normally may be requested or required by the employer to sign written waivers indicating their inability to work with normal speed or effectiveness, that such workers will not receive the piece rate earnings guarantee and that, if they are employed at hourly rates, they will be paid rates as low as 75 percent of the required adverse effect rate, but not less than the applicable Federal or State minimum wage.

(2) If the provision in paragraph (d) (1) of this section is included:

(i) The job offer must also contain provisions that the employer may request a U.S. worker to sign a waiver only after the worker has had average hourly earnings below the hourly standard for no less than 40 hours of work experience at piece rates designed to produce the hourly guarantee; that the 40 hour trial work experience period may begin only after the worker has had 24 hours of training in the activity in questions; that the employer will maintain records to demonstrate the worker's earning ability during the 24 hours of training and during the 40 hour trial work experience period; and that, during this 64 hour period, the worker will receive the full hourly adverse effect rate;

(ii) The waiver shall be worded as follows:

I _____ having been given 3 eight
(Employee)
hour days of training and 40 hours work experience as a _____ and being unable to maintain production standards of _____ _____ here-
(Occupation)
(Minimum) (Acceptable per hour or day)
by waive my right to the minimum required rate of $_____ and authorize my employer to reduce my minimum wage to $_____
(List rate)

(No less than 75 percent of adverse effect rate. (In no case less than the applicable minimum Federal or State wage).)

§ 655.4 Assurances.

As part of the labor certification application the employer shall include assurances signed by the employer, that:

(a) The employer has not within the past year been found by a Court or by a Federal or State enforcement agency to have failed without good cause to comply with an employment contract with a United States or foreign agricultural or logging worker, or to have failed without good cause to comply with applicable Federal, State and local employment-related laws, including health and housing laws and temporary labor certification related requirements, or that, if the employer was so found, the employer has produced conclusive, documented evidence that the violation has been remedied, and assures that it will not vioate the law or laws in the future;

(b) The job opportunity is not:

(1) Vacant because the former occupant is on strike or is being locked out in the course of a labor dispute, or

(2) At issue in a labor dispute;

(c) During the period in which foreign workers are scheduled to be employed under the terms of the temporary labor certification:

(1) The wages and working conditions which will be offered and afforded by the employer to any foreign worker will not be higher or more favorable than those offered and afforded to U.S. workers;

(2) The employer will offer and provide employment to any U.S. worker who is qualified and willing to work in the job opportunity (including women) and will offer and provide housing to such a worker and to the worker's family until the time the foreign worker who holds the job opportunity has completed 50-percent of the foreign worker's contract period; and

(3) The employer will provide each U.S. worker with a copy of the worker's employment contract. The employment contract which is provided to the worker shall be written in Spanish if the worker is fluent and/or literate in Spanish but is not substantially literate in English.

§ 655.5 Recruitment plan.

If the employer has made requests for temporary foreign labor for each of the preceding two years, the employer shall submit as part of the temporary labor certification, a written plan for recruiting and retaining U.S. workers which is designed to reduce the use of temporary foreign workers. If such a recruitment plan was submitted in the previous years, the employer shall submit documents showing the employer's efforts to implement the plan and the results of the implementation.

§ 655.6 Recruitment efforts.

As part of the temporary labor certification application the employer shall include documents clearly showing the employer's efforts to recruit U.S. workers. The documents must show that:

(a) Reasonable efforts have been and will continue to be made by the employer to obtain U.S. workers at wage rates and working conditions no less favorable than those offered to aliens; and

(b) Such efforts included reasonable attempts to use workers who commute on a daily basis between their residences and the place of employment, the use of the Employment Service intrastate and interstate clearance system, and the employer's participation in special youth requirement programs.

§ 655.7 Action on temporary labor certification applications by the local office.

(a) When a temporary labor certification application is filed with a local employment service office, the local office shall make sure that the application is complete. If the application is not complete, the local office shall return it to the employer and shall advise the employer to re-file it when it is completed.

(b) If the application is complete, the local office, using the information on the application, shall prepare and process an employment service job order. If this job order is discriminatory or otherwise unacceptable as a job order under employment service regulations, the local office shall, as appropriate, either contact the employer to try to remedy the defect or return the application to the employer with instructions as to how the defect can be remedied.

(c) (1) If the job order is complete, and if it complies with employment service regulations, the State agency shall use the job order to recruit U.S. workers from the local area and through the Employment Service intrastate and interstate clearance systems.

(2) In view of the statutorily established basic function of the employment service as a no-fee labor exchange, that is, as a forum for bringing together employers and job seekers, neither the Department of Labor nor the State employment service agencies are guarantors of the accuracy or truthfulness of information contained on job orders submitted by employers. Nor do such job orders represent an "offer to contract" to which the Employment Service is in any way a party. Nevertheless, if the Department of Labor or a State employment service agency finds probable cause to believe that an employer's job order contains a material representation, the procedures at Subpart F of Part 658 of this Chapter shall be followed (as proposed in the FEDERAL REGISTER on October 5, 1976, at 41 FR 44023).

(d) The State agency shall send the labor certification application to the appropriate Regional Administrator (RA), Employment and Training Administration, together with a statement indicating whether the local office believes the employer has met requirements of this subpart, a report of U.S. worker availability in the area, a description of the recruitment efforts undertaken by the local office on behalf of the employer, and any other information requested by the ETA.

§ 655.8 Temporary labor certification determinations.

(a) The RA shall determine whether the employer has met the requirements of §§ 655.2–655.6. If the RA finds that the employer has complied with those requirements, the RA shall recommend to the Administrator in writing that the temporary labor certification be granted, giving the reasons therefor. If the Administrator objects to the granting of the temporary labor certification based on relevant considerations, the RA shall not grant the temporary labor certification until and unless the objections are resolved.

(b) If the RA believes that the employer's efforts to recruit U.S. workers has not been sufficient or that the temporary labor certification should not be granted for other reasons, the RA shall issue a Notice of Findings, as defined in § 655.1, and shall afford the employer a reasonable time to submit evidence to rebut the bases of the Notice of Findings.

(c) No labor certification shall be granted to any employer if the Immigration and Naturalization Service has notified the Department of Labor that the employer has knowingly had in his employ during the previous 12 months any foreign worker who was not lawfully in the United States, or if the employer, in the previous 12 months, has been found to have violated the Farm Labor Contractor Registration Act or the Federal regulations issued under that Act.

(d) After the labor certification determination has been made the RA shall notify the employer in writing of the decision. If the labor certification is denied, the notice shall state the reasons therefor and the appeal rights of the employer under the Immigration and Naturalization Service regulations.

§ 655.9 Adverse effect rates.

(a) *Schedule of Rates for 1976.*

State:	Rate
Connecticut	2.61
Florida (sugarcane only)	3.04
Maine	2.69
Maryland	2.27
Massachusetts	2.56
New Hampshire	2.82
New York	2.48
Vermont	2.78
Virginia	2.44
West Virginia	2.74

(b) The adverse effect rate for all areas not listed in paragraph (a) of this section, for logging and sheepherding, and for Florida crops other than sugarcane, shall be the prevailing wage rate for the occupation in the area of intended employment.

(c) The Administrator shall review the adverse effect rates annually in the light of changed agricultural and/or similarly skilled non-agricultural wage rates in each State. The Administrator shall periodically publish a schedule containing: (1) The adverse effect rate; and (2) The normal piece-rate production of an average U.S. worker; (3) The adverse effect piece rate, that is, the piece rate by which an average U.S. worker will earn the adverse effect rate.

§ 655.10 Temporary labor certification applications involving fraud or willful misrepresentation.

(a) If possible fraud or willful misrepresentation involving a temporary labor certification application is discovered prior to a final temporary labor certification determination, or if it is learned that an application is the subject of a criminal indictment or information filed in a Court, the RA shall refer the matter to the INS for investigation and shall notify the applicant in writing of this referral. The RA shall continue to process the application and may issue a qualified temporary labor certification.

(b) If a Court finds an applicant innocent of fraud or willful misrepresentation, or if the Department of Justice decides not to prosecute an applicant, the RA shall not deny the temporary labor certification application on the grounds of fraud or willful misrepresentation. The application, of course, may be denied for other reasons pursuant to this subpart.

(c) If a Court or the INS determines that there was fraud or willful misrepresentation involving a temporary labor certification application, the application shall be deemed invalidated, processing shall be terminated, and the application shall be returned to the applicant with the reason therefore stated in writing.

§ 655.11 Invalidation of temporary labor certifications.

After issuance, temporary labor certifications are subject to invalidation by the INS upon a determination, made in accordance with that agency's procedures or by a Court, of fraud or willful misrepresentation of a material fact involving the temporary labor certification application. If evidence of such fraud or willful misrepresentation becomes known to a Regional Administrator, Employment and Training Administration or to the Administrator, the Regional Administrator or Administrator, as appropriate, shall notify the INS in writing.

§ 655.12 Failure of employers to comply with the regulations under this subpart.

If the Department of Labor or a State employment service agency has probable cause to believe that an employer's job order contains a material misrepresentation, or that an employer has not complied with the terms of a temporary labor certification application or of a certification, the procedures at subpart F of Part 658 of this Chapter shall be followed (as proposed in the FEDERAL REGISTER on October 5, 1976 at 41 FR 44023).

§ 655.13 Petitions for higher meal charges.

(a) An RA may permit an employer to charge workers up to $4.00 for providing them with 3 meals per day if the employer justifies the charge by submitting documentary evidence to the RA.

(b) Evidence submitted shall include the cost of goods and services directly related to the preparation and serving of meals, the number of workers fed, the number of meals served and the number of days meals were provided. The cost of the following items may be included: food; kitchen supplies other than food, such as lunch bags and soap; labor costs which have a direct relation to food service operations, such as wages of cooks and restaurant supervisors; fuel, water, electricity, and other utilities used for the food service operations; other costs directly related to the food service operation. Charges for transportation, depreciation, overhead, and similar charges may not be included. Receipts and other cost records for the representative pay period shall be available for inspection by the Secretary's representatives for a period of 1 year.

Signed at Washington, D.C., this 14th day of January 1977.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

[FR Doc.77-2132 Filed 1-24-77;8:45 a.m.]

CHROME AND THE CONSUMER

Mr. HARRY F. BYRD, JR. Mr. President, now that the President has signed a bill that will again allow the embargo of chrome from Rhodesia, the cost of such action will face the American consumer.

In the past, the Soviet Union has reaped windwall financial gain from an embargo on Rhodesian chrome and the consumers of this country have paid the tab.

I believe that the consumer will again pay the tab as the United States cuts itself off from high quality Rhodesian chrome.

An interesting article concerning this matter has been published by the Field Newspaper Syndicate authored by Robert S. Allen.

I ask unanimous consent that the text of this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CHROME AND THE CONSUMER

(By Robert S. Allen)

WASHINGTON, March 26, 1977.—There is a strikingly significant omission in Administration gloating over repeal of the Byrd amendment that gave the U.S. free rein to import Rhodesian metallurgical chrome.

This is the exceedingly moot question—just who won what!

Examination of what's behind this glaring silence quickly reveals the stark answer:

Far and away the principal gainer is Russia—which once again will have a highly profitable near-monopoly as this country's main supplier of metallurgical chrome, essential in the production of missiles, nuclear submarines, jet aircraft, other key weapons and high-grade steel products.

At the same time, outstandingly heavy loser will be the American consumer who once again will bear the rap for virtually certain rapacious Russian price gouging.

The record is irrefutably predictable on that.

WHAT HAPPENED

Before 1966, when the United Nations, under Moscow-Arab-African bloc domination,

imposed economic sanctions against Rhodesia, Soviet chrome sold at $27 a ton. By 1971, when Senator Harry Byrd, Ind-Va., persuaded Congress to approve his amendment voiding compliance with the UN ban, the Russian price had zoomed 188 percent.

But with Rhodesian chrome once again being shipped to the U.S., the Soviet price declined markedly—until 1974.

That year, the Senate, under vigorous spurring by former Secretary Henry Kissinger, junked the Byrd amendment and it looked as if the House would follow suit.

Result: Russia doubled its price to $160 a ton.

But the House balked, and the repeal legislation was voted down—taking with it the Soviet's vaulting chrome profits.

Now of course, the way is wide open for that profiteering to be resumed—at the expense of U.S. consumers who will have to pay in higher weapons and steel costs.

It will be one more deep notch in the inflation gouge.

TYPICAL U.N. SHAM

Grimiest irony of all is that the UN's sanctions have been ignored and violated from the very start.

Not only that, but the worst offenders have been the loudest embargo invokers.

High on the list are none other than Russia and the East European satellites—notably East Germany and Czechoslovakia, with others not far behind. In January of this year, a classified UN report flatly charged the Soviet and four satellites with large-scale violations of the Rhodesian sanctions.

It is interesting to note that this UN document got short shrift from the media—that never passes up a chance to publicize anything critical of the U.S. But somehow, this report was conveniently disregarded.

That intriguing indifference has characterized the publicizing of violations of the Rhodesian embargo throughout.

Since its imposition in 1966, the UN has recorded around 75 formal complaints.

Among those charged with violations are Russia, four Eastern European satellites, Britain, Red China, France, West Germany, and most of the black African countries—in the van of denouncers of white-ruled Rhodesia and demanding rigorous restrictions against it.

"I find it ironic," says Senator Byrd, "that countries most vocal against U.S. importation of Rhodesian chrome have been in the front rank of violators of the UN sanctions. It is these same countries that in arguing for the imposition of the embargo characterized Rhodesia as a 'threat to world peace.'

"Rhodesia is a small, landlocked country, with 6 million people, virtually no military assets and a police force that is the mainstay for keeping order. That force, incidentally, is predominantly black. There is no way in the world Rhodesia can be considered a threat to world peace. It was utterly ludicrous for the UN to so declare."

But it did—and other equally asinine, biased and frenetic antics that have cost U.S. taxpayers hundreds of millions of dollars.

MORE IRONIES

While the UN castigated Rhodesia for so-called "minority rule," the characteristically hypocritical world organization has yet to criticize or do anything about outright dictatorial rule in the controlling Soviet-Arab-African bloc. Of the 49 African countries, 15 are iron-fisted military dictatorships and 29 others one-party authoritarian states. . . . Claims of Byrd amendment opponents that new technological processes now make it possible to use low-quality chrome are plausible to some extent. Large steelmakers that can afford the expensive equipment necessary for these processes can use inferior-quality chromium. But that doesn't apply to the hundreds of small U.S. factories that make stainless and other high-grade steel. They are compelled to use chromium of the fine type available in large quantities only from Rhodesia, South Africa and Russia. It is these small businesses that will definitely be hurt by the reimposition of the UN embargo against Rhodesian chrome.

Byrd amendment supporters flately contend the UN sanctions are both illegal and unethical. They charge that "in terms of the UN Charter, under Articles 39 and 41, an embargo can only be imposed against a country if it is judged to be a threat to world peace." When former Secretary Kissinger tesitfied before the Senate Finnace Committee for the bill to repeal the Byrd amendment, he was asked by the Virginia legislator, "In your judgment, does Rhodesia represent a threat to world peace?" Replied Kissinger, "No, I do not think so." Continued Byrd, "Do you think our actions toward Rhodesia are just or unjust?" With characteristic unctuousness, Kissinger weaseled, "Well, I think it reflects the decision of the international community and the general conviction about justice." Byrd, looking Kissinger over coldly, replied, "Frankly, I am not clear from what you have just said, whether you regard it as just or unjust."

WATER PROJECTS ISSUE

Mr. McGOVERN. Mr. President, on March 21 at the State capital, Pierre, S. Dak., a field team from the President's Water Projects Review Panel conducted public hearings on the Oahe irrigation project. Testimony was taken both in support and in opposition to the project.

One secondary aspect of the project which appears to have been overlooked by the administration water planners is the impact that project termination would have on power costs.

With that in mind, I think that the Congress will find of interest the statement of Loren Zingmark, general manager of the East River Electric Power Cooperative of Madison, S. Dak., on this issue.

I ask unanimous consent that this statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT FOR OAHE PROJECT REVIEW PUBLIC HEARING, MARCH 21, 1977

Mr. Chairman and Members of the Committee:

My name is Loren Zingmark. I am the General Manager of and represent East River Electric Power Cooperative, Inc. (East River) located in Madison, South Dakota.

East River is a transmission rural electric cooperative funded by the Rural Electrification Administration. We serve wholesale electric power to twenty-four member distribution systems who ultimately provide retail electric power to approximately 52,000 rural consumers located in 38 counties east of the Missouri River in South Dakota and in four counties in western Minnesota. The East River service area includes those areas to be irrigated by the facilities of the Oahe Project.

East River presently purchases slightly less than half of its member's electric power requirements from the hydroelectric resources of the Missouri River. The balance of our member's electric power requirements are purchased from Basin Electric Power Cooperative, Bismarck, North Dakota.

For many years East River has supported the orderly development of the Oahe Project through general membership and Board of Director resolutions. The Project was authorized by Congress as an integral part of the 1944 Flood Control Act which was later renamed the Pick-Sloan Missouri Basin Program. Extensive Congressional review has taken place over the past decades, not years, leading to the justifiable conclusion that the project has merit. Support in South Dakota exemplified by the formation of the Conservancy Subdistrict and the irrigation districts and entering into a master contract with the Federal government as a result of a vote of the people directly affected indicates the support for the project. Recent surveys within the project area substantiate continued widespread support for the project. The Environmental Impact Statement has been found to be in compliance with the National Environmental Policy Act of 1969 as a result of a suit filed and a decision made by the Federal District Court in South Dakota. It is significant to note that the Federal Court's decision validating the EIS has not been challenged. Additionally, South Dakota has recently been saying, loud and clear, that it will resist Federal intervention in the control of water development for the State of South Dakota.

Yet we now see the Administration attempting to undo in 60 days the efforts of South Dakotans and the Congress developed carefully and deliberately over several decades. Frankly, we question the Administration's credentials to take such capricious and unwarranted action and challenge those "instant" experts in the Administration whose aim it is to kill the Oahe Project and other water development projects to justify their actions. We do not believe they can do so. This includes such agencies as the Federal Fish and Wildlife Service which is threatening farmers throughout the project area with condemnation of some of their best farm land for wildlife mitigation. This action must be stopped. If wildlife acres are to be obtained, we believe they must come from willing sellers. For our part we shall not set idly by and watch as the new "open" Administration dismantles water resource development efforts which have developed over many years throughout the United States. We abhor this type of heavy-handed Federal intervention and turn to Congress and those sensible persons in the Administration to support these vital projects.

Our reasons for support of the Oahe Project are many. We believe the Oahe Project will substantially increase and stabilize the state's agricultural economy. The increased value to the State and nation's economy has been estimated conservatively at $170-million annually which would yield $8.5-billion in 50 years. Since 1973 and the Arab oil embargo, agricultural commodities have accounted and been largely responsible for maintaining a favorable balance of payments for the United States. The Oahe Project and other water resource development projects like it will contribute materially to increased agricultural production which will certainly be needed to maintain such a favorable balance of payments. This is especially true in light of the burgeoning demand for foreign oil purchased at ever increasing costs.

We believe that the Oahe Project will help to assure the future of family farming in South Dakota by providing a hedge against the all-too-common drought. During the current drought, perhaps the worst ever in South Dakota, we have learned that the only way to maintain our agricultural economy is through irrigation. Additionally, the Oahe Project will provide much needed municipal water supplies to South Dakota cities who are desperately short of water. Fish and wildlife habitat will be enhanced. Jobs will be created and maintained. The benefits of the Project, in our opinion, more than adequately justify its construction.

Of great concern to us is the impact that non development of the Oahe Unit will have on hydro electric rates. Cost allocations for the facilities authorized by the Pick-Sloan Plan recognized irrigation development as paying a portion of those costs. Accordingly, approximately $144-million of monies already expended to provide the power facilities and storage reservoirs for the Oahe Project have been allocated interest free to be repaid by the revenues derived from the Oahe Project. The users of electric power from the Pick-Sloan facilities pay most of the remaining reimbursable costs of the authorized Pick-Sloan facilities. Should the Oahe Project not be developed, those irrigation costs presently allocated for repayment by the Oahe Project must be repaid by other multipurpose functions. We are convinced that these costs will be allocated to power users.

The Upper Missouri Region of the U.S. Bureau of Reclamation has projected such a reallocation of costs will result in an increase infirm hydro electric rates of 0.6 mills per kilowatt hour. This would mean a 12.4 percent rate increase to preference customers. The Garrison Project in North Dakota, also targeted for termination by the Administration and another irrigation feature included in the Pick-Sloan Plan, will add another 10.6 percent (0.51 mills per kilowatt hour) to the amount to be repaid by power users if it is not developed. Thus, termination of both projects (Oahe and Garrison) will result in a total increase in firm hydro electric rates of at least 23 percent.

In terms of dollars, an increase of 0.6 mill per kilowatt hour would have meant that the customers in South Dakota who purchase hydro electric power would have paid $956,132 more for power purchased in 1976. If both Garrison and Oahe are not developed and hydro rates were increased by 1.11 mills per kilowatt hour it would have meant a staggering $1,768,843 increased electric bill to South Dakotans in 1976. And these costs will continue on an annual basis for 40 to 50 years into the future. Attached is Exhibit A which I request be included in the record as part of this statement. It is a listing of the costs which would be incurred by South Dakota hydro electric customers.

The beauty of the Pick-Sloan Plan is that the investments allocated to power users are to be repaid before the investments allocated to irrigation. This means the development of the Oahe and Garrison units will not affect hydro electric rates.

The conclusion is obvious. Non development of the Oahe Unit will result in at least a 12.4 percent rate increase from the Bureau of Reclamation which translates into millions of dollars in increased electric bills for South Dakotans.

Allegedly the Oahe Project has "significant remaining adverse environmental impacts". If this is true, which we doubt, especially in consideration of the unchallenged Federal Court decision indicating that the Oahe Project does comply with Federal law, then the method to correct or mitigate such alleged impacts is not to withdraw funds. If these alleged problems are to be resolved and the intent is not to kill the Project, then the logical decision must be to continue funding so that the Project can be developed on an orderly basis. We suspect, however, that those who have recommended the funds be withdrawn have only one thought in mind—stop Federal water development.

The Oahe Project even with the present discount rate of 6⅜ percent retains a favorable benefit-cost ratio of 1.37 to 1. However, we question the "wisdom" of applying this discount rate, which in our opinion is too high, for we are certain that by far the greatest percentage of Federal government expenditures are not justified by such a "paper rate of return." We wonder if the $2.1 billion advanced by the Federal government to the city of New York for this fiscal year would stand such a fictitious test. We doubt it. If it makes such good sense to change the discount rate from 3⅛ percent to 6⅜ percent, both of which yield positive benefit cost ratios, then it should also make sense to seek out those owners of the land that was purchased by the federal government in the 40's and 50's to construct the Missouri River mainstem dams and reimburse them for the several hundred dollars per acre difference in present day land prices compared to when the land was taken. Such action is no more ridiculous than trying to apply the inflated discount rate of 6⅜ percent to a project which has been authorized by the Congress at 3⅛ percent. Once again we suspect the ultimate motive of those using this type of review is to stop Federal water development.

The Oahe Project apparently met the safety criteria used.

It is clear that those in the Administration who are trying to stop the Oahe Project and other water development projects are willing to disregard and circumvent the Constitutional safeguards within which our nation is structured. In the case of the Oahe Project it has developed within the Constitutional framework of legislative, executive and judicial validation. Now we are seeing a handful of zealots apparently determined not to abide by statutes passed by Congress and signed by a past President. Neither are they willing to accept the judicial decisions made by the courts on this Project.

In this are of a nationally depressed economy when the Federal government is appropriating billions of dollars to create jobs for the unemployed, it is beyond our understanding how we can destroy hundreds of jobs by not developing already justified projects such as the Oahe Project. The Oahe Project is the result of a commitment made by the Federal government at the time over 500,000 acres of South Dakota river bottom land were sacrificed to provide storage for the four mainstem dams located in South Dakota. To terminate development of the Oahe Project can only be interpreted as a breach of that commitment as well as the breach of already signed contracts between the Federal government and the State. The Oahe Project is merely an orderly continuation of the development authorized by Congress for the Missouri Basin. The Oahe Project is one feature of the multipurpose development of the Missouri Basin. We urge the Federal government to live up to their commitments.

We urge that funding for the Oahe Project be continued. We believe that modifications to enhance the project can be made as orderly development progresses. Further review of this manner should be discontinued and the efforts of both the Federal and State entities directed at improving the Oahe Project and not trying to kill it without justification.

EXHIBIT A

Based upon the most recent information received from the Upper Missouri Regional Office of the U.S. Bureau of Reclamation (USBR), Billings, Montana if the Oahe and Garrison Units were not constructed the rates for hydro electric power are projected to increase by at least 23 percent. For calendar 1976 the South Dakota customers of the USBR would have had to pay the following added costs for firm hydro electric power, if the rate increase would have been effective during 1976. These added costs are annual increases which would be reflected for each year after the Oahe and Garrison units are terminated:

EXHIBIT A

BATAAN-CORREGIDOR DAY WOULD COMMEMORATE FAMOUS WORLD WAR II BATTLE

Mr. MATSUNAGA. Mr. President, I am today introducing legislation which would authorize the President to proclaim February 16 as Bataan-Corregidor Day.

Enactment of my joint resolution would commemorate the famous World War II battle in which soldiers of the United States and the Republic of the Philippines fought gallantly side by side, and it would reinforce the strong bonds of friendship which exist between the United States and the Republic of the Philippines. It would be very appropriate if this measure could be passed and signed into law on Independence Day which is celebrated on July 4 in both the United States and the Philippines.

When the Imperial Air Force of Japan bombed Manila on December 8, 1941, the day after Pearl Harbor, Gen. Douglas MacArthur commanded a force of some 30,000—about 15,000 American troops and about 15,000 Filipino soldiers and reservists. The enemy invasion force numbered 200,000. Badly outnumbered, General MacArthur and his troops slowly withdrew to the Bataan Peninsula, setting up their headquarters at Corregidor. There, they fought tenaciously, withstanding onslaught after onslaught by enemy infantry, artillery and air power, even though nearly half of them were wounded or ill and all were near the point of starvation.

It was to these valiant forces that General MacArthur made his famous pledge: "I shall return."

In May 1942, General Wainwright, the new Commander of the Allied Forces, which was then reduced to about half of its original numbers, was forced to surrender. All endured the infamous "Death March" to prison camp at Camp O'Donnell.

That was not the end of the story, however. In October 1944, General MacArthur, true to his word, waded ashore at Leyte. The following year, on February 16, American and Philippine forces reclaimed Bataan and Corregidor. It is that date which would be commemorated by passage of my resolution.

AIRLINE DEREGULATION

Mr. McGOVERN. Mr. President, in the consideration presently being given to deregulation of the Nation's commercial airlines, there has been insufficient attention given to the problems that would result in those States with no major trunk service—or limited access to trunk carriers.

In South Dakota and other States where we are dependent on regional subsidized carriers for much of our local service, we find deregulation poses a threat to existing service patterns.

In reviewing S. 689, the "Air Transportation Regulatory Reform Act of 1977," I find it is silent on the future of rural air transportation. Other supplemental measures to S. 689 allude to the problem, but suggest as a solution some form of third-level carrier which we in South Dakota find unacceptable.

I believe that other States with similar problems would be well advised to express their concern in the hope of making appropriate changes in the pending measures to insure that service to rural areas of the country is continued.

I ask unanimous consent that my statement on this matter submitted to the Aviation Subcommittee of the Senate Committee on Commerce, Science, and Transportation be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR GEORGE McGOVERN TO THE SENATE COMMITTEE ON COMMERCE, SCIENCE AND TRANSPORTATION ON S. 689—"AIR TRANSPORTATION REGULATORY REFORM ACT OF 1977" AND RELATED MEASURES

Mr. CHAIRMAN. I appreciate this opportunity to address the Committee in relation to its consideration of S. 689, the "Air Transportation Regulatory Reform Act of 1977", together with other measures presently under consideration that have a bearing on airline service.

South Dakota shares the concern of the sponsors of this bill that the economic vitality of the nation's air carriers be improved and that service be fully responsive to the public need. Obviously, in highly competitive market situations and city pairs, adjustments in operations as they relate to more carrier flexibility on service offered is desirable. We know that we must make it possible for carriers to substantially increase their load factors, not only to maximize the return of energy expended, but also to insure that to the fullest extent possible each flight will pay its own way. We are encouraged, as well, by the promise of some reduction in airfares on certain routes.

When S. 689 was introduced it was characterized as "designed to change the direction of regulation rather than abolish it". S. 689 is similar to S. 3830 introduced in the 94th Congress, but in that context I was pleased to note that this measure, as presently drafted, does not purport to speak to the problems of the "future of airline service to small communities", but that this Committee intends to deal with that question during the hearing process.

It is toward that service to "smaller communities" that I wish to address my remarks today.

South Dakota is distinguished from its sister states in the upper great plains in that we have no major national trunk air carrier serving our State, nor do we have any Amtrak or other transportation systems available. In practical terms, we are dependent on the private automobile and the commercial airline for both intra and interstate travel.

South Dakota presently has commercial airline service as follows:

Western, Ozark and North Central serving Sioux Falls, Frontier, Western and North Central serving Rapid City, North Central and Western serving Pierre, and North Central Airlines service to Aberdeen, Watertown, Huron, Mitchell, Brookings and Yankton.

South Dakotans, using these carriers, generally have access to the major trunk airlines through terminals at Minneapolis/St. Paul, Chicago, Denver and Omaha.

We are concerned that if legislation is adopted that will permit open exit and entry to various markets that those airlines presently receiving subsidies to operate in relatively low density areas will pull that equipment in order to maximize their impact in other areas where they could compete to increase their load factors. This would result in a complete lack of service for many boarding points in South Dakota.

We do not find the so-called "third level or commuter" service to be adequate. There is no guarantee that once a presently certificated carrier has withdrawn from a community that any third level carrier would apply to provide service. The front money required is seldom available for any untried company, there is understandable concern over interline transfers, the additional plane changes involved and a safety factor that mandates larger aircraft. South Dakota is at the center of weather systems that make flying scheduled service a job for a professional airline in our part of the country.

There is also no guarantee that a third level carrier—even with a flow-through or direct subsidy arrangement—would continue service. With limited access to high volume routes to balance those segments for which substantial subsidy is required, third level carriers simply do not have the financial stability to provide the kind of service that is required. It would not be unusual, for example, for a third level carrier to be certificated on the premise of a certain quality of service only to subsequently discover that the cash flow was not available. Service would have to be cut back and eventually eliminated entirely. The Federal Government cannot be expected to fully subsidize a third level carrier. The present system which permits a regional carrier to balance profitable routes with unprofitable ones—and blend in a subsidy as needed—not only works well, but makes sound economic sense for the taxpayers, provides good service to areas that might not otherwise have it and will, in most instances, generate a profit for the airline involved.

Millions of dollars have been spent by the Federal Government, in association with state and local expenditures, to bring the South Dakota airport and airways system up to acceptable standards and to permit them to accept larger jet aircraft. It makes bad public policy to mandate these expenditures—and then to, in effect, tell airport boards and managers that their system which is capable of handling commercial jets, will now only be serviced by a smaller aircraft that will try to make up in frequency and "daring"—what they lack in capacity and safety. We have welcomed the increasing sophistication of the airways system which permits the utilization of aircraft that means a better and safer trip.

By the same token, we cannot afford to leave airports where a substantial investments of public funds have been—unused by the very kinds of equipment for which they were designed improved and maintained. Such a substantial departure from established Federal policy and the historic commitment by state and local government to airport development does not make economic sense and does not fit into a national airline system approach to transportation needs.

The airlines themselves have expended vast sums in their local facilities in the communities they serve. Literally thousands of people's jobs are directly or secondarily involved in airline service in our State. Companies that have located or re-located in South Dakota have predicated their site selection, in part, one the type of airline service we have. They will not stay in place without fully adequate access to the airlines.

As equipment capacity increases, South Dakota has grown increasingly reliant on air freight for what we produce and ship—and what we buy from other parts of the country. Smaller aircraft cannot provide this service—some of what is of an emergency nature. It is not unusual, for example, for medical supplies to be flown to the point of need through our commercial air service. During harvest

season, we frequently need to fly in critical parts for our farm equipment so that the harvest may continue. Almost every South Dakotan is dependent, in one way or another, on the availability of air freight to bring us what we need—when we need it—and to send what we have elsewhere in the country as it may be required.

Mr. Chairman, almost a half million passengers boarded commercial aircraft in my State last year. Outbound passengers were fed into the major trunk systems as part of the overall national commercial airline network. Incoming passengers utilize our four airlines after transfering from trunk lines at major air terminals. These regional airlines provide a vital and necessary link for rural America to have access to the rest of the country. The Congress cannot adopt a policy that Americans who do not live in metropolitan areas—are forbidden to fly. But if S. 689 and the other pending measures are designed to remove the subsidy presently provided and to encourage local service carriers to schedule their aircraft elsewhere—then the result will surely be that those who live in South Dakota and other essentially rural areas will be left in the backwater of commercial aviation; with the dream of a truly national airline system gone forever.

South Dakota is not asking for some new program—some new expenditure of hard earned tax dollars. We have a workable blend of public and private involvement in our air transportation system in South Dakota now. We want to keep it. We are asking that this Committee carefully and thoughtfully assess the basic economic values involved here—and to make provision for states like ours in your final bill. Let us keep what we have—or let us improve it—but do not under the guise of "de-regulation or reform" destroy the existing airline systems in rural America. We desperately need the service.

THIS IS HOW IT WAS DONE

Mr. ABOUREZK. Mr. President, 6 months has passed now since the tragic, needless, and barbaric assassinations of Orlando Letelier and Ronni Karpen Moffit, two people who had done nothing but to speak their conscience. From time to time, we hear snatches of information "on the progress of the investigation," despite reliable and corroborated facts from various sources as to the true perpetrators of this crime.

The FBI and the Justice Department have indicated the identities of the killers are known, but the fundamental question remains: Will they be brought to justice for this hideous crime? I am shocked and saddened that more forceful action has not been taken concerning the assassins of Orlando Letelier and Ronni Karpen Moffit. Not only do we have a binding obligation to uphold the American judicial system, but we also have a moral responsibility to protect people living in the United States from brutal acts based solely on their beliefs and conscience.

Mr. Saul Landau and Mr. Ralph Stavins were both colleagues and close friends of Orlando Letelier and Ronni Karpen Moffit. They have written a fine article in the Nation which I ask unanimous consent to have printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THIS IS HOW IT WAS DONE

(By Saul Landau and Ralph Stavins)

Six months have passed since Orlando Letelier and Ronni Moffitt were murdered on Embassy Row in Washington. No arrests or indictments have occurred. From our own investigation, published reports and Justice Department sources the names of several of the suspected assassins are known. From independent evidence that we have gathered, the suspects' motives and key details of the crime have emerged. The FBI and Justice Department findings concur in crucial detail with the conclusions drawn from our inquiry.

The actual plot for the murder began during a debate within the Chilean junta in June 1976. Letelier had received a letter from a reliable source which described this discussion. The question arose whether or not to assassinate Letelier, whom all members of the ruling council judged a danger to the regime. Gen. Augusto Pinochet made special reference to Letelier's public attempts to isolate and denigrate the ruling junta—his part in blocking a $63-million Dutch investment, his testimony before the United Nations and other world bodies about torture in Chile, his relationships with members of Congress and State Department officials (Letelier lunched from time to time with William Rogers, Assistant Secretary of State for Latin American Affairs, and had close contact with outspoken legislative critics of the junta, Senators Kennedy, McGovern, Abourezk and Humphrey, and Congressmen Fraser, Miller, Moffett and Harkin); his influence at international banking and lending agencies (Letelier was an economist and a former high official of the Inter-American Development Bank). Letelier stood for the Chilean law and constitution, for human rights and reason—in a word, legitimacy, underlined by his presence in Washington. All the junta had to rule with was terror.

The "moderates" around the Santiago decision-making table argued that, while Letelier constituted a clear and present danger, his assassination at that time would not augur well for future relations with Washington. The "hards" said, "kill him; the United States is soft on communism anyway." They no longer felt concerned over possible U.S. reaction to assassinations. They already felt betrayed.

The moderates prevailed. Instead of assassination a compromise was agreed upon: Letelier was stripped of his Chilean nationality by a junta decree. This decision reached in June, was not published in the official *Gazette* until September 10, 1976.

Several elements entered into the junta debate. The most important factor was that, contrary to the public impression, U.S.-Chilean relations had suffered a steady decline over the previous year. Because of flagrant and well-documented violations of human rights, the U.S. Congress began to reduce the large benefits it had been granting to the junta since the overthrow of Allende. Congress stopped all military aid, sharply cut back economic aid, and inserted human rights provisions into aid legislation. From a 1975 peak of $273 million, U.S. aid was halved in fiscal 1976 and halved again for fiscal 1977. Three members of Congress and their staffs traveled to Chile and, upon their return home, gave eyewitness accounts of the horrors of daily life under the military dictatorship. In addition to such open condemnation of the regime by Congressional leaders, the Ford administration voted in early 1976 to denounce Chile at the United Nations for its systematic violation of human rights, and the State Department through the U.S. Embassy in Santiago delivered signals of diplomatic disapproval.

The sum of these gestures did not indicate an impending break in relations; indeed, one could interpret them as messages to mend one's brutal ways. But the junta responded with puerile rebelliousness. Its leaders, realizing that Congress was determined to cut their aid significantly, boasted that they didn't want it anyway. Chile's economic minister announced that Chile needed no more foreign loans, since the Chilean economy was already glutted with foreign credit.

The Chilean press increased its attacks upon liberal U.S. legislators. Senator Kennedy was branded a Communist leader and cartoons in the junta-controlled Santiago dailies portrayed other powerful Senators conspiring against the junta, with Mrs. Hortensia Allende, the slain President's widow, goading them on.

Pablo Rodriguez, leader of the ultra-Right *Patria y Libertad* movement, asked on Chilean TV, "Why has Chile become an electoral banner used in the U.S. to win votes? I believe it is because to a great extent international communism has been attracting those nations where eventually there might be a conflict." Detente, according to officials in Chile, had proved that the United States could no longer be trusted. (Shortly after the murders, former Chilean Ambassador Manuel Trucco, responding to Presidential candidate Carter's attack on the junta and U.S. involvement in the coup, wrote Carter warning that his advisers were Marxist dupes.)

Letelier's published writings continued to throw doubt on the junta's economic and political legitimacy. In the August 28, 1976, issue of the *The Nation*, he published an article, "Chile: Economic 'Freedom's' Awful Toll," which connected the campaign of state terror to the junta Milton Freidman economic model. Despite the ubiquitous terror, Letelier concluded, the generals showed no capacity to mold a viable economy, and future investment in Chile was foolhardly.

On September 10, 1976, Letelier learned of the decree stripping him of his nationality. At a scheduled speech at Madison Square Garden, New York, he gave his reply: "I was born a Chilean, Iam a Chilean and I will die a Chilean. They, the Fascists, were born traitors, live as traditors, and will be remembered forever as Fascist traitors." The overflow crowd roared its approval. DINA agents attended the rally and reported to Santiago.

We believe that General Pinochet and his DINA chief, Manuel Contreras, called a special meeting to discuss these, for them, unfavorable recent events. This time the moderates lost. Pinochet ordered DINA to "hit" on Embassy Row in Washington, D.C. as Pinochet's "symbolic" response both to Letelier's resistance and to the United States' "betrayal" of its promised support.

From several sources inside the U.S. Government, we have learned that a high-level DINA official was instructed to conspire with Cuban exiles in the United States for the actual killing. The DINA-exile connection, by then many mnoths old, had come about as naturally as a marriage between Mafia families. Shortly after the 1973 coup, Col. Eduardo Sepulveda, a close friend of Pinochet, was dispatched to Miami to meet with Cuban exile leaders. Ramior de la Fé, a Bay of Pigs veteran who had served time for possession of explosives, and who was a spokesman for several terrorist groupings, consulted with Sepulveda and helped him set up a front group in the United States to promote the junta's image. In return, according to former exile activist, Carlos Rivero Collado,* Sepulveda promised moral and material aid in the exiles' private war against Castro and the Cuban Revolution.

* Carlos Rivero Collado was active in Cuban exile affairs until he recently returned to Cuba, revealing all he knew of exile politics.

In early 1974, the junta blessed the arrangement by sending Julio Duran to deliver a keynote speech before the exile community in Miami. Duran, Chile's delegate to the U.N. General Assembly and a leading figure in *Patria y Libertad*, promised the exiles that henceforth, Chile would support their cause.

The exiles, most of whom the CIA had abandoned because of periodic policy changes and the fallout from Watergate, became the junta's adopted sons. The junta and the exiles shared the same enemies and ideology. Chile, not the United States, was dedicated to the overthrow of Castro; Chile, not the United States, was now the hemispheric leader in the struggle against international communism; Chile, not the United States, was willing to use terror as a routine tool of policy. The exiles had new parents, and, judging from the frequency of their visits to Chile, a new home. In 1975 Brigade 2506, composed of Bay of Pigs veterans, awarded Pinochet its "medal of freedom."

According to Carlos Rivero Collado, from 1974 to 1976 the Cuban exile terrorist groups, with Chilean moral and material aid, launched a number of violent attacks in and out of this country. Their targets included not only the Cuban Revolution but some of their newly defined enemies in the United States. In one incident, Emilio Milian, a Miami-based Cuban exile, who advocated détente with Cuba, had his legs severed when a C4 bomb exploded in his car, the identical method used later to eliminate Letelier. (For details of atrocities committed by Cuban exiles in the recent past, see "Miami, Haven for Terror," The Nation, March 19.)

Our evidence indicates that a high-level DINA agent landed in Miami on September 13, 1976, and met with a group of Cuban exiles who had already been alerted that a "contract" was in the offing. The DINA agent worked out the details of the Letelier assassination with four young terrorists noted for their daring and coldbloodedness. Having secured a plastic explosive and a detonating device, they departed for Washington. There they met with DINA agents, posing as Chilean officials, stationed at the Chilean Embassy. The Washington-based operatives briefed the exiles on Letelier's habits, his car description, daily departure times, route to work, parking location, and probable work schedule at the Institute for Policy Studies during the following week.

The next afternoon, Justice Department sources confirm, a group of Cubans made an official call upon their Chilean Ambassador, Manuel Trucco, to "protest" the extradition of Rolando Otero, a fellow Cuban exile, from Chile to the United States, there to stand trial for bombings in the Miami area. This visit to the Chilean Embassy could serve in the future, should it be necessary, to explain their presence in Washington.

Upon leaving the Chilean Embassy, they probably drove to an alley behind the Institute for Policy Studies, where Letelier routinely parked his car. The explosive was taped to the I-beam of the car, under the driver's seat, for maximum impact. The car may have been driven to test whether the plastic would remain in place. Just the day before a set of Letelier's car keys had been stolen from his office and when Letelier arrived at the car at 6:30 that evening, one of his companions pointed out that the right front door was ajar. He shrugged it off, saying, "Oh, I must have gotten out on the wrong side today."

The next morning Letelier drove to National Airport, parked his car for the day, and took an Eastern shuttle to New York. He returned on Saturday for a party at his house to celebrate Chilean Independence Day.

Monday, the day before the assassination, Letelier worked at his office. At the end of the day, he phoned Isabel, his wife, confirming a dinner-work engagement at home for that evening with Michael and Ronni Moffitt. When Moffitt discovered that his own car would not start, Letelier phoned again explaining that the Moffitts would drive with him. They stayed until midnight, and then drove Letelier's car to their own home, it being agreed that they would pick him up and drive to work together the next morning.

At 8:45 Tuesday morning, a Latin woman walking in front of Letelier's residence noticed a late-model gray sedan parked near the Letelier driveway. Three occupants sat inside and one man stood by the car. She identified him as "certainly a Latin," about 30, wearing a gray suit and tie. The four appeared to be enjoying an "inside joke," she said.

At 8:55 the Moffitts arrived in the Letelier car, and pulled into Letelier's driveway. Engaged in conversation, they did not notice any other vehicles nearby. As soon as they entered the Letelier residence, one of the group of four must have crawled under Letelier's car and attached the detonating device to the plastic charge—a procedure that requires only seconds.

At 9:15, Letelier, Ronni and Michael Moffitt left the house and began the drive from Bethesda to the District of Columbia. Letelier took the route he always drove—River Road to 46th to Massachusetts Avenue. They talked about the day's business and the dreary weather. No one paid attention to a gray sedan trailing them at a "safe" distance.

As Letelier entered Sheridan Circle, a hand in the gray car depressed a button. Michael Moffitt heard the sound of "water on a hot wire" and then saw a "white flash." Thrown clear of the explosion, Moffitt tried to free the unconscious Letelier from the wreckage on top of him. His legs had been snapped from his body and catapulted some 15 feet away. Ronni Moffitt stumbled away from the smoldering Chevrolet; she seemed to be OK, but in fact had suffered severed artery and soon bled to death. Michael screamed out into the world, "The Chilean Fascists have done this."

This reconstruction of the assassinations, based upon evidence gleaned in six months of probing and with some educated guessing, is supported by what we know of FBI findings. In crucial areas, our conclusions and those of the Justice Department match exactly: a DINA official, himself under orders from "above," ordered and supervised the "hit"; Cuban terrorists carried it out; plastic explosive was the murder instrument.

Most of the FBI and Justice Department officials investigating the murders have made a concerted effort to bring the perpetrators to the bar of justice. At the same time, other agents inside the government have leaked material from Letelier's briefcase, seized by the police as potential evidence at the time of the explosion. The leaked material first appeared on the desks of several officials of the Inter-American Development Bank, where Letelier had served for many years. Next, the briefcase material was given to newspaper columnists Jack Anderson and then to Evans and Novak. The columns which these men wrote attempted to discredit Letelier and divert attention from the actual killers—General Pinochet, the Chilean junta, the DINA and their Cuban exile hit men.

The names of most of the killers, their motives, and their *modus operandi* are now known to the Justice Department. What remains are the more fundamental questions: will the U.S. authorities be allowed to gather sufficient evidence to bring the killers to trial? Will they name General Pinochet and other ruling junta members who ordered the assassinations? And will the role of U.S. intelligence and defense agencies, which had previously trained junta leaders, DINA agents and the exiles, be revealed in full?

THE SUNSET ACT OF 1977

Mr. GLENN. Mr. President, the Sunset Act of 1977 is now being evaluated in hearings before the Subcommittee on Intergovernmental Relations of the Governmental Affairs Committee. Senator MUSKIE, who has been the leading advocate of sunset legislation, is chairman of this subcommittee.

In working with Senator MUSKIE on this legislation, I have been particularly concerned that it include sunset provisions for tax expenditure as provided in title IV.

At today's hearings, Senator EDWARD KENNEDY appeared as a witness in favor of the Sunset Act, and particularly in favor of title IV, the tax expenditure portion of the act.

His statement was such an excellent treatise of the whole concept, Mr. President, that I ask unanimous consent that it be printed in the RECORD, and hope it will receive the careful, and I hope favorable, consideration it deserves.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

TESTIMONY OF SENATOR EDWARD M. KENNEDY, TAX EXPENDITURES AND S. 2, THE SUNSET ACT OF 1977, SENATE SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

I am pleased to have the opportunity to appear before this Subcommittee and to testify on S. 2, the Sunset Act of 1977.

I regard the sunset concept as one of the most imaginative and innovative approaches to government reform that has been proposed in many years, and I especially commend Chairman Muskie and the other members of this Subcommittee for their efforts to bring this issue before the Senate. I pledge my full support to achieve enactment of this important new building block in the structure that Congress is gradually creating to establish more rational and effective Congressional oversight of the federal government in general and the federal budget in particular.

In my testimony today, I do not propose to deal with the general issues involved in the sunset legislation as it applies to direct federal spending programs. This Subcommittee has studied these issues in depth, and the current hearings will help to refine them even further for action by the full Senate in the coming weeks.

Rather, I wish to direct my comments to one particular aspect of the bill—the critical necessity that the sunset legislation should treat tax expenditures and direct outlays in the same fashion.

Failure to include tax expenditure programs in the sunset legislation would mean that a significant portion of the total federal budget would remain outside the process of regular congressional review and evaluation of federal subsidy programs.

The sun does not only rise and set on direct expenditures. The sun also rises on tax expenditures. And that same sun must also set on tax expenditures, if the Sunset Act is to reach its goal.

In understanding the need to apply the sunset concept to tax expenditures and the mechanics of implementing that concept it is useful to review briefly how the tax expenditure concept developed and the present state of knowledge concerning the tax expenditure process.

DEVELOPMENT OF THE TAX EXPENDITURE CONCEPT

In the 1960's, work in the Treasury Department demonstrated that the federal tax system is composed of two separate and quite distinct components.

One component—which is the structure most people have in mind when they think of the tax system—consists of the rules necessary to raise and collect taxes. These rules set forth the standards for defining net income, the rates of tax, the annual time periods within which taxes must be paid, the persons and groups required to pay the tax, and the administrative provisions necessary to implement and collect the taxes. These are the basic provisions necessary to establish and maintain any type of income tax system—the so-called "normal" or "structural" part of the system.

But there is a vast number of other provisions in the Internal Revenue Code that do not play any part in defining this "normal" income tax structure. In contrast, these other provisions are measures added by Congress to the Internal Revenue Code to achieve non-tax goals of the federal government.

These goals were numerous and of obvious concern to government. They included better health care, stimulation of investments in machinery and equipment, encouragement of gifts to charitable organizations, incentives for home ownership, inducements to drill for oil and other natural resources, and many other worthwhile objectives. But these goals are not tax goals of the federal government. They are spending goals, and the funds involved are federal subsidies as surely as any direct outlay program involves a federal subsidy.

Accordingly, in the annual report of the Secretary of the Treasury in late 1968, these non-tax subsidy provisions contained in the Internal Revenue Code were finally identified and quantified by Secretary of the Treasury Joseph Barr, who presented the first tax expenditure budget.

In that budget, the numerous spending provisions in the Internal Revenue Code were treated as the functional equivalent of direct outlay programs. That is, these special provisions were viewed as a mechanism by which Congress collects, authorizes and appropriates funds for the objectives set forth in the various provisions. Viewed in this way, each tax spending program could be identified and assigned to the same budget category as related direct outlay programs in the regular budget.

In each subsequent year since 1968, a tax expenditure budget has been prepared by the staff of the Joint Committee on Taxation, working with the Treasury Department and, in recent years, with the Congressional Budget Office.

The identification of these tax provisions as the equivalent of direct outlay programs has proved to be a crucial turning point in our understanding of the total budget picture and the universe of Federal spending programs. As the tax expenditure budget makes clear, when Congress decides to provide financial incentives or support for a particular goal, it always has a choice between two methods:

It can provide the needed financial aid through direct outlays, using the traditional authorization and appropriations process.

Or, it can use the tax expenditure route, in which the authorization and appropriations processes are telescoped into a single action within the House Ways and Means Committee and the Senate Finance Committee. In some respects, tax expenditures are analogous to permanent appropriations or entitlement programs, which are also especially troublesome aspects of the budget because they too short-circuit the crucial authorization-appropriation process.

USES OF THE TAX EXPENDITURE BUDGET

The realization that Congress can write any spending program either in the form of a direct outlay or in the form of a special tax provision makes it obvious that Congress must apply the same tests to tax expenditure programs as we already apply to direct outlay programs.

Thus, whether the issue is a tax expenditure or a direct expenditure, Congress must satisfy itself about the following questions:

Is there a need for any federal spending program at all?

If there is a need, what form of federal spending program most effectively meets the need—such as direct grants, loans, or loan guarantees on the one hand, or tax subsidies on the other hand?

What standards and limitations are required to insure that the program is equitable and that its benefits outweigh its costs?

If these questions are addressed legislation can then be written using either a direct outlay program or a tax expenditure program that reflects the answers Congress has given to the questions.

The problem is that Congress has yet to develop a set of rational criteria for determining when to use a direct outlay or a tax expenditure approach to achieve a particular federal goal. A major cause of the problem is the structure of the committee system in Congress. There is virtually no coordination in this respect between the tax-writing committees and the other standing committees, even though both types of committees are addressing the same national problems and both types of committees are proposing ways to spend federal dollars to solve them.

Although the Senate Committee system reorganization resolution passed earlier this year did not deal with this basic flaw in the present system, it is only a question of time before Congress, faced with irresistible budget constraints, will have to develop adequate methods to coordinate tax spending programs and direct spending programs.

The basic understanding that tax expenditure programs can be structured and analyzed in the same manner as direct expenditure programs carries with it important implications for the budget process. For example, the tax expenditure budget makes clear that if Congress does not exercise the same oversight over tax expenditures as it exercises over direct outlays, the budget process is simply out of control. Accordingly, the Budget Reform Act of 1974 required the President to submit a tax expenditure budget along with a direct outlay budget for each fiscal year. In addition, procedures were set forth in the Budget Reform Act to insure that Congress would exercise its oversight responsibility over tax expenditures in a manner similar to its responsibility over direct outlays.

GROWTH OF THE TAX EXPENDITURE BUDGET

The tax expenditure budgets have also revealed, however, that we still have a long way to go before Congress brings tax spending under the same control that we have achieved with respect to direct spending. When Secretary Barr presented his first tax expenditure budget in 1968, tax expenditures totaled some $44 billion. For fiscal 1978, the joint tax committee staff estimates show a tax expenditure budget of $124.4 billion. The tax expenditure budget in the past decade, therefore, has grown by over 180%. By comparison, direct outlays in fiscal 1968 were $178 billion. President Carter has submitted a direct outlay budget for fiscal 1978 of $459 billion, a growth of "only" 160% over the past decade.

Obviously, if we are concerned about runaway federal spending in the direct budget, we also have to be concerned about runaway federal spending in the tax budget. Often, however, it turns out that those who call the loudest for restraint in direct spending programs are the biggest spenders when it comes to spending through the tax laws.

The current sorry state of Congressional control over tax expenditures is more the result of historical accident than logic or intent. The late recognition of the reality that large numbers of provisions in the Internal Revenue Code are actually spending programs has meant that the basic established Congressional review procedures are seldom, if ever, applied to tax expenditure programs.

Normally, when Congress moves by the direct outlay approach, an authorizing committee studies the issue, and recommends a level of funding. Then, the Appropriations Committee reviews the recommendation and sets a funding level consistent with other goals and needs.

But in tax expenditures, the House Ways and Means Committee and the Senate Finance Committee act as both judge and jury. They authorize a program and appropriate the funds for it in a single step. The disciplines and checks produced by the normal authorization-appropriation procedure are missing when tax expenditures are enacted.

This undesirable state of affairs is a long term problem for Congress to resolve. But recognition of this fact makes it imperative, as Congress moves step by step to implement effective budgetary procedures, that tax expenditures be subjected to the same controls as direct outlays.

THE SUNSET BILL AND TAX EXPENDITURES: OVERALL OBJECTIVES

Now, with the Sunset bill, we have the opportunity to take a major step in the right direction. I believe there are at least three widely accepted goals to be achieved by subjecting tax expenditures to the same sunset rules as direct outlays.

First, there will be a regular congressional review of tax expenditure programs.

Second, there will be better coordination between the review of tax expenditure programs and the review of direct outlays in the same budget category.

Third, there will be an opportunity to eliminate outmoded and inefficient tax expenditure programs.

I suspect that there is widespread agreement on these goals. They are reflected in Title IV of the Sunset Act and in the legislation that Senator Glenn has proposed in conjunction with the act. They are also reflected in the basic position of the Carter Administration. And OMB Director Bert Lance testified last week to this Subcommittee, reviewing outlay programs in a given area without also reviewing tax expenditure programs in the same area "would surely be inappropriate." Similarly, Secretary Blumenthal also testified last week that "it is important that outlays and tax expenditures be considered together."

There is thus a widespread recognition that the basic policies to be achieved by the sunset legislation can be realized only if tax expenditures are subjected to the same procedures as direct outlay programs. The real question, therefore, shifts from the agreement on this policy goal to the issue of technical implementation.

SUNSET LEGISLATION AND TAX EXPENDITURES: TECHNICAL IMPLEMENTATION

I strongly urge that the same procedures and sanctions that are applied to direct outlay programs in the Sunset bill should be applied to tax expenditures. I believe that the technical "problems" raised by some with respect to inclusion of tax expenditures in the Sunset bill can be easily resolved. The Senate—and the budget experts assisting us—should ask two questions when a technical objection is raised:

Is the same technical problem present in dealing with direct outlays? In other words, are there any technical problems present in terminating a tax expenditure program that would not also be present in terminating a direct outlay program, if the tax expenditure were considered as an outlay?

Are there any factors unique to tax ex-

penditures that require modifications in the sunset principles developed for direct programs?

I urge the Subcommittee to approach so-called "technical" problems in applying sunset legislation to tax expenditures with a healthy dose of skepticism. I suspect it will become quickly apparent that virtually all of the "technical" problems involved in terminating tax expenditures are equally applicable to terminating direct expenditure programs. With slight modifications, the procedures in S. 2 for terminating direct expenditures can apply equally well to terminating tax expenditures. The "technical" problems should not become a smokescreen for continuing the long and unjustifiable immunity of tax expenditures from responsible analysis and oversight in Congress.

By way of illustration, let me turn to some of the technical problems that have been raised with respect to the inclusion of tax expenditure provisions in the sunset legislation.

1. Defining tax expenditures

In his testimony last week, Secretary Blumenthal indicated that there might be problems in identifying tax expenditures. But the examples given do not suggest that the problems are significant. To illustrate his point, Secretary Blumenthal quoted a statement from a 1975 pamphlet of the staff of the Joint Committee on Taxation that indicated such difficulties. But that statement has not appeared in similar Joint Committee staff publications for the past two years.

With respect to the specific examples cited by the Secretary, no tax expenditure budget for the past ten years has included personal exemptions as a tax expenditure; every budget has included the standard deduction as a tax expenditure. To my knowledge, there is no disagreement as to either treatment.

Moreover, the Treasury seems to be concerned in its other examples by items that are not included in the tax expenditure budget. But the suggested definitional difficulties seem to be resolved in light of the thorough analysis that has characterized the efforts of the Congressional Budget Office and the Joint Committee on Taxation on this issue in recent years.

The Budget Reform Act of 1974 contains a workable definition of tax expenditures. So, too, do S. 2 and the legislation developed by Senator Glenn. Moreover, under the Budget Reform Act, the Committee reports of the House Ways and Means Committee and the Senate Finance Committee must identify new or increased tax expenditures. Therefore, the Joint Tax Committee and the Congressional Budget Office—as well as the Treasury—are given guidance by Congress as to the items that should be included in the tax expenditure budget.

The one modification that I would suggest in S. 2 is that the task of correlating the review of tax expenditure programs with review of direct outlay programs should be placed in the Congressional Budget Office. Review and termination of tax expenditure programs is primarily a budget matter, not a tax matter. Therefore, the responsibility for developing a timetable for termination of tax expenditure programs should not be placed with the Joint Tax Committee but with the Congressional Budget Office, the agency of Congress that is assigned to assist Congress in carrying out its budget responsibilities. Of course, the Congressional Budget Office should be directed to work closely with the staff of the Joint Tax Committee, the Congressional Budget Committees, the Treasury Department and the Office of Management and Budget in developing the schedule of tax expenditure termination.

2. Method of terminating tax expenditure programs

The Treasury also suggested that there may be difficulties in terminating certain tax expenditure programs. Again, this "problem" seems capable of easy resolution. Indeed, although Secretary Blumenthal expressed reservations about how to terminate certain tax expenditure programs, the appendix to his statement demonstrated how such programs could be terminated under the sunset legislation.

Terminating tax expenditure programs does not involve problems that are any more difficult to resolve than the problems involved in terminating direct outlay programs. The technique is somewhat different, because the technique of enacting spending programs through the tax writing committees is somewhat different than the technique of enacting direct outlays through the authorization-appropriation process.

To deal with this concern, the sunset bill should require that, six months before the scheduled termination date for a particular tax expenditure program, the Joint Tax Committee should submit a report listing the changes in the Internal Revenue Code (or Treasury Department rulings and regulations) that are required in order to terminate the program. The appendix to Secretary Blumenthal's statement last week provided an example of this kind of report with respect to the tax expenditure program involved in the sensitive area of the tax exemption for interest on state and local bonds.

In addition, if any substantial problems are encountered, the tax writing committees could employ the extension of time procedure in Section 504 of S. 2 that is available when difficulties are encountered in terminating direct expenditure programs.

In sum, as the Treasury statement put it, tax expenditures do "lend themselves to automatic expiration," just as do conventional budget outlays, and the Senate should not hesitate to apply the termination procedure evenhandedly to both types of federal spending.

3. Scope of tax expenditure programs

The Treasury testimony also suggests that the broad scope of some tax expenditure programs makes it difficult to apply the sunset concept. The example given is capital gains, but it is a curious example to select. The tax expenditure budget already divides the total capital gains tax expenditure into several different categories, including capital gains for timber, capital gains for coal and iron ore, capital gains for corporations, capital gains for individuals, and capital gains on property transferred at death. Perhaps further refinements in categories might be desirable. But it is obvious that the budget experts can divide broad tax expenditures into workable program categories that correspond to direct outlay programs.

The same process currently operates in other tax expenditure programs. For example, accelerated depreciation in the tax expenditure budget is shown in separate components for programs for rental housing, other buildings, machinery and equipment, corporations, and individuals. Thus the "scope" problem raised by the Treasury is really a matter that budget experts are easily capable of resolving.

4. Interrelationship aspects

The Treasury also suggests that the interrelationship among tax expenditure programs is unique to tax expenditures. As reports by the Congressional Budget Office have pointed out, however, these same interrelationships exist in direct spending programs. That is, if some direct expenditure programs are terminated, there will be a shift to other direct expenditure programs.

Moreover, if Congress terminates some direct expenditure programs, it may well choose to substitute new or improved programs in place of the discarded programs. For example, if the existing welfare programs were to terminate under the sunset legislation, it is obvious that Congress would want to substitute another program in place of the present system. The same is obviously true of tax expenditures. In this regard, terminating tax expenditure programs is no different from terminating direct expenditure programs.

5. Transition rules

The Treasury also noted that transition problems may be different for tax expenditure programs than for direct expenditure programs. Again, such problems do not seem to present serious difficulties. Capital recovery programs such as accelerated depreciation—the example used by the Treasury—are simply interest free loans provided by the government to business. The transition problems of terminating this loan program are no different from the transition problems of terminating direct loan programs that the government provides, for example, to farmers and small business. The transition techniques developed for terminating those direct programs are equally applicable to the transition techniques needed to terminate programs under the tax system.

6. Relation to tax reform

The Treasury also indicated that automatic termination dates might interfere with the tax reform process. But nothing in the sunset legislation prevents the Treasury and Congress from moving faster than the schedule prescribed in the sunset bill. One might as easily argue that the sunset bill will impede welfare reform legislation or national health insurance. But obviously, the sunset termination of federal welfare programs five years in the future does not prevent Congress and HEW from moving ahead on welfare reform as quickly as possible in 1977.

7. Estimating tax expenditures

On occasion, it is asserted that it is difficult to estimate tax expenditures. While this may be so, it is important to understand that the difficulties are hardly different from those encountered in advance estimates of direct outlays. Supplemental appropriations bills are often required when actual outlays exceed estimates. We are also familiar with the fact that in the past fiscal year, outlays in key areas fell well short of estimates, with resulting shortfall of $10–15 billion; the same shortfall problem is plaguing the Administration in the current fiscal year.

Budgets *are* estimates and the problems of estimating a tax expenditure budget are neither greater nor less than those involved in formulating a direct outlay budget.

CONCLUSION

I commend this Subcommittee and its parent committee for your efforts to produce legislation that will give Congress a new and more effective tool to provide greater oversight and control over Federal programs and the federal budget process.

I am confident that the committee's legislation will adequately cover direct outlay programs. I strongly urge the committee to apply the same controls to tax expenditure programs. Failure to do so will mean that more than $125 billion of federal spending—one-fifth of the total federal budget—will be left outside the control of Congress.

Such a large-scale abdication of our responsibility cannot be defended to the American people. We now have the chance—through the sunset concept—to provide effective oversight and control over every program in the federal budget. That oversight and control must also be exercised over each tax expenditure program, if the sunset approach is to be capable of fulfilling its great promise.

DISTINGUISHED PUBLIC SERVICE AT THE FOOD AND DRUG ADMINISTRATION

Mr. PERCY. Mr. President, in July of 1973, Commissioner Alexander Schmidt

took on the responsibility for administering the Food and Drug Administration—FDA. From that time until his resignation a few months ago, he consistently demonstrated very able leadership in dealing with the issues in FDA's area of authority. Many of these issues were engendered by recent scientific advances, leading to problems that are both highly technical and complex. There often were no easy answers.

Commissioner Schmidt accepted the challenge and handled it most professionally and adroitly.

Under his leadership, consumers, professional groups, and industry alike have seen increased openness in the FDA's operations. Communication has been fostered so that the scientific and regulatory decision-making processes now reflect viewpoints from many segments of society, as they should.

There was a great deal of agency activity at FDA during Dr. Schmidt's tenure. While I do not necessarily agree with each of the agency's decisions, the length and scope of the list of FDA's activities are apt testimony to the dynamism of this man. We from Illinois are proud of our fellow Illinoisan's considerable contribution to the food and drug field. I ask unanimous consent that highlights of FDA's accomplishments be printed in the RECORD following these remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SIGNIFICANT ACTIVITIES AND INITIATIVES OF THE FOOD AND DRUG ADMINISTRATION UNDER COMMISSIONER ALEXANDER M. SCHMIDT, M.D.

FOODS

Proposed regulations that will require declaration of drained weight or actual amount of fruit or vegetable in a container.

Required that fats and oils be identified specifically by origin on all food labels, thereby helping consumers to select those fats and oils they wish to consume for health, religious or personal reasons.

Amended regulations dealing with standardized foods to reduce the number of "mandatory" ingredients. This results in declaration of more ingredients on the package label.

Proposed regulations that would require declaration of the percentage of major ingredients in baby food products.

Initiated studies to determine whether artificial food and color additives may be related to behavioral changes in children (hyperkinesis).

Issued final regulations governing the labeling and composition of vitamin and mineral products used as dietary supplements. These regulations will increase consumer protection and awareness.

Banned FD&C Red No. 2, Red No. 4, and Carbon Black; revitalized final review of remaining provisionally listed colors.

Approved regulations prohibiting use of 13 substances as food ingredients and 2 substances as indirect food ingredients. Proposed actions to clarify the extent of testing the Food and Drug Administration (FDA) will require for various food ingredients; tightened requirements for listing substances used in food after 1958 as generally recognized as safe (GRAS) and established criteria for listing an ingredient as GRAS. These actions are an important milestone in assuring that all food ingredients, whether old or new, are evaluated for safety by the best available scientific methods.

Established procedures for the GRAS review so that consumers, scientists and industry would have the fullest opportunity to participate in the review process.

Established food service sanitation regulations, which with an updated model ordinance would provide food service establishments with standards and State and local governments with a comprehensive model law for more uniform regulation of food service sanitation.

Established criteria for setting "action levels" and/or tolerances for added poisonous or deleterious substances in food. Proposed regulations setting an action level for mercury in fish and shellfish and tolerances for lead in evaporated skim milk, polychlorinated biphenyls (PCB's) in packaging materials and aflatoxin in peanuts and peanut products used as human foods.

Ordered amendment of 10 canned fruit standards of identity to promote consistency with anticipated world-wide standards for these products, consistent with the standard being considered by the Codex Alimentarius Commission.

To establish an orderly development of information regulations, the Department of Health, Education, and Welfare, Food and Drug Administration, and Public Health Service reorganized and recodified regulations concerning quarantine control and interstate sanitation. Regulations cover Food Service Sanitation on land and air conveyances and vessels, equipment and operation of land and air conveyances, servicing area for land and air conveyances, and sanitation facilities and conditions on vessels.

Established good manufacturing practices for bottled water.

Under provisions of the Interstate Quarantine Regulations, which are administered by the Bureau of Foods, banned the commercial or public distribution of viable turtle eggs and live pet turtles to protect the public health against Salmonellosis.

Signed 18 documents as part of the Food and Drug Administration's continuing program to revise food labeling to make it better serve the consumer. These include a standard of identity for dietary supplements, revised regulations covering label statements on foods for special dietary uses, regulations for establishing common or usual names for certain foods, and regulations establishing microbiological quality standards for certain foods.

Prohibited the use of curing premixes in which nitrites or nitrates are combined with flavoring or seasoning in food.

Set limits on the safe use of certain amino acids in foods.

Signed memoranda of understanding with several European countries which export dry milk products to the United States to assure that these are safe and wholesome.

DRUGS

Proposed revision of the Good Manufacturing Practice regulations ("Umbrella GMP's") to assure quality improvements in drugs.

Took action to eliminate sequential type oral contraceptives from the market because of their relatively higher risk of adverse effect.

Ordered label revisions for estrogen drugs and proposed patient labeling for these products to alert physicians and consumers to potential risks of these drugs. Similar action was initiated for progestogens.

Initiated a project jointly with the National Bureau of Standards to develop improved ssytems for monitoring newly approved drugs for adverse reactions.

Established rules to be followed by all retail pharmacies which post or advertise the prices of prescription drugs. This has facilitated meaningful consumer comparison of such products.

Implemented the government-wide Quality Assurance Program, resulting in consolidation of responsibility in FDA for medical products procured by such government agencies as Department of Defense, Veterans Administration, and the Public Health Service.

Prohibited the use of vinyl chloride as an ingredient of drug and cosmetic aerosol products.

Approved regulation establishing requirements for marketing diethylstilbestrol (DES) for use as a post coital oral contraceptive and setting forth patient labeling for its use.

Established general labeling conditions for the safe and effective use of over-the-counter drugs.

Established production and control procedures to prevent asbestos-form articles in drugs for parenteral injection.

Proposed regulations designating a required format and the kinds of information that shall appear under each heading on prescription drug labels. These regulations are designed to provide the essential information the practitioner needs to use drugs safely and effectively in the care of patients.

Approved adoption of international standards for acceptance by FDA of foreign clinical drug studies. The regulation is designed to improve FDA's access to drug studies outside the United States.

Classified any aerosol drug or cosmetic product containing zirconium as a new drug or an adulterated cosmetic product.

Established standards for over-the-counter antacid and antiflatulent drug products.

Set forth conditions under which Digoxin may be marketed to assure required uniform potency.

Required oral contraceptive manufacturers to include in patient brochures the statement that the drugs have no value in treating venereal disease.

RADIOLOGICAL HEALTH

Promulgated performance standards for cabinet x-ray systems, assuring protection to users of industrial radiography, particularly airline baggage x-ray personnel.

Proposed mandatory safety performance standards to protect the public from improper exposure to radiation emitted by ultrasonic therapy and surgery equipment. Development of standards for ultrasonic equipment used in dentistry, eye surgery and diagnostic procedures is also underway.

Approved regulations involving the assembly and reassembly of diagnostic x-ray equipment.

Strengthened the performance standards for microwave ovens by requiring that specific safety instructions be included in user and service manuals and that all microwave ovens bear specified warning labels.

Published performance standard for laser products to protect persons from radiation hazards.

MEDICAL DEVICES AND DIAGNOSTIC PRODUCTS

Established procedures to better monitor pacemakers by instituting a pacemaker registry project.

Serious product defects in such life-sustaining devices as cardiac pacemakers, heart valves, blood pumps, aerial shunts, oxygen delivery systems, defibrilators, catheters, and hemodialysis units led to increased FDA recall and inspectional activity in this area. This was accomplished in the absence of definitive medical device regulation authority. The medical device amendments were enacted in 1976.

Proposed regulations that would require IUD's to bear uniform professional and patient labeling.

Proposed regulations governing the labeling and sale of hearing aids to increase consumer protection, especially for elderly persons.

VETERINARY MEDICINE

Monitored catastrophic events such as the accidental contamination of animal feed

at the expense of the American taxpayer and for the benefit, not of the United States—but of Panama.

[From the Waterbury Sunday Republican, Feb. 20, 1977]

DECISION ON CANAL'S FUTURE AT HAND

(By Hanson W. Baldwin)

We have now reached, because of the "waffling" of past administrations and long continued concessions, a point-of-no-return, when we must put up or shut up.

In 1974 Henry Kissinger unwisely signed a "statement of principles" to govern negotiations for a new Panama Canal zone treaty. Kissinger agreed that the concept of perpetuity should be eliminated and, in effect, that the new treaty should end—after a fixed but undecided period of time (the year 2000 is generally mentioned)—U.S. sovereignty and control over the Canal and the Zone.

Ever since, negotiations with Panama have been conducted—despite strong and strengthening protests in Congress and among many sections of U.S. public opinion—within the framework of these limitations.

After a virtual hiatus most of last year because of the presidential campaign and the interjection of the Canal issue into it, the negotiations are to resume momentarily under the auspices of a new administration. Our protagonist, however, is still the same radical demagogic dictator, who has ruled Panama's 1.5 million people for the past eight years.

Omar Torrijos seized power in a coup and has retained it by armed force (the support of the Panamanian National Guard, the only military-police power in the country) and by the bland promises of pie-in-the-sky—ultimate sovereignty over the Canal and the Zone. He has not hesitated to rule roughshod; he has exiled some dissident business men, completely controls a fully censored press and he has outlawed all political opposition. His government has become a kind of neo-Marxist dictatorship, not only in its domestic policies, but in its close and cordial relationships with Castro and Moscow. Only one party—Torrijos' "Peoples Party"—is permitted; there are numerous known communists among its leaders.

Torrnjos has staked his political future on taking over the Canal and he may well have unleashed forces he cannot control. His bargaining style continues in the Latin Political tradition of making Uncle Sam a whipping boy; it is a mixture of open threat and nationalistic bluster. But what he considers his aces in the hole are the prediction—indeed the promise—that unless a treaty ceding ultimate sovereignty to Panama is concluded this year, the United States will face armed confrontation (i.e. rioting mobs, terrorist and sabotage activity, guerrilla war, even a kind of low-key Panamanian "Vietnam"); and we shall also face the united condemnation of al the Latin-American nations.

Both threats are, in my view, overdrawn—particularly the latter. But the question still remains:

Is it more important to avoid confrontation and condemnation than it is to retain control of the Canal, a security asset of tremendous importance in its own right but of even greater significance to the future of that vital area—the Caribbean Sea-Gulf of Mexico?

DISASTROUS CONSEQUENCES

The psychological and political consequences of the abandonment of sovereignty by the United States in the Zone—in the face of repeated threats by a minor dictator openly backed by Castro and Russian communism—to our naval base at Guantanamo Bay, Cuba, to other U.S. base rights overseas and to our strategic position in the Caribbean could be disastrous. The questions that would inevitably be asked are:

Is the United States a paper tiger?

Where, after Vietnam and Angola and now, Panama, would we draw the line, if not at our own back door?

It is certainly true that rioting mobs tomorrow, as in the past, are an ever present possibility in Panama; Latin volatility and Communist provocateurs, aided by trained Cuban infiltrators, insure that. Sabotage and terrorism, if supported by Cuba and/or Russia, could become serious; some bombing incidents involving the automobiles of Zone residents who oppose the transfer of sovereignty have already occurred. But serious sabotage of the Canal itself, even if it could be accomplished, would be an irrational act. For Panama, it would kill the goose that laid the golden egg.

A large-scale guerrilla war, another Vietnam, is highly unlikely. We want no more Vietnams, but surely Panama does not want a Central American Vietnam either, and the great majority of Panamanians are not the dedicated and disciplined fanatics that we faced in the jungles of Southeast Asia.

In any case, if we are to avoid confrontation all over the world by concession and retreat, if we refuse to defend highly important or vital interests merely to avoid the blackmail threat of violence we are finished before the crisis erupts.

RISK IS NECESSARY

As to Latin-America, we must risk its wrath. But it will be far from unanimous—no matter what some Latin American spokesman say, pro forma, for public consumption. Fundamentally the nations of Latin-America and the Southern Hemisphere have always respected strength. Many of them are highly dependent on the waterway, and some of them, quite satisfied with the low rates and efficiency of American operation of the Canal, mistrust the probable instability and uncertainty of Panamanian rule.

There is, too, very considerable uneasiness about Communist influence in Panama and the close ties Torrijos has established with Castro. The memories of Angola and the fears of Russian imperialism within the Western Hemisphere are vivid.

During last Fall's political campaign, both President Ford and Jimmy Carter avoided the real issue in the Panama negotiations which is the question of U.S. sovereignty and the security of our "soft underbelly." Neither of them referred to the maior problem of the Canal issue—the strategic importance of the Caribbean, and both of them said they would maintain "control" of the Canal.

The exact words of now President Carter, which are today most germane, were:

"I would never give up complete control or practical control of the Panama Canal Zone. But I would continue to negotiate with the Panamanians."

In other words have your cake and eat it, too. Give up sovereignty, perhaps, but maintain security and control. It's a nice trick, if you can do it.

We lost our great airfield in Libya and our entire military investment there after a change of regime. We were denied overflight or refueling bases during the last Mid-East war, even by our allies. After the Cyprus crisis both Turkey and Greece either limited U.S. operations at our bases in those countries or closed them down.

Sovereignty means control. Control without sovereignty is double-speak.

FORMATION OF NEW YORK STATE ALLIANCE TO SAVE ENERGY

Mr. PERCY. Mr. President, this morning's New York Times reported a March 28 meeting in New York City at which Senators JACOB JAVITS and DANIEL MOYNIHAN joined in launching the New York State Alliance to Save Energy. The meeting included a number of distinguished business and government leaders, including the mayors of New York City, Buffalo, Syracuse and Yonkers and the chairman of Consolidated Edison. On behalf of Senator HUMPHREY and myself I congratulate our distinguished colleagues for their initiative and foresight.

Like the national Alliance to Save Energy, whose honorary co-chairmen are Vice President MONDALE and former President Ford, the New York State Alliance to Save Energy will be a nonpartisan effort. The purpose of the New York organization, according to Senators JAVITS and MOYNIHAN, is to emphasize to the public the need for energy conservation and to develop public and private energy-saving measures. The New York State Alliance will also develop educational material on energy conservation and encourage organizations and individuals to put energy-saving programs into effect.

Mr. President, I ask unanimous consent that the full text of the March 29 New York Times report of this event be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ENERGY GROUP BACKED FOR NEW YORK STATE: GOVERNMENT AND BUSINESS LEADERS MOVE TO ESTABLISH AN ALLIANCE TO ENCOURAGE CONSERVATION

(By Emanuel Perlmutter)

A step toward the formation of a New York State Alliance to Save Energy was taken yesterday at a meeting of Senators Jacob K. Javits and Daniel Patrick Moynihan with business and governmental officials.

The Senators said at the meeting, in the Ford Foundation's headquarters at 320 East 43d Street, that they would announce the appointment of an executive board for the alliance within two to three weeks.

The organization, Mr. Javits and Mr. Moynihan said, will emphasize to the public the need for energy conservation and will develop public and private energy-saving measures. It will also develop educational material on energy conservation and encourage organizations and individuals to put energy-saving programs into effect.

The national alliance, of which President Carter and Vice President Mondale are honorary co-chairmen, has asked that similar units be set up by the states. Thus far, only Illinois and New York have taken steps to do so.

BEAME VOICES SUPPORT

Mr. Javits and Mr. Moynihan said the state alliance would operate independently but within the framework of the National Alliance to Conserve Energy. The establishment of the national group was announced last month by Senator Hubert H. Humphrey, Democrat of Minnesota and Senator Charles H. Percy, Republican of Illinois. Like the national group, the state body will be bipartisan.

Mayor Beame, who attended yesterday's

First, FDA's present numbers are inadequate to allow anyone much time to pursue research interests, or clinical activities, or even to keep up with reading scientific literature. If FDA is to hire and keep good people, the Agency will have to be able to offer significant time for valid scientific activities other than reviewing petitions. And, to be able to do that implies a larger number of slots for professionals.

Secondly, FDA must have, in house, in one place, its own scientific laboratories. I am in total disagreement with anyone who says, "NIH can do the research, and FDA the regulation." Impossible. Read the recommendations of the past—upgrading the scientific capability of the Agency is consistently urged as a top priority.

Third, put the Agency together, out at Beltsville. Build the labs and offices that FDA needs for the people it needs, give FDA the people, and then you will see some real improvement, some speeding up:

It is a very real problem that the FDA today must operate from some 23 scattered locations in the Washington area alone.

How can the Commissioner respond to critics who charge the Agency is too slow to act when a simple meeting between the Bureau of Veterinary Medicine and the Bureau of Foods over the uses of DES in food animals involves a half day's trip between Rockville and downtown Washington?

A mundane problem, certainly. But like another cliche that begins "for want of a nail . . ." it gets to the essence of a problem. And the problem of facilities affects the quality of the talent the FDA is able to recruit, train and retain.

The lack of labs for FDA is a serious problem. FDA must have practical answers to many practical questions, and only FDA is interested in answering some of these questions. Also, there are a great many questions, and it will take all that any of us can do, to get the needed research done. FDA's type of research isn't everyone's cup of tea, and many people aren't interested in doing research at the request of FDA. So, either give FDA the research capability it needs, or let it order up research from NIH.

Parenthetically, one reason for FDA's apparent slowness on occasion, is that no one knows what it is best to do—science hasn't yet provided the information necessary to answer the question. Giving FDA the scientists and the labs to answer some of the questions will ultimately allow the Agency to be less hesitant.

Reorganizing, FDA, particularly to a form discarded in 1970 as unworkable, won't solve any significant Agency problem that I know of. Upgrading the Agency in the organizational hierarchy might; and here, let me remind all of you of Peter Hutt's excellent analysis of this problem last year, at this banquet. To his suggestions, I would add one more. I think it important to keep the product-based bureau structure, and upgrade it, as does Peter. But if the idea is to consolidate, then let's put all food regulation in the Bureau of Foods, including meat and poultry inspection. Then, relate FDA, EPA and CPSC more closely than is now the case. All three agencies are concerned with the same kind of regulatory process, and often the same hazardous substances, witness chlorofluro carbons, asbestos, vinyl chloride, etc.

But, don't split science and compliance in FDA—to quote Sherwin Gardiner, that's dumb! Read the December 10, 1969, report to the Secretary to HEW to find out why! That's the report that put them together in 1970!

Sometimes the FDA has been criticised for being slow when in fact, we were hung up in court, or in hearings, or other elements of the process of law. So to anyone wanting to improve FDA, I say, take a look at the legal hoops FDA has to jump through. Can improvements in the law be made? In the hearing procedures? In the definition of trade secrets? Some expect FDA to work its way toward a better definition of imminent hazard, alone. But why not some help from Congress?

Lastly, I would make a plea for the importance of FDA's educational role. One recommendation made by essentially every public group looking at FDA in the past 20 years is that FDA has an important role in educating the public, the professions and industry—in order to prevent hazardous products from reaching the market, in order to teach people to avoid risk, in order to teach professionals to use products wisely. Yet, the Agency is criticized by some, including congressional staff, for becoming "soft" on industry by developing educational programs. I hope that Congress will formalize FDA's educational role by defining it more specifically, and by providing program direction and support.

I have emphasized two main points tonight, directing my remarks to those wishing to remodel FDA. A thorough study of previous blue prints for change and of recent strengthenings of the structure are properly in order, before one takes up hammer and saw. But the main job to be done is to build the professional staff, the scientific milieu, the scientific capability of the Agency. That won't solve all FDA's problems, but it will solve what to me has been the largest.

None of this is meant to take away from what FDA is today. It is a strong and good Agency, well managed, knowing its basic mission and performing it well. And the people across this country know it.

The Agency today is more stable than a few years back; it is far less a crisis-to-crisis operation; it relies on orderly process and clearly set out procedures; it has improved its scientific competence and in addition can now rely upon voices other than its own; it has become more responsive to reasonable demands; it conducts its business in the sunshine of public scrutiny.

The Food and Drug Administration clearly is out in front of the entire world in its field, and well deserves to be there. If only reasonable care is taken with the Agency in the next year, as I'm sure it will, FDA will not only survive the present time of hard examination, but will grow even stronger and better. I will watch that development with a great deal of pride and pleasure.

THE CORPORATION'S ROLE IN SOCIETY

Mr. McGOVERN. Mr. President, on March 25, Mr. Ralph Ablon, chairman of the Ogden Corp., spoke to the Boston College Finance Academy's seminar on "Financing the Corporate Structure for the 1980's."

His thought-provoking views on the subject of "Business's Social Responsibility for Employment and Capital Needs" invite both challenge and championship. I ask unanimous consent that an excerpt from his remarks be printed in the RECORD for my colleagues' attention.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

One of President Carter's favorite philosophers, Reinhold Niebuhr, once wrote: "The capacity of man for justice makes democracy possible, but the inclination of man toward injustice makes democracy necessary."

To the extent injustice exists in this country, and it does, I am unwilling to entrust the righting of such injustice to the altrusim of individuals or corporations—both are special interest groups. I believe in the democratic process. It is the single best means yet devised by man for righting collective societal wrongs. Sometimes the democratic process may not seem to be preferable, except, as Churchill noted, when compared with the alternatives.

However, we cannot legislate morality. We cannot pass laws requiring us to like our neighbors. But we can legislate behavior. We can, and did, pass a law requiring that any family wanting to be our neighbor could not be discriminated against. I do not believe the struggle for Civil Rights would have advanced had we entrusted its progress solely to people of goodwill and the corporations.

I contend that when clear and obvious injustices exist, business should not be asked to correct them on an ad hoc basis. When such needs become evident, participation by business should be mandatory. Then every business will operate under the same rules. No company will enjoy a competitive edge because it opted for lower wages, or because it refused to spend money on obviously necessary environmental controls or safety features; or for other costly, socially responsible actions.

Moreover, many of the measures proposed are the projects of special interest groups. One group's proposed waste disposal area is another group's recreational facility. Employment is often reduced or new job opportunities foreclosed because of ecological considerations. These considerations must be balanced more carefully against the personal hardship of the displaced worker. Only government can undertake this task.

In this connection, the capital required for the development of certain essential industries—such as housing and transportation, can only be met on the national level. The policy principle is the same as in the creation of a nationwide highway system or major flood control project. Only government can conceive a national plan for these areas.

I am convinced that corporations could perform certain social programs more effectively than the government. Business could implement selected, specific projects faster and more efficiently, spend less money doing so, and get better results than many government agencies. Since we have too much government already, it would be advantageous to shift activity from the public to the private sector.

The National Aeronuatics and Space Agency, NASA, is an excellent example of this kind of partnership. When it was decided to land on the Moon, it was clear that the project exceeded the capability of any single business or military unit. Through the quasi-governmental authority of NASA, utilizing public funds and the expertise and products of hundreds of American corporations, the mission was accomplished. Solving our long-term energy crisis is a less formidable task.

It may well be that standard financial accounting procedures will have to provide some new entries for social cost and the development of human resources. But this cannot be done with private money. As in the case of NASA, it must be accomplished with public money, allocated to the private sector on a competitive bidding basis.

With regard to employment in the more narrow sense, the social responsibility of the corporation does require the optimum development of its own human resources. This simply means acting in its own enlightened self-interest. A corporation has the most efficient means to create new employment through the use of its capital and in so doing allocated human resources on a rational basis. Through training programs, it also has the capacity to develop individuals who would

otherwise remain among the vulnerable unskilled.

Nevertheless, business alone cannot meet the requirements of the Full Employment Act of 1946 to which Congress committed this nation as a matter of policy. The Federal Government must deal with the joblessness of the urban teenager, the aged and the infirm. The welfare system has failed, encumbered with the weight of self-perpetuating bureaucracy and a patchwork of jurisdictional confusion.

The negative income tax concept may be an answer—but it implies acceptance of a permanent stratum of hard-core unemployables. Such an acceptance is inconsistent with existing and proposed legislation and our cornerstone belief that everyone is entitled to life, liberty and the pursuit of happiness, meaning the opportunity to gainfully contribute to our economic life.

SEVEN DIRTY WORDS

Mr. ROTH. Mr. President, a recent court of appeals decision reversed a Federal Communications Commission order that prohibited seven specific words from the airways when children may be listening. The words—not fit to be repeated—are filthy and indecent.

What has developed in this case is a classic confrontation between first amendment rights and society's desire to stop the flow of immorality that is so commonly tolerated today. The use of unfit language on the air is a matter of serious concern. In this instance, there is a need to restore the delicate balance between freedom of expression and conduct which affects the morality of our children.

The court, in setting aside the order, stated that the FCC guidelines were "too broad and unenforceable." However, the court left open the possibility that more specific guidelines may be acceptable.

Mr. President, the Federal Communications Commission should be applauded for its attempt to curb this type of activity. I have written to the Chairman of the FCC commending them for their attempt to halt this flood of filth and urging them to draft new acceptable guidelines.

Mr. President, a Washington Post editorial published March 19 raises a number of good questions regarding this decision. I direct my colleagues' attention to it. I ask unanimous consent that the content of my letter and the editorial be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 24, 1977.

HON. RICHARD W. WILEY,
Chairman, Federal Communications Commission, Washington, D.C.

DEAR MR. CHAIRMAN: I would like to commend the Federal Communications Commission for its attempt to prohibit certain obscene words from being broadcast. The FCC has shown great sensitivity and judgment in trying to protect our children from indecent speech.

Unfortunately, parents cannot keep, even with the closest supervision, their children from being exposed to filthy language. There is a public need to police the airwaves, so we can prevent harmful conduct which affects the morality and behavior of our children.

As you know, the Court of Appeals in striking the order because of vagueness, did not reach the larger issue of whether the Commission could ever make a similar ban that would withstand a court challenge. I suggest that the Commission draft stricter guidelines that could survive judicial scrutiny.

The problem is complicated and serious. On one hand, we must balance the rights of the First Amendment; on the other, public control of offensive and tasteless expression.

Again, I applaud your action and extend my heartiest support.

Sincerely,

WILLIAM V. ROTH, JR.,
U.S. Senate.

[From the Washington Post, Mar. 19, 1977]

SEVEN DIRTY WORDS

The U.S. Circuit Court of Appeals here recently set aside an order of the Federal Communications Commission barring seven specific words from the airwaves. It did so because one judge thought the order abridged the First Amendment and another thought the order was too vague to meet the strictures of that amendment. Either way the decision focuses attention again on one of the most difficult current problems: to what extent can society control the content of radio and television programs, particularly as it may affect the morals and manners of children?

We see no need to print the seven words in question. It is hard to imagine the circumstances that would justify their use in a family newspaper or on the airwaves. Suffice it to say that they are barnyard words used to describe sexual and excretory organs and functions. The monologue in which they were used over and over again is one that never should have been allowed on the air. But it was. And the FCC, in an effort to keep it and other material using these and similar words off radio and television, fashioned a rough set of standards of what constitutes "indecent language" that cannot be broadcast.

The competing values here are large. On one hand is the legitimate desire of most people to keep out of their homes and cars and particularly to keep away from their children, the kind of filth that is all too prevalent today. On the other hand there is the First Amendment's guarantee that people can say what they want to say with little or no limitation and with no prior censorship by government.

We find this conflict between values much easier to resolve when it involves the printed word or even motion pictures than when it involves radio and television broadcasting. In the case of the former, communities can protect those who find the material offensive by restricting sales or admissions to exclude children and by barring its display in public. The same cannot be done so readily with radio and television, where words and pictures are broadcast without warning and limiting access to children is difficult even in the most carefully supervised families. The offending material can already have been heard or seen before the switch can be turned off.

The easy answers to this problem lie in the claims that responsible broadcasters won't permit material of this kind on their stations and that, if irresponsible ones do, a vigorous public reaction against their programs will soon drive them off the air. The trouble with that solution lies in the experience of recent years with pornographic magazines and movies. Their success at least suggests that there may be a market for broadcast filth and, if such a market exists, some irresponsible broadcasters, like irresponsible publishers and movie-makers, will fill it.

Frankly, we are not sure how the conflict should be resolved. The potential evils of government censorship are clear—if it can control language and the expression of certain kinds of suggestive thoughts on the air, the way may be opened to control other kinds of thoughts. But if government can't constitutionally place the kind of limitations on radio and television that the FCC attempted to place in this case, should society sit back and rely solely on the broadcast industry not to drag everyone down to the lowest level of taste and speech? A better accommodation than any we have yet heard about is badly needed.

RURAL HOUSING ACT OF 1977

Mr. HART. Mr. President, I am pleased to join my distinguished colleagues in supporting S. 1150, introduced by Senator HUMPHREY, which addresses the housing needs of the elderly and the handicapped, an issue that has been consistently neglected in the past. The Rural Housing Act of 1977 contains several provisions that will enable the Department of Agriculture to provide additional funding and expand its involvement in servicing and upgrading the housing needs of these persons.

Most importantly, this measure would provide low-interest loans, 60 percent of which would go to low-income families. This would be coupled with protection against foreclosure of transfer of action without prior notice.

Second, consideration of loan applications from private and nonprofit organizations would be processed on the same basis as applications from public bodies. Also, applicants who are denied loans under the Farmers Home Administration would have the right to request a review of their loan application by an appeals board.

Third, the bill stipulates that the FmHA is responsible for remedying defects in the housing structure and directs it to make repairs as soon as they are needed. Authorization for sewer and water grants would be increased from the current $300 million to $500 million to provide a more equitable distribution of grant money between those communities that badly need the grant funds and those who can appropriate some local funding to supplement the grant money.

Under this bill, the Secretary of Agriculture would be directed to critically evaluate issues relating to the mission and programs of the FmHA within the context of national housing goals. His evaluation would be made with an eye to the particular needs of special groups such as Indians, the handicapped, and farmworkers.

Mr. President, this legislation would mandate the use of energy-saving techniques in all new housing financed by the Farmers Home Administration. There is no doubt that we will all profit from the construction of energy-conserving housing units.

Mr. President, the improvements offered in this legislation will insure many less fortunate citizens of this Nation the availability of financial assistance to provide needed housing. It strikes a reasonable balance between the desire to ease the financial burden of these people who would not, under ordinary circumstances, be able to afford adequate housing and the incentive to provide housing that can be obtained through private financing.

MILITARY UNIONIZATION

Mr. THURMOND. Mr. President, in the recent hearings before the Senate Armed Services Committee, Secretary of Defense Harold Brown testified in general terms against unionization of uniformed members of our armed services.

However, in his testimony he admitted that the Department of Defense did not prohibit soldiers, sailors, airmen, or marines from joining unions in connection with their military service. Also, he admitted that the Department of Defense does not presently have a policy to prohibit union organizers from coming on Federal military installations to solicit members of our military forces for union membership. I understand that the Secretary has directed his staff to work on closing the latter loophole. I commend him for his efforts.

It will be interesting to see how the Defense Department will address the so-called "open" installation problem. For example, how will the Defense Department prohibit union organizers from soliciting on Fort Sam Houston, which has a city street of San Antonio dividing the installation? The same question may be asked concerning Fort Bragg, N.C. A North Carolina State highway divides this post. There are many other such examples on military installations throughout the country.

Mr. President, I do not believe any policy issued by this Secretary of Defense or any Secretary of Defense can be completely effective.

Secretary Brown, I predict, will not prohibit service personnel from joining unions. Without an express order of the President to him, I agree that the Secretary of Defense would be on dangerous constitutional ground. However, Secretary Brown goes one step too far. He and some of his lawyers question the constitutional authority of Congress to prohibit servicemen from joining unions and stop on- and off-post solicitation for that purpose.

The Secretary of Defense should address himself to the question of whether legislation to prohibit unionization of our Armed Forces is needed. The question of whether legislation is constitutional is one of concern to Congress and the Department of Justice. The Congress has the power, knowledge, and resources to effectively consider this issue. The Department of Justice, not the Department of Defense, will have the job to defend the constitutionality of any bill passed by Congress.

Quite bluntly, I am suggesting that those in the hierarchy of the Department of Defense will continue to drag their feet on this issue. The reasons behind such a stand are truly baffling to me. Over a year ago, the General Counsel, Department of Defense, Mr. Wiley, discussed this issue with me. On that occasion, he told me that there was no serious unionization threat. Further, we should not stir up the unions with legislation. My own impresison of what he told me was, "do nothing and maybe the issue will go away."

Well, unionization of the Armed Forces has not gone away. We have but to look at the actions, not words, of the American Federation of Government Employees during the past year, following my conversation with Mr. Wiley. In June 1976, the executive committee of the American Federation of Government Employees, by an overwhelming vote, decided to place before their annual convention the question of whether to accept uniformed members. In September 1976, those delegates in national convention approved a change in the union constitution to accept uniformed members. Even now, as I speak, locals all over the country are being polled. AFG President Kenneth Blaylock, has stated that the polling of locals to determine their desires will be completed around the first of May 1977.

Mr. President, the hour is late, but the Senate has the opportunity to avoid a confrontation on this issue. Joined by 30 Senators, I introduced a bill in the 94th Congress to prohibit unionization of our armed services. In the 95th Congress, 39 other Senators have joined with me on S. 274, which will accomplish this end.

The distinguished Senator from Mississippi, Senator STENNIS, also recently introduced a bill which will prohibit unionization of our armed services. During the recent hearings, Senator STENNIS informed Secretary Brown:

> It's news to me that through your regulations you can take care of this problem. Unless we meet this unionization threat with firm legislation, the nation's all-volunteer force is going to go downhill fast and prove to be a failure. You've got to make up your mind which way you're going to go on a real bill to prevent unionization of the military. Otherwise, you're in for trouble, the services are in for trouble and Congress is in for trouble.

I strongly support the stand of the Senator from Mississippi. We can no longer stand idly by waiting for hierarchy of the Defense Department to make up their minds. We, in the Senate, elected by the people of this Nation, have a responsibility to them. It is our responsibility to pass a bill which will insure that we keep a strong and sound defense force for this Nation—a defense force controlled by and responsible to the President, Congress, and ultimately the people.

Mr. President, I ask unanimous consent to have printed in the RECORD a newspaper article from the Washington Post, March 26, 1977, two editorials from the Ocala, Fla., Star-Banner, January 31, 1977, and Phoenix, Ariz., Republic, February 20, 1977, and an article from U.S. News & World Report, March 28, 1977, on this issue.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 26, 1977]

EX-PARATROOPER BATTLES TO UNIONIZE 82D AIRBORNE

(By George C. Wilson)

FT. BRAGG, N.C.—A former trooper who went handcuffed to federal prisen directly into the Army is trying to unionize the 82d Airborne Division here.

He also is trying to get back into the Army under an American Civil Liberties Union suit which alleges they kicked him out. The secretary of the Army and the 82d Airborne commander, both of whom happen to be black, broke Reconstruction Era laws designed to protect blacks from the Ku Klux Klan.

To make the situation even more bizarre, here at Bragg where the greeting between paratroopers is "All the way," 82d Airborne officers admit that their actions have helped the very unionizing they oppose.

The Army's unintended assist for unionizing the military around here came from making 28-year-old Thomas L. Doran, Jr., something of a celebrity by discharging him for reasons which sound right out of the novel "Catch 22."

"He was in the Army but he really wasn't," said one 82d Airborne Division lawyer in explaining why Doran had to be discharged. "He was wearing the Army uniform but he wasn't really in the Army" because his enlistment was illegal.

"That doesn't wash," Doran countered in an interview, claiming the Army kicked him out because of his efforts to promote a union within the military. American Civil Liberties Union lawyers agreed and filed suit against the Army last week.

Among the laws the ACLU charges the Army broke is a federal statute enacted in 1861 and revised in 1871 by the Reconstruction Congress which forbids two or more persons to "conspire or go in disguise" to deny anyone "equal protection of the laws."

Division officers here said there was nothing illegal about Doran leaving federal prison in Petersburg, Va., in handcuffs in 1971 to be sworn into the Army. He had been imprisoned for refusing induction but agreed to join the Army after seven months in jail.

What was illegal, according to 82d Airborne officers here, was the Army accepting Doran for a second hitch after he had been honorably discharged from his first two-year tour. Through what officers acknowledged was "a bureaucratic screwup," Doran's honorable discharge did not indicate that he was ineligible for re-enlistment.

The reason that Doran was declared ineligible, officers here said, was that he did not pass muster for re-enlistment when the government conducted a security check on him during his first tour of Army service. The material uncovered in the security check has not been disclosed by the Army.

An Army recruiter took a look at Doran's honorable discharge and happily signed him up for a three-year hitch on March 20, 1975. Doran rejoined the 82d Airborne here as an artillery surveyor and received ratings of "excellent" in conduct and performance from his Army superiors. He was promoted to a specialist five and slated for another promotion when he was suddenly discharged.

Doran said it was on this second tour of duty that he started exploring the idea of a union for low-ranking soldiers. He concluded, he said, that only a union could deal effectively with "the hassle" in today's Army.

"I'm not talking about taking a strike vote in the foxhole," Doran said. "I'm talking about getting a little self-respect for Joe Tentpeg and the women in the Army who are being hassled. They've got to be able to feel that 'I've got a little bit of power no matter how much the boss has got.'"

Doran and his small squad of allies contend that the grievance procedures and chain of command options are not adequate for people in the lower ranks.

Doran said that he and others started discussing the benefits of unionization in livingroom gatherings around Bragg; at meetings with other servicemen in Washington last summer, and at the American Federation of Government Employees (AFL–CIO) convention in Las Vegas last September.

The AFGE is currently polling its 280,000 members on whether they want to try to establish union locals within the military. The ballots will be tallied this summer.

Officers at Bragg said they sense no widespread desire among the troops for unions. But Doran said he and his allies promoting unionization have found lots of support among people in the service, especially women, and among retired military servicemen who fear their retirement and other benefits are going to be reduced.

Asked how a union would have made his life as a paratrooper better at Bragg, Doran said a union's leverage would have deterred sergeants from ordering troops to pick up cigarette butts at 4 in the morning, from hassling women and kept officers from conducting do-nothing training exercises.

Doran claimed his artillery unit would go out in the woods for three days and fire rounds only four hours the whole time.

"What do you do the rest of the time out in the woods?" he was asked.

"Wait."

"Wait for what?"

"Later."

Doran said the union would be more like a legal aid society, not an organization that would question orders or interfere with combat operations.

Sen. Strom Thurmond (R.-S.C.) is the leading advocate in Congress of passing a bill to outlaw unions within the military, asserting that the threat is real and growing. His bill to outlaw military unions has 37 senators as cosponsors.

Defense Secretary Harold Brown, in appearing before the Senate Armed Services Committee last week, cautioned against overreacting to the threat of unionization and said the Pentagon currently has enough rules to deal with the possibility.

Maj. Charles Murray, judge advocate of the 82d Airborne, and Maj. Terry Throckmorton, division spokesman, stressed in interviews here in discharging Doran the division's leadership was not reacting to the paratrooper's unionizing efforts at all.

Instead, Murray and Throckmorton said, they were simply following Army rules that could not be waived in the face of the findings in the government's security check. "Serendipity," Murray said in searching for a word to describe the whole affair.

[From the Phoenix Republic, Feb. 20, 1977]

OUTLAW MILITARY UNIONS

A study by the U.S. Air Force underlines the necessity for quick congressional action to outlaw unionization of the military.

Last September, the American Federation of Government Employes, AFL-CIO, amended its constitution to permit the enrollment of servicemen as members.

It has yet to start an organizing drive, but it almost certainly will in light of the Air Force study.

The Air Force conducted a poll of 800 officers and 800 enlisted personnel, whom it considered "reasonably representative of the Air Force population."

The poll disclosed that 35 per cent of the enlisted personnel and 16 per cent of the officers would join a union if they could.

Twenty per cent of the officers and 33 per cent of the enlisted personnel were "undecided." This would be enough to constitute a majority for unionization.

Although relatively few of the officers said they would join a union, 56 per cent agreed that a union "could prevent the erosion of fringe benefits." Sixty two per cent of the enlisted personnel were of this opinion.

Yet 72 per cent of the officers and 50 per cent of the enlisted personnel felt that a union "would have a negative effect on discipline in the Air Force."

The findings are especially ominous because the Air Force is the most popular of the services and has the least difficulty in obtaining high-quality recruits. In all probability, a poll of the other services would find the sentiment for unionization even greater.

Now it's easy to understand why so many servicemen should look with favor on unionization. The great majority of them are very young. They have not been in uniform very long, and they do not understand the necessity for discipline and instant obedience to orders in a military organization.

Pay and benefits in the services compare favorably with those in civilian life; in fact, that's why they enlisted in the first place. However, it's a rare human being who does not think he's underpaid, who does not want more.

However, unionization would destroy the effectiveness of the armed forces. As Sen. Barry Goldwater, R-Ariz., has pointed out, it "would destroy the military chain of command and ruin the discipline so necessary for the proper performance of military missions."

There is one way to prevent unionization, and one way alone; and that is for Congress simply to ban it. The AFGE should be prohibited by law from attempting to organize the armed forces.

[From the Ocala (Fla.) Banner, Jan. 31, 1977]

SHOOT DOWN EFFORTS TO UNIONIZE TROOPS

Unionization of the nation's armed forces is a clear danger to the defense of our nation, and Congress should not delay in enacting legislation that would prevent military personnel to sign up with a union.

With the American Federation of Government Employes already taking the first step in a nationwide effort to unionize military personnel, our federal lawmakers already have waited too long in heading off unionization attempts.

As incredible as it may seem, serious steps have been taken by the union to represent individuals serving in the military.

This would be totally destructive and incompatible with the mission of a democracy's armed forces, and the sooner Congress and the president make this clear to the union organizers, the better off the services and the nation will be.

Just why Congress has been dragging its feet on such a serious issue as this is unclear. Certainly, the lawmakers must be aware of the nationwide effort to unionize military personnel.

Actually, a bill already has been introduced by Sen. Strom Thurmond that would prohibit any member of the armed forces from signing on with a union.

A number of senators from both sides of the aisles have agreed to co-sponsor the legislation. Necessary committee hearings should be held right away, with similar legislation working its way to a conclusion in the House as well.

Congress should not stall any longer on this matter. It must recognize that labor organization is not compatible with the mission of the armed forces.

[From U.S. News & World Report, Mar. 28, 1977]

LET SOLDIERS JOIN LABOR UNIONS?

YES—"THE MILITARY HAS REAL PROBLEMS ON PAY, FRINGE BENEFITS": INTERVIEW WITH KENNETH BLAYLOCK, PRESIDENT, AMERICAN FEDERATION OF GOVERNMENT EMPLOYEES

Q. Mr. Blaylock, why should servicemen and women join unions?

A. For the same reason any group joins unions. People don't organize, and we can't organize people unless they have problems. Some good examples in the private sector: IBM and Sears, Roebuck. They've got good working conditions, good pay, good fringe benefits, fair treatment—and they don't organize. But the military has some serious problems.

Q. Such as what?

A. For a long time they have had real problems on pay, fringe benefits, the conditions of employment.

Twenty-year retirement is a good example. That's under serious attack right now by the Congress. There's a real effort to do away with the commissaries. Overseas rotation, career ladders, career development—they have the same problems any work force has.

You've got Congressmen that would cut the defense budget to the bare bones. Career people are going to get clobbered. With the all-volunteer-force concept, the emphasis has been placed on the military being a career now, not necessarily a dedication-motivated service. We look at the military as a work unit, and we're looking strictly at bread-and-butter issues. This union is not getting involved in the philosophical, idealistic ideas that are being floated by some groups, such as the right to question the legality of orders. This is where the real controversy comes in: fear of a shop steward in the foxhole, and that sort of thing.

Q. People say that soldiers are not really demanding membership in unions now, so why organize them—

A. They may be, and they may not be. All we can base our opinion on is the responses we've got. We now have four fat folders of individual letters, petitions, letters of request to organize. We've had as many as 800 people in one battalion who want us to come on in and sign them up. I think they want to organize.

Q. Who is making the requests?

A. We're not getting much from the first-termers. The response is coming from the career types—NCOs and officers. And I'm talking about some commanding officers and base commanders.

Q. You can't do anything for them, can you?

A. Commanding officers that have 18 or 20 years in are just as concerned about their retirement as the sergeant is. They're just as concerned about that commissary closing. They're just as concerned about the fact that every couple of years they've got to pull up their family from the East Coast and move over to the West Coast.

Q. Can the military keep up discipline or fight a war if its officers have to deal with shop stewards?

A. They're not going to have to deal with shop stewards in the foxhole. You can look at the other public employees in this country—fire fighters, policemen. When there's a fire going on and the captain tells them, "Get in this building and go to floor so and so," they don't challenge that. Those things are excluded from the scope of bargaining. But when they get back to the station and the captain says, "By the way, Joe, we're changing your shift and you're going to start working third shift," he says, "No, the contract says I get two days' notice except under these conditions."

Q. Do you have any evidence that the armed services will be as effective a fighting force if unions are permitted?

A. The only real thing we have to go on is this: Dutch soldiers are unionized, and in NATO [North Atlantic Treaty Organization] exercises of '75, the military forces of the Netherlands came up with top rankings. Gen. Alexander Haig, NATO's military commander, made the statement recently that if he ever had to go into combat, he'd feel good having Dutch troops on his flanks.

If you're talking about their looks, their long hair or their baggy uniforms, that's one thing. But the actual evaluations of their performance show that they do quite well in military tactical exercises.

Q. What would prevent the unions from calling a strike or filing a grievance when the order to fight was given?

A. Here we need some rules. Rather than

trying to prohibit the military from organizing, Congress should develop legislation that defines the limits for collective bargaining, bargaining-unit makeup, and so forth.

History has shown us that if work forces have serious enough problems they will organize, no matter what the law says. Look at the Postal Service. The law said it couldn't strike. The postal people struck. If you want to create the crisis, we can continue to ignore the problems that people have.

Q. You would not bar soldiers from striking?

A. Here again, history has proven that, if the problems are not addressed, people will take some kind of action to bring focus on their problems.

Q. What could unions do that sergeants, officers, the Defense Department and Congress don't already do?

A. We could provide enlisted men legal representation in lesser cases, such as company commanders punishment as well as in courts-martial. And, of course, we can provide them lobbying that their professional associations are not providing for them now.

"The military will organize anyway"—

Q. Do you have organizers working on the military now?

A. No. We're not actively organizing the military yet. We haven't made the final decision to move. The American Federation of Government Employes could have a final decision by the first of May.

But I'll say this: If AFGE decides not to move, the military will organize anyway. They may turn to the Teamsters; they may turn to some of the independents; they may convert their own military professional organization to unions—I don't know—but they will organize.

NO—"EFFECTIVENESS AND READINESS" OF MILITARY WOULD BE DAMAGED: INTERVIEW WITH REPRESENTATIVE ROBIN BEARD, REPUBLICAN, OF TENNESSEE

Q. Representative Beard, why do you oppose unions for the military?

A. From all indications, they would not only have a serious detrimental impact on the over-all effectiveness, discipline and readiness of the armed services, they would also add unnecessarily to costs. Our military backs up our responsibilities to NATO, our responsibilities in Korea, and our other worldwide commitments, and I cannot imagine how unionization could be acceptable in that situation.

Q. What evidence is there that unionization would hurt?

A. Findings by the Joint Chiefs of Staff, for one thing. Gen. George Brown, Chairman of the Joint Chiefs, has stated that every country that has had servicemen's unions has paid a terrific price in operational effectiveness.

A strong chain of command is essential in the military. It may be harsh to say, but the military cannot be a totally democratic system. It must be one where discipline is the highest priority.

Union organizers are quick to point to European models as examples of "successful" unionization of the military. Yet these so-called models simply cannot be compared with our own military in terms of troop strength, physical size of the respective countries, or worldwide defense commitments. Sweden, for example, is a neutral country, not a NATO member, with a small standing Army. The Dutch active armed forces number a little over 35,000.

Let's look at the potential inflationary aspect, too:

In 1968, at the height of the Vietnam War, our personnel outlays were about 45 per cent of the total defense budget. But with the advent of the volunteer Army, that percentage rose to 60 per cent, even though troop strength declined considerably. This jump took place to make our armed services "more attractive." Unionization would almost certainly drive these costs even higher—seriously jeopardizing our procurement as well as research-and-development programs.

Q. Unions say they are getting support from career servicemen who are worried about erosion of benefits, such as commissaries and retirement. Could unions help?

A. I'm not saying that we don't need to be sensitive about such matters as commissaries, PX's, and so forth—these have traditionally gone hand in hand with the military service. But we could insure and increase every single benefit ever requested, and unions are still going to be able to find men that complain: that young man that didn't make it from lance corporal to corporal; the officer who didn't make it from captain to major; the guy who was just ordered to Okinawa for 13 months without his family.

Military service is not a glamorous job. You'll have a hard time convincing me that sleeping out in the boonies in 10-degree weather is a glamorous job.

Threat of strikes—

Q. Union organizers say that there is enough ferment that troops will organize even if unions are barred—

A. That is absolutely absurd. Union organizers also state that there would be a no-strike clause in any military-union arrangement. Yet Mr. Clyde Webber, a former president of the American Federation of Government Employees, said when asked about the absence of a right to strike: "There isn't any way to stop those things. They don't ask me to go on strike." The AFGE also stated that, in time of a national emergency, they would terminate union activity in order to avoid confusion. That in itself indicates that they know unionization would create problems.

The ultimate weapon of unions has always been the right to strike, including police and fire fighters' unions. They don't strike, but they have other ways to accomplish the same thing: sick leave or whatever the case may be.

Other groups go further. One has proposed what it calls a "GI Bill of Rights": full civilian pay with compensation for overtime; an end to saluting and other "class distinctions"; the right to resist "illegal" orders or policies; elimination of nonjudicial punishment, and an end to bad discharges. You wonder: Once it starts, where does it end? You have plumbers now who refuse to drive nails. Would this be the case in the military?

Q. How do you distinguish between the validity of unions for government workers and a union in the military?

A. The most obvious distinction is that police and fire fighters, for example, hold jobs with local as opposed to national or international responsibilities.

The serious discussion of unionization of the military started when we went to the all-volunteer service. All of a sudden, the military is taking the attitude: "It's just another job." The sense of patriotism, the sense of national service is taking a back seat. So the unions are saying: "All right, if it's just a job, that's a market ripe for union organization."

Q. Are the rights of servicemen adequately protected under the present system?

A. I'm sure that you could find individual cases where they are not. But over all, yes. I was an officer in the Marine Corps for four years, and I found that a man that was brought before a court-martial was allowed competent defense staff, military or civilian.

Q. Wouldn't abuses such as the death, injuries and harassment suffered by trainees be a proper subject for unions?

A. There are always individual cases of poor judgment in any field. But public pressure, sincere individuals in charge of the services, and members of Congress are not going to tolerate cases like those you refer to. I don't think unions could add a single thing to that.

Q. How would you enforce a ban on organizing?

A. I don't know exactly what procedures could be used. It seems to me that military violators could be punished through the military judicial system. As for civilians, the military could prohibit organizational activities on the bases and establish methods to enforce that prohibition.

[From U.S. News & World Report, March 28, 1977]

DRIVE TO ORGANIZE GI's PICKS UP STEAM

Once considered unthinkable, even ridiculous, unionization of the U.S. armed forces is beginning to emerge as a pressing and controversial issue.

There is hardly any middle ground in the argument, as shown by the interviews on the following pages.

On one side, senior commanders and other opponents warn of the adverse impact that unions might have on the effectiveness of America's armed forces. Often cited is a danger of striking soldiers' refusing orders to fight.

On the other side, union supporters insist that moves by the White House and Congress to reduce defense costs make it mandatory in an all-volunteer force that officers and enlisted men, as "employes" of the U.S., have a union to look after their interests.

President Carter has come out firmly against military unions. He told Pentagon workers on March 1: "My own opinion, which is strongly held, is that it would not be advisable to have the military personnel unionized. . . . I know it has been discussed in isolated areas and by some responsible people, but I think the national leaders, even in the labor movement, have no commitment to this proposition."

Actually, unionization of the military is moving forward. In September, the American Federation of Government Employes (AFGE), a union of 255,000, revised its constitution to permit military membership. AFGE now is polling its locals to determine whether it should start organizing the 2.1 million men and women in the armed forces.

Although military unions are a relatively new concept in the U.S., they are well developed in Europe. Belgium, Denmark, the Netherlands, Norway, Sweden and West Germany have a total of more than 60 soldier organizations.

Both opponents and proponents of military unions in the U.S. cite the experiences of European unions—good and bad—to support their arguments.

From the magazine's bureaus overseas come the following cabled reports on how such unions operate in three European nations.

SWEDEN

Most of Sweden's 65,000 military personnel belong to three major groups: the Swedish Officers' Union of top-level officers; the Company Officers' Union of lower-grade officers and the Platoon Officers' Union, which includes senior noncommissioned officers.

Technically, military men in Sweden have the right to strike. But the unions voluntarily have banned walkouts by higher officers, and restrictions are so tight that walkouts by other ranks are considered impossible. Before strikes can be called, the situation must be reviewed by a board of Government, Parliament and union representatives. If it is decided a strike would endanger the nation, it would be prohibited.

Conscripts yield influence through elected representatives who present demands and discuss grievances. Most demands are for higher pay, more fringe benefits and a shorter workweek.

WEST GERMANY

Military unions in Bonn's 495,000-man armed forces date back more than two decades, to July, 1956.

Yet union power is severely limited, even in peacetime. By West German law, *Beamter* (senior civil servants) are prohibited from striking. And all men and women in uniform, plus civilian employes of the Defense Ministry, are classified as *Beamter*.

The 200,000-member German Armed Forces Association, the principal organization representing military men, is more a professional association or a company union than it is a labor union. It maintains close ties with the Defense Ministry and is not associated with the civilian West German Labor Federation.

The federation has one foot inside the barracks through a branch of the OTV, the Union of Public Service and Transport Workers. But this branch has only 41,000 members, all but 4,000 of them civilian employes of the military.

West German military men have not had a pay hike since 1974, and both the association and federation are pushing for a raise. They also are campaigning for overtime payments of from $25 to $50 per month and bonuses of $80 to $120 to help finance vacations.

NETHERLANDS

Most foreign criticism of military unions has centered on the armed forces of the Netherlands.

With their long hair, refusal to salute superiors and militant campaigns for individual freedoms, Dutch soldiers have acquired a reputation, which some experts claim is undeserved, of being an undisciplined, unreliable force.

There are 15 unions in the Dutch armed forces of 112,000. The most powerful is the VVDM, a union for conscripts that has resorted to frequent mass protests and petition campaigns to win demands.

But like the West Germans, Dutch military men are forbidden to strike.

Among benefits the VVDM already has achieved are improved quarters and recreational facilities, an end to saluting and polishing shoes and fewer roll calls and inspections. Still sought is compensation for overtime.

In disciplinary matters, a unit that refused to take part in a maneuver because it was too cold was given three weeks' detention. A draftee who refused to move against the hijackers who had seized a Dutch train last year was discharged from the Army. But he had to put in an equivalent period of community service.

ANGOLA, AMIN NEED DISCIPLINING

Mr. WALLOP. Mr. President, I ask unanimous consent to have printed in the RECORD a letter published in the Sheridan Press. It is written by a citizen of my hometown—a Mrs. Max Vigil. Mr. President, the letter speaks for itself and should give the Senate, the Congress, and the President pause to reflect on the hasty, and in my opinion, ill-advised repeal of the Byrd amendment.

Mr. President, "majority rule" is a word of art which beguiles the American public into believing that African countries will ipso facto have representative or democratic government. Mrs. Vigil's letter, and history, indicate that such does not happen automatically, and in fact in many instances crueler, more restrictive government has followed.

Both from the standpoint of national self-interest and humane considerations, Mrs. Vigil's letter adds a dignified dimension to the arguments.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ANGOLA, AMIN NEED DISCIPLINING

EDITOR: The Woman lay face down on the yellow earth, her hand slack in death. The great black ants clustered about her to feed, and thus she was found by other villagers.

The elephants, terrified, were fording a stream, a baby struggling close to its mother, all of them thin and emanciated from lack of feeding time.

The people stood about aimlessly, their very existence threatened—they were totally unarmed, helpless. Areas of free travel now posed a threat to life because of guerilla warfare.

Such is Africa today—and tomorrow, and ?. The American government seeks to aid the wrong people. Color is not the only area on which to discern right and wrong.

Russia wants the chromium deposits of Rhodesia. Men who have never been in Africa are making war on unarmed whites and blacks alike at the beckoning of Russia. When black murders black to force him into a political alliance he neither seeks nor understands, who is going to weep for those law abiding unarmed peoples? What is better, the slow life style of the past, or the murder and chaos of "freedom fighters," who will not be there when it is all over. How much Freedom have any of the Communist dominated peoples?

It is a lie to tell our people that Rhodesia must be "disciplined" when we do (did) nothing about Angola, we cringe at Amin and his blackmail, we lie to ourselves about our own freedom practices. Who is free?

The Earth cringes with the pain of bombs; the people, the animals, the lifestyle of a whole continent goes literally to hell because we would rather mouth impossible slogans than admit the Angola is now the head and body of the Communist octopus in Africa. Russia figured right, we will jump in when people who are like ourselves in lifestyle and color are threatened—but we sit and watch when thousands of helpless blacks are slaughtered to bring power to a few.

Ninety miles away from us is another arm of the Russian octopus,—so why punish Rhodesia? When will we see the threat to our own existence in letting Russia corner the world's supply of our own national needs?

Sincerely,

Mrs. MAX "ANN" VIGIL.

TRADING WITH COMMUNIST COUNTRIES

Mr. HUMPHREY. Mr. President, I wish to share with my colleagues an article by Theodore Shabad in the March 17 issue of the New York Times, entitled "China, in Aggressive Drive, Tops Soviet in Exports to United States," and a March 19 Washington Post article by Michael Gettler, entitled "East Europeans Try Trade by Barter."

These two very interesting articles deal with our trade to Communist countries and how barter is being utilized by Eastern European countries trying to avoid excessive debt burdens.

The Shabad article points out that last year the Chinese had a favorable trade balance with the United States, buying only $135 million worth of American goods while selling $202 million worth to us.

On the other hand, the Soviet Union imported $2.3 billion while exporting only $221 million worth to the United States. The United States has been exporting large quantities of grain and technology to the Soviet Union while it has been selling to us minerals and platinum metals which have been declining in volume in recent years.

The Gettler article indicates that the Eastern European countries are very much interested in Western technology in order to modernize their economies, but are fearful of further debt accumulations. At the Leipzig International Trade Fair, U.S. firms were approached by Eastern European countries which wished to acquire U.S. technology in return for bartered Eastern European products which often present difficulties for the U.S. firms when they try to market these products here.

These two articles do present interesting information on what is happening in these countries and the importance of trade in our relations with the Communist world.

Mr. President, I ask unanimous consent that these articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

CHINA, IN AGGRESSIVE DRIVE, TOPS SOVIET IN EXPORTS TO THE UNITED STATES

(By Theodore Shabad)

An aggressive export drive by Peking, sparked by exhibits at the Canton Trade Fair and other sales efforts, has put China squarely ahead of the Soviet Union among Communist suppliers of manufactured goods to the United States.

Final figures for 1976, made public by the Department of Commerce, show that the Chinese appear to have been more successful than the Russians in penetrating the American market with manufactured goods. The Soviet Union still remains ahead of China as a source of raw materials for United States industry.

China now ranks as the second Communist exporter of manufactured goods to the United States and has been moving closer to Poland. Imports from Poland, and more recently from Rumania, are the old ones from Communist countries that benefit from low United States tariffs under most favored nation status. Both the Soviet Union and China lack such preferential treatment.

In total turnover—imports plus exports—the Soviet Union remained the United States' leading Communist trade partner last year, according to the Commerce Department figures. Turnover with the Soviet Union was $2.52 billion, Poland $940 million, Rumania $448 million and China $337 million.

POLAND LEADS IN EXPORTS TO THE UNITED STATES

In total 1976 exports to the United States, Poland led with $319 million, followed by the Soviet Union with $221 million, China with $202 million and Rumania with $199 million.

Both Peking and Moscow have been seeking to balance their trade with the United States, which has been generally selling far more to those governments—mainly agricultural exports and industrial machinery—than it has been importing from them.

However, Peking has been steadily expanding its sales to the United States since trade relations were resumed in the early 1970's. Moreover, last year, for the first time, the Chinese established a favorable balance of trade with the United States. As China's agricultural imports sharply declined, it bought only $135 million worth of American goods while selling $202 million worth.

The upsurge of Chinese exports, exceeding the Soviet export level, first became evident in the last months of 1975 and was maintained consistently through all of 1976, monthly Commerce Department figures show.

In the case of the Soviet Union, a combination of continuing heavy imports of grain and technology from the United States and declining exports in the last three years have preserved a pronounced imbalance in trade. Last year, Soviet imports from the United States were $2.30 billion compared with the exports of $221 million, or a ratio of more than 10 to 1.

AMERICAN MARKET SHRINKS

Part of the decline of Soviet exports to the United States has been attributed to a shrinking American market in the recent recession. Much of the value of American imports from the Soviet Union is made up of platinum-group metals and some other minerals for which demand declined in the last two years. Moreover, a spurt in Soviet oil exports at the time of the oil crisis of 1973–74 has also subsided.

China, on the other hand, appears to have been able to maintain its traditional exports to the United States, with the leading items being tin, accounting for one-fourth of the total value in 1975; cheap cotton piece goods, antiques, rosin, raw silk, hog bristles and fireworks.

Over the long term, the Soviet Union is expected to strengthen its export position, particularly in industrial raw materials that may be in short supply in the developed countries. But such an export drive will have to await the completion of large resource development projects, notably in Siberia, now being financed by some Western countries.

Because of the lead time required, the payoff from these so-called compensation deals, whereby the Russians will pay back development loans in products from completed projects, is not likely to become evident until the early 1980's. A key element in future exports will be the Baikal-Amur Mainline, a 2,000-mile railroad construction project designed to open up new Siberian resource areas for export into the Pacific basin.

Trade expansion between the United States and Communist countries, particularly the Soviet Union, has been hampered by legislation that preserves high tariffs on imports, mainly manufactured goods, from most Communist countries and imposes limits on loans that may be extended by the Export-Import Bank of the United States. As a result, trade with Communist countries represented only about 2 percent of United States trade turnover in 1976.

Similarly, the United States is only a moderately significant factor in the foreign trade of the Communist countries. Most of the trade of the Soviet bloc is among the East European countries and the Soviet Union, and their principal Western trade partners are West Germany, France and other West European nations as well as Japan.

China, since veering away from the Soviet bloc, in 1960, has been doing most of its trade with Japan, Hong Kong and countries in Southeast Asia.

EAST EUROPEANS TRY TRADE BY BARTER—U.S. FIRMS AT LEIPZIG FAIR CITE PRESSURE IN CONTRACT TALKS

(By Michael Gettler)

LEIPZIG, EAST GERMANY.—East European countries, seeking to modernize their troubled economies with Western technology but without amassing still more debts to the West, are turning increasingly toward an ancient trading technique—barter.

The idea is to press Western companies harder to accept more Eastern—manufactured or—grown products as part payment for goods bought in the West.

The expanding emphasis by the East on such techniques was in evidence here this week at the mammoth Leipzig international trade fair that brings together some 9,000 exhibitors from 60 Eastern and Western countries.

Two large U.S. firms exhibiting electronic and chemical products here said privately that apparently serious East German interest in buying their equipment was also accompanied by just as serious inquiries about the prospects for paying for some of it in barter.

The most dramatic example, however, came in the announcement that the Italian steel firm of Danieli had won a $250 million contract from East Germany to build a new plant in Brandenburg, East Germany.

The West German firm of Salzgitter thought they had the contract sewed up. The Italians are said to have slightly underbid the West Germans. However, the Italians also have agreed to accept as payment for the contract part of the plant's steel output plus a selection of other East German manufactured goods.

West Germany is East Germany's largest and most important trading partner in the West, and West German businessmen clearly are worried over the expanding demands by the East for these direct barter, or so-called "buy-back," provisions.

West German officials say the barter pressure clearly is higher this year than last and that it is now a major problem, especially for some smaller and medium-sized firms that don't have the flexibility to make such deals pay off.

It is not clear yet how the East will fare in their campaign, however, if trade on this basis continues to grow. It could cause a boom for the handful of brokerage houses in London, West Berlin, Vienna and elsewhere that specialize in barter deals.

"The way it works is that East Germany may be interested in some U.S. electronic equipment but may want to pay in part with plum jelly, just as an example. The brokerage firm finds out how much they can sell Eastern plum jelly for in the West and the electronic company then decides whether they want to play. After everybody takes his cut, however, the price of the electronic equipment goes up," one U.S. businessman here explained.

For East Germany, which already is estimated to be in debt by about $5 billion to the West, barter is very important. Like much of Communist East Europe, East Germany does not have convertible currency and thus needs to sell its products in the West in order to get hard currency with which it can pay off some of its debts and import still more technology.

But the barter issue creates other problems. Some East German products, such as optics built by Carl Zeiss in nearby Jena, are world-renowned and sell well on their own. But other East German products, even though of reasonable quality, would clearly have a hard time competing with Western goods in the West.

Thus, the East Germans want to use barter for two reasons. One, to take advantage of Western marketing operations that are already set up and which they could not hope to compete with. Secondly, however, they are also trying to use it to get rid of some of the products they also have trouble selling in the East, said one Western businessman.

The Italian steel plant deal is also being viewed by some experienced observers here as reflective of another potentially important trend—an effort by East Germany to back away slightly from its overwhelming dependence on West Germany as a trading partner.

Last year, trade between the two German states was more than $3 billion. The Bonn government, however, clearly gets the better of that, with the East in debt to West Germany alone for some $900 million.

On the other hand, 11 percent of East German exports to the West go to West Germany, and the East Germans have been both expanding exports to Bonn and cutting imports in the past year.

THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, it certainly is mystifying that the United States has failed to ratify a convention that is so closely identified with its best traditions.

The Genocide Convention, adopted by the General Assembly of the United Nations, signed by the United States in 1948, was submitted for Senate ratification by President Truman in 1949. The convention makes it an international crime the commission of specified acts with intent to destroy national, ethical, racial, or religious groups as such.

Mr. President, we cannot wait any longer. It is imperative that the Senate seize the initiative and ratify this convention during this session renewing our dedication to the cause of human rights.

There is no danger of jeopardizing our national interest if we become a party to the Genocide Convention, as many people think. There is absolutely no justification for the inaction of the United States in this vital area of human rights. Recent terrorist actions should be reason enough for immediate ratification of this convention.

Mr. President, over 80 nations have attested to the fact that genocide is an international crime by signing this treaty. The United States can still redeem itself if it moves rapidly to ratify the Genocide Convention now.

Mr. President, I urge the Senate to recognize the need to make genocide an international crime and ratify the convention at once.

WORKER ATTITUDES

Mr. INOUYE. Mr. President, the University of Hawaii is the U.S. base for a very important innovative study of worker attitudes, work content, and working conditions in 15 countries. The findings in this study will have no immediate effect on unemployment here or in the other participating countries; but in the long run, this study may significantly influence the decisions Government, management, and unions make about our work force.

What really challenges the worker—good pay or creative opportunities?

What are the advantages and the limitations of the collective bargaining system—codetermination—worker participation in management.

I would like to introduce the first report on the U.S. findings in this study, as reported in the September 1976 issue of the Wharton magazine.

Mr. President, I ask unanimous consent that the text of this article be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

LIFE ON THE AUTOMATED LINE

(By Philip and Betty Jacob)

(Editor's note.—This article reports on the American phase of a study of automation in the auto industries of 16 countries; a follow-up article will analyze the international similarities and differences.)

Many industrial managers have long believed that the introduction of automation into assembly line production would significantly alter the attitudes of workers towards their jobs. Two distinct and contrary viewpoints have developed. On the one hand, automation, by cutting down on repetitive, manual operations, might contribute to increased job satisfaction and self-respect. On the other hand, automation might make workers feel more like cogs, operating more complex devices, but more completely subordinate to the machines.

Our intensive study of automobile workers in both General Motors and Ford factories indicates that both of these assumptions must be sharply qualified. People have a basic tendency to remain people, behaving and responding in similar ways, whether they work on automated lines or not. But several important variations were discovered which could influence the future introduction of industrial automation.

Our study focused on the most highly automated technology in the automobile industry—the engine block transfer line—and several non-automated processes in three plants, one Ford and two General Motors. As an overall group, workers on the automated line differed little in attitudes or behavior from other workers. Across departments, operators were like operators, maintenance men like maintenance men, and supervisors like supervisors, whether or not the technology was automated. However, operators, stock handlers and inspectors in both situations, those who did the most monotonous work, differed markedly from maintenance men and supervisors—they derived less satisfaction from their work.

In general, there was a high degree of support for automation from the auto workers we interviewed and observed. Only 17 percent would disapprove of introducing work-saving new machines and equipment into their plants. But the factor that contributed most to acceptance of automation had nothing to do with the nature of automated processes themselves.

Instead, the key factor was the comparative beliefs workers had in the security of their jobs. Those who felt most job security were the most supportive of automation. Eighty percent of the strong supporters of automation were confident that even if their present jobs were taken over by the new machines, the company would take care of them with "other acceptable work"; another 17 percent thought the company might possibly do so. Only 2 percent thought they might lose their jobs.

There were, of course, different degrees of acceptance. Those with greater skill and responsibility were most willing to accept advanced technology—maintenance personnel (93 percent) and supervisors (100 percent). So were older workers who had the advantage of seniority, despite the stereotype that younger people are more flexible about change.

The management style, or "organizational climate", also has an effect on a worker's attitudes toward automation. If a worker feels that management is concerned about his welfare, communicates with him, and runs an efficient shop, he will be more favorably disposed to the technological change. The most important component of company atmosphere is openness of communication, up and down, between management and workers. Of those workers who felt adequately informed of technological changes beforehand, 51 percent approved of automation; of those who felt they had not been adequately informed, only 31 percent approved.

One of our clearest findings is that productive behavior is closely related to worker satisfaction. Worker productivity is not necessarily represented by greater output per hour—such output has largely been standardized by the technology of the jobs themselves, and men work to the pace of the machinery. But satisfied workers engaged less in unproductive behavior—such as deliberate absenteeism and rapid turnover—behavior that costs the company money.

Even though this study was conducted while the energy crisis had upset the automobile industry, the great majority of workers we interviewed were either satisfied or "somewhat satisfied" with and reliable on their jobs. Only 13 percent said they were dissatisfied. Only 13 percent had been absent in the two weeks preceding the interview—and of these, less than half (6 percent) said it was because they didn't feel like going to work." Furthermore, this majority intended to stay put, not to change jobs.

These findings may not fit some people's impressions about the attitudes of workers in the automobile industry. Many opinions about how automobile workers feel may have been influenced through the reporting of strike events which occurred in the early '70's in the GM Lordstown plant. The complex issues which arose at the Lordstown plant were not a part of this study because Lordstown did not have the type of automation that was common to all the plants included in the broader multi-national study.

The most potent element in work satisfaction was the challenge in the job. The most satisfied workers found variety, interest and novelty, and the chance to develop new skills in their work. Monotony was strongly associated with dissatisfaction. Satisfaction was also directly related to the extent that the worker felt he could control his own job process, and have autonomy and responsibility. The greater the control, the greater the satisfaction. All this was verified not only by what the workers said, but by our own direct observation of what they did on the production line.

Different kinds of jobs, of course, have different degrees of challenge and autonomy, and therefore different levels of worker satisfaction. Of all workers, the maintenance group, the people who repair the machinery, were the most satisfied, and felt that their jobs came closest to what jobs should be. They were followed by the set-up group, who installed and changed tools. Then came the supervisors.

The most dissatisfied workers, regardless of the machinery they attended and whether or not it was automated, were those with the routine jobs—operators, product handlers, quality control inspectors, for example. Nobody had much good to say about the working conditions.

We have seen that jobs vary, and are associated with different kinds and degrees of job satisfaction and acceptance of automation. The same is true of personalities. This part of the analysis, undertaken by Professor George W. England of the Industrial Relations Center at the University of Minnesota, probed into the reasons that individuals worked, and what gave each person satisfaction. He found there were two general kinds of personalities who responded to different incentives.

The first group worked for the material things the job could give them—primarily pay, the opportunity for upgrading and promotion, reasonable working conditions, and a reasonable work load. Work, therefore, was a means to other ends, most of which would take place away from work.

With the second group, the nature and satisfactions of work came closer to being basic ends in themselves. Satisfaction came from self-expression at the job. For them, interesting work was the most important factor, followed by the chance to form good relationships, and the chance to rise in the organization.

The current expression for this phenomenon is "different strokes for different folks." Both types of workers were found within every type of job, automated or non-automated, at all age levels, and at all pay levels. However, more maintenance people appear to work for self-expression than for pay. The reverse is true for people doing routine manual work like stock handling and inspecting. Supervisors and set-up men are almost equally divided.

The existence of these two distinct and differently motivated groups of workers has major management policy implications. No single, uniform package of material rewards, job enrichment devices and or redesigned work processes—based on an assumption that all workers are alike—will lead to satisfaction for everyone. For the first group, material rewards and conditions of work are of primary importance. For the second group, increased opportunities for self-expression, largely through interesting work, are the crucial factors. This is the group which will find participative management styles appealing.

One group of workers is clearly and sharply different from the rest. These are young workers, under 30. Thirty percent of this group expressed overall dissatisfaction with their jobs, compared to only 9 percent of older workers.

They are the least satisfied in every respect—with the kind of work they have to do, with their supervisors, with the company, with their relations with fellow workers, with the physical conditions in the plant. In short, they are alienated.

Why? First of all, they feel least secure in their jobs, a factor undoubtedly aggravated by the energy crunch when the study was made. Of those 30 or under, 42 percent said their jobs provided little—at most moderate—security. This pessimistic statement was made by only 15 percent of workers over 40. Thirty percent of the youthful group stated flatly they thought they could lose their jobs because of automation, compared to 12 percent of all the rest. They had some experience behind that fear: 24 percent had been recently unemployed, compared to 13 percent of the rest.

What was more, they had the worst jobs—the most monotonous, the ones with the least opportunity for self-expression or the opportunity to use and develop skills and abilities: 68 percent were operators, 22 percent did other routine work such as inspecting or stockhandling. None were in set-up, none were supervisors, and only 10 percent were in maintenance. Even within the same pay brackets, younger workers are more alienated than older ones. Another powerful factor in alienation among the young is the fact that they are over-educated in relation to the mental requirements of their jobs—much more than their elders.

The root cause of alienation among young workers may well be that most hallowed of union workers' rights—the seniority system. Seniority puts them at the bottom of the totem pole, keeps them from the good jobs for (to them) an impossible stretch of time, makes the educational discrepancy most glaring. Worst, it denies them security: they are the last hired and the first laid off or furloughed when the market slumps, apparently the least valued and most expendable.

They are not only dissatisfied with the job; they are also dissatisfied with the union, that institution so closely identified with the older workers. More than their elders, they don't feel that the union is doing enough about better wages and working conditions, grievances, and organizational changes. They

take less part in union activities, care less about broad social and public issues, and think the union should spend less time trying to influence public policy and workers' political consciousness. Unlike other young rebels, they are not openly carrying signs; but they want their goodies now, not after the slow turn of the seniority wheel.

Alienated young workers present a general problem and a threat. There is also a small group (10 percent) of socially-conscious, union-oriented activists who may be the agents of change, reconciling the adoption of automation with improvement in the quality of life. They may bring union and management together in the common effort.

This small group is not alienated; it does not feel powerless. It works actively to change and influence the conditions of work and life both inside and outside the plant. Among the workers we interviewed there is a significant overlap between those who try to participate in decisions that affect their work, and those who are active in the political and social life of the broader community. They are also principal participants in the union, which serves as a link between the two worlds.

What can be done?

Five routes to "humanized productivity" can be assessed in the light of this study.

First, more automation. This is a road to nowhere as far as greater motivation and relieving disaffection are concerned. In the heavy machining operations that go into making auto engines, more automation will not make work more satisfying or challenging for the majority, only for a few maintenance and set-up people. Routine remains routine for many tasks that require the presence of a human, even if electronic controls replace manual work.

Second, the pay and comfort route. No one has strong work motivation or satisfaction without adequate pay and good working conditions. To some workers, they are the prime factors—along with a chance to get even better pay and more comfort through advance.

But to others, though they are necessary, they are not enough. They are a floor, not a ceiling. The youngest workers, the alienated group, did not complain primarily about pay. Besides, in a democratic union, the egalitarian pressure is to get adequate pay for everyone rather than superior pay for the best and brightest and those who work the hardest; the range is narrow, and usually pegged to seniority.

Third, job security. Now we come close to the jugular. As reported earlier, the data clearly show that the feeling of security is vital to gain workers' support for technological advances that generate greater productivity. It is also basic to general job satisfaction and to workers' regard for and loyalty to the company. The secure worker is less likely to look for another job, or to lay down on this one.

It is a popular cliche of our society that security has a deadening effect on initiative, that it produces loafers and timeservers. "If you want security above everything, go to prison." The data show that this glib generality is not only untrue but dangerous.

In socialist countries employment security is guaranteed by the government; in Japan, by some large companies. In America it is an option subject to decision by management negotiating with unions. So management, unions and government should concentrate on creating a formula that will assure workers of job security as a fundamental step toward humanized productivity.

Fourth, greater challenge in the job. At first glance, the findings seem to support the current emphasis on "job enrichment" and better "job design." Much of the job satisfaction among the engine builders was due to the challenge of the work. This was particularly true of those whose main motivation was the need for self-expression.

In the production end of heavy industry, however, technology imposes limitations on what can be done to make many jobs more challenging. The maintenance jobs already provide variety, interest, independence, skill and ingenuity; and the electrician, fixture-repair man and pipefitter are well aware of how important they are on trouble calls, when every minute of shutdown on the transfer line may cost thousands of dollars.

But how does one "enrich" a quality control inspector's work—without eliminating at altogether through automatic controls? How can management add variety and "creativity" to the monitoring of a Cincinnati broach or a bank of Excello borers?

Fifth, expanded worker participation. Many of us who planned this multinational study expected that workers who had an important share in making the decisions that affected their work would be more satisfied and productive. We thought this might be a common element among different societies and different levels of technology. The American data, from GM and Ford, do not support this expectation. Neither the opportunities for participation, nor even the actual degree of participation, in decision-making about work was significantly related to job satisfaction, behavior leading toward better production, or acceptance of new technology.

Why was this so? One possibly is that the actual participation was not large or important enough—or apparently not connected closely enough to their immediate jobs and situations. Those few workers who had the most significant participation—whether working with the company's policies or against them—turned out to be the most concerned, and generally the most satisfied. Another possibility is that, because of the whole collective bargaining process of working through the union, the workers don't see a close connection between the individual efforts and the results.

In the 1950's it was fashionable for engineers and industrial managers to write books and articles about automation sweeping through industry after industry to re-shape American society. There was a great surge of concern about chronic unemployment created by automation which was countered by a great share of enthusiasm about potential leisure. Few of the anticipated changes have occurred so far. Only about 1 percent of industrial tools have been converted to automatic control, because the process of automation has proven to be more difficult and more costly than anticipated.

Nonetheless, automation research moves ahead, and it will undoubtedly bring important changes. To expand the domain of automation, however, will demand the shedding of concepts and practices deeply imbedded in the structure of American management and unions.

ABOUT THE STUDY

This article is the first publication of research from a unique international study of how automation affects worker attitudes and behavior in the automobile factories of the United States and 15 European countries, including the Soviet Union. A later article will examine the ways in which different cultures and different economic systems influence the effects of automation on workers.

The overall study was originated by the International Labor Institute of the Soviet Academy of Sciences, and sponsored by the European Center for Coordination of Research and Documentation in the Social Sciences in Vienna. Though the nations and their economic systems differ, identical research tools were developed by unions, management, and scholars to examine work content, working conditions, and worker attitudes. Similar sections of each auto industry were examined—first, the automated transfer line where an engine block is tooled by electronically controlled machinery, and second, a non-automated department with similar, but manually controlled, tooling. Over 3,000 workers were interviewed and observed, more than 200 in the United States.

Other countries in the study include: Austria, Czechoslovakia, Denmark, Finland, France, Federal Republic of Germany, German Democratic Republic, Hungary, Italy, Japan, Poland, Soviet Union, Sweden, United Kingdom, United States, Yugoslavia.

COMMENTS FROM UAW AND GM

Irving Bluestone, Vice President, United Automobile Workers, Director—General Motors Department:

The study notes that while it was anticipated worker participation in decision making would emerge as a key variable influencing worker motivation, nevertheless, the data does not support this expectation. I want to draw attention to one of the problems which I believe drew the research to this conclusion.

Workers cannot evaluate the meaning and significance of worker participation programs unless they actively experience them. My personal experience in discussing this with workers indicates that where a "before and after" project is studied, worker participation creates greater satisfaction.

I feel, therefore, that the results of the study are incomplete since they are based on interviews of workers who have not been involved in carefully designed worker participation programs.

In this regard, it is important to distinguish between programs of so-called job enlargement or job enrichment (which normally relate to redesigning of individual jobs) and programs of improved quality of worklife (which embrace all aspects of the relationship of the worker to his job and to the management). Involvement of the worker in the decision-making process is not simply a matter of enlarging the number of operations he performs or establishing work groups, etc. It is not a matter of imposing new engineering techniques upon the worker. Rather, it means finding better ways to afford the worker the broadest opportunities for input and innovation as to job design, methods, and processes of operation, quality of product, plant layout and a host of other decisions regarding the worker's relationship to the total workplace.

Dr. D. L. Landen, Director, Employee Research Section, General Motors Corporation:

Overall, I think the conclusions are sound and supported by our own research and that of others. It is apparent from these findings, as it is from ours, that there is no simple explanation of job satisfaction or of human motivation. Neither are static; neither are subject to universal "manipulations"; neither are locked inexorably to specific causal variables or conditions; and neither will succumb to final definition, differentiation and defeat. If it sounds like a never-ending struggle, it is; and I hope it remains that way. Now some specific comments.

First, I don't question the importance of job security. It may be the most significant variable among a cluster of important variables. But the subsequent elaboration of this finding suggests that the job security variable is either moderating or is moderated by the age variable. The age variable reoccurs either directly or inferentially throughout the findings: younger workers do have less job security; older workers tend to have more responsible, skilled jobs; while absenteeism may or may not be higer among younger workers, turnover or the propensity toward turnover is greater among the younger, less senior employees; the more satisfied workers are those older workers, who,

because of their length of service, are maintenance employees or do set-up work; the dissatisfaction is linked to the type of work performed, which unquestionably is a significant determiner; but here again it is likely that these jobs are populated with younger workers.

Second, I concur completely with the conclusion that "no single, uniform package" is appropriate to all workers. It may not even be appropriate to any single group of workers.

Third, while more automation may only lead to greater job satisfaction among a small group of workers, it may lessen dissatisfaction among a larger group of workers. More automation in the automobile industry may be somewhat unlikely because of the nature of most jobs or because of the cost/benefit ratio. But you may not wish to discount it completely as the basis for eliminating the least desirable jobs.

Fourth, admittedly, the nature of the technology does indeed limit the extent to which jobs can be redesigned or enriched. However, it does not limit the degree to which the roles of workers can be enriched. Despite the technology, means are available by which people can participate more actively and creatively in problem solving, and in other activities, wherein they can make more "significant contributions" and thus derive greater satisfaction from their "work."

S. 1150—RURAL HOUSING ACT OF 1977

Mr. ABOUREZK. Mr. President, I am pleased to cosponsor Senator HUMPHREY'S bill to amend title V of the Housing Act of 1949. This legislation addresses many problems in the Housing Act and will make much needed improvements in these programs.

Of special importance to me are sections 3 and 20. Section 3 addresses the urgent need for rural housing research. The FmHA is now the largest direct Federal lender in the country. In its entire history, the FmHA has never had its own research capacity. The time is long overdue for the FmHA to create an in-house research arm in order to allow it to focus in needs of special groups such as the elderly, the handicapped, farmworkers, and Indians; to study rural growth patterns; and to evaluate rural community facilities and services.

Section 20 addresses the urgent need for water and sewer grant/loan programs. I agree with the goals of this section and I intend to introduce a more comprehensive measure on this subject very soon. Following its introduction, I hope and expect to work with Senator HUMPHREY on this important matter to develop a mutually acceptable approach to serve the neds of the rural communities in order to supply them with adequate water and sewage systems.

Mr. President, this is vital legislation and I urge the Senate to move as quickly as possible to enact it into law.

(This concludes additional statements of Senators submitted today.)

CONCLUSION OF MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask that morning business be closed.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATOR CHAFEE AND SENATOR BAKER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent after the two leaders or their designees have been recognized under the standing order tomorrow morning that Mr. CHAFEE be recognized for not to exceed 15 minutes; and, thereafter, Mr. BAKER be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE TOMORROW

Mr. ROBERT C. BYRD. Mr. President, at the conclusion of these two orders, the Senate will resume consideration of the code of conduct, at which time the pending amendment by Mr. PERCY will be under a time limitation of not to exceed 30 minutes to be equally divided between Mr. PERCY and Mr. NELSON; and that following the debate on the code of conduct it then be set aside and the Senate proceed to the consideration of the unemployment compensation measure, with a vote to occur with relation to the Percy amendment at a specific time tomorrow afternoon, let us say, 2 p.m.

Mr. PERCY. 2 p.m. would be quite satisfactory.

Mr. JAVITS. Mr. President, reserving the right to object and, of course, I shall not object, I have a very important committee meeting. I have the primary amendments to the unemployment compensation bill. Would the Senator anticipate we would reach that before 12 on his schedule?

Mr. ROBERT C. BYRD. It is my anticipation that we would start on the unemployment compensation measure at 11 o'clock. Senator LONG said he would like to start at 11 o'clock because we will be all day on it and maybe into the evening. If we could just have this one vote set for 2 o'clock, with the understanding that immediately following the vote the Senate will resume consideration of the unemployment compensation bill——

Mr. JAVITS. Again reserving the right to object, If Senator LONG will understand that I cannot get to the floor physically until noon with respect to amendments, he knows the amendments I have, and as long as he understands that, that is all right.

Mr. BAKER addressed the Chair.

Mr. LONG. We will not have any hope at all of completing action on that bill before noon.

Mr. JAVITS. That is all right. I just wanted to be here.

Mr. BAKER. Mr. President, reserving the right to object, and I do not plan to object, may I ask if it is the intention of the majority leader to finish the unemployment compensation bill tomorrow, because we must get on with the ethics package all day on Thursday. Otherwise, we will not be able to take advantage of the time. Since there are a number of amendments on our side, I need assurance that we will return to the ethics package all day Thursday.

Mr. ROBERT C. BYRD. Mr. President, in response to that question, I would suggest that the Senate will probably be in session fairly late tomorrow evening, depending upon the manager of the bill, but I ask unanimous consent that if the Senate does not complete action on the measure tomorrow that it be put aside until such time Thursday as we have finished with amendments on the code of conduct, if we finish them on Thursday and, if not, that the Senate resume consideration of the unemployment compensation measure immediately upon the disposition of the code of conduct on Friday, in connection with which a final vote has already been agreed to.

Mr. LONG. Mr. President, may I just add my thoughts to this. This unemployment insurance bill should be passed at the earliest possible moment.

Now, we cannot do much about these revenue bills getting over here late from the House. We commenced the hearings on the bill before the bill was ever in the committee. We heard the bill was on its way so we started the hearings.

We had the bill reported within 3 days after the House got the bill to us, so we are moving as fast as we know how to move with that bill. But, notwithstanding that, the checks that are due to be paid to unemployed workers on Monday will not be able to be there for those men because we have not acted unless we act very soon.

I hope if we can get that bill on the President's desk and get it signed sometime Friday. They ought to be able to have checks, let us say, Monday for these unemployed workers.

I know the Senate would not want to delay on this matter to the extent that those who are out of work and have been out of work for a long time, and have very meager income, would have to do without just because we tarried here in the Senate, even voting on something as important as a code of ethics for Senators. At that point I think the average unemployed workers would say he was not that excited with whether we are ethical or not ethical. He wants his check. He needs something to put some food on the table, and I think every Senator understands that.

So I hope if we fail to pass this bill Thursday evening or Wednesday evening that nothing would keep us from pro-

ceeding with it until we get that unemployment insurance bill passed because there must be a conference, and some of the issues in conference will be rather hard fought, and that is assuming that no amendments are added that might add to the controversy.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Senator PERCY has the floor

Mr. PERCY. Mr. President, will it be possible to resolve the unanimous-consent agreement? I would like to order the yeas and nays before Senators leave the floor.

Mr. BAKER. Mr. President, reserving the right to object, just for a moment——

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

Mr. BAKER. I understand the point made by the distinguished Senator from Louisiana. But, by the same token, there are commitments that are outstanding to finish this ethics bill under a standing unanimous-consent request allotting 50 hours on a schedule the leadership has tried to establish.

I just want it clearly understood, that so far as I am concerned, I have agreed for this matter to come up tomorrow at the request of the majority leader. I think it is important and should come up tomorrow. While there is a deadline Friday, we must attend to this important business. As far as I am concerned, we will stay as long as is necessary tomorrow night to dispose of this bill.

Mr. President, I am under an obligation to the Senate and to my colleagues on this side of the aisle to see that the ethics package is concluded. Therefore, I must say that my consent to the consideration of this measure is interdependent on the arrangements I have just described. I am willing to proceed on the assurance of the majority leader, which I now have, that should we not finish the unemployment measure tomorrow, or even prior to 10 a.m. Thursday morning, that it will be laid aside so that we might honor our commitment to address the ethics package all day Thursday and Friday prior to 11:15.

I have no objection.

Mr. JAVITS. Mr. President, reserving the right to object and I shall not object, I have four amendments to the measure and I shall present them, but I will do my utmost, I wish to assure the Senator, because I agree with him about the unemployment compensation, to make the time only as to what is absolutely essential. I do not agree with him about amendments, we rarely do, that they are complicated things like that, but we will argue that when the time comes. I will do my utmost to make it possible to finish about 10 a.m., and I am glad the leader said 10 a.m., because we may want to vote the next morning, after debating the bill. So I will have no objection to the arrangement; provided it includes 10 a.m. on Thursday.

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Senator PERCY has the floor.

Mr. HUMPHREY. Will the Senator from Illinois yield to me for the purpose of asking a question of the majority leader?

Mr. PERCY. I am happy to yield.

Mr. HUMPHREY. It is a technical question. This unanimous-consent request does not prevent the meeting of committees or sub-committees that may be scheduled at 10 o'clock tomorrow morning?

Mr. BAKER. Mr. President, if the Senator from Illinois will yield so I may answer. I am the culprit who has been objecting to committees meeting while we are concerned with the pending measure, the ethics package. I will not object to committees meeting while we are engaged in debate on the unemployment compensation bill.

Mr. HUMPHREY. I have a markup tomorrow. That is why I say that.

Mr. JAVITS. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Chair observes that the committees may meet until 2 hours after the Senate convenes in any event.

Mr. JAVITS. That is all right.

Mr. HUMPHREY. I thank the Chair.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. THURMOND. We do not vote until tomorrow.

Mr. ROBERT C. BYRD. Yes; there will be no more votes until tomorrow.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETINGS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may meet during the session of the Senate tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFFICIAL CONDUCT AMENDMENTS OF 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume consideration of Senate Resolution 110 at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

UP AMENDMENT NO. 109

Mr. ROBERT C. BYRD. Mr. President, I understand that Senator PERCY, the author of the amendment, and the manager of the measure, may have worked out a resolution on the Percy amendment.

ORDER VITIATING RECOGNITION OF SENATOR JAVITS AND RESUMPTION OF CONSIDERATION OF UP AMENDMENT NO. 109 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for recognition of Mr. PERCY on tomorrow and for the resumption of consideration of amendment No. 109 on tomorrow be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask unanimous consent to modify my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 110

Mr. PERCY. Mr. President, I send a modification of my amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes unprinted amendment No. 110, a modification to amendment No. 109.

On page 28, strike out lines 12 through 19 and insert in lieu thereof:

"6. No Member, officer, or employee of the Senate compensated at a rate in excess of $25,000 per annum and employed for more than 90 days in a calendar year (unless hired on a per diem basis) shall affiliate with a firm, partnership, association, or corporation for the purpose of providing professional services for compensation or permit that individual's name to be used by such a firm, partnership, association, or corporation or practice a profession for compensation to any extent during regular office hours of the Senate office in which employed. For the purposes of this paragraph, 'professional services' shall include but not be limited to those which involve a fiduciary relationship."

Mr. PERCY. Mr. President, I wish to express appreciation to the Senator from Wisconsin (Mr. NELSON) and the Senator from South Carolina (Mr. THURMOND) for assisting in working this amendment out in such a way that it accomplishes the end that I think we have all tried to reach. I would also like to express appreciation to the Senator from Oklahoma (Mr. BELLMON) for the work that he has done in this area of treating with fairness and justice all Members of the Senate and members of the staff, in such a way that we can meet all the objections that could logically be raised, but provide adequate freedom to put everyone on a fair and equitable basis.

Mr. President, I have no further comment to make at this time, and I am prepared to vote.

Mr. THURMOND. Mr. President, I strongly opposed this amendment to begin with, because it would have allowed a Senator's staff member, during regular working hours, to practice law or medi-

cine or some other profession. As the amendment is now modified, it provides that a Senator's staff member will not be allowed to practice a profession for compensation to any extent during regular office hours of the Senate office in which employed.

In view of that modification, I am willing to accept the amendment.

The PRESIDING OFFICER. Do Senators yield back the remainder of their time?

Mr. NELSON. Mr. President, I would just like to say the amendment is now drafted more narrowly than the House provision, which does permit the practice of the professions within the earned income limitation.

I would doubt that the amendment itself specifically affects any Member of the Senate, but there are somewhat more than 2,000 staff people beyond those in the Senate, and certainly some of those would be affected by the restriction that is in the resolution. I think it is drafted carefully enough that I have no objection to the amendment.

Have the yeas and nays been requested?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. NELSON. I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment, as modified, of the Senator from Illinois.

The amendment, as modified, was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and ask unanimous consent that the time be charged equally against both sides on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—H.R. 4877

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as H.R. 4877, the supplemental appropriation bill, is called up and made the pending business before the Senate, there be a time limitation for debate on the bill of 4 hours, to be equally divided between the Senator from Arkansas (Mr. McCLELLAN) and the Senator from North Dakota (Mr. YOUNG); that there be a time limitation on any amendment of 1 hours, and a time limitation on any debatable motion, appeal, or point of order, if such is submitted to the Senate for discussion, of 30 minutes, and a time limitation on any amendment in the second degree of 30 minutes; and that the agreement with respect to the division and control of the time be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the program for tomorrow is as follows, and I ask the Chair, Parliamentarian, and Journal clerk to follow please closely:

The Senate will convene at 10:30 a.m. After the two leaders or their designees have been recognized under the standing order, Mr. CHAFEE will be recognized for not to exceed 15 minutes, after which Mr. BAKER will be recognized for not to exceed 15 minutes.

H.R. 4800

The Senate will then proceed to the consideration of Calendar Order No. 56, H.R. 4800, an act to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, there will be rollcall votes throughout the afternoon tomorrow. It is possible that a rollcall vote could be reached before 12 o'clock. I doubt that any amendment will be called up, however, that would result in a rollcall vote before noon. But that cannot be guaranteed. Rollcall votes will continue into the late afternoon, possibly early evening, and conceivably could go later than the early evening tomorrow. It is important, as Senator LONG has already pointed out, and he will be the manager of the bill, that that measure be enacted as quickly as possible because there is a time deadline of March 31 in connection with the bill.

TIME LIMITATION AGREEMENT ON BARTLETT AMENDMENT TO H.R. 4800

Mr. President, there is an amendment which Mr. BARTLETT will call up on the unemployment compensation bill. It is a nongermane amendment. I believe the distinguished chairman of the committee would authorize me to enter into a time agreement on that one nongermane amendment.

I ask unanimous consent that there be a time limitation of not to exceed 1 hour with reference to Mr. BARTLETT's amendment, the time to be equally divided between Mr. BARTLETT and Mr. LONG.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Reserving the right to object, Mr. President, I would inquire of the majority leader if that request could be extended to provide that no amendments to the amendment might be in order

Mr. ROBERT C. BYRD. Yes. I ask unanimous consent, Mr. President, that no amendments to the Barlett amendment be in order, but that, of course, Mr. LONG retain his right to move to table the amendment.

Mr. BAKER. Mr. President, reserving the right to object still further, I understand that nothing in this agreement would affect the right of any Senator to call for a division of the amendment.

Mr. ROBERT C. BYRD. The Senator is correct.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I acceded to the suggestion concerning a time agreement on Mr. BARTLETT's agreement without having cleared this with Mr. LONG. I would ask unanimous consent that the agreement hold conditioned on Mr. LONG's approval thereof.

Mr. BAKER. Mr. President, reserving the right to object, and it is not my intention to object, I understand the request by the majority leader and think it appropriate. However, by the same token, I want it made clear that there is no order against nongermane amendments to this bill at this time.

The PRESIDING OFFICER. The Senator from Tennessee is correct.

Mr. BAKER. A further parliamentary inquiry, if I may?

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. By acceding to the request of the majority leader, we are doing nothing to extinguish any rights that the distinguished junior Senator from Oklahoma would have in any event to offer this amendment to this bill.

The PRESIDING OFFICER. The Senator from Tennessee is correct.

Mr. BAKER. Mr. President, under those circumstances, while first expressing my hope that Senator LONG will not object to this formulation——

The PRESIDING OFFICER. The Chair observes that the only right which would be extinguished would be the right to amend the Bartlett amendment.

Mr. BAKER. Mr. President, I still reserve the right to object for just a moment.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, continuing on with my reservation on the request, I believe the Chair has advised the Senator from Tennessee that the request of the majority leader would not extinguish any rights of the junior Senator from Oklahoma to offer his amendment to the Emergency Unemployment Compensation Act, and that there is no standing order and no unanimous-consent order against nongermane amendments.

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Mr. President, I have no further objection to the request of the majority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I think it is well that we leave the last word in this instance to Mr. LONG, inasmuch as I have not cleared it with him. I feel he is entitled to that courtesy. I am very grateful to the minority leader and to Mr. BARTLETT for acceding to my request in this regard.

OFFICIAL CONDUCT AMENDMENTS OF 1977

Mr. BAKER. Mr. President, on another matter, we still have a number of amendments to Senate Resolution 110 that will be offered on our side. I ask the Chair how much time is remaining under the order, and how much time is respectively allocated to the Senator from Tennessee and the majority leader?

The PRESIDING OFFICER. The Senator from West Virginia has 332 minutes. The Senator from Tennessee has 489 minutes.

Mr. BAKER. I thank the Chair.

Mr. President, for the benefit of our colleagues and for general information, according to my notations I have requests from six Senators on this side to offer other amendments—Senators CURTIS, DOLE, HANSEN, BAKER, STEVENS, and WALLOP. I believe we have already provided time limitations and a sequence for the amendments of the Senator from NEBRASKA (Mr. CURTIS), Mr. DOLE, Mr. HANSEN, and in the case of my own amendment. Incidentally, it is presently planned to offer only one of the two amendments now at the desk—one amendment by Mr. STEVENS and one amendment by Mr. WALLOP. According to my rough calculations that will come out to just about the time we have remaining on our side.

I would say, Mr. President, that I hope we can have a full day on Thursday, and what available time there is on Friday, to make certain no one is cut off from offering additional amendments they may have to this resolution.

Mr. ROBERT C. BYRD. Mr. President, I ask the Chair to state what the sequence is if such an order has been entered into.

The PRESIDING OFFICER. There is no further sequence on amendments of recognition.

Mr. ROBERT C. BYRD. That is my understanding.

Mr. President, what is the order with respect to time limitation on any of the amendments to which Mr. BAKER has referred, with the exception of his own amendment?

The PRESIDING OFFICER. On each amendment offered by the Senator from Wyoming, the limitation is 80 minutes.

Mr. ROBERT C. BYRD. That is Mr. HANSEN?

The PRESIDING OFFICER. Yes.

The same is true of the senior Senator from New York.

Mr. ROBERT C. BYRD. Mr. JAVITS.

The PRESIDING OFFICER. The same is true of the Senator from Kansas (Mr. DOLE). Those are the only variations from the 2-hour agreement.

Mr. ROBERT C. BYRD. Does that conform with the information that the distinguished minority leader has?

Mr. BAKER. Mr. President, it does. We shall be hard pressed to do all of this in the time available. I think it will just fit, but there will be no time to spare on the calendar, on the clock, or on this list.

Mr. ROBERT C. BYRD. Mr. President, I have a feeling that the manager on the part of the majority probably will not take as much time as is allotted to him on the amendments. I express the hope to my friend from Tennessee (Mr. BAKER) that we can work together in getting authors of amendments to reduce the time, if at all possible, so that we can give them all a chance to get their amendments in, and get votes with relation thereto, on Thursday. It will be difficult to have anything on Friday prior to the hour of 9:45 a.m.

Of course, the Senate can come in earlier and can take action, but I believe the Senate is to begin its consideration of the amendment by Mr. BAKER at 9:45 on Friday morning. So if the distingiushed minority leader and I could work together in getting Senators to cooperate with us, if they will, to the extent that they can, in reducing time on amendments, perhaps it might ease our burden a little bit.

Mr. BAKER. Mr. President, I agree with the majority leader. I express only one other hope that, if there are no other amendments or only a few amendments left on his side of the aisle, that we might share a little of the remaining time—if time is to be critical.

Mr. ROBERT C. BYRD. Yes.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. ROBERT C. BYRD. Mr. President, so that committees will be on notice Thursday, we expect to be back on the code of conduct. The first 2 hours of the session, the committees are at liberty to meet.

ORDER FOR RECESS FROM TOMORROW UNTIL 9 A.M. ON THURSDAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business tomorrow, it stand in recess until the hour of 9 a.m. on Thursday.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, depending on what the outlook is by the time we close up business tomorrow, it might be possible to change that order, to come in a little later than 9 a.m., but as of now I think it well that we sav 9 a.m. so that the committees will know they can at least meet until 11 a.m. on Thursday.

RECESS TO 10:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10:30 a.m. tomorrow.

The motion was agreed to; and at 7:23 p.m., the Senate recessed until tomorrow, Wednesday, March 30, 1977, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate March 29, 1977:

DEPARTMENT OF STATE

Richard N. Cooper, of Connecticut, to be Under Secretary of State for Economic Affairs.

Donald F. McHenry, of Illinois, to be Deputy Representative of the United States of America in the Security Council of the United Nations, with the rank of Ambassador.

DEPARTMENT OF JUSTICE

Thomas E. Lydon, Jr., of South Carolina, to be U.S. Attorney for the District of South Carolina for the term of 4 years vice Mark W. Buyck, Jr., resigned.

THE JUDICIARY

Howell W. Melton, of Florida, to be U.S. District Judge for the middle district of Florida vice Gerald B. Tjoflat, elevated.

IN THE COAST GUARD

The following regular officers of the Permanent Commissioned Teaching Staff of the U.S. Coast Guard for promotion to the grade of captain:

John B. Mahon
Frank S. Kapral
Harlan D. Hanson
Thomas D. Combs, Jr.
Louis K. Bragaw, Jr.

The following officers of the U.S. Coast Guard Reserve for promotion to the grades indicated:

Captain

Pasquala M. Benigno
Laurel R. Elliott
Joseph F. Tyson
Manuel Tubella, Jr.

Commander

Paul E. Burke

The following regular officer of the U.S. Army to be a permanent commissioned officer in the regular Coast Guard in the grade of lieutenant:

Joseph F. Tucker

The following licensed officers of the U.S. Merchant Marine to be permanent commissioned officers in the regular Coast Guard in the grade of lieutenant (junior grade):

Allan H. Moore
Richard T. Nelson

IN THE AIR FORCE

The following officer to be placed on the retired list in the grade indicated under the provisions of section 8962, title 10 of the United States Code:

To be lieutenant general

Lt. Gen. Warren D. Johnson, [redacted] FR (major general, regular Air Force), U.S. Air Force.

IN THE NAVY

Vice Adm. Julien J. LeBourgeois, U.S. Navy, for appointment to the grade of vice admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

The following-named Midshipmen (Naval Academy) to be permanent Ensigns in the line or staff corps of the Navy, subject to the qualifications therefor as provided by law:

Philip J. Aarons
Edward L. Abner II
John A. Achenbach
George W. Ackley III

FOOD SERVICE WARRANT (SUPPLY CORPS)

Michael S. Marmon

The following-named (U.S. Navy officer) to be appointed a temporary Commander in the Medical Corps in the Reserve of the U.S. Navy, subject to the qualifications therefor as provided by law:

*CDR Larry D. Cordell, MC, USN

CONFIRMATIONS

Executive nominations confirmed by the Senate March 29, 1977:

DEPARTMENT OF THE TREASURY

Bette Beasley Anderson, of Georgia, to be an Under Secretary of the Treasury.

Anthony Morton Solomon, of Virginia, to be Under Secretary of the Treasury for Monetary Affairs.

C. Fred Bergsten, of New York, to be a Deputy Under Secretary of the Treasury.

Gene E. Godley, of the District of Columbia, to be a Deputy Under Secretary of the Treasury.

*Appointment sent out Ad Interim (during the recess of the Senate).

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Hale Champion, of Massachusetts, to be Under Secretary of Health, Education, and Welfare.

Henry Jacob Aaron, of the District of Columbia, to be an Assistant Secretary of Health, Education, and Welfare.

Richard D. Warden, of the District of Columbia, to be an Assistant Secretary of Health, Education, and Welfare.

Eileen Shanahan, of the District of Columbia, to be an Assistant Secretary of Health, Education, and Welfare.

SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

Robert S. Strauss, of Texas, to be Special Representative for Trade Negotiations, with the rank of Ambassador Extraordinary and Plenipotentiary.

DEPARTMENT OF DEFENSE

Gerald Paul Dinneen, of Massachusetts, to be an Assistant Secretary of Defense.

David E. McGiffert, of the District of Columbia, to be an Assistant Secretary of Defense.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE AIR FORCE

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be general

Lt. Gen. William G. Moore, Jr., [redacted] FR (major general, Regular Air Force), U.S. Air Force.

The following officer for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapters 35, 831, and 837, title 10, United States Code:

To be brigadier general

Colonel John B. Conaway, [redacted] FG, Air National Guard.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. William Bennison Fulton, [redacted] Army of the United States (major general, U.S. Army).

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lieutenant General John Alfred Kjellstrom, [redacted] Army of the United States (major general, U.S. Army).

IN THE NAVY

Rear Adm. Kenneth M. Carr, U.S. Navy, having been designated for commands and other duties determined by the President to be within the contemplation of title 10, United States Code, section 5231, for appointment to the grade of vice admiral while so serving.

IN THE MARINE CORPS

The following colonels of the Marine Corps Reserve for appointment to the grade of brigadier general under the provisions of title 10, United States Code, section 5902:

Kenneth W. Weir
John B. Hirt

Lieutenant General John N. McLaughlin, U.S. Marine Corps, when retired, to be placed on the Retired List in the grade of lieutenant general in accordance with the provisions of title 10, United States Code, section 5233.

IN THE AIR FORCE

The following officer under the provisions of Title 10, United States Code, Section 8066, to be assigned to a position of importance and responsibility designated by the President under Subsection (a) of Section 8066, in grade as follows:

To be general

Lt. Gen. John W. Roberts, [redacted] FR (major general, Regular Air Force), U.S. Air Force.

IN THE ARMY

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of Section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. John Rutherford McGiffert II, [redacted] U.S. Army.

IN THE MARINE CORPS

Maj. Gen. Andrew W. O'Donnell, U.S. Marine Corps, having been designated, in accordance with the provisions of title 10, U.S. Code, section 5232, for commands and other duties determined by the President to be within the contemplation of said section, for appointment to the grade of lieutenant general while so serving.

IN THE ARMY

Army nominations beginning James J. Hill, to be colonel, and ending David C. Zimmerman, to be second lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on March 14, 1977.

IN THE NAVY

Navy nominations beginning David H. Acton, to be lieutenant, and ending Jeri M. Rigoulot, to be lieutenant, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on March 1, 1977.

Navy nominations beginning Ronald J. Abler, to be lieutenant commander, and ending Margaret F. Hamman, to be lieutenant commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on March 1, 1977.

EXTENSIONS OF REMARKS

BYRD AMENDMENT REPEAL DISGRACEFUL

HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

Tuesday, March 29, 1977

Mr. HARRY F. BYRD, JR. Mr. President, I have maintained for many years now that the punitive sanctions imposed on Rhodesia by the United Nations were hypocritical and ineffective.

The hypocrisy stems from the fact that the Government of Rhodesia is no more illegal, no more oppressive, and no more undemocratic than a great many other governments within the United Nations. Yet Rhodesia is the only nation to date to be singled out for total sanction by the U.N.

Many of the leading members of the U.N. have ignored the sanctions while publicly paying lip service to them.

Despite these multiple hypocrisies, the United States has complied with the U.N. sanctions rigorously with the single exception of strategic materials vital to the defense of the United States.

None has addressed this subject better than did the syndicated columnist, James J. Kilpatrick, in the column published throughout the United States last week. I ask unanimous consent that the text be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BYRD AMENDMENT REPEAL DISGRACEFUL

(By James J. Kilpatrick)

WASHINGTON.—The House and Senate voted with a whoop and a holler last week to repeal the Byrd amendment on Rhodesian chrome. An exultant President signed the bill the next day. "This puts us on the side of what's right and proper," he said. It was a fatuous remark, but no more than what we are learning to expect from Mr. Carter.

Until it was snuffed out a few days ago, the Byrd Amendment was the one bright flame of truth in a murky world of diplomatic falsehood. As such, it was a great embarrassment. In the midst of ten thousand lies, there stood the Byrd Amendment: Little Orphan Honesty. Observers of the African scene were perplexed: What's a nice kid like you, they kept saying, doing in a joint like this?

During the five years of its existence, the Byrd Amendment provided the only breath of integrity in the UN's fetid swamp. The amendment openly, unapologetically, without shame or subterfuge, authorized the importation of Rhodesian chrome. The amendment was in palpable violation of the United Nations' sanctions against trade with Rhodesia. So long as it remained on the books, the amendment made Uncle Sam a kind of pariah, as welcome as Billy Graham at an East Side orgy.

With this irritating splinter removed, the United States may again be as crooked, as deceitful, as filled with hypocrisy, as everybody else. And this will be a tremendous relief. For the past ten years, since the UN imposed these punitive sanctions, none of the leading members of the UN has paid the slightest attention to them. Visitors to Salisbury have marveled at the evidence of worldwide commerce before their eyes—Toyota from Japan, Fiats from Italy, Volkswagens from Germany, Chevrolets from the United States. Every major nation of the world has violated the sanctions in every conceivable way.

Rhodesia produces the finest matellurgical chrome in the world; and for the past ten years, despite the UN embargo, Rhodesia has sold every ton that could be mined. The ore has gone to Russia, to England, to German, and of course to the United States. The ore will continue to find its way into the channels of steel production worldwide. The only difference, now, is that the cheating will be unanimous.

Mr. Carter, maintaining his fatuity record in this regard, referred the other day to the "illegal" regime in Rhodesia. The regime at Salisbury is precisely as "illegal" in its origin, neither more nor less, than Mr. Carter's regime in Washington. As we were reminded to the point of saturation throughout 1976, the United States came into being by means of a unilateral Declaration of Independence from Great Britain. Our forefathers were rebels, traitors, revolutionaries. And not to

put too fine a point upon it, they were racists also—dedicated to denying the black slaves the most elementary human and civil rights.

In the name of conscience, in the name of history, how can the Americans of that inheritance denounce an "illegal, racist regime" in Salisbury? The government of Rhodesia is no more illegal than any other government born of revolution; and it is no more oppressive or undemocratic than dozens of other regimes that are cordially welcome in the family of nations.

The whole business is disgraceful. Mr. Carter has won repeal of the Byrd Amendment. His next stop will be to obliterate the tiny Rhodesian information Service that has been operating modestly in Washington for the past decade. Not a single dissenting voice is to be permitted. Root and branch, the last vestige of a Rhodesian presence is to be stamped out.

This is the scenario: The peaceful, inoffensive government of Ian Smith under which the blacks of Rhodesia have attained the highest standards of health, education and personal income in southern Africa, is to be toppled. The country then is to be delivered into the hands of power-hungry terrorists, Marxist in their orientation, who will set up a one-party dictatorship in the fashion of Zambia, Mozambique and Angola. The native blacks will have no effective voice in their destiny: they will be worse off than they are now. Most of the white Rhodesians will leave, and a long dark night will begin.

In that dreary prospect, repeal of the Byrd Amendment fits perfectly. In the UN's essentially dishonest atmosphere, polluted by a double standard of international morality, the Byrd Amendment was too good to survive. Let it go. Asking the UN to tolerate truth is asking too much.

ON BEHALF OF SHCHARANSKY AND HUMAN RIGHTS—DON'T LET THE SOVIETS OFF THE HOOK

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. KEMP. Mr. Speaker, I want to bring to the attention of my colleagues an editorial entitled "The Sakharov Challenge." In light of Secretary Vance's trip to the Soviet Union, as well as the anticipated visit of Natalia Shcharansky to Washington this Friday, it is most important for us all to be aware of the current state of human rights in the Soviet Union and to pledge our efforts to assist those who have been victimized by Soviet policy.

I have personally expressed my strong support for the ideas expressed in this editorial to President Carter, for I concur with Mr. Sakharov that we must not allow our strength of conviction to falter in reaction to Soviet criticism. Therefore, I call attention to this editorial, and I urge all in Congress to continue support for the human rights efforts of President Carter.

While Brezhnev is telling Secretary Vance that the efforts toward SALT II and human rights are contradictory, I believe they are not. Indeed, a SALT II agreement, without a Soviet liberalization of its "police state" activities against Jews and Christians and other so called dissidents, would be shallow, indeed. For as Sakharov warns, if the United States lets up, it will only encourage the Soviets to be more repressive and lead to tragic consequences.

The article from the Wall Street Journal of March 25, 1977, follows:

THE SAKHAROV CHALLENGE

Nobel laureate Andrei Sakharov, whose correspondence with President Carter has especially upset the Kremlin, has issued a public challenge to the President in connection with Secretary of State Cyrus Vance's Moscow trip this weekend. If the President is really serious about his human rights campaign, Mr. Sakharov says, he must come to the support of Anatoly Shcharansky.

Mr. Shcharansky, a computer specialist active in the Jewish emigration movement, was arrested in Moscow last week. Tremors instantly spread through the Soviet dissident community, since Mr. Shcharansky had earlier been accused in Izvestia of spying for the CIA. A police spokesman said the arrest was for suspicion of a "crime against the state," the category including treason and espionage. Recently most dissidents have been charged with crimes like "slandering the Soviet state," which have at least some legalistic reference to their actual activities. The introduction of espionage charges is an atavism of the Stalinist era.

It is even more ominous that a Jewish emigration leader was singled out as the target of espionage charges. Anti-Semitism is never far below the Russian surface, but it has emerged with unusual viciousness in recent weeks. Russian prime time television has twice carried a film called "Traders in Souls" attacking Jewish activists as "soldiers of Zionism" and then providing their names and addresses, presumably for viewer reaction. Another TV movie charges a Jewish conspiracy to kill Lenin, and so on.

Israeli Foreign Minister Yigal Allon sees in the Shcharansky arrest "a new dimension in the persecution of the emigrant activist movement, in fact against all Jews—a grave and worrisome dimension such as we have not known for the last 25 years." Mr. Shcharansky himself said recently that the atmosphere "smelled of pogrom."

Mr. Shcharansky is further symbolic because he has been refused permission to emigrate to Israel, though his wife was given an exit visa and is now an Israeli citizen. (She was in fact in New York this week trying to get support for her husband from United Nations officials.) The Helsinki agreement, duly signed by the Soviet Union, the United States and others, not only generally calls for greater freedom of movement, but has explicit provisions on family reunion.

The Shcharansky arrest provoked a press conference by Mr. Sakharov and about 20 other dissidents, which received astonishingly little attention in the American press, but was extensively reported by Robert C. Toth in a front-page story in the Los Angeles Times. Mr. Sakharov said the arrest was a "challenge" to President Carter, and "an attempt to blackmail the new administration, before the visit of Secretary of State Vance, to give up its principled stand on defending human rights all over the world."

The embattled dissidents feel that the Kremlin is unleashing an especially vicious crackdown in an attempt to persuade the U.S. that talking about human rights is counter-productive, and that the U.S. will silence its criticism in order to reach agreement on matters affecting other American interests. But Mr. Sakharov warned that the Soviet authorities will be emboldened to further repression if Mr. Carter is silent on the Shcharansky case: "Any hestitation will have very tragic consequences."

President Carter has in fact been quite steadfast in his human rights campaign, telling Senators not to get nervous every time Chairman Brezhnev sneezes and proposing additional funds for the Voice of America, Radio Free Europe and Radio Liberty. Even so, his human rights campaign will come under a cloud if he ignores the Sakharov challenge. With Secretary Vance headed for Moscow, President Carter should make it publicly clear that whatever deals may be struck, the U.S. recognizes the especially disturbing overtones of the Shcharansky arrest.

FOOD-FOR-PEACE HUMANITARIAN SHIPMENTS

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ZABLOCKI. Mr. Speaker, I have introduced a bill designed to strengthen an important humanitarian provision of the food for peace program (Public Law 480), by increasing the minimums for title II food distributions abroad by 300,000 tons. Title II shipments are donations of food to needy people, particularly to young children and mothers, to the poor through food-for-work projects, and to disaster victims. Sponsoring these programs of overseas distribution are American voluntary agencies, the world food program and other international organizations, and governments of the recipient countries.

The International Development and Food Assistance Act of 1975 set a minimum of 1.3 million tons a year for title II of which a minimum of 1 million tons was to be distributed through nonprofit voluntary agencies and the world food program. I was deeply concerned upon learning late last year that actual shipments in fiscal 1976 were considerably below the 1.3 million tons programed. My exchange with the executive branch on this matter appears on page 35793 of the CONGRESSIONAL RECORD of October 1, 1976. The executive branch programed 1.4 million tons for fiscal 1977.

This bill would raise the title II minimum to 1.6 million tons, a modest increase above the 1.5 million tons which the President proposed for fiscal 1978. The minimum for nonprofit voluntary agencies and the world food program would be raised to 1.3 million tons. The minimums would apply within the Public Law 480 total, without raising the overall level of commodities distributed under the law.

I want to stress again that in setting the title II minimum, the Congress did not intend that executive branch planners should regard that as a maximum. I believe this bill merits serious consideration as a step forward for this worthy program in view of the record of its implementation to date.

THE PROPOSED SACCHARIN BAN MUST BE CHALLENGED

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. PEPPER. Mr. Speaker, like millions of Americans, I have been disturbed by the Food and Drug Administration's proposed ban on saccharin, which is the only legal sugar substitute available in the United States.

I believe the FDA acted precipitously and with little regard for the effect this action would have on the millions of Americans who rely on saccharin. As chairman of the Select Committee on Aging, I am especially concerned over the effect it would have on our older citizens. They will be hit hardest by this action, for it is they who suffer most from diabetes and the other chronic illnesses which require the use of sugar substitutes.

On March 21, 1977, I testified in opposition to the ban before the Subcommittee on Health and the Environment of the Committee on Interstate and Foreign Commerce. I wish to share these remarks with my colleagues, and I include them in the RECORD at the conclusion of my statement.

I have joined with my colleague, Congressman JAMES MARTIN, in sponsoring H.R. 5166. This bill would amend the Delaney clause to permit the use of certain additives if their benefits are found to outweigh any risk involved in their use. The Secretary of Health, Education, and Welfare would be required to obtain the recommendations of an advisory committee composed of scientists, consumer and industry representatives, nutritionists, economists, lawyers, and persons who are qualified to evaluate the cancer-producing effect of the additive in question. Orders proposed in this fashion would not take effect until 120 days after they were published in the Federal Register. I am hopeful that this legislation will receive the early and favorable consideration of the Congress.

Mr. Speaker, as I emphasized in my testimony, I believe the Government must take a strong stand to protect our people against health hazards. But I also believe they expect us to temper our concern for the public health with sound judgment. I believe they want us to be reasonable. Reason simply must be a factor in our judgments of this nature, and I am hopeful that the FDA will apply this standard with regard to the issue of saccharin.

STATEMENT BY CONGRESSMAN CLAUDE PEPPER

Mr. Chairman, as one who has served in the Congress for many years, I am well aware that we sometimes make determinations the ramifications of which are beyond our ability to comprehend. Despite our efforts to maintain reason and balance, we are, on occasion, caught in the web of our own hindsight. At times we become victims of our good intentions.

Perhaps the FDA ban on saccharin is an example of this phenomenon. Millions of Americans think so. They think we have violated their freedom of choice. They think this time we've gone too far, and frankly, Mr. Chairman, I am not so sure they are wrong.

The FDA tells us a human would have to drink more than 800 twelve-ounce cans of diet soda a day—the equivalent of some 4,000 packets of saccharin a day— to risk developing the cancer that killed the Canadian rats.

Now I certainly don't mean to sound unsympathetic with the plight of those poor rodents. If this ban goes through, they will have earned their place in history.

But neither can I ignore the effect this action will have on the millions of Americans who rely on our good judgment in the conduct of public business. I speak in behalf of the elderly, for it is they who will be hit hardest by this action. It is they who suffer most from diabetes and other chronic illnesses which require the use of sugar substitutes.

We know that some 10 million Americans suffer from diabetes. It is the third leading cause of death in our country—and it contributes to heart attack, blindness, kidney disease and gangrene. Eighty-five to ninety percent of those persons are over 40 years of age, and many of them rely on sugar substitutes such as saccharin to help control this disease. If we take saccharin off the market, what have we left them? What choice have we left the millions of Americans who suffer from chronic obesity? That in itself is a health hazard, yet without a substitute for sugar, we have left them only the choice to to without the pleasure of sweetness.

Lest I be misunderstood, I want to emphasize that I believe the government must take a strong stand to protect our people against health hazards. But I also believe they expect us to temper our concern for the public health with sound judgment. I believe they want us to be reasonable.

The FDA tells us it might allow the use of saccharin with a doctor's prescription. We are given this option with little regard for the fact that it would add bureaucratic paperwork to the already too thick jungle of government regulations. Moreover, the Library of Congress has indicated that it could triple the cost of saccharin. Our elderly people who live on a low fixed income simply can't absorb cost increases like that.

Let me offer another word of caution. We must not let our preoccupation with saccharin cloud our vision and block out the other components of our diet that could potentially be cancer-causing. For example, some of our esteemed leaders in the field of medicine tell us there is a substance called aflatoxins that is found in peanuts. This is an ominous development. Before long, we might have to ban peanuts. Then we might as well pack our bags, because the Congress would surely be dissolved, and we'd all be sent home!

Mr. Chairman, if conclusive evidence is presented to confirm a health hazard, I will certainly support the ban. But at this time, I feel the action taken by the FDA is precipitous and unreasonable.

The FDA itself acknowledged that it was acting under requirement of Federal law. Mr. Sherwin Gardner, Acting Commissioner of Food and Drugs, said, and I quote: "We have not concluded that saccharin is an immediate hazard to human health." He also said: "We have no evidence that saccharin has ever caused cancer in human beings."

So the FDA acted not necessarily because it foresees health danger for our people, but because the law requires it.

The Delaney clause, which was authored by our distinguished colleague, has served us well. It reflects the appropriate interest of the Congress in protecting our people from substances which could jeopardize human health and life.

We will not abandon our concern, but I believe the time has come to determine what changes might be necessary in light of developments in science and medicine.

Several proposals aimed at revision of the Delaney clause have been offered, and I believe they deserve careful consideration by the Congress.

Finally, I urge that the FDA reconsider its proposed ban. There is ample evidence that the medical community is not in accord on the interpretation the FDA has made. The FDA should undertake a careful review before a formal proposal is published.

I appreciate having the opportunity to give you my views, Mr. Chairman. I am confident that the Congress will develop an appropriate response to this unwise and ill-conceived action.

Thank you.

A SALUTE TO JEROME WHITEHEAD AND THE MARQUETTE WARRIORS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. McCLORY. Mr. Speaker, last night in Atlanta, an unlikely team won one of the biggest prizes in American sports. Marquette University's Warriors, with seven losses during the regular season, were a tarnished contender for a tournament invitation, much less the NCAA basketball championship.

But under the direction of its superb coach, Al McGuire, Marquette played its best basketball of the season in its five tournament games. The Warriors climbed to the championship by beating talented teams: Cincinnati, Kansas State, Wake Forest, North Carolina-Charlotte, and finally, North Carolina. And today they sit atop the basketball world.

Mr. Speaker, my congressional district naturally ends at the Illinois-Wisconsin border, and I represent neither Marquette itself nor any other part of Milwaukee. But one of Marquette's stars, center Jerome Whitehead, is a constituent of mine from Waukegan, Ill.

Indeed, without Jerome Whitehead, there may have been no championship for Marquette. It was he who scored at the buzzer in the semifinals Saturday to give his team a two-point win and a chance to play for the title.

In that semifinal against North Carolina-Charlotte, Jerome Whitehead made the difference not only at the finish, but throughout the game. He literally played the game of his life, scoring 21 points and snatching 16 rebounds against a team renowned for its aggressive play under the backboards.

Last night against North Carolina, Whitehead contributed 8 points, including some critical free throws, and was the game's leading rebounder with 11.

Mr. Speaker, very few young men ever achieve what the Marquette Warriors did last night. Jerome Whitehead's contributions will be a continuing source of pride

for his family, his friends, coaches, and teachers at Waukegan High School, and the entire Waukegan community.

I rise today to salute Jerome Whitehead, his parents, Mr. and Mrs. John Whitehead, and the entire Marquette team.

FIREMAN'S FIREMAN: CHIEF EARL LEVY

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. FUQUA. Mr. Speaker, the image of the fireman is deeply embedded in the hearts and minds of the American people. Every child has been excited at the sound of the siren, the flashing lights, and the bright red trucks speeding to answer an alarm.

That scene masks a very serious and dangerous occupation, one in which many have lost their lives serving others.

One of the finest men ever to serve the profession has completed 40 years of service as a fireman with the Tallahassee, Fla., Fire Department. He is Earl Levy, the chief of that department, and one who is respected in and out of the profession.

A tribute which says it all was published recently in an editorial in the Tallahassee Democrat, the newspaper serving my State's capital city. As a tribute to this remarkable gentleman, and his profession, I ask that it be printed in the pages of this journal for others to share:

CONGRATULATIONS CHIEF

Fire Chief Earl Levy began his 51st year as a Tallahassee fireman today. Tuesday he celebrated his conclusion of 50 years of service, a truly remarkable accomplishment.

It was March 15, 1927 that Levy, a youth of 16 years, began work with the fire department. He advanced through the ranks and on May 1, 1940 was appointed chief of a department which had nine men and one station. Today there are more than 100 in the department working out of five stations.

During the past half a century Levy has displayed not only a devotion to duty, but a devotion to improving the capabilities of the fire department and of the men who work for it. As a result of his efforts Tallahassee enjoys the best fire insurance rating of any city in the Southeast.

A constant training program is carried out within the department. Firemen study the latest techniques and also become familiar with those buildings to which they might be called.

Many honors have come to Levy over the years and he has served with many organizations interested in fire safety.

He has served as president of the Southeastern Division of the International Association of Fire Chiefs. He has appeared on programs of the National Fire Department Instructors Conference and served as chairman of the Educational Committee of State Fire Chiefs when that committee was instrumental in getting fire fighting service courses, leading to an associate degree, accepted on the college level.

Seven years ago, on the anniversary of his 30 years as chief, Levy was honored with a dinner and with special resolutions adopted by both houses of the Florida Legislature and the Cabinet.

Levy's golden anniversary as a fireman was quiet. City Commissioners adopted a resolution honoring him at last night's meeting. For chief, however, it was another work day, one more since he had joined the department 18,263 days ago. We hope he will have many more.

In the most honorable sense of the word, Chief Levy has been a public servant. We congratulate him for it. Tallahassee is rightfully proud and thankful for his service.

SACCHARIN BAN MUST GO

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. COLLINS of Texas. Mr. Speaker, the recent decree by the Federal Drug Administration to ban the use of saccharin reflects the damaging power of bureaucracy. Five million pounds of saccharin are consumed annually in the United States—three-quarters of it in soft drinks. Ten million diabetics, 40 million overweight Americans, and those with heart disease and hypertension depend upon this chemica to control their diets.

Saccharin has been in use for approximately 80 years, with no evidence that it has ever produced cancer in human beings. The rats who developed cancer as a result of the Canadian tests were fed diets containing 5 percent saccharin. My calculation is that a person would have to drink the equivalent of 1,250 12-ounce bottles of dietetic soda a day or eat more than 4,000 packets of saccharin a day to ingest a quantity of saccharin comparable to that fed to the rats. When you consider that drinking 50 cans of pure water a day can be fatal, it becomes evident that an overabundance of any chemical can upset the body chemistry.

In 1958, the Congress passed the Delaney amendment, enacted as a part of the Food, Drug and Cosmetic Act, which flatly bans the use of any food additive which "is found to induce cancer when ingested by man or animal." The FDA maintains that they are not allowed any leeway or discretionary judgments under the provisions of the Delaney clause.

I feel it is imperative that the Delaney amendment be reexamined. I am sponsoring a bill to require all food additive safety tests to be based upon—first, the probable human consumption of the foodstuff; and second, the cumulative effect of the food additive in the human diet. Applying these reasonable standards will prevent arbitrary bans, such as the one proposed for saccharin.

I am now pressing for legislation which will prevent FDA implementation of the proposed ban until a complete congressional investigation has been conducted. The FDA is allowing 60 days for public comment, and a final decision on the proposal will be made at that time.

Since the saccharin ban announcement, approximately 80 percent of my mail has been from constituents voicing their opposition to the FDA proposal. Not one letter has been in favor of the ban.

Here are some excerpts from the thousands of personal and most sincere letters of the folks in Texas:

"If they are going to ban Saccharin, then why not ban cigarettes from the market and prevent lung disease and cancer?"

"I am very concerned about the proposed ban on Saccharin. One very good reason is my 94 year-old mother. She is a diabetic and has learned to live with it, thanks to Saccharin."

"My 11-year old diabetic son has depended on Saccharin to be as normal as possible. Without it, he would have to increase the already large dosage of daily insulin and eat sugar."

"My husband is a dentist with a B.A. in Chemistry, and I am a dental hygienist with good training in nutrition. If we were going to ban a sweetener, sugar would be it."

"As a lifetime Weight Watcher, I restrict my intake of sugar and am totally dependent on artificial sugar (currently Saccharin products)."

"The people are fed up with big government! We do not like to be told by Washington what we can eat, drink, wear or play with. It should be our choice."

PROCLAMATION

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ABDNOR. Mr. Speaker, today marks the fourth anniversary of the end to one of the most tragic eras of this century. March 29, 1973, ended the participation of American forces in Southeast Asia. To honor those citizens of the great State of South Dakota and our Nation who suffered and sacrificed during that conflict, I urge that we give tribute on this day. The Governor of South Dakota, the Honorable Richard F. Kneip, has urged the citizens of our State to honor those who served; and I echo his proclamation. I would ask that his executive proclamation be included in the RECORD.

EXECUTIVE PROCLAMATION

Whereas, March 29, 1977, marks the Fourth Anniversary of the end of the American participation in the South East Asian Conflict; and,

Whereas, The United States Government has set aside the Twenty-Ninth Day of March as Vietnam Veterans Day; and,

Whereas, South Dakotans are a people with a deep and continuing faith in the aims and principles of the United States and its Constitution; and,

Whereas, Citizens of the United States have always sent their sons and daughters to serve that Government and Constitution, and have further always given to those who serve respect and honor because of that service; and,

Whereas, Over twenty-five thousand of this State's men and women participated in the Citizen-Soldiery of the Vietnam Era and have served with honor and distinction;

Now, therefore, I, Richard F. Kneip, Governor of the State of South Dakota, do hereby proclaim Tuesday, March 29, 1977, as Vietnam Veterans Day in South Dakota, and in suitable recognition of that day request that the flag of the United States be dis-

played on all public buildings, on our streets and on our homes. I also urge that civic and patriotic organizations participate in and give enthusiastic support to appropriate ceremonies marking this special day. I further ask all South Dakotans to participate as fully as possible in the spirit of this day, remembering those who made the sacrifices, those who gave their lives, those who are disabled, those who are still missing and all whose lives were interrupted by their service to our country in the Armed Forces, because of our Vietnam involvement.

OFFICE OF DRUG ABUSE POLICY

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ROGERS. Mr. Speaker, as most of my colleagues are aware, last year the President signed into law legislation establishing an Office of Drug Abuse Policy within the Executive Office of the President. This office is to make recommendations to the President with respect to policies for, objectives of, and establishment of priorities for, Federal drug abuse functions. In addition, it is to coordinate the performance of such functions by Federal departments and agencies. This office replaced the Special Action Office on Drug Abuse Prevention, which was established in 1972.

Unfortunately, the former administration failed to implement the legislation establishing this office, despite the clear statutory requirement that it do so. I am very pleased that the President has announced that he is activating the Office of Drug Policy, and that he has appointed a distinguished physician, Dr. Peter G. Bourne, as Director-designate. Early activation of the office is clear evidence of the President's commitment to the fight against drug abuse, as well as his commitment to work closely with the Congress on matters of mutual concern.

For the information of my colleagues, I am inserting the memorandum signed by the President which activates the Office of Drug Abuse Policy in the RECORD at this point:

ACTIVATION OF THE OFFICE OF DRUG ABUSE POLICY—ODAP—AND REVITALIZATION OF THE STRATEGY COUNCIL

Drug abuse continues to drain our human resources, especially from our youth, with no end in sight. I am determined that we make every effort to reverse this trend, and, therefore, effective with the date of issuance of this memorandum do hereby establish the recently enacted Office of Drug Abuse Policy (ODAP). I look forward to early confirmation of the nominations which I have sent to the Senate of Peter G. Bourne and Lee I. Dogoloff for the positions of Director and Deputy Director respectively.

The Office of Drug Abuse Policy shall be responsible for carrying out the Congressional mandate specified in the law. In addition, and to the maximum extent permitted by law, the Director of ODAP is hereby directed to fulfill the following responsibilities:

Recommend government-wide improvements in the organization and management of Federal drug abuse prevention and control functions, and recommend a plan to implement the recommended changes;

Study and recommend changes in the resource and program priorities among all agencies concerned with drug abuse prevention and control;

Assume the lead role in studying and proposing changes in the organization and management of Federal drug abuse prevention and control functions, as part of my promise to reorganize and strengthen government operations; and

Provide policy direction and coordination among the law enforcement, international and treatment/prevention programs to assure a cohesive and effective strategy that both responds to immediate issues and provides a framework for longer term resolution of problems.

In addition, I am abolishing the Cabinet-level committees concerned with international narcotics control, drug abuse prevention, and drug law enforcement created by previous Administrations, and am directing that the Strategy Council, created by the Drug Abuse Office and Treatment Act of 1972, be revitalized and serve as the government-wide advisory committee for this problem area. Also, I am adding the Secretary of the Treasury and the Director of the Office of Management and Budget as fully participating members of the Council. The Director of the Office of Drug Abuse Policy shall serve as Executive Director of the Council.

The Council shall be supported by Working Groups for supply control and demand reduction, and be composed of personnel from each of the concerned agencies.

I am confident that you will provide your full support to ODAP and the Strategy Council in the performance of their tasks.

JIMMY CARTER.

INTRODUCTION OF A BILL TO PROTECT THE HEALTH OF SMOKERS AND NONSMOKERS IN PUBLIC PLACES

HON. EDWARD P. BEARD

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. BEARD of Rhode Island. Mr. Speaker, I am introducing a bill today that would effectively strengthen the efforts of the Federal Government to provide clean air for all its citizens and at the same time, remove one of the most aggravating problems in our public life, namely, the practice of smoking in public places.

It is high time that cigarette packaging communicate something more significant than the usual warning from the Surgeon-General. I am proposing that such packaging specifically name the diseases that we now know are caused by cigarette smoking.

At the same time, my bill would outlaw smoking in all Federal buildings and provide for all new Federal construction to provide designated places where a smoker cannot produce harmful tobacco smoke that would interfere with a person's right to breathe clean air.

My bill also provides for special smoking areas in all bus, train, and airplane terminals. Smoking would be prohibited in terminal restaurants, cafeterias, waiting rooms, and ticket offices.

I call attention to similar statutes that have been passed in some States and localities, notably in my own State of Rhode Island where the antismoking ordinance went into effect just last week. That bill prevents smoking in churches, supermarkets, museums, movie theaters, schools and hospitals. I think it is high time for action to be taken on a Federal level to deal with this increasingly serious problem.

AGRICULTURAL AND ENVIRONMENTAL RESEARCH ACT OF 1977

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. BROWN of California. Mr. Speaker, I am introducing a bill today which will hopefully take the Nation one step further on the path toward improved maintenance and protection of our environment.

The legislation, known as the "Agricultural and Environmental Research Act of 1977," simply amends those laws which authorized the establishment of the land-grant colleges, the U.S. Extension Service, the State Agricultural Experiment Stations, and the Agricultural Research Service, to enable these institutions to engage in endeavors that will maintain, preserve, and improve the environment.

Such specific authority should help increase education, research, and practical demonstrations related to developing improved conservation utilization practices applicable to land, water, energy, and organic matter resources.

These particular branches of the USDA are equipped to provide immediate leadership in the fields of education, research, demonstration, and application of new and improved farming practices, techniques, and technology.

The affects of our agricultural system on the quality and quantity of soil, water, and organic matter are acute. A recent GAO report stated:

If the United States is to continue to meet its own food needs and help alleviate world food shortages, it must maintain its topsoil. Estimates of soil losses for 283 farms GAO visited on a random basis in the Great Plains, Corn Belt, and Pacific North-west indicate that topsoil losses are threatening continued crop productivity.

Soil loss has continued to increase until approximately 84 percent of the 283 farms tested by GAO had losses over the maximum acceptable limit of 5 tons per acre. As this soil is washed away, valuable nutrients are taken with it affecting the remaining degree of soil fertility and productivity.

Such erosion also damages the quality of our water as wind and water runoff carry chemical biocides and nutrient-laden soil into our rivers, lakes, and streams.

There are various ongoing soil conservation programs within the U.S. Department of Agriculture but the Soil Conservation Service has stated that their efforts under the small watershed program, which receives a major focus, only retard 1 percent of this annual runoff of sediment into our water bodies.

Additional research, instruction, demonstration, and application of new conservation methods would help to improve this situation. Hopefully, if Congress were to indicate its strong support of such an environmentally concerned focus through legislation like that I am introducing today, the U.S. Department of Agriculture will assume a leadership role in the effort.

SMALL BUSINESS LEGISLATION

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ZABLOCKI. Mr. Speaker, I am again introducing a bill to amend the provisions of the Social Security Act to consolidate the reporting of wages by employers for income tax withholding and old-age, survivors, and disability insurance purposes, and for other purposes. This measure, which I introduced in the 94th Congress and have supported for years, would provide relief to the owners and operators of small businesses and assist in our effort to reduce the rate of inflation in our economy. It would change the quarterly wage reporting system for social security purposes, IRS form 941, to an annual system utilizing the existing W-2 form. It would also result in substantial paperwork reduction and form simplification, and in appreciable clerical and accounting savings to small businesses.

The owners and operators of small businesses are hard hit by the crush of inflation which increases the cost of doing business—and reduces the income essential to continuing in business.

Certainly, with the economy as it is, we must look to measures which will help to stimulate business and thus strengthen our economy.

The economy of our country is based on the prosperity of 8.8 million small businesses nationally, including nearly 200,000 in Wisconsin. If these firms fail—then so shall our economy fail. Many of these small businesses are now struggling against the pressures of reduced income and increased costs as inflation takes its toll.

We have the opportunity to reduce one of the costs of doing business by reducing the burden of paperwork through the legislation that I have introduced today.

There will be no reduction in revenue essential to the social security system if my legislation is enacted by this Congress. In addition, the Internal Revenue Service favors the bill as they see no need for companies to file quarterly.

Small businesses will realize a savings of time and money, and one of the many pressures will be eased for this very important and necessary segment of our economy.

The cost of doing business, naturally, is passed on to the consumers, and anything we can do to reduce that cost will just as naturally reduce the need to increase costs of goods and services to consumers and thus combat inflation.

It is important to note that the bill I introduced will cost the U.S. Treasury nothing—but it will contribute greatly to the incentive of investing capital and labor in the small businesses of America.

I urge my colleagues to consider the proposed amendment to the Internal Revenue Code and support this legislation.

THE LEGISLATIVE VETO IS CONSTITUTIONAL

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. LEVITAS. Mr. Speaker, so much has been said recently about the constitutionality of the legislative veto that I am encouraged to see an informed opinion on the question by such a renowned constitutional law scholar as Prof. Arthur S. Miller of the National Law Center at the George Washington University.

Professor Miller's credentials are impeccable. He received an A.B. from Willamette University in 1938; his law degree from Stanford University in 1949; and a J.S.D. from Yale University in 1959.

Professor Miller has been a professor of constitutional and administrative law at the George Washington University and Emory University, as well as a lecturer in the advanced study program at the Brookings Institution.

He has also worked on a consultant basis for the Government. From 1970 to 1975, he was a consultant to the Senate Subcommittee on Separation of Powers; a consultant to the General Accounting Office from 1975 to the present; and the chief consultant to the Senate Select Committee on Presidential Campaign Activities during 1973-74.

As an author, Professor Miller has published 5 books on constitutional law and has written more than 80 articles in legal periodicals. He is a frequent contributor to newspapers and magazines; often asked to testify before congressional committees; and a frequent participant on television and radio programs.

His scholarship and understanding of the constitutional framework of our Government underpins this important article which originally appeared in the Los Angeles Times of March 20, 1977, and I commend it to the attention of our colleagues and the public:

CONGRESS AGAINST PRESIDENT: BATTLE LOOMS OVER LEGISLATIVE VETO

(By Arthur S. Miller)

Despite the compromise on the prickly issue of government reorganization, a major constitutional battle between the President and Congress still could erupt soon over the so-called "legislative veto."

The legislative (or congressional) veto is a technique by which Congress delegates powers to the executive branch, while reserving the right to scrutinize—and to approve or disapprove—specific White House actions. Although attention this year has centered on President Carter's request for reorganization powers, the problem is far broader.

Carter wants basically the same power that his predecessors from Franklin Roosevelt through Richard Nixon had—to propose reorganizations of the executive branch which would become effective unless disapproved by either house of Congress in 60 days. The Senate on March 3 voted, 92-0, to give him those powers. But he was challenged in the House by Rep. Jack Brooks (D-Tex.), who maintained that the procedure "stands the Constitution on its head."

When Brooks saw that Carter had the necessary votes, however, he agreed to a compromise, which was approved last week by the House Government Operations Committee and is expected to be approved next week by the House.

Under the compromise, Congress is more likely to get a chance to approve or disapprove White House reorganization proposals than might otherwise have been the case. Such proposals in the future could not be bottled up in committee; after 45 days, they would automatically go to the floor of the House or Senate, where only one member's request would bring a roll-call vote. Unless one House disapproved, the proposal would take effect after 60 days. The compromise would limit to three the number of reorganization plans the President may have pending before Congress at one time.

The larger constitutional problem still remains, however. Numerous statutes have some sort of legislative review ("veto") provisions—for example, the War Powers Act of 1973 and the Budget and Impoundment Control Act of 1974. So the issue will not vanish. The confrontation will continue, and must be resolved sooner or later.

Resolution could come by political accommodation, much as most "separation-of-powers" questions have been settled in the past. That would mean either that Congress or the President would give in, or that some sort of compromise would be worked out.

The Supreme Court may have to rule at some time on the constitutionality of the practice. One of several cases already filed could be the vehicle. Perhaps the most important is *Clark v. Valeo*, in which Ramsey Clark contested the one-house veto provision of the Federal Elections Act. In January, Clark lost in the U.S. Court of Appeals in the District of Columbia. But the decision—that the dispute was not yet "ripe" for the judiciary to handle—has been appealed to the Supreme Court. Other cases are pending before the Court of Claims (the suit by federal judges for a salary increase) and the U.S. Fourth Circuit Court of Appeals.

Arguments for and against the constitutionality of the congressional veto are on two levels—legal doctrine and practical considerations. The law at present is unsettled.

Those who contest the veto maintain that it improperly interferes with the President's constitutional veto power and that it violates the principle of bicameralism. These intertwinted arguments are derived from the fact that Article I, Section 7 of the Constitution gives the President a veto over legislation.

In essence, opponents assert that Congress must act by both Houses in making policy; and when it does, those actions must be submitted to the President for approval or veto. They seek to make the executive much more an autonomous entity.

Proponents counter by arguing that Congress may condition its delegations of power any way short of actual violation of an express provision of the Constitution—and that the legislative veto does not violate any express provision. Further, they point to the "necessary-and-proper" clause of Article I, under which Congress has power to make laws necessary and proper to carry into effect both its own powers "and all other powers vested by this Constitution in the government of the United States, or in any

department or officer thereof." The President is an "officer" of the United States; and if the clause is taken to mean what it says, then the ultimate power rests in Congress—and the legislative veto is valid. Proponents, accordingly, wish to continue the blending of powers under the Constitution—the system of "checks and balances."

Their views gain support from *Pressler v. Simon*, decided by a three-judge federal court last October. The court ruled that Pressler's challenge to a congressional salary statute could not stand, relying in part on the "necessary and proper" clause. Said the court: "The Constitution is not to be parsed in the narrow, rigid, pedantic manner of a statute. It must remain flexible and adaptable," preserving "a flexible approach to government that would facilitate accommodation to changing conditions and experience."

Reinforcement for the legislative veto may be found in Justice Byron White's concurring opinion in *Buckley v. Valeo* (1976). Said White: "For a regulation to become effective, neither House need approve it, pass it, or take any action at all with respect to it. The regulation becomes effective by nonaction. This no more invades the President's power than does a regulation not required to be laid before Congress."

On the level of legal doctrine, then, the proponents seem to have the better of the argument. That conclusion is strengthened when one weighs the practical considerations involved.

Opponents point to probable added delay in the promulgation of administrative regulations while Congress' 60-day period elapsed; to the fact that Congress does not have the staff or expertise competent to deal with often abstruse matters; and to the fact that the congressional veto will give lobbyists a "third bite at the apple." That means that those who oppose a given policy would have another chance to stop it, even after having lost at the first stage (enactment by Congress of the basic statute) and the second (drafting of the administrative regulation).

But those views are rather easily overcome. An additional few days' delay for the usual administrative regulation means nothing, for often it takes years for regulations to be written. Congress can enhance its expertise as do such states as Florida, where a special group of lawyers reviews all regulations and makes recommendations to the Florida legislature. And the third bite at the apple can work as well for public-interest lobbyists, such as Common Cause, as it does for the "special interests."

Moreover, there already exists a pervasive scheme of "nonstatutory" vetoes (and approvals) by congressional committees. These informal accommodations, which occur mainly in "reprogramming" of appropriated funds, work to the benefit of the Executive Branch—for example, the Pentagon, where changing military requirements necessitate some pragmatic adjustments to be made. They have been used for many years.

All in all, the legislative veto is a technique that permits a flexible approach to changing problems of government. The alternatives are undesirable: Congress would either have to turn over unrestricted governing power to the bureaucracy, or legislate with specificity and precision on a host of narrow problems. Neither alternative fits the needs of modern government; the former would be an abdication of power, while the latter would be impossible.

The congressional veto is a means by which, in James Madison's words, the government can be "obliged to control itself." A necessary pragmatic adjustment to complex problems of government, the congressional veto enables urgent tasks to be accomplished with a measure of accountability.

Possibly the courts will continue to be reluctant to rule on its validity, preferring to call it a "political question" that must be settled by elected officials rather than judges. That conclusion gains support from the inconsistent positions about the legislative veto taken by both the White House and members of Congress. Presidents are willing, even eager, to have their reorganization powers limited only by the congressional veto, but stoutly oppose wider use of the technique on other proposed administrative regulations. For example, Atty. Gen. Griffin Bell, in his opinion upholding the validity of the legislative veto concerning reorganization powers, expressly excluded from his opinion any other type of legislative veto. Chief executives thus want it both ways—as did Brooks, who opposed the congressional veto for reorganizations, but kept silent when his salary and that of other congressmen was increased recently, even though the law that permitted it allowed either house to "veto" the raise.

When politicians are inconsistent, the way is open for compromise. A pragmatic accommodation of the competing interests of President and Congress could come during the next few years; certainly the judiciary must fervently wish for that to be so.

Three bills now pending in Congress provide for across-the-board legislative vetoes of all proposed administrative regulations. Unless there is a compromise on these bills similar to last week's compromise on governmental reorganization, the basic issue of the constitutionality of the legislative veto will eventually have to be decided by the courts.

THE BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. FARY. Mr. Speaker, Friday, March 25, Americans of Byelorussian descent celebrated the 59th anniversary of the Declaration of Independence of the Byelorussian Democratic Republic which was signed in Minsk, Russia, on March 25, 1918.

The Byelorussian people on March 25, 1918, achieved national independence and regained the freedom which had been lost to the czarist Russia at the end of the 18th century. This national sovereignty, however, was short lived, and the Byelorussian people continue their valiant struggle to again achieve their national identity as a sovereign state free from the forces of Communistic domination and control.

The Byelorussian people are one of the oldest ethnic groups now under the Soviet yoke of oppression. They had been living in their homeland which extended from the eastern borders of Poland to the approaches of Moscow since before the 9th century. There they led a peaceful and rewarding existence until around the turn of the 16th century when Moscow launched a series of attacks against them. Byelorussia, in fact, served as a cultural and artistic center for all of eastern Europe. The Byelorussians introduced the ideas and works of the Renaissance into the area, and they became the third ethnic group, after only the Germans and the Czechs, to have a Bible printed in their native tongue.

At this point in history when we are commemorating the principles of freedom and democracy on which our country was founded, we should emphasize the right of self-determination for those people deprived of their rights within the Soviet Union.

Mr. Speaker, on behalf of the people of my congressional district I join in this annual observance of the Byelorussian heritage and trust it will help to reassure those people whose human rights are held captive not only behind the iron curtain of the Soviet Union, but throughout the world, that through world opinion we can attain international understanding and agreement that will eliminate the oppression of people and restore human rights, and the people's rights of self-determination to national and political independence in the so-called captive nations of the world.

WESTERN WATER PROJECTS

HON. FRANK E. EVANS

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. EVANS of Colorado. Mr. Speaker, on February 18, 1977, the administration announced cancellation of 19 Western reclamation Corps of Engineer projects and a review of all 320 nationwide water projects by April 15. The suddenness and confusion surrounding these major decisions disturbs me.

The western Colorado projects represent over a decade of political commitment from both Democratic and Republican administrations and both Houses of Congress.

Funds have already been spent and there is overwhelming local political support.

I am aware of numerous private and public studies attesting to the economic and social benefits of these projects. Environmental considerations have been accounted for.

I have therefore requested the administration justify the deletions and explain their procedures. I have petitioned Secretary Andrus to submit the documents used in the decision and to announce the time, place, and a bill of particulars for the upcoming review period.

I hope that all Members of the House will support me in these efforts.

I would like to include in the RECORD the following Denver Post editorial:

CARTER "NIGHT OF LONG KNIVES" WAS NO WAY TO TREAT THE WEST

Rep. Morris Udall, D-Ariz., has drawn an apt and stinging parallel between President Carter's secret attack on Western water projects and the "imperial" presidency of Richard Nixon.

For the sake of appearances, Udall didn't use the former president's name. But the analogy is impossible to mistake. Nixon let his White House elite run roughshod over Congress, over other administrative agencies—in short, over the democratic process.

That picture is alarmingly similar to the way a small group of White House elitists, operating in an atmosphere described as "vast confusion," wielded its long knives against Western and other water projects the night of February 18.

This under the aegis of a man who prom-

ised the American people "a new era of cooperation" when he ran for the presidency.

It is not to the President's credit that the Colorado congressional delegation has taken steps toward filing suit to secure the White House's documents on this decision under terms of the Freedom of Information Act.

If President Carter is going to maintain confidence in his governing style he can scarcely be pleased to find some of the most energetic and conscientious Democrats in the West questioning his decision process.

The decision was handled so badly that President Carter has driven these loyal Democrats into a corner.

Delay of 19 water projects, three of them in Colorado, reads like a shopping list prepared by the environmentalists surrounding Kathy Fletcher, the President's new environmental adviser, and the young lawyers attached to the staff of consumerist Ralph Nader.

There was very little solid evidence released as to why such a move was needed.

Nobody talked to Gov. Dick Lamm of Colorado about the impending action. Nobody talked to officials of the U.S. Bureau of Reclamation, which has spent years planning many of these projects.

Failure to consult Governor Lamm is simply incredible. Here is a man with deep commitment to environmental causes. But like any governor, Lamm has many constituencies. He cannot ignore the jobs, economic pursuits and political interests of Coloradans at large.

Nobody knows better than Dick Lamm that water projects in the West have serious limitation—serious potential for adverse environmental impact.

That is why Lamm's staff studied the three projects carefully and cut back their environmental impacts. That is why his Department of Natural Resources insisted that repayment contracts be modified to prevent easy conversion of water rights from agriculture to less desirable uses, such as unwise commercialization.

The Lamm commitment to the Dolores, Fruitland Mesa and Savery-Pothook (the latter on the Colorado-Wyoming border) is based on a firm belief that Colorado agriculture is economically depressed and needs help. These projects can strengthen Colorado agriculture; they are an important tool in spreading development away from the big centers of population along the Front Range.

Through repayment and crop production, such projects create far more long-term wealth than the President's narrow focus on public-sector jobs which in some cases are no more productive than leaf-raking. There is a place for both in terms of rebuilding the nation's economy.

The present is a particularly insensitive time to impede Western water projects. The projects in question have no bearing on the current drought. But people are reminded during dusty periods such as this dry winter of 1977 that only the storage of runoff water for dry years keeps the West viable for the people who live here.

The Western delegations are not talking about vast new growth of their states. They are talking about balanced economic activities, survival of agriculture and maintenance of the West's strong social fabric.

When a methodical, careful lawmaker like Morris Udall, chairman of the House Interior Committee, is forced to question the administration's review process there is trouble brewing for President Carter. Udall asked:

"Is it going to be an open review process in which the Congress, the states and the people, as well as federal authorities, are involved?"

And then he cautioned: "We've seen what happens when the executive branch makes decisions secretly."

The President can ill-afford to ignore that message.

HOW BRITAIN'S ONEROUS TAX SYSTEM IS DESTROYING BOTH ENTERPRISE AND THE TAX BASE OF THE UNITED KINGDOM

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. KEMP. Mr. Speaker, recently I had the privilege of dining with Mr. William Rees-Mogg, editor of the Times—London. He discussed the reasons for Britain's economic decline and said that the incredibly heavy burden of taxation was a key reason. For example, he noted that before World War I Britain instituted a surtax on all incomes over 8,000 pounds—equivalent to approximately 55,000 pounds today, or over $100,000. This was assumed to be the level at which one became rich. Yet today, the surtax still begins at the 8,000-pound level, despite all the inflation and devaluation that has taken place in the last half century.

The result is creation of severe disincentives for work and investment today in Great Britain and the emigration of many of Britain's best managers and professional people. Mr. Rees-Mogg noted that the Times' top reporters rarely chose to return to Britain after being stationed somewhere else. Not only is enterprise investments diminished but their tax base in shrinking as well.

I am very worried that the United States is on a similar course. Because of continuing inflation and steeply graduated tax rates, many people are paying a higher percentage of their income in taxes every year even though their purchasing power may not have increased at all, or even decreased. Consequently, I think that the Congress should pay careful attention to the situation in Great Britain and learn some lessons from its experience before it is too late. I therefore commend to you the following article from this morning's Wall Street Journal about the onerous level of taxation in Great Britain today and how it relates to our own Nation. High rates of taxation discourage work and production while encouraging leisure and current consumption, to the extent this happens tax revenues fall and the burden of government spending falls on the middle income taxpayer. My own State, New York, is the closest example on the North American Continent of how this British disease can infect our country:

BRITAIN'S ONEROUS TAX SYSTEM

(By Robert Prinsky)

LONDON.—A director of a medium-sized chemical company decides to skip work for a month and spend the time painting his house. After taxes, he figures, the salary he stands to lose is less than he'd pay to get the job done for him.

A public relations director for a major corporation is scouring branch offices for an assistant. Prospective candidates aren't enthusiastic, though. There's more money in it for them, but barely enough to compensate for losing the tax-free company car that's supplied only outside London.

A newspaper executive is asked to write an article for another publication. He agrees on condition that he's paid in the form of airline tickets to someplace he wants to go. Just plain money, he explains, is taxed too heavily to interest him.

These examples are drawn from management, a group of people whose concerns usually aren't a priority of British governments, especially the current Socialist one. Lately, however, business spokesmen have been loud in complaining that Britain's onerous income tax system—which has a marginal rate in the highest bracket of 83% of earnings—squeezes managers more than most other citizens of these islands. And there are signs that the authorities are listening at last.

WORRISOME MORALE

Low management morale is worrisome in today's economically troubled Britain because "these are the people—from foremen to chairmen—that the country needs to lead the way back to prosperity," declares the Confederation of British Industry, which represents most major corporations and is lobbying hard for the government to cut upper-bracket tax rates in the budget statement it is due to unveil tomorrow.

It has a good point. It's at times like these, when industrial recovery is being counted on to lead the way to economic revival, that management should have every incentive to achieve top performance. Outsiders like Americans have more than a passing interest in Britain's recovery, for they recently lent the country billions of dollars to help achieve it.

At present, though, managers' morale is at a low ebb. "A majority of them are fed up, bitter at unfair treatment (by the government) and worried about money and their standard of living," the independent Opinion Research Centre found in a recent survey.

The pollsters found a quarter of the managers they surveyed believed it isn't worth accepting a promotion because of the effect of taxes on pay increases: The hassle of moving often isn't worth the extra pay a transfer brings. Half those polled consider that lack of financial reward is causing managers to be less efficient in their jobs. Fully 15% admitted they are working less hard than they used to.

"When I talk to groups of young managers in our firm and tell them about our progress, they say, 'Yes, but what's in it for us?' " reports Raymond W. Pennock, a deputy chairman of Imperial Chemical Industries Ltd., one of Britain's biggest companies. "Industry generally has a big problem persuading graduates to join them" as management trainees, he says.

ICI devoted a section of its latest annual report to the "inadequacy" of its executives' pay. None of ICI's nearly 2,000 senior British-based employes earned as much last year as the equivalent of their salaries in 1967, taking inflation and tax changes since then into account. But more than 200 executives working in offices outside Britain earned more than home-based executive directors, some of them two and three times more—and that's after allowing for the higher cost of living abroad, ICI said.

LOSING GROUND ON PAY

Naturally enough, "people don't want to come home from overseas posts," says Mr. Pennock. "They ask to be taken off short lists for promotions."

British salaries generally are lower to begin with than European and American ones. As a result, comparatively few people pay the higher rates of tax that managers are complaining about. Indeed, only 1.3 million people, or one in 20 taxpayers, pay more than the 35 percent "standard rate" at which the British scale begins. As recently as 1973, a mere 370,000 paid more than the standard rate, which currently applies to taxable income up to $8,600.

The fact that 95 percent of Britons pay the

same standard rate negates one of the most frequently cited advantages of income over sales taxes: progressiveness. Everyone pays the same rate of sales tax, but the poor can get a break from income taxes through rates that become progressively higher on higher incomes. Thus, besides changing income tax rates, there's also justification for increasing the number of brackets in the British system; currently there are 10, compared with 25 in the U.S.

Everyone in Britain is suffering as inflation outpaces the level of wage increases allowed under the country's voluntary controls, but managers claim the system hurts them more because gains are limited to a maximum $7 a week. That's barely 3 percent for the average manager, who earns only $10,850 a year.

Higher permitted pay boosts aren't enough to satisfy managers, however. "Top people don't need more money, they can't use it," says Sir John Read, chairman of EMI Ltd., a large electronics, music and leisure concern. But lower tax rates in the higher brackets "would be a great boost for morale," he believes.

What good is a pay increase, many managers say, if up to 83 percent of it is taken away in taxes? That's the rate on taxable income over $34,400. Even a $21,000-a-year family man with a modest mortgage can find 60 percent of a $1,000 raise taken in taxes. An American in similar circumstances would lose only 25 percent of that additional $1,000 to federal tax collectors. There aren't any state taxes in Britain.

Investment income is taxed even more heavily, with a 98 percent top rate. This encourages people to invest in land or paintings that are taxed at lower capital gains rates. Or it encourages them simply to spend on the ubiquitous Rolls-Royces and other luxuries that foreigners find strange to see in a supposedly poor country. Given the disincentive to invest, "the wonder isn't that there are so many of these things to be seen in London at a time of supposed economic tribulation, but so few," notes Samuel Brittan, economic columnist for London's Financial Times.

The CBI proposes that there be six tax brackets and that the starting point for each be raised so that our $21,000-a-year man, for example, loses only 40 percent of a raise instead of 60 percent. In addition, it proposes a single 33 percent bracket right up to $13,760, which provides only two percentage points of relief for those in the current bottom bracket but 17 points for those now earning $13,760.

Whether these particular changes are adopted isn't too important, though, notes ICI's Mr. Pennock. The key is that there should be "a change in direction" of government policy, he says. Indeed, says Roy Close, director-general of the British Institute of Management, what comes out most clearly from recent surveys is "the strong feeling among managers that they have been treated unfairly."

Corporate tax changes don't seem to be in the wind this time around. The CBI, which represents corporations, puts its first priority on personal income tax cuts and, given the government's limited resources, isn't suggesting corporate tax cuts in tomorrow's budget. Also, previous recent budgets have included tax incentives for business, so there isn't any equivalent groundswell of opinion for corporate tax changes.

There are signs the government is listening to the pleas for a tax break for individuals, however. Chancellor of the Exchequer Denis Healy, who is drawing up tomorrow's budget statement in the usual complete secrecy, says he hopes to lower income taxes "particularly at the lower and higher ends of the scale." He recently told a London audience he is "convinced that nothing will do more to increase the incentive for greater efforts to improve our industrial performance.

The government's plans, insofar as they have been hinted at, are endorsed by the Paris-based Organization for Economic Cooperation and Development, whose member nations include Britain's big international creditors. "The legitimate concern with equity problems at the bottom of the scale and with work incentives at the top could be tackled by selective tax reductions at the two extremes," the OECD said recently.

POLITICAL PROBLEMS

But there inevitably are political problems in helping the comparatively well off, especially for a Socialist government like the present British one. With limited financial resources and many of the nation's less well-off in dire straits themselves, the pressures are great to help only those at the bottom end of the tax scale.

While the CBI stresses help for those at the top end, its organized-labor counterpart, the Trades Union Congress, urges that "particular emphasis is given to those at the bottom end." The TUC asserts that liabilities at high income levels can be reduced through permitted deductions such as interest on mortgages. Union officials also point to the many tax-free benefits that managers can receive, such as company cars, entertainment expenses and even company-paid housecleaning services and vacations.

At least one major union favors relief for managers, though. It's ASTMS, the Association of Scientific, Technical and Managerial Staffs, a white-collar union that represents some 10,000 managers. "We'd like to see some tax changes," says Barry Sherman, the union's research director. Most of the tax cuts should come at the lower end of the scale, but there should be some at the higher end too, he says.

ASTMS backs traditional labor goals as strongly as any union. However, it pushes higher salaries rather than tax cuts as the best way to reward managers. "They deserve it in their own right", says Mr. Sherman. "It has nothing to do with the spurious argument about motivation. In the long run, management would be far better off having the salary system changed than having the tax system changed."

Be that as it may, some change in the tax system does seem to be in the cards for managers. Of course, lower taxation for managers in itself won't result in better British economic performance. The nation's class system puts a formidable barrier against cooperation between managers and the people who work for them. The level of competence of the managers themselves is often questioned. Most industries also are saddled with antiquated plants and entrenched union rights. Tax changes won't do much for these basic ills, but they would help managers try to cope with them.

TRIBUTE TO FORMER REPRESENTATIVE FRANCES PAYNE BOLTON

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. STOKES. Mr. Speaker, it is with a sense of sorrow and loss that I rise today in tribute to a great humanitarian and stateswoman. The late Frances Payne Bolton of Cleveland, Ohio, is a familiar personage to many of my distinguished colleagues assembled here today. There are those who will remember that she served with distinction in the U.S. House of Representatives from 1939 until 1968. And, Mr. Speaker, there are others more recently elected to Congress, who know her as a figure of national and international prominence for her political and philanthropic work.

Though former Representative Bolton preceded me in Congress, I knew of her great work in my district in Cleveland. Mr. Speaker, it is a well known fact that Mrs. Bolton was a woman of great wealth and power. Even so, she never removed herself from the plight of the poor and oppressed. As a tireless advocate for social equality and human dignity, Mrs. Bolton will be revered for years to come.

Mr. Speaker, former Representative Bolton passed away on March 9, 1977, at her home in Lyndhurst. While her work on Earth has ended, her accomplishments and great spirit will live on in our hearts and minds. At this time, I would like to ask my colleagues to join me in commemoration of Frances Payne Bolton, and in some small way, rededicate our lives and our professions to those humanitarian ideals she held so dear.

JONATHAN LYLE IS FIGHTING FOR HIS LIFE

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. CARTER. Mr. Speaker, each day we deal with national issues in general terms. Sometimes we forget that to individuals those problems are not abstract, generalized concerns but intensely personal matters.

According to a recent Congressional Budget Office estimate, approximately 40 million Americans are uninsured against medical expenses or else have very poor insurance coverage. Yet virtually every American faces the possibility of financial ruin which can accompany certain types of chronic illness or serious injury.

But that is the general view of the national problem of health insurance; reduced to human terms the problem is a tragic dilemma like that which confronts the John Benningfields of Campbellsville, Ky., in the area I represent.

Since the birth of their twins last fall, John and Debbie Benningfield have worried about whether their son, Jonathan Lyle, will live. But added to this burden is the worry about how they will pay the potential $50,000 uninsured medical cost which has resulted from the hospital care of their son.

The Benningfield's plight is one which faces many Americans, and I submit that the remedy lies in passage by this Congress of legislation to provide catastrophic illness insurance coverage for all Americans.

I am including for the RECORD a copy of the article which appeared in the March 21 edition of the Central Kentucky News-Journal in Campbellsville about the Benningfields so that my esteemed colleagues might see the impact

on individuals of our not having a catastrophic illness insurance program:

JONATHAN LYLE IS FIGHTING FOR HIS LIFE

(By Steve Lowery)

John and Debbie Benningfield celebrated their second anniversary last Tuesday. Like many young couples in Central Kentucky they headed towards Louisville to do it.

But instead of spending the evening out on the town, they went to Norton-Children's Hospital to visit with their son, Jonathan Lyle, who's fighting for his life.

Little Jon is nearly seven months old. All of his short life he's been struggling to live. It's been an uphill battle.

"He's a fighter though," said Debbie, while explaining her son's condition. "He won't give up."

The Benningfields—like their son—won't give up either. They're fighters. They have to be. In the last seven months their entire lives have changed radically.

John, a 26-year-old farm assistant for Southern States, and Debbie, a 22-year-old registered nurse at the Taylor County Health Department, decided they wanted to have a family in early 1975.

Since they both had jobs, a bright future and good health, they planned for Debbie's pregnancy. As planned, she became pregnant. Her baby would be due in November 1975, her doctor said.

Debbie continued working. Her pregnancy seemed normal enough although she felt like she was picking up a great deal of excess weight.

Little did she know.

On September 26—after six and a half months of being pregnant—Debbie felt like she was ready to have her child. Her doctor said she was just afraid, but he called her in for a check-up.

After his examination he informed John and Debbie that, yes she was going into labor and that she was going to have twins.

"We never expected that," said John. "We had no idea."

An ambulance was called to the doctor's office to deliver Debbie to Louisville. Since the babies were going to be born prematurely, complications were expected.

The ambulance left Greensburg. But Debbie didn't wait to get to Louisville to give birth. Jonathan Lyle and Jessica Lea were born in Elizabethtown.

An ambulance took the twins to Louisville. Both were having a rough time. Their little lungs hadn't had enough time to develop. They had to fight to breathe plus they both were very small. Jon weighed 3.5 pounds, Jessica, 2.14 pounds.

Both babies were put into isolation. At times they needed the help of a respirator to breathe. Constant medical attention was needed for the twins.

Jessica started to improve quickly. Her lungs started functioning normally after a short time. Six weeks after her birth, she came home.

Jonathan hasn't been as lucky. His lungs still can't hold up for any length of time.

"The problem is that his body didn't produce enough lung tissue," Debbie explained. "After he was born, he was fighting to breathe so hard that his lungs started hemorrhaging."

That complicated Jon's problems. Furthermore his heart tried to compensate for his lungs. It started beating faster. Fluid surrounded his heart.

A blood clot passed through his lungs once too. And one of his lungs has never functioned correctly.

He's still in intensive care—that's where he's been since being born.

Although they don't talk about it, the Benningfields know that Jon could die at any time. "The doctor said if he makes it past nine months, he'll probably live," Debbie said.

The expense of the hospital care, doctors, medicine, and so on are enormous and growing by the day.

To date, John has received bills totaling more than $61,300. That doesn't include his son's doctor bill, the expense of the ambulance service and a good portion of Debbie's doctor bill.

Then there is the expense of driving to Louisville to see Jon and nightly calls to Norton's to see how he is progressing. The bills and expenses are never ending.

Blue Cross-Blue Shield has paid approximately $35–$36,000 of the expenses. The rest of the money—which could easily mount up to more than $50,000 if and when Jon gets out of the hospital—must be paid by the Benningfields.

John said he used to worry constantly about the bills. Now, he said, he tries not think about them except on pay day.

It's a debt that could very well be with him and Debbie for the rest of their lives. They've adjusted to that fact, they said. They've adjusted as much as they can anyway.

"It's like watchin' television," John said. "I always thought they made these sort of stories up until I saw it happen."

"It's easy to feel sorry for yourself," said Debbie, but then I look at the other babies in the nursery and I see some that have no hope of going home."

They're both back working now. Besides their jobs they travel to Louisville three times a week or more to visit with the little fellow. They've been doing that since he was born; remember the snow, ice, rain and cold weather? They dsove through that too.

"Sometimes I think I'm getting tired but then I think of Jon and how tired he must be. I figure I must be able to take it as long as he can," said John. "I never knew family life could be so rough."

SOLAR ENERGY LOANS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. LEHMAN. Mr. Speaker, following an especially harsh winter, our attention is focused on the shortages of existing energy sources and the resultant soaring costs of oil, gas, and electricity. While we must take steps to deal with these problems, we also realize that viable alternatives for the future must be developed. One answer lies in inexhaustible sources of energy such as solar power.

Earlier this session, I introduced H.R. 485, to establish within the Small Business Administration a new direct low-interest loan program to assist homeowners and builders in purchasing and installing solar energy equipment. A significant portion of energy consumption can be attributed to residential structures. Despite the fact that the Sun would appear to be an ideal source of energy, present programs discriminate against this system because of higher initial costs.

Financially, heating and cooling systems were once looked at in terms of installation costs only. Today, these systems are being viewed in a more realistic light. Energy experts refer to a heating system's "life-cycle-cost" which includes the cost of fuel required to maintain the system. Solar systems are generally more expensive to install, but they have lower life-cycle-costs than conventional systems.

Federal programs of loans and loan guarantees for purchasing or improving homes enable borrowers to obtain loans at low-interest rates. These loans, however, are limited in size and cannot cover the cost of installing a solar heating and cooling system. Many homeowners, therefore, are discouraged from putting solar systems in their homes because the initial cost would put the total loan amount over the limit. In order to qualify for a low-interest loan, many are forced to choose low initial but high life-cycle-cost conventional heating and cooling.

H.R. 485 provides one possible remedy to this unfortunate situation. The benefits of a program such as the one provided for in this legislation would be far-reaching. In addition to significantly reducing the use of fossil fuels, we would be providing a stimulus to a new industry and creating more jobs. The utilization of the small business segment of our national economy recognizes the vital role that small business concerns have played and will continue to play in the development of manufacturing and marketing solar energy equipment.

Mr. Speaker, for the benefit of my colleagues who maintain an interest in promoting the use of solar energy in the United States, the text of my bill is as follows:

H.R. 485

A bill to amend the Small Business Act to establish within the Small Business Administration a new direct low-interest loan program to assist homeowners and builders in purchasing and installing solar energy equipment

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS AND PURPOSE

SECTION 1. (a)(1) The Congress finds that the energy needs of residential structures account for a significant portion of our national energy consumption, and that the expected substantial increases in the cost of oil, gas, and electricity will significantly and adversely affect millions of American homes. The Congress further finds that a program of Federal assistance in purchasing and installing solar energy equipment can provide a new opportunity for the efficient heating and cooling of homes despite the energy shortage.

(2) The Congress recognizes that small business concerns have already demonstrated their ability to participate effectively in the assembly and marketing of solar energy equipment and are increasingly engaging in commercial operations in this field, and declares that it would be in the national interest to place special emphasis upon the small business segment of the economy in any program of Federal assistance of the kind described in paragraph (1).

(b) It is the purpose of this Act to provide a source of financial assistance for homeowners and builders so as to enable them to purchase and install solar energy equipment, primarily through the small business segment of the economy in order to substantially reduce the use of fossil fuels.

SEC. 2. Section 7 of the Small Business Act is amended by adding at the end thereof the following new subsection:

"(l)(1) In addition to its other functions under this Act, the Administration is authorized to make loans as provided in this

subsection to individuals and families owning and occupying residential structures, and to persons engaged in building residential structures, to assist them in purchasing and installing qualified solar energy equipment (as defined in paragraph (4)) in such structures.

"(2) A loan made under this subsection with respect to any residential structure shall—

"(A) be in such amount, not exceeding 75 per centum of the cost of purchasing and installing the equipment involved, and not exceeding—

"(i) $6,000 per dwelling unit in the case of a one- to four-family structure,

"(ii) $5,700 per dwelling unit in the case of a multifamily structure containing five or more but less than twenty-five such units,

"(iii) $5,400 per dwelling unit in the case of a multifamily structure containing twenty-five or more but less than one hundred such units,

"(iv) $4,800 per dwelling unit in the case of a multifamily structure containing one hundred or more but less than two hundred such units, or

"(v) $4,500 per dwelling unit in the case of a multifamily structure containing two hundred or more such units,

as may be necessary to enable the owner or builder of such structure to purchase and install qualified solar energy equipment which is suitable and appropriate for such structure, including the cost of any necessary modifications in the structure itself, taking into account the climatic, meteorological, and related conditions prevailing in the region where the structure is located, as established by the Administration in regulations prescribed by it and in effect at the time of the loan;

"(B) bear interest at a rate equal to the average market yield (computed as of the end of the calendar month preceding the month in which the loan is made) on all marketable interest-bearing obligations of the United States then forming a part of the public debt (with such average yield, if not a multiple of one-eighth of 1 per centum, being adjusted to the nearest such multiple), plus one-half of 1 per centum for administrative costs;

"(C) have a maturity not exceeding—

"(i) eight years in the case of a one- to four-family structure, or

"(ii) fifteen years in the case of a multifamily structure,

except that if the loan is made to the builder of a structure which is sold to another person for occupancy, rental, resale, or any other purpose, the maturity of the loan shall not extend beyond the date of the sale to such other person; and

"(D) be subject to such additional terms, conditions, and provisions as the administration may impose in order to assure that the purpose of this subsection is effectively carried out.

"(3)(A) Each application for a loan under this subsection shall be accompanied by detailed plans for the purchase and installation of the proposed equipment and an estimate of the costs involved.

"(B) No such application shall be approved unless—

"(i) the administration finds that the proposed equipment is suitable and appropriate and will be effective, that the costs will not be excessive, and that the purchase and installation of the equipment will not involve elaborate or extravagant design or materials; and

"(ii) the proposed equipment is being purchased from a small business concern (as defined by the administration under section 3) and, unless installed by the applicant, will be installed by a small business concern (as so defined); except that the requirement of this clause may be waived by the administration in any case upon a specific finding that there is no small business concern within three hundred miles of the structure involved which is engaged in marketing or installing solar energy equipment that would meet (with respect such structure) the requirements of clause (i).

"(C) In making loans under this subsection, the administration shall impose such standards and take such actions as may be necessary or appropriate to assure that both one- to four-family structures and multifamily structures share equitably in the fun family structures share equitably in the funds provided for such loans.

"(4) For purposes of this subsection, the term 'qualified solar energy equipment' means equipment—

"(A) which utilizes solar energy to provide hot water, space heating, electrical power, or cooling (or any combination of any of the foregoing), including devices for the collection, distribution, storage, and regulation of solar energy;

"(B) which, including the installation of such equipment, meets minimum standards promulgated by the Administrator with respect to durability of parts, efficiency, ease of repair, availability of spare parts, acceptability of cost, technical feasibility of design, or proven workability, and such other matters as the Administrator may consider relevant or appropriate; and

"(C) which is not supplementary to the performance of solar equipment through the use of conventional energy forms such as petroleum, gas, coal, or other hydrocarbon fuels, or electricity.

"(5) In carrying out its functions under the Solar Heating and Cooling Demonstration Act of 1974 and in support of the objectives of this subsection, the Energy Research and Development Administration shall—

"(A) establish a mechanism or procedure (or both) for the inspection and evaluation of each type or model of solar energy equipment, making provision for dealing with applications received from manufacturers and for the consideration of comments received from homeowners already using such equipment.

"(B) review each new solar energy unit, system, or component entering the market.

"(C) periodically (no less often than once energy equipment, and recommend the prospective rescissions of such certifications (or energy equipment, and recommend the prospective rescission of such certifications (or appropriate modifications in the equipment involved) whenever it finds that such equipment no longer meets applicable standards or criteria,

"(D) periodically transmit its findings and recommendations under this paragraph to the Administration for use in the performance of its functions under paragraph (4), and

"(E) take such other actions, and impose such other conditions and requirements, as will promote the objectives of this subsection.

"(6) The Administration shall provide to any person upon request (without regard to whether or not such person is making or proposes to make application for a loan under this subsection) full, complete, and current information concerning recommended standards and types of qualified solar energy equipment, available from small business concerns, which is appropriate for use in residential structures of varying sizes and types and in various regions of the country.".

SEC. 3. (a) Section 4(c)(1) of the Small Business Act is amended by striking out "and" immediately before "(B)", and by inserting before the period at the end thereof the following: "; and (C) a solar energy loan fund which shall be available for financing functions performed under section 7(l) of this Act, including administrative expenses in connection with such functions".

(b) Section 4(c)(2) of such Act is amended by striking out "and" immediately before "(B)", and by inserting before the period at the end thereof the following: "; and (C) pursuant to section 7(l) of this Act, shall be paid into the solar energy loan fund".

(c) Section 4(c)(4) of such Act is amended by striking out "and" immediately before "(D)", and by inserting before the period at the end thereof the following: "; and (E) under section 7(l) of this Act, shall not exceed $900,000,000".

SEC. 4. (a) The authority of the Small Business Administration to make loans under section 7(l) of the Small Business Act (as added by section 2 of this Act) shall become effective six months after the date of the enactment of this Act, and shall expire ten years after such date.

(b) Prior to the date on which its authority to make loans under section 7(l) of the Small Business Act becomes effective under subsection (a) of this section, the Small Business Administration shall promulgate and publish the regulations necessary to carry out its functions under such section 7(l).

ARCTIC GAS PROJECT

HON. M. CALDWELL BUTLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. BUTLER. Mr. Speaker, Delegate A. R. (Pete) Giesen from Virginia's 15th Legislative District introduced House Joint Resolution No. 267 "Expressing the Sense of the General Assembly That the United States Should Proceed With the Arctic Gas Project."

This resolution was unanimously adopted by the Virginia General Assembly in its recent session that adjourned March 4.

I believe points made by Delegate Giesen are good and timely, and the resolution follows for the Members attention:

HOUSE JOINT RESOLUTION NO. 267

Whereas, to the great extent in our nation's long, two hundred year history we as a people are dependent upon foreign sources for the energy-producing fuels that run our nation's industries, our people's transportation and our citizens' homes; and

Whereas, substantial alleviation of this immense problem has been found in the form of a reserve of natural gas discovered in the Prudhoe Bay area of Alaska that if brought to market in the lower forty-eight states would greatly enhance our goal of energy self-sufficiency; and

Whereas, the Arctic Gas Project, designed to move Alaskan gas by large diameter pipeline through Canada to eastern, western and mid-western markets, will afford the most feasible means by which Alaskan gas can be made available to markets in the lower forty-eight States; and

Whereas, our nation's chief architect of Federal Power Planning and Action, the Federal Power Commission, in its December, nineteen hundred seventy-six meeting issued staff recommendations for certification of the

Arctic Gas Project as being "vastly superior" when compared with alternative projects; and

Whereas, virtually all of the assemblage of data thus compiled indicates that the proposed overland pipeline route through Alaska and Canada will afford the safest, most environmentally acceptable and economically prudent method proposed to date for the movement of Arctic Gas to markets in the lower forty-eight states; now, therefore, be it

Resolved by the House of Delegates, the Senate concurring, That the General Assembly of the Commonwealth of Virginia hereby expresses its support for the Mackenzie River Valley Pipeline known as the Arctic Gas Project; and, be it

Resolved further, That the General Assembly of Virginia urges the President of the United States, the Secretary of the Interior, the Congress of the United States, and other responsible federal agencies to expeditiously take all necessary action for the furtherance of the authorization of the construction and operation of the proposed Arctic Gas Project.

The Clerk of the House of Delegates is directed to forward copies of this resolution to Virginia's Congressional Delegation.

LITHUANIAN INDEPENDENCE

HON. WILLIAM F. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. WALSH. Mr. Speaker, freedom struggles constantly in the face of Soviet oppression throughout the world. Nowhere is this more apparent than in Lithuania.

Her history, which began in the 12th century, has been filled with the constant effort to achieve this freedom and independence. On February 16 of this year Lithuanians throughout the world celebrated the 59th anniversary of the Declaration of Independence of Lithuania. This landmark achievement occurred in 1918 when its people rejected Communist oppression and declared themselves to follow the principle of freedom.

This battle is not new to the people of Lithuania. She remained under czarist domination for 123 years, defying Russian intentions to russify and assimilate its inhabitants. Lithuanians repeatedly revolted against Russian rule.

Under present Soviet rule, the resistance has become even more forceful. Through relentless undertakings the desire for liberty and national consciousness matures and is strengthened. The inhabitants are deprived of basic rights which we as Americans consider essential and God-given. They are starved from the freedom of the press, speech, and even freedom of religion.

But this spirit of freedom is alive in Lithuania. Within its culture and literature Lithuania vitally recognizes its independent history.

Today we in the House of Representatives commemorate this independence and applaud the continuing efforts of the Lithuanian people to achieve such an honorable goal.

At the same time, we must not become complacent but act boldly in the face of such oppression in Lithuania and throughout the world. We must preserve the legal rights of these proud and brave people by keeping their suffering constantly before the bar of world opinion. To this end, it is crucial that we maintain our policy regarding Lithuania and oppose Soviet "incorporation" of independent sovereign states.

I would like to commend and thank the people of Lithuania for their struggles in the face of such overwhelming odds and encourage them in their efforts to survive as independent and freedom-loving people.

CENTER FOR THE ARTS

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. BYRON. Mr. Speaker, last week was a happy week for my hometown, Frederick, Md. An unselfish family there presented the city with a valuable gift to be enjoyed by current and future generations of Fredericktonians.

Dan and Alyce Weinberg and their children, Danyce and Aldan presented the city and its fine arts council with the keys to the magnificent Tivoli Theatre to be used as permanent Center for the Performing Arts.

The beautiful Tivoli Theatre opened in 1926 and boasts a rare in-place concert theatre organ. The Weinbergs' wonderful gift is a source of pride to Frederick and a lasting tribute to the Weinberg family.

So they may share my excitement over this wonderful gift, I wish to share with my colleagues this editorial which appeared in the Frederick Post:

CENTER FOR THE ARTS

"The reaction has been tremendous!"

This is the immediate response to the announcement made Tuesday by Mayor Ronald N. Young that Frederick City may soon have its very own "arts center"—a long-time dream given reality by the generosity of a local family.

Mr. and Mrs. Daniel H. Weinberg (Dan and Alyce) and their chlidren, Danyce and Aldan, have handed the keys to the Tivoli Theatre over to the City and its Fine Arts Council to be used as a permanent center for the performing arts.

The "Tivoli" stands on one of the most valuable piece of property in Downtown Frederick, 20 W. Patrick St., just west of the "Square Corner."

There is only one "string" attached to this offer by the Weinberg family, and that "String" favors the community. That is, the agreement (which must be ratified by the Board of Aldermen at its next meeting) is to continue indefinitely, "as long as the Tivoli is utilized for the purpose for which it is intended"—as a center for the arts. It should be no other way.

The offer by the Weinbergs also includes a "purchase price" for the "building and its contents." The "price" of $19,500—and this amount has already been more than "covered" by pledges of contributions from arts patrons eager to energize the project—is so insignificant in contrast to the value of the property, that it should be considered only a "token"—an expression from the community that it is, in fact, dedicated to the task of turning this rare gift into a most successful center for the performing arts.

President Fred Stenger of the Fine Arts Council said the offer by Mr. and Mrs. Weinberg—Mrs. Weinberg has worked with the Arts Council since it was created—has been "in the mill" for nearly two years. Many community organizations have supported the idea and have pledged to it their wholehearted support.

Preliminary plans call for county-wide use of the facility for drama, concerts, the dance, pageants, conventions, town meetings, exhibitions and other uses related to the performing arts.

The center will be operated by the Arts Council, with a permanent "oversight" committee of three—one designee of the Weinberg family, the Mayor of the City of Frederick, and the president of the Arts Council—responsible for major decisions relating to the center.

Further planning calls for "total civic involvement in repair, restoration and beautification" of the Tivoli, and plans are being made for a community-wide fund-raising drive to support the renovation program.

The Tivoli, which in 1976 marked the golden anniversary of its opening on Dec. 23, 1926, boasts the only "in-place concert theatre organ in the State of Maryland."

The Tivoli Organ is considered by the great concert organist Ray Brubaker of Baltimore and the national organ society as one of the "rare treasures" of its kind still in use. The organ was a "victim" of the Oct. 9, 1976 flood, and Mr. Brubaker and his fellow organ afficionadoes—including Richard F. Kline Jr. of Frederick "have moved pretty well along toward total restoration" of the organ at their own investment of time and labor—"a labor of love."

There is swelling up in the community an exciting enthusiasm for this unique undertaking. Plans for a major fund-raising effort for the arts center will soon be announced, and public support in terms of both "dollars now" and "usage later" will be needed.

The generosity which has made this project such a possibility has marked it for certain success. And we are sure, and those many groups and individuals who have been involved to date are confident, that the Frederick Community will join hand-in-hand in making the arts center dream come true—the only fitting tribute we can give "in kind" to match the spirit of generosity being shown by Dan and Alyce Weinberg and their children.

TUITION CREDIT LEGISLATION

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ZABLOCKI. Mr. Speaker, I am again introducing legislation to amend the Internal Revenue Code of 1954 to provide for a Federal tax credit to individuals for tuition paid for dependents that attend a private nonprofit elementary or secondary school. This bill would provide a credit of 50 percent of the tuition paid for a dependent up to a maximum of $400 per dependent. The credit would be phased out gradually to the extent a taxpayer's adjusted gross income exceeds $25,000.

My legislation is prompted by the rapidly increasing costs of education coupled with the closings and consolidations of private school systems. The dual

burden of parents supporting the public schools as taxpayers and the private schools as parents of students paying tuition is becoming intolerable and inequitable. The difficulty of carrying this dual financial burden has created a crisis in private and parochial education at the elementary and secondary level across our Nation. The resultant decline of private and parochial education is imposing heavy financial burdens on the public schools nationally.

Mr. Speaker, my objective is to strengthen both public and private systems of elementary and secondary education by providing direct and indirect tax relief to all taxpayers. As we are all concerned with education and educational opportunities I urge my colleagues to consider my proposal and support legislation to provide for the tax credit for tuition.

A SOURCE OF FUNDING FOR BLACK AMERICA

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. RANGEL. Mr. Speaker, as a member of the board of the United Black National Fund I am quite aware of the dependence black communities, organizations, and institutions have on established foundations—including government—for their support. The time has come for the creation of a central black treasury financially sound enough to assume the obligations of current philanthropic groups. The current level of black programs and activities underscores the importance for organized fund raising and capital accumulation.

In light of this, I would like to offer my colleagues the following article from Black Enterprise detailing this important matter. It is very well written, informative, and I feel my colleagues will find it most interesting:

CREATION OF A BLACK NATIONAL FUND

(By Richard F. America)

Within the past decade, events have apparently brought many people to the realization that if they are serious about accelerating the development of their communities and institutions, they will, of necessity, have to develop various forms of central treasuries. The development of such treasures will perhaps first have to be successfully demonstrated in a few localities before coordinated and national fund raising can be undertaken.

We are aware of several sophisticated and apparently effective national fund-raising efforts on behalf of several black institutions and organizations, and there are, from time to time, one-shot appeals in legal emergencies or especially in support of the victims of natural disasters. But there remains a requirement for an annual national program that successfully reaches and effectively appeals to all seven to eight million households and all the business and voluntary organizations in black America. A basic principle has become clear: Black America cannot permit itself to remain quite so financially dependent on government and established foundations and contributors for support of its ongoing or experimental programs.

One example of financial vulnerability can be found in the experience of many of the community-action efforts of the Great Society program. In many places, a kind of grass-roots community organization was undertaken to develop general cohesion, some broader democratic participation in decisions perceived as affecting local interests, and local political leadership. Much of the early energy was generated through the device of rallies against traditional downtown political figures and institutions. Movement was often generated to oppose city hall over specific education, service or developmental issues. Some distortions and even some demagoguery crept into these processes, but there remains an obvious need for organized vigilance to ensure justice and due process in these matters.

But city hall perceived a threat, which ironically was funded by government, and as perceived by many, by the general community. Congress then, at the urging of many mayors, withdrew much of the necessary financial support from community-organizing activities.

That was predictable. To the extent that the interests of black America are in conflict with those of the general community, it is now widely understood as unrealistic to expect general institutions to underwrite consistently the activities of black parties to the conflict, although occasionally some such funding is available. If, as in the example, political organization is considered to have some ongoing value, funds for it will have to be found internally.

Comparative Savings in the United States, 1960–61

	Black	White
Average income after taxes	$3,840	$6,169
Current consumption	$3,707	$5,609
Savings	$133	$560
Savings as percent of income	3.5	9.1

Source: U.S. Bureau of the Census, Department of Commerce.

In the 1960s and the early 1970s, there were many indications of growing interest in and need for organized fund raising in Afro-America. There were many conferences called by many groups at which plans and programs were discussed but could not be accomplished for, ironically, lack of adequate funding. Groups interested in the arts, in housing, in political action, health, education, criminal justice, commercial development and so on generate a constant stream of proposals, many of which are worthwhile and almost all of which call for ongoing financial support.

All of these activities underscore the need for dramatically increased savings in many forms and for organized fund raising and capital accumulation in few well-planned, well-managed institutions.

The development and security of black America over the next 30 years or so will require the harnessing of its financial resources. Such saving and investment will occur in many forms, commercial and noncommercial. Deposits in savings accounts in financial institutions, as well as the retained earnings of its corporations, will all contribute to "savings." Indeed, increased savings in mattresses, socks, cookie jars and piggy banks are also desirable if ultimately these find their way primarily into the investment stream and do not simply become deferred consumption. But our interest here is in the potential of savings in the form of internal charity or what might be thought of as voluntary taxation. But savings will probably be an important component of any successful, comprehensive, development effort.

In 1975, the NAACP experienced a budget problem in its national program and sought additional funding through a special letter campaign, and through magazine and other advertisements. It could be that the NAACP is the single organization best in a position to launch a national fund that would provide funds for most of its needs and would do so as well for many other organizations and projects under the umbrella.

It does seem obvious that everything any of the major development organizations wish to achieve from now on is going to depend much more on the internal resources of black America. This will be true even with a sympathetic national administration running the government.

Tithing requirements as a means of saving—such as are frequently mentioned in connection with the Nation of Islam—have been the subject of some comment. Also, efforts like the "10–36" program of the Zion Baptist Church and Rev. Leon Sullivan in Philadelphia have attracted attention.

Historically, religious sanctions or charismatic leadership have succeeded in inducing heavy savings increases by groups of people who, because of relatively low incomes and other socioeconomic characteristics, would have been expected to consume virtually all of their income. However this pattern can be altered, apparently, by an effective appeal. The same may be true of middle-income households, which because of relentless advertising and other stimuli, also tend to have trouble saving consistently from year to year.

The national savings rate is in the range of seven to ten percent annually. The black rate is lower than that in most years, although this is a complex subject. Marcus Alexis, a highly regarded economist, for example, says that there is "evidence of higher savings by blacks than by comparable income white families." And "statistical data show regional differences in savings. Northern blacks save a larger portion of their incomes than Northern whites with the same incomes."

Alexis discusses at some length several hypotheses that attempt to explain this greater savings pattern. For our purposes, however, in spite of possible greater household savings at comparable incomes, the overall black savings rate will have to increase as a proportion of total income if satisfactory development is to occur. The rate of three to five percent is probably too low for successful development. Of course, the problem is compounded in that much of black America's savings does not occur in its own financial institutions and is diverted away from its investments into investments in the general economy. Little of the reverse flow has occurred although it may be possible to stimulate white savings in black banks as the banks gain in strength and numbers.

But our particular focus here is on a specific type of savings that occurs in the form of charitable donations. Some interracial flows do occur in this form and presumably will continue. Blacks give to white-controlled efforts like the United Funds and Red Cross, and whites give to the United Negro College Fund and NAACP. There has been controversy over allocation decisions in United Fund budgets in several cities, and some reforms have been made. But even if the United Funds did everything that could reasonably be asked, there would still be a need for an autonomous national fund.

Officials of United Way of America have seemed unenthusiastic at the prospect of the national fund. Their cooperation could be helpful and, certainly, communication during start-up will be desirable to avoid any undue abrasion.

Most traditional civil rights organizations were reported to be experiencing some fluctuation or decline in revenues after the mood of the country began to change around the middle 1960s. Such broad-based membership organizations, if they are to become even more effective, deserve greater internal support.

There are issues on which it may be possible and desirable to develop Afro-American policy. If so, such issues deserve serious research in independent centers or elsewhere, and that is costly. Similarly, specific problems in education, housing, health, employment, transportation, law enforcement, public safety and economic development could be more adequately addressed if major institutions like Howard, Atlanta and Fisk Universities, for example, could undertake more extensive serious research. Additional financial support to them, not just from alumni but from the broader community, perhaps through some such mechanism as a national fund, could help make that possible.

Black America must thus increasingly fund its own development. Problems come quickly to mind concerning intragroup politics, personalities, collection, administration, disbursal and safe-guarding of large funds. These are real enough difficulties to anticipate. But the basic problems are subject to demonstration and evaluative research.

The national fund would contain a number of familiar elements similar to the approach of other national charitable organizations. The key problems will be recognized as marketing problems, and they may be summarized as how to find a set of secular and technically effective substitutes for traditional, charitable and religious commitment.

Many leaders have expressed the desire over the years to see community-wide support for annual fund-raising drives that have the purpose of "raising money from the community for the community."

There is no obvious reason why this cannot be accomplished in this decade, although there are sources of opposition apparently including executives of the major national multipurpose funds. Their opposition is significant because they are in a position to make the launching of the national fund more or less difficult. The major foundations are especially important because operating budgets in the fund's early phases will require significant grant subsidies.

Looking ahead, what might be the order of the financial potential of the national fund? It is difficult to judge, but we can look at a variety of combinations of assumptions as to level of response and level of contribution. With conservative assumptions, estimates can be derived in the $10 million to $15 million range, and with optimistic ones even higher. Roughly, if we reckon total income in Afro-America at over $50 billion, one-tenth of one percent of that is $50 million, and, given the savings rate, this might not be an unreasonable expectation after the fund has achieved some operating history and wide respect as a sensible apparatus for internal philanthropic purposes.

It is possible to debate the contribution assumptions at great length. Suffice it to assert here that annual receipts in the hundreds of millions do not seem unreasonable if careful research can discover a powerful and meaningful appeal, and if a record of prudent management and solid program results can be established.

A number of organizations over the years have thought to attempt such a program. Indeed, there is in existence an effort known as the National Black United Fund (NBUF), which has sought to create a program together with several local funds now affiliated through NBUF. This might be the vehicle that can evolve into the national fund.

In any event, the problems of coordination and cooperation in the national fund may strike some as staggering. It is no secret that there have been, historically, problems of mutual trust. It is reasonable to assume for now that they are manageable, if not solvable.

It takes money to raise money. The catalytic agent to raise seed money to establish the structure and launch the fund should be a business-oriented group, a group of civil rights and legal leaders, perhaps a group of athletes, writers and entertainers frequently mentioned as people looking for ways to make worthwhile contributions to social reform and development, or a body of religious leaders. Such a group may already exist, but more likely it will have to be created.

A major benefit of the entire undertaking will be its pressure toward program emphasis throughout black America. Funding applications presumably will be screened according to seriously applied standards of feasibility and soundness.

One reason that "radicals" and "conservatives" have adopted these postures is that they have tended to lack funds. In the case of radicals, rhetoric has been often a substitute for constructive action. Conservative elements have often tended to be preoccupied with pageantry, frivolity and trivia, in part, because meaningful activity is difficult without organized, reliable, financial resources. With good fortune, the national fund would lead to greater emphasis on careful program development by groups all along the ideological spectrum.

REPORTS OF COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ROGERS. Mr. Speaker, on March 26, 1977, the Committee on Interstate and Foreign Commerce filed reports on H.R. 4974, the Health Planning and Health Services Research and Statistics Extension Act of 1977; H.R. 4975, the Biomedical Research Extension Act of 1977; and H.R. 4976, the Health Services Extension Act of 1977. At the time of filing, the reports of cost estimates as required by section 403 of the Congressional Budget Act of 1964 had not yet been prepared. Those cost estimates now have been received and I include them in the RECORD at this point:

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 29, 1977.

Hon. HARLEY O. STAGGERS,
Chairman, Committee on Interstate and Foreign Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for H.R. 4976, the Health Services Extension Act of 1977.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: H.R. 4976.

2. Bill title: Health Services Extension Act of 1977.

3. Purpose of bill: To extend the authorizations for one year or more as stated for the following Sections of the Public Health Service Act; Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 and the Social Security Act.

Section No.	Purpose	Authorization level (1978)
314(d)(7)(A)	Formula grants to States	$103,500,000
314(d)(7)(B)	Hypertension programs	10,350,000
319(h)(i)	Planning and development of migrant health centers.	1,897,500
319(h)(2)	Operation of migrant health centers.	29,152,500
319(h)(3)	Inpatient and outpatient service.	3,450,000
330(g)(1)	Planning and development of community health centers.	5,750,000
330(g)(2)	Operation of community health centers.	241,670,200
1001(c)	Family planning projects	123,625,000
1003(b)	Training (family planning)	3,450,000
1004(b)	Research (family planning)	67,838,000
1005(b)	Informational and educational materials.	690,000
1121(b)(5)	Sudden infant death syndrome.	2,300,000
1131 (f)	Hemophilia	3,450,000
1132(e)	Blood separation centers	3,450,000
Subpt. IV, pt. C, title VII: sec. 757.	Scholarship programs (1978)	5,450,000
	National health service centers (1979).	6,300,000
	1980	7,200,000
COMMUNITY MENTAL HEALTH CENTERS ACT		
202(d)	Planning community mental health center programs.	100,000
203(d)	Initial operation of CMHCS	22,775,000
204(c)	Consultation and education service.	15,000,000
205(c)	Conversion grants	22,000,000
213	Financial distress grants	12,000,000
231(d)	Rape prevention and control	5,750,000
SOCIAL SECURITY ACT		
501	Maternal and child health crippled children's services.	399,864,200
PUBLIC LAW 94-63		
602(a)(5)	Home health services	3,450,000
602(b)(4)	Home health service training	1,000,000
Total authorizations:		
1978		1,087,962,400
1979		6,300,000
1980		7,200,000

4. COST ESTIMATE

[Outlays in millions of dollars]

	1978	1979	1980	1981	1982
314(d)(7)(A)	95.2	8.3			
314(d)(7)(B)	5.2	5.2			
319(h)(1)	1.2	.702			
319(h)(2)	18.4	10.8			
319(h)(3)	2.2	1.3			
330(g)(1)	3.2	2.7			
330(g)(2)	130.5	111.2			
1001(c)	48.2	37.7	37.7		
1003(b)	1.4	1.1	1.1		
1004(b)	26.5	20.7	20.7		
1005(b)	.270	.210	.210		
1121(b)	.280	1.9	.120		
1131(f)	1.7	1.7			
1132(e)	2.1	1.1	.210		
Sec. 757	3.3	1.8	.327		
1979		3.8	2.1	.388	
1980			4.4	2.4	0.432
COMMUNITY MENTAL HEALTH CENTERS ACT					
202(d)	.020	.055	.025		
203(d)	4.6	12.5	5.7		
204(c)	3.0	8.3	3.8		
205(c)	4.4	12.1	5.5		
213	2.4	6.6	3.0		
231(d)	1.2	3.2	1.4		

SOCIAL SECURITY ACT

	1978	1979	1980	1981	19
Amount	243.9	72.4	83.6		

PUBLIC LAW 95-63

Amount	1.2 .050	1.7 .050			
Total outlays	600.7	327.0	170.0	2.8	.432

Note: Totals may not add due to rounding.

5. Basis for estimate: Outlays are based on specific program spendout rates from HEW as of January 19, 1977, and updated by CBO.
6. Estimate comparison: None.
7. Previous CBO estimate: None.
8. Estimate prepared by: Mary Plaska (225-7766).
9. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C. March 29, 1977.

Hon. HARLEY O. STAGGERS,
Chairman, Committee on Interstate and Foreign Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for H.R. 4975, the Biomedical Research Extension Act of 1977.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: H.R. 4975.
2. Bill title: Biomedical Research Extension Act of 1977.
3. Purpose of bill: To extend the authorizations for one year (fiscal year 1978) for the following Sections of the Public Health Service Act:

Section No.	Purpose	Authorization level
390(c)	Medical libraries	$9,200,000
409	Cancer control	69,116,150
410C	National Cancer Institute	847,162,450
414(b)	Heart and lung treatment programs.	29,900,000
419B	National Heart and Lung Institute.	406,636,550
472(d)	National Research Service awards.	137,700,000
	Total authorization	1,499,785,150

4. COST ESTIMATE

[Outlays in millions of dollars]

	1978	1979	1980	1981
390(c)	8.4	0.8		
409	26.3	31.1	9.7	2.0
410C	321.9	381.2	118.6	25.5
414(b)	11.4	13.5	4.2	.8
419B	154.5	183.0	56.9	12.2
472(d)	52.4	62.0	19.3	4.1
Total	574.9	671.6	208.7	44.6

5. Basis for estimate: Medical libraries were assumed to be primarily salaries and expenses and were projected to spend out at 91% the first year and 9% in 1979. All other programs which include much more grant and contract funds will, based upon historical experience, spend out at 38%, 45%, 14% and 3% between 1978 and 1981.

In each case, outlays were calculated assuming that appropriations would be at full authorization levels.
6. Estimate comparison: None.
7. Previous CBO estimate: None.
8. Estimate prepared by: Jeffrey C. Merrill (225-7766).
9. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., March 29, 1977.

Hon. HARLEY O. STAGGERS,
Chairman, Committee on Interstate and Foreign Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for H.R. 4974, the Health Planning and Health Services Research and Statistics Extension Act of 1977.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: H.R. 4974.
2. Bill title: Health Planning and Health Services Research and Statistics Extension Act of 1977.
3. Bill purpose: To authorize appropriations for FY 1978 for the following Sections of the Public Health Service Act:

Section No.	Purpose	Authorization level
308(i)(1)	National Center for Health Services Research.	$27,600,000
308(i)(2)	National Center for Health Statistics.	31,740,000
1516(c)(1)	Planning grants	125,000,000
1525(c)	State planning agencies	35,000,000
1526(e)	Rate regulation	6,000,000
1534(d)	Centers for health planning	10,000,000
1613	Facilities construction	135,000,000
1640	Area development	120,000,000
	Total authorization	490,340,000

4. COST ESTIMATE

[Outlays in millions of dollars]

Section	1978	1979	1980	1981	1982
308(i)(1)	9.9	18.8	3.9		
308(i)(2)	22.5	9.2			
1516(c)(1)	50.0	75.0			
1525(c)	14.0	21.0			
1526(e)	3.0	3.0			
1534(d)	2.0	6.0	2.0		
1613	18.9	33.8	47.2	27	8.1
1640	24.0	60.0	24.0	12	
Total	144.4	221.8	77.1	39	8.1

5. Basis for estimate: Spendout rates for 1978 are based upon HEW's Outlay Analysis, dated January 19, 1977. Spendout rates for 1979-1982 are based upon prior spending experience of these programs. The following rates were used for each Section: (First year through fifth year):

308(i)(1), 36 percent, 50 percent, 14 percent.
308(i)(2), 71 percent, 29 percent.
1516(c), 40 percent, 60 percent.
1525(c), 40 percent, 60 percent.
1526(e), 50 percent, 25 percent, 25 percent.
1534(d), 20 percent, 60 percent, 20 percent.
1613, 14 percent, 25 percent, 35 percent, 20 percent, 6 percent.
1640, 20 percent, 50 percent, 20 percent, 10 percent.

In each case, outlays were calculated assuming that appropriations would be at full authorization levels.
6. Estimate comparison: Not Applicable.
7. Previous CBO estimate: None.
8. Estimate prepared by: Jeffrey C. Merrill (225-7766).
9. Estimate approved by:

JAMES L. BLUM,
Assistant Director for Budget Analysis.

"NATIONAL LUPUS WEEK" DRAWING

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ANDERSON of California. Mr. Speaker, for almost a year now I have been striving to achieve an expression of recognition by the Members of this House of the Congress of a deadly, widespread, and largely unknown disease called lupus erythematosus—lupus.

This disease currently afflicts over 500,000 people in this country, many of them women and children. On the first day of this session I introduced House Journal Resolution 24 with 24 of my colleagues; the purpose of which was to authorize the President of the United States to proclaim a week in 1977 as "National Lupus Week."

Since that time 156 additional Members have joined in cosponsorship of this joint resolution including 11 of our full committee chairmen. But due to the rules of the subcommittee with jurisdiction in this matter, our resolution remains in a state of limbo since 219 cosponsors are needed in order for the subcommittee to consider it.

I would like to personally thank the 181 Representatives who have demonstrated their concern and compassion for these hundreds of thousands of lupus-afflicted patients across the country and have cosigned the resolution. I would also like to thank the many local lupus chapters in Tennessee, in central Illinois, in Pennsylvania, in southern Arizona, in Texas, in New York, in my home State of California, and elsewhere throughout the United States for their support.

We still need 38 more cosponsors. Time is running out if we are to be successful in having a week of Federal recognition in 1977.

I urge those Members who do not see their names listed below to contact me and join in our efforts to bring to the attention of the American people the existence of this deadly disease of the connective tissues and vital organs.

Our resolution authorizes no Federal funds and in no way obligates the Treasury of the United States. All it does is authorize President Carter to issue a presidential proclamation proclaiming the week of September 18-24, 1977 as "National Lupus Week."

The list of cosponsors follows:

A LISTING OF THE COSPONSORS OF HOUSE JOINT RESOLUTION 24

James Abdnor of South Dakota, Joseph Addabbo of New York, Daniel Akaka of Hawaii, Clifford Allen of Tennessee, Glenn Anderson of California, Les AuCoin of Oregon, Herman Badillo of New York, Max Baucus of Montana.

Robin Beard of Tennessee, Anthony Beilenson of California, Tom Bevill of Alabama,

James Blanchard of Michigan, David Bonior of Michigan, David Bowen of Mississippi, John Brademas of Indiana, John Breckinridge of Kentucky.

Jack Brinkley of Georgia, William Brodhead of Michigan, Garry Brown of Michigan, George Brown of California, Clair Burgener of California, J. Herbert Burke of Florida, Yvonne Burke of California, Phillip Burton of California.

Charles Carney of Ohio, Tim Lee Carter of Kentucky, Del Clawson of California, James Cleveland of New Hampshire, E. Thomas Coleman of Missouri, Silvio Conte of Massachusetts, James Corman of California.

David Cornwell of Indiana, Baltasar Corrada of Puerto Rico, William Cotter of Connecticut, Lawrence Coughlin of Pennsylvania, Norman D'Amours of New Hampshire, George Danielson of California, Mendel Davis of South Carolina, E de la Garza of Texas.

Ronald Dellums of California, Ron de Lugo of the Virgin Islands, Robert Dornan of California, Thomas Downey of New York, Robert Drinan of Massachusetts, John Duncan of Tennessee, Robert Edgar of Pennsylvania, Mickey Edwards of Oklahoma.

Allen Ertel of Pennsylvania, Bill Lee Evans of Georgia, Walter Fauntroy of Washington, D.C., Millicent Fenwick of New Jersey, Hamilton Fish of New York, Daniel Flood of Pennsylvania, Walter Flowers of Alabama.

William Ford of Michigan, Benjamin Gilman of New York, Bo Ginn of Georgia, Dan Glickman of Kansas, Barry M. Goldwater Jr. of California, Henry Gonzalez of Texas, Albert Gore of Tennessee, Tennyson Guyer of Ohio.

Sam Hall of Texas, John Paul Hammerschmidt of Arkansas, James Hanley of New York, Mark Hannaford of California, George Hansen of Idaho, Augustus Hawkins of California, Margaret M. Heckler of Massachusetts, W. G. Hefner of North Carolina.

Cecil Heftel of Hawaii, Harold Hollenbeck of New Jersey, Frank Horton of New York, James Howard of New Jersey, William Hughes of New Jersey, Henry Hyde of New York, Andy Ireland of Florida, Ed Jenkins of Georgia.

John Jenrette of South Carolina, Bizz Johnson of California, Ed Jones of Tennessee, James Jones of Oklahoma, Abraham Kazen of Texas, Jack Kemp of New York, William Ketchum of California, Peter Kostmayer of Pennsylvania, John Krebs of California.

John LaFalce of New York, Robert Lagomarsino of California, Raymond Lederer of Pennsylvania, Joseph Le Fante of New Jersey, Norman Lent of New York, Elliott Levitas of Georgia, Jim Lloyd of California Marilyn Lloyd of Tennessee.

Trent Lott of Mississippi, John McFall of California, Matthew McHugh of New York, Stewart McKinney of Connecticut, Andrew Maguire of New Jersey, James Mann of South Carolina, Ron Marlenee of Montana, Dawson Mathis of Georgia.

Romano Mazzoli of Kentucky, Helen Meyner of New Jersey, Barbara Mikulski of Maryland, Abner Mikva of Illinois, Clarence Miller of Ohio, Norman Mineta of California, Joseph Minish of New Jersey, Joe Moakley of Massachusetts.

Anthony Moffett of Connecticut Robert Mollohan of West Virginia, Carlos Moorhead of California, William Moorhead of Pennsylvania, Austin Murphy of Pennsylvania, John Murphy of New York, Michael O. Myers of Pennsylvania, Stephen Neal of North Carolina.

Robert Nix of Pennsylvania, Richard Nolan of Minnesota, Mary Rose Oakar of Ohio, James Oberstar of Minnesota, George O'Brien of Illinois, Richard Ottinger of New York, Leon Panetta of California, Edward Patten of New Jersey.

Jerry Patterson of California, Edward Pattison of New York, Claude Pepper of Florida, Carl Perkins of Kentucky, Otis Pike of New York, Melvin Price of Illinois, Albert Quie of Minnesota, James Quillen of Tennessee.

Nick Joe Rahall of West Virginia, Charles Rangel of New York, Henry Ruess of Wisconsin, Frederick Richmond of New York, Matthew Rinaldo of New Jersey, Ted Risenhoover of Oklahoma, Ray Roberts of Texas.

Peter Rodino of New Jersey, Robert Roe of New Jersey, Edward Roybal of California, Marty Russo of Illinois, Jim Santini of Nevada, Ronald Sarasin of Connecticut, James Scheuer of New York, Paul Simon from Illinois.

Bernie Sisk of California, John Slack of West Virginia, Stephen Solarz of New York, Gladys Spellman of Maryland, Harley Staggers of West Virginia, J. William Stanton of Ohio, Pete Stark of California, Louis Stokes of Ohio.

Steven Symms of Idaho, Richard Tonry of Louisiana, Bob Traxler of Michigan, Morris Udall of Arizona, Al Ullman of Oregon, Guy Vander Jagt of Michigan, Bruce Vento of Minnesota, Joe Waggonner of Louisiana.

Douglas Walgren of Pennsylvania, Robert Walker of Pennsylvania, William Walsh of New York, Henry Waxman of California, Ted Weiss of New York, Charles Wiggins of California, Charles Wilson of Texas, Charles H. Wilson of California.

Larry Winn of Kansas, Lester Wolff of New York, Antonio Won Pat of Guam, Sidney Yates of Illinois, Gus Yatron of Pennsylvania, Don Young of Alaska, Robert Young of Missouri, Leo Zeferetti of New York.

ANNIVERSARY OF THE BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. RHODES. Mr. Speaker, March 25 marked the 59th anniversary of the founding of the Byelorussian Democratic Republic. It has long since been swallowed up by the tyranny of Communist Russia.

It is most appropriate that here in the United States we observe this anniversary. For two centuries we have preserved freedom as the bedrock of our Republic. Today, benevolent paternalism, exercised in the guise of public protection, is an internal threat to our own tradition of freedom.

In this year of 1977 the cause of human rights around the world has taken on new dimensions. There are stirrings everywhere of oppressed people against the shackles of thought and action imposed by totalitarian regimes. Although the nations of Eastern Europe have been obliterated in many instances, and their populations dispersed, those of Byelorussian descent in the United States observe this anniversary in the fervent hope that one day their homeland may again be autonomous and free. It is fitting that we in Congress take note of their faith and that we work to advance the cause of human rights for all peoples. We also must be on guard that we do not fritter away our freedoms through overbearing Government, confiscatory taxation, and overdependence on Government to make decisions that a free people must make for themselves.

DOCTOR ON TRIAL

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. McDONALD. Mr. Speaker, it has been obvious to many people for years, and even the press is catching on, that the battle against cancer is being lost, not won. However, the Congress continues to appropriate millions to be spent on more variations of radiation and chemotherapy. It is as though all our cancer researchers had blinders on. However, woe to anyone who steps out of this path.

Dr. John Richardson, a California doctor, has been treating cancer patients for some years with B–17 or Laetrile. He is a personal friend and one of the finest people I know. This treatment has been successful in many instances. Indeed, many other scientists and doctors are working with various vitamins and nutritional aspects of food as they might relate to cancer.

Dr. Richardson has been under constant harassment by Federal authorities for this treatment in spite of the fact the FDA pins its whole case on the prohibition of interstate movement of the drug. Alaska legalized B–17 and several other States have similar bills pending. But the saga of one honest doctor's attempt to provide the best remedy he knows is a story in itself. I commend this item as it appeared in the Review of the News on February 2, 1977, to the attention of my colleagues:

DOCTOR ON TRIAL

Dr. John Richardson is on trial in San Diego, California, along with a dozen others, for conspiracy to smuggle and conspiracy to receive smuggled goods. The doctor is acting as his own attorney, and the following is a condensation of his introductory remarks to the jury.

Ladies and gentlemen of the jury:

You are sitting in judgment of a case that may be one of the most important in American history. The issue is not smuggling, but literally whether medical science is to be frozen by bureaucratic fiat. The lives of millions are in the balance. I am charged with conspiracy to smuggle—but the purpose of this prosecution is not to punish a smuggler but forever to chain the advancement of medical science to political whim.

Let me begin with a short biography. I was in college when our country was attacked and forced into World War II. I quit school and joined the Marine Corps. After successfully completing the Officers Candidate School Training, I served in Guam, Saipan, and China. Following the war I returned to college where I played football and served on the student council and honor court. After being graduated I entered medical school at the University of Rochester and upon completion of my studies received a fellowship for medicine and surgery at Mary Imogene Bassett Hospital in Cooperstown, New York. Continuing to prepare myself for practice I accepted a fellowship in ear, nose, and throat at Kaiser Hospital in San Francisco.

Finally, in 1956, I opened a general practice in Albany, California. It grew rapidly and I became both professionally and financially successful. I stress this because, as we all know from watching Perry Mason and Sher-

lock Holmes on television, a major element in judging those charged with crime is to examine motive. Why would a professionally and financially successful physician risk everything to become a smuggler? Surely that is something we associate with professional criminals or people who are desperate and have no other way of making a comfortable living. That is clearly not the case with myself.

I am here before you today instead of at home in Albany treating my patients because in my practice I use a substance called Vitamin B–17, also known as amygdalin or laetrile. I think it is important for you to understand how and why I became involved in fighting the giant medical bureaucracy by using this vitamin.

WHAT IS LAETRILE?

The efficacy of laetrile is not the subject of this trial; but the story of B–17 is relevant to why I happen to be in this courtroom charged with being a common criminal. In 1969, as part of my continuing medical studies, I spent some time investigating the claims made for Vitamin B–17. This vitamin is extracted from apricot seeds and contains a substance from a family known as nitrilocydes. I discovered that these nitrilocydes occurred in nature not only in apricot seeds but also in peach seeds, bitter almonds, and some 1,200 natural sources. Tonight, if you have lima beans with your dinner, you will be ingesting nitrilocydes.

While studying this subject, I learned that there are parts of the world where the everyday diet is high in nitrilocydes; and I noted that the higher the natural diet is in this substance, the lower the incidence of cancer. It was hypothesized that these nitrilocydes are connected to the immunity system which exists in each of our bodies. One noted, for example, that in the last century *millet*, which is high in nitrilocydes, was a staple in the American diet. Since that time wheat, which is low in nitrilocydes, has replaced millet on our tables even as the incidence of cancer has been steadily increasing.

WHEN ASKED FOR HELP

Such information was fascinating, but strictly academic since I did not treat cancer patients as part of my practice. Then one day my nurse, Charlotte Anderson, came to me almost in tears to announce that her sister had cancer. She wanted to know if I would treat her with laetrile shots. Whether to do this was a very difficult decision. I told her that the proponents of B–17 did not claim that it was a cure for cancer, but that it often acted as a control much in the way that insulin, not a cure for diabetes, serves to control that disease. My nurse believed that her sister's chances were better with laetrile than through the traditional forms of treatment—composed of cutting (surgery), burning (radiation), and poisoning (chemotherapy).

At that time I had no idea of how political the treatment of cancer had become, and how politics and self-interest now so often supersede the search for medical cures. I did know that the treating of cancer with laetrile was frowned upon by the medical establishment. But my Hippocratic Oath as a physician was and is more important to me than politics, the whims of bureaucrats, the vested interests of drug companies and research institutions, or even the current fads of those who claim to speak for the medical profession. I knew I could not refuse to treat my nurse's sister without betraying my Hippocratic Oath and becoming a traitor to my conscience. It was a momentous decision and I knew it. What I did not then realize was that I was about to bring down upon myself and my family the vengeance and hatred of a professional machine that felt its authority threatened.

Kaiser Hospital had biopsied a melanoma on the arm of my nurse's sister and wanted to amputate immediately. Consider what it meant to her and all of us when she responded beautifully to the B–17 treatment. I saw her recently at a wedding, and ladies and gentlemen of the jury she came up to me and grabbed both of my hands . . . with both of her hands.

With such splendid results, I began using B–17 with other patients as part of an overall nutritional program. The use of B–17 is legal in the State of California as long as it is not being used specifically and exclusively as a treatment for cancer. But I soon found myself the victim of harassment by armies of state and federal bureaucrats.

SUSTAINED HARASSMENT

In June of 1972, eight men from the California Food and Drug Administration and the Albany police burst into my office as if to capture John Dillinger. They were accompanied, if you can believe it, by a film crew from ABC television. My staff and I were treated like heroin pushers as government agents manhandled my nurses and ransacked the office. They were looking for laetrile, as if there were some dark secret that I was using it in my practice. The presence of a television crew to record such a commando operation is, as far as I know, unprecedented in annals of the C.F.D.A. Apparently the idea was to put me, a faithful and respected physician, in the worst possible light by making me look like a common criminal to a public that gets 70 percent of its news from images flashed on television. It seemed obvious that I was to be tried by the press with loaded and phony evidence, and that the creation of such a smear was the sole reason why the C.F.D.A. had brought along the television crew.

Outraged at such abuse, some of the local media began to champion my cause and I was soon refused my right to a jury at the first trial. I appealed, and forced the judge to permit a trial by jury. But I soon had major problems with my attorney, a nightmare within a nightmare, and I was convicted of using laetrile to treat cancer, even though I had always been careful to explain to each patient that I was providing laetrile as part of an overall nutritional program. Never have I claimed laetrile would "cure" cancer. Despite the many carefully documented cases of total remission, no reputable physician that I know of claims that Vitamin B–17 is anything more than a control for the disease.

I appealed, was granted a second trial, and it resulted in a hung jury. Unsatisfied, the state tried me yet again on the same charge and I was forced to endure a third trial. Once more there was a hung jury, and this time the judge saw what was happening and ordered the state to get off my back and quit harassing me. Unfortunately, as you know, there are now so many government bureaus and agencies that harassment can be moved from one bureau to another, to another, to another, until the victim surrenders or is destroyed. The idea is to crush resisters to the bureaucracy by keeping them constantly in court while draining them financially through attorneys fees.

The time and money which go into such a defense are enormous, and by the time you are found innocent you have been driven so deeply in debt that every practical impulse urges you to give up your principles, forget your moral obligations, and do whatever it is they want. I can't do that. I have sworn an oath as a physician and I can't let innocent people die needlessly. This is why I am defending myself in this trial.

The logical question now is why everybody would get so excited about a doctor using Vitamin B–17 in his practice. This is a simple question, but the answer is very complicated. Let me try to make sense out of it for you.

THE CANCER ESTABLISHMENT

Every year more than 370,000 Americans are killed by cancer. It is by far the most feared of the deadly diseases. Man has with little success been looking for a cure to this horrible killer for ages. Much of the research has been sponsored by the American Cancer Society, established long ago by the Rockefeller family and some of its business friends. Since they were in the petroleum and drug businesses they were interested in looking for a solution to the cancer threat that involved the use of synthetic drugs. As it happens, most synthetic drugs have a coal-tar base; that is, they are derivatives of petroleum.

Over the past several decades the American Cancer Society has financed and directed the vast majority of the cancer research in this country through grants. There may or may not have been something sinister in all this, but the point is that if you wanted money to do cancer research you were most likely to get it by looking in an area which involves the use of coal-tar-based chemicals and assorted synthetic medicines.

Maybe they have not been looking in the right place. There is another theory on the prevention and control of cancer. This lies in the field of orthomolecular medicine. That is a term coined in 1968 by Dr. Linus Pauling, the famous Nobel laureate. The prefix "ortho," from the Greek means "correct." And "molecular" relates to molecules. According to the Linus Pauling Institute of Science and Medicine, in its *Newsletter*, Volume 1, Number 1:

"Orthomolecular medicine is the achievement and preservation of good health and the prevention and treatment of disease by the use of substances that are normally present in the human body; that is, by changing the amounts of those substances in the human body. The vitamins are substances of this sort. One of the goals of orthomolecular medicine is to determine the amounts of various vitamins that are needed to put people in the best of health. Synthetic drugs and other artificial substances are not a part of orthomolecular medicine."

As much as $28 billion is spent each year in the fields of cancer research, detection, and treatment. You could put the portion of this $28 billion which goes into orthomolecular research in your eye and it would not blur your vision. The bureaucrats, foundation powers, and medical politicians do not intend to be proved wrong. The answer is going to be found in synthetics come hell or high water. In the opinion of those of us in orthomolecular medicine, this means it may never be found at all while Americans continue to die horribly at the rate of 370,000 a year.

THE PAULING PROSPECT

Let us take a look at Linus Pauling for a moment. Now, politically, I consider Dr. Pauling to be on the moon, but there is no denying that he is one of the great scientists of this century. And for many years he was the absolute reigning darling of the American scientfic establishment. Then, about ten years ago, he began looking into diet as a factor in preventing and treating disease. Pauling has set up an institute at Stanford University for the study of orthomolecular medicine. But even Linus Pauling, possibly the most famous living scientist in the world, cannot obtain grants from either the big foundations or the government to carry out his research. Professor Pauling has gone from the penthouse of the scientific establishment to its outhouse. He was forced to buy ads in the *Wall Street Journal* of November 8, 1976, to solicit research funds. The Pauling Institute's solicitation begins:

"Our research shows that the incidence and severity of cancer depends upon diet. We urgently want to refine that research, so that

it may help to decrease suffering from human cancer.

"The U.S. government has absolutely and continually refused to support Dr. Pauling and his colleagues here in this work during the past four years."

I can tell you that if Dr. Pauling were researching in the field of petroleum-based chemicals he would be inundated with funds from both the U.S. Government and the American Cancer Society. But, Nobel laureate Linus Pauling, the world's most famous living scientist, has become a pariah. He is now a non-person as far as the U.S. medical establishment is concerned—simply because he believes that a solution to the mystery of cancer lies in the field of diet, and that prevention and treatment can be found through vitamins, minerals, and enzymes. You see, they cannot be patented. Potential profits do not therefore justify commercial research.

A WORD ABOUT MOTIVES

Probably the most difficult thing to understand about all this is that men of science could be so foolish as to foreclose the avenue suggested by Pauling and others. Cancer is such a horrible disease that it staggers the mind to think that every possibility of finding a means of prevention or remedy is not being exhaustively explored. Cynics have pointed out that with the billions of dollars flowing into cancer research—that is, cancer research of the "right" kind—there is more money to be made looking for a cure than in actually finding it. I believe that the scientists doing actual cancer research hope with all their hearts that they will be successful. Besides the humanitarian aspects involved, whoever finds a cure or preventative for cancer will become one of the most famous people in history. Just as Jonas Salk has become a household word for producing a preventative for polio, the man or woman who beats cancer will become an instant superstar. Wealth and power will lie at his feet.

The trouble is, as I have explained, that scientists are being financed to look for the answer to cancer only within the realm of traditional cancer therapies. They have not been able to get money to investigate the field of nutrition as it relates to cancer—no matter how much we in orthomolecular medicine produce in the way of evidence that they are looking for the needle in the wrong haystack. At the rate things are going, they may never find it. If so, millions of people are going to die agonizing and terrible deaths because of the intransigence springing from politics, bureaucracy, and blind arrogance.

We have no quarrel with those who insist on finding the solution to cancer within the realm of petroleum-based chemicals, although we think they are wrong. What grates us is that these people and their legion of associated bureaucrats and hired propagandists insist that anybody dealing with cancer from any other position is automatically a quack. Now, of course, they do not call Dr. Linus Pauling a quack. They just cut off his funds while shaking their heads and tsk-tsk-ing about what a shame it is that this great man has lost his marbles. But, ladies and gentlemen of the jury, let me remind you that Pauling is dealing in the field of pure research. I have to face the man or woman who is dying of cancer. The doctor is on the front line of this battle, sandwiched in between medical orthodoxy which would label him a quack and the patient who is in desperate need. This is why I am in court for the fourth time.

THE POLITICAL GAME

There is an obvious tendency for the federal regulated big drug companies, the medical politicians of the American Cancer Society, and the Food and Drug Administration to act as one big happy family. We all know that many generals and admirals leave the Pentagon and retire to cushy jobs with defense contractors. Then they proceed to negotiate defense contracts with their old chums. This fact of political life has received a fair amount of publicity. What has received virtually no publicity is the fact that the same kind of musical chairs is played between the drug company giants, the American Cancer Society, and the Food and Drug Administration. Much of this, incidentally, has been brought out by Senator William Proxmire of Wisconsin.

What it all means is that, by operating in both the private and public sectors, a powerful clique has a hammerlock on research and treatment in the field of cancer. If you are on their team and play the cancer game their way, you are respectable and you get public recognition with lots of generous grants. If you are not on their team, and persist, you will be vilified as a quack preying upon the suffering of others. You will be harassed by every possible branch of government, with sensationalists in the mass media treating you like some kind of dope peddler. You can imagine how humiliating and infuriating it is to be faced with such an assault and to know that if you and other medical scientists give in to it you could be signing the death warrants of literally millions.

Not that there are not real quacks in the field of cancer who prey upon ignorance and desperation—black-box charlatans and seedy con men. But it should be clear to even the merest stripling that no legitimate Doctor of Medicine like myself, with a thriving practice and after years of study and faithful service, would give all that up to become a quack and subject himself and his family to the Hell that I am being put through.

RATIONALIZATION THAT KILLS

I am not trying to imply that everyone connected with the big drug companies, the American Cancer Society, and the F.D.A. is consciously saying to himself: "I don't care how many people die agonizing deaths as long as my career is on the upswing." Nobody is that blatant. But we do know that human beings have an incredible capacity for rationalization of anything which they see as being in their immediate self-interest. If people were not given to rationalization, nobody would smoke. The bars would close down, we would all go on a diet, and the churches would be overflowing. Crime would virtually disappear, and maybe we would all sprout angel wings. But this is not Utopia; it is the real world. People are given to self-deception and self-delusion. Probably even the prosecutor in this case sincerely believes that he is here today to protect the public's interest, justifying on that basis some of the lawyer tricks he has been playing.

My point is that human nature is still human nature, and there is a vast and vested self-interest in the orthodox treatment of cancer that has been endorsed by a massive bureaucracy. These people tend to be unwilling to admit that anyone searching for answers elsewhere can be motivated by any other feelings besides greed and malice. The oil companies want to sell petroleum products to the pharmaceutical companies. The drug companies want to sell their products to doctors and hospitals. Doctors who are trained to do so, and ignorant of other alternatives in indicated cases, want to perform operations, and use radiation and chemotherapy. Scientists want grants. Bureaucrats at H.E.W. want to expand their authority by getting the federal government more and more involved in medicine, and they recognize in fear of cancer an excuse for doing so.

All these people have an enormous interest in maintaining the *status quo*, and react with anger and resentment at anyone who challenges their well-financed authority. Collectively, the prejudice and bigotry of their reaction is the defense perimeter of what can only be called the Cancer Establishment.

Those of us who dare to differ with this Cancer Establishment become the enemy. That is why I am in here in this court today instead of home treating the sick and suffering.

WHAT IS AT STAKE

As I said earlier, I began using Vitamin B–17 because I felt obligated under my Hippocratic Oath to do so. But I know for a fact of many other good doctors who have attended seminars on the prevention and control of cancer through diet who have spent considerable time and effort doing their own research into this matter and who would like to use B–17 in their practice. A number of them simply do not dare. They believe from the evidence that our position is medically right, but they know it is politically dangerous. They dare not subject themselves to the kind of harrassment I have had to endure. And I must admit that if I had known what I was getting into when I stumbled into this field I can't say what my own course would have been. I pray it would have been the same.

If enough doctors would jump into this fight, the sinister effort to use the bureaucracy to dictate scientific truth would be exposed and defeated. But each of us sees himself as an individual and few busy doctors dare to pit themselves against a powerful army of bureaucrats and prosecutors backed by a multibillion-dollar machine. Doctors are not masochists.

I hope that now you see why I began this introductory statement with the observation that you are acting as the jury in an affair which is far more important than a simple smuggling case. The prosecutor knows I am not a smuggler. He knows he has no case against me. What is going on here is that a physician named John Richardson has challenged the Cancer Establishment. If I can be forced to stop treating patients with Vitamin B–17—if I can be destroyed, even imprisoned—then, because I am the most widely known of the doctors using vitamin therapy, other physicians will be afraid to work and research in this field. Even now, of the hundreds of doctors providing their patients with B–17 because they feel morally obligated to do so, most do it in secret because they fear being subjected to what is happening to me. I have put my years of study, my professional practice, the reputation and comfort of myself and my family, on the line, I have endured every humiliation, fought successfully through trial after trial, and continued to fight. No hope of personal gain could be worth this. I have done it because a physician's job is not to be a lackey to the bureaucracy but to save lives and relieve suffering. I have done it because I could not break my Hippocratic Oath. If that makes me an old-fashioned doctor who doesn't recognize the new realities, and you consider that a criminal offense, I guess you're going to have to let them put me in jail.

THE NLF OF VIETNAM: ANOTHER MYTH DESTROYED

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ASHBROOK. Mr. Speaker, throughout the fight against the Communists in Vietnam I pointed out that the National Liberation Front of Vietnam—NLF—and the Vietcong were nothing but fronts for the North Vietnamese Communists. Some of those who opposed the fight for freedom in Vietnam maintained that the NLF and the

Vietcong were separate from the Communists and were trying to throw off colonialism—first the French and then the Americans.

That myth has been completely destroyed. The Vietcong have been made part of the regular army. The NLF's Provisional Revolutionary Government has been incorporated into the Hanoi government.

The battle in Vietnam was a fight between the forces of communism and those forces that opposed communism. The defenders of the Vietcong were in fact defending the Communists.

EXPERIENCE WARNS AGAINST TRUSTING HANOI'S GOOD FAITH

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. DERWINSKI. Mr. Speaker, Frank Starr, who is a columnist in the Chicago Tribune's Washington Bureau, and one-time bureau chief of that publication's office in Moscow, has a good insight into the historic pattern of Communist duplicity.

In his column of March 28, he raises a legitimate warning that the trust and good faith in the Communist dictatorship in Hanoi should be carefully pondered by the administration's policy decisionmakers who are leaning toward embracing that particular Government.

The article follows:

EXPERIENCE WARNS AGAINST TRUSTING HANOI'S GOOD FAITH

(By Frank Starr)

WASHINGTON.—It is not every schoolboy who knows exactly how many nations there are in the world with which the United States has no diplomatic relations.

Even the President could be forgiven if he did not know the precise number. Jimmy Carter does know it, though. It apparently is a statistic which causes him some discomfort, one he would like to reduce to zero. That would be nice. Even admirable. If that's all there were to it.

But the nature of the movement toward Viet Nam suggests that Hanoi is to be the first in line, and that the President had made up his mind about this even before the Woodcock Commission on the Missing-in-Action went to Viet Nam and reported home.

One may understand that this President feels it is incumbent on him to take the last step in putting the war behind us and to do it early and promptly. It is also understandable that he feels such evenhandedness in dealing with adversaries and friends of left and right is fundamental to the open foreign policy he wishes to conduct. It can certainly strengthen his hand for the confrontations that could arise later.

But the nature of the movement toward iVet Nam suggests that Hanoi is to be the first in line, and that the President had looking to the future and not the past, there is very good reason to believe that the Vietnamese are not acting in good faith.

That little matter of the Paris accords to end the war still stands huge on the landscape of agreements made and very promptly broken. In fact, from the purely diplomatic point of view, it was a permanent mark on the credibility of the Socialist Republic of Viet Nam as well as the "face"—in the Asian sense of losing face—of the United States.

Now comes the Woodcock Commission which, in its report, says at the outset it determined to approach Viet Nam without reference to the past. What followed was a description of a very slick con job at the hands of the Vietnamese but to which the commission was ready to submit itself willingly.

According to its report, the commission did not examine any evidence except that presented it by the Vietnamese "although they almost certainly have at least some additional MIA information available [which] they did not provide."

The commission also observed that further obstacles to gathering information might be presented by the reluctant attitude of many Vietnamese as well as the passage of time and nature of the country. Nonetheless, the commission concluded that "there is no evidence" of deserters or defectors alive. It also concluded that other Americans who stayed behind "probably have been allowed to leave." Additionally, "it is probable no accounting will ever be possible."

Still the commission found, and the President agreed, that the Vietnamese had done "about all they can do." And if he finds, the President says, that they are acting in good faith he will look favorably on normalizing relations and economic aid.

It is certainly in the North Vietnamese interest to persuade us that they are acting in good faith. Then it is certainly not in our interest to be so easily persuaded, given recent experience, unless there is some other, deeper interest that Carter has not yet explained.

Vietnamese membership in the United Nations will bring yet another activist member into that body's Communist-Third World bloc.

Moreover, Carter's promise that "we will never cease attempting to account for those 2,500 American servicemen who were lo=t" rings a little hollow against the commission's report that probably "no accounting will ever be possible."

But the final indignity heaped upon us is the Vietnamese position that, under those bitter Paris accords, American reparations are "an obligation to be fulfilled with all your conscience and all your sense of responsibility."

If Americans are to accept that, it is my guess they will need to hear a better reason why.

TENANTS' TAX JUSTICE BILL

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. HARRIS. Mr. Speaker, I am today reintroducing the tenants' tax justice bill with additional cosponsors. This bill is identical to H.R. 84, H.R. 383, H.R. 1676, and H.R. 2642. To date, 75 Members of the House have cosponsored this legislation to extend property tax relief to renters.

Tenants pay property taxes through their rent. However, unlike other taxpayers, renters are denied the right to claim their property tax payment for Federal income tax purposes. The tenants' tax justice bill attempts to correct this inequity by extending property tax relief to renters.

The inequity in the current law is clearly demonstrated by two similarly situated taxpayers who live in the same single-family development. Despite the fact that their homes, their housing costs, their income, the number of their dependents, and so forth, are identical, the Federal income tax liability of the individual who rents his home is greater than that of the individual who has been able to purchase his home.

However, the inequity is even more fundamental. Under current law, lower and many middle-income taxpayers receive no property tax relief, while upper income taxpayers obtain assistance.

I urge my colleagues who would like to cosponsor this legislation or who would like additional information to contact me.

VIETNAM VETERANS DAY

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ABDNOR. Mr. Speaker, we are all aware of the uproar which was heard throughout the Nation as a result of the President's pardon of draft evaders 2 months ago. A great number of the citizens of the State of South Dakota expressed the same anguish. The citizens of my great State have always supported the American fighting men and women in their endeavors to protect this Nation. The South Dakota State Legislature, sensing this attitude, passed Senate Concurrent Resolution No. 4 honoring South Dakota veterans for their services in the armed forces and protesting the Presidential pardon on March 22, 1977. I include the text of the resolution at this point in the RECORD:

SENATE CONCURRENT RESOLUTION No. 4

A concurrent resolution, honoring the South Dakota veterans for their service in the armed forces and protesting the presidential pardon

Be it resolved by the Senate of the State of South Dakota, the House of Representatives concurring therein:

Whereas, the duty to serve one's country is above and beyond the call of citizenship; and

Whereas, over 27,500 South Dakotans responded to their civic duty during the Vietnam conflict; and

Whereas, there are over 83,000 veterans in the state of South Dakota who have honorably served their state and nation; and

Whereas, the South Dakota National Guard has honorably served their state and nation; and

Whereas, our president has seen fit to grant pardon to those who fled this country or otherwise evaded mandatory compliance of the draft laws; and

Whereas, such pardon may jeopardize the future of the United States in the event our country should again be required to institute a draft to defend itself from attack; and

Whereas, such action of the President is distressing to those who have honorably served their state and nation:

Now, therefore, be it resolved, by the Senate of the Fifty-second Legislature of the State of South Dakota, the House of Representatives concurring therein, that those who have served their state and nation be honored as having served honorably above and beyond the call of citizenship and be in-

formed that we, the Legislature of the State of South Dakota will continue to hold them in the high esteem they deserve; and

Be it further resolved, that the Legislature of the State of South Dakota protests any pardon program; and

Be it further resolved, that copies of this Resolution be sent to the President of the United States, the Governor of the State of South Dakota, the Adjutant General of South Dakota, and the Congressional delegation of South Dakota.

THE 95TH CONGRESS SCOUTING SURVEY

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. BROWN of Ohio. Mr. Speaker, during each of the past five Congresses, I have surveyed the Members of the House and Senate for the Boy Scouts of America to determine the participation of Members of Congress in Scouting, either as Scouts during their youth or as leaders.

The survey for the current Congress is now complete. I thank my colleagues for their 100 percent participation and cooperation.

As I have done in the past, I am placing the results of the survey in the RECORD so that they will be available to Members and others during the next 2 years for reference. The results are also made available through the press and the Boy Scouts of America.

I am happy to report that the percentage of Members who have participated in Scouting has increased by 1 percent since the 94th Congress, signalling a welcome increasing trend.

The percentage of Members who have participated in scouting stands at 58.7 percent for the 95th Congress. The 314 Members who have participated is an increase over the 309 Members of the 94th Congress. The totals include 254 Members of the House and 60 Members of the Senate.

There are four more Eagle Scouts in the 95th Congress than in the 94th. Both the House and the Senate lost one Eagle Scout, but the House gained five and the Senate one.

A summary of the results and a list of the participating Members follows:

BREAKDOWN OF 95TH CONGRESS SCOUTING SURVEY

	Representatives	Senators	Total
Scout (only)	166	38	204
Scout & Leader	68	16	84
Leader (only)	20	6	26
Total	254	60	314

Total who were Leaders: 110

Percentage of Members who participated in Scouting: 58.7 percent.

Eagle Scouts:

Senators—Richard Schweiker, Penn. (R), Lloyd Bentsen, Tex. (D), John Culver, Iowa (D), Sam Nunn, Ga. (D), and Richard G. Lugar, Ind. (R).

Representatives—
Bill Alexander, Ark. (D).
Charles Bennett, Fla. (D).
Keith J. Sebelius, Kans. (R).
Larry Winn, Jr., Kans. (R).
Thad Cochran, Miss. (R).
Barber E. Conable, N.Y. (R).
Mark Andrews, N.D. (R).
Clarence J. Brown, Ohio (R).
J. William Stanton, Ohio (R).
Tom Steed, Okla. (D).
Daniel J. Flood, Penn. (D).
J. J. (Jake) Pickle, Tex. (D).
Henry S. Reuss, Wisc. (D).
M. Caldwell Butler, Va. (R).
Philip R. Sharp, Ind. (D).
John P. Murtha, Penn. (D).

SENATE CONCURRENT RESOLUTION 7

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. EDWARDS of California. Mr. Speaker, as a cosponsor of a similar House measure, I strongly support Senate Concurrent Resolution 7, and am pleased at its passage by both the House and the Senate. The Congress has now

clearly demonstrated its deep concern at the Soviet Government's mistreatment and harassment of Soviet Jews and other minorities.

In his speech to the United Nations earlier this month, President Carter outlined his commitment to a strong human rights policy. In the President's words:

All the signatories of the U.N. Charter have pledged themselves to observe and to respect basic human rights. Thus, no member of the United Nations can claim that mistreatment of its citizens is solely its own business. Equally, no member can avoid its responsibilities to review and to speak when torture or unwarranted deprivation occurs in any part of the world.

By our overwhelming vote in favor of Senate Concurrent Resolution 7, we have shown the Soviet Union and the world that the Congress and the American people stand behind our President's human rights commitment.

We must continue to voice our concern when the basic human and civil rights of individuals are violated. We must continue to urge the Soviet Union to abide by the human rights provisions of the Helsinki Declaration. I believe the Congress has shown that it will meet this responsibility.

A CHAMPIONSHIP FOR MARQUETTE, AND AL McGUIRE

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. REUSS. Mr. Speaker, I want to share with my colleagues the jubilation of my district over the victory last night of the Marquette Warriors basketball team in the finals of the National Collegiate Athletic Association championships in Atlanta. I would also like to express my pride and admiration—and that of my constituents—for Mr. Al McGuire, who will now retire as coach of the Warriors after 13 great seasons.

My Milwaukee office reports that Wisconsin Avenue—the city's main street—was jammed last night with celebrators for the 3 miles between 16th Street and Lake Michigan. One staffer says that she was hugged several times by total strangers. There are also unconfirmed reports of beer flowing in Milwaukee houses of refreshment at great discounts, and vigorously increased volumes.

For the last 10 years, Al McGuire has been taking his strong Marquette teams to post season tournaments. Now, at last, the Warriors won the national championship, and Milwaukee went wild with joy. It was fitting that the team should win the championship in Mr. McGuire's last season.

The national press, which gets to see Mr. McGuire only around this time every year, paints him the iconoclast and bad boy of college basketball—a position he likes.

These members of the national press, however, have not seen the strong respect in which Mr. McGuire is held in the community of Milwaukee. And they cannot see up close, as we see in Milwaukee, the superb work of education and guidance he gives to the young members of his teams.

For all the shouting and press fireworks, there is a real sense of love on Mr. McGuire's teams, and a feeling that the youngsters who come to Marquette at the ages of 17 and 18 draw real guidance and purpose from their years with him. For all the winning, and all the brilliant strategy of Mr. McGuire's games—I direct my colleagues' attention to the way he handled the vaunted Carolina four-corner offense—he is above all an excellent teacher, and an excellent example to young men who strive to be best.

My special congratulations to Al, and to Hank Raymonds, who will step into his shoes next year. And I congratulate the entire Marquette team: Bo Ellis, Bill Neary, Jerome Whitehead, Butch Lee, and Jim Boylan; Gary Rosenberger, Bernard Toone, Ulice Payne, Robert Byrd, Craig Butrym, Jim Dudley, and Mark Lavin.

THE PROBLEMS OF FUNDING SOCIAL SECURITY

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. WHITEHURST. Mr. Speaker, 2 years ago I introduced a bill to establish a Special Advisory Council on Social Security Financing, since it was already abundantly clear that our social security system was in deep financial trouble. It seemed obvious to me that no time should be lost in pursuing possible alternative means of financing the system, so that those now employed could, with some degree of confidence, expect to benefit from the system when they retired.

Between now and the year 2050, the average annual deficit in the system will be 7.96 percent, according to the estimate of the trustees. However, if we continue at the present rate, the deficit in 2050 will be 16.69 percent of the taxable payroll. I have already introduced one bill this year to end the present system of coupling and another to permit everyone, regardless of whether or not he or she is covered under a pension plan of any kind, to participate in a tax-sheltered individual retirement account. The former would go a long way toward reducing the anticipated deficit, and the latter would protect future retirees from major cuts in social security benefits.

Today I am reintroducing my 1975 bill, in the hope that a special advisory council, with the sole responsibility of investigating alternative means of financing the system, can offer proposals to help solve the major problem we are facing by coming up with something that would be actuarially sound, perhaps a phasing-in of an annuity plan akin to civil service and a phasing-out of the present FICA tax, which has been putting an ever-increasing burden on the current work force. If our present birth rate continues, or declines, it is not inconceivable that within a generation the retirees will outnumber those working.

It seems to me that there is a declining confidence in the present system. One sign of this is the sharply increased rate at which State and local governments are exercising their legal option to withdraw.

Mr. Speaker, 2 years ago it was urgent that new ways be found to finance the social security system; now it is a critical need. I hope that my colleagues will see fit to take prompt, positive action in this regard.

THE MERITS OF THE DEATH PENALTY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. McDONALD. Mr. Speaker, the recent reinstitution of capital punishment by the State of Utah has generated a new round of debate over the merits of the death penalty as a just, effective punishment for those who commit heinous crimes. Although current polls indicate that the vast majority of Americans now favor the death penalty, a vocal minority led by organizations such as the American Civil Liberties Union continue to attack the death penalty on grounds such as: First, it does not deter crime; second, it is impossible to guarantee that an innocent man will not be executed under our imperfect judicial procedures; third, Christian doctrine requires forgiveness and mercy, rather than punishment, even when dealing with murderers; and fourth, discriminates against minorities and the poor.

An article by Reed Benson and Robert Lee in the August 1974 issue of the Georgia Journal of Corrections analyzes these and other arguments used by opponents of capital punishment. I commend this article, which originally appeared in the August 9, 1972, issue of The Review of the News, to the attention of my colleagues.

The article follows:

On June 29, 1972, the Supreme Court (92 S.Ct. 2726 [1972]) handed down a 5-to-4 decision which, for all practical purposes, abolishes existing state and federal laws authorizing capital punishment and commutes the death sentences of some 600 prisoners throughout the nation. Rejecting the precedent established by all prior Supreme Court decisions on the matter, as well as the clear intent of the framers of the Constitution, the Court ruled that the death penalty violates the Eigth Amendment's ban on "cruel and unusual" punishments.

The decision comes at a time when crimes such as murder, rape, and skyjacking have reached unprecedented levels, leading many to question the wisdom of removing from our statute books recourse to what may well be the most potentially effective and just means of dealing with the most brutal of criminals.

The narrow vote and the nine individual opinions which accompanied it reflect the controversial nature of this issue. Only two members of the Court (Justices Thomas

Brennan and Thurgood Marshall) concluded that capital punishment should be banned under all circumstances. Presumably, this leaves the door ajar for possible future use of the death penalty, provided that extensive legislature revisions are made in the meantime. But the decision of June twenty-ninth is nevertheless the most devastating legal blow yet struck in the longtime Leftist campaign to abolish capital punishment.

It is often argued that the death penalty should be abandoned because of the possibility of executing an innocent person. Justice Marshall asserted in his concurring opinion: "We have no way of judging how many innocent persons have been executed but we can be certain that there were some" (92 S.Ct. 2726[1972]).

One wonders how we can be certain, if there is no way of judging. Especially since the Legislative Reference Service of the Library of Congress looked into the matter in 1966 and determined that: "There have been no known cases of the execution of an innocent man in this country" (Vialet, 1966, p. 61). What is known, however, is that scores of innocent people have been killed over the year by escaped or paroled murderers who had not been executed. Strangely, neither Justice Marshall no other members of the Court majority made reference to this provable fact.

It is certainly possible that sometime during the last 196 years human fallibility has, indeed, resulted in an as yet undisclosed legal execution of an innocent man in our country. But the point of such fallibility is clearly at the end of a two-edged sword. If lawyers and juries can make mistakes, so can psychiatrists and parole boards: A killer who is incorrectly determined to be "reformed" or "cured" can be sent back to society to kill again. Consider this illustration from the F.B.I. Law Enforcement Bulletin for January of 1971:

"After a recent gun battle, one suspect was arrested for two murders, a kidnapping, and the gunpoint robbery of his own mother. Citizens leared in disbelief that he had been freed from a mental hospital just a few months before, after six court-appointed psychiatrists had testified he has regained his sanity. In 1967 he had been found insane after the strangulation murder of a woman." . . . (Hoover, p. 21).

Examples of innocent citizens dying at the hands of convicted murderers are many. Here are a few cases to consider:

(a) Some sixty years ago Charles Fitzgerald killed a deputy sheriff and was given a 100-year prison sentence as a result. But he was released after serving just eleven years, and in 1926 proceeded to murder a California policeman. Sentenced to life imprisonment for this second killing of a law enforcement officer, Fitzgerald was nevertheless granted parole once again in December of 1971. (Associated Press, 1971).

(b) In 1931, "Gypsy" Bob Harper, who had been convicted of murder, escaped from a Michigan prison and killed two persons. After being recaptured, he then proceeded to kill the prison warden and his deputy. (Bedau, 1967).

(c) In 1936, the late F.B.I. Director J. Edgar Hoover reported the case of a Florida prisoner who committed two murders, received clemency for each, and then showed how much he had been "reformed" by murdering twice more. (Bedau, 1967).

(d) In 1952, Allen Pruitt was arrested for the knife slaying of a newsstand operator and sentenced to life imprisonment. In 1965, while in prison, he was charged with fatally stabbing a prison doctor and an assistant prison superintendent, but was found not guilty by reason of insanity. In 1968, his 1962 conviction was overturned on a technicality by the Virginia Supreme Court, thus forcing the state to re-try him for the 1952 slaying. In November of 1970, he was again found guilty, but was given a 20-year sentence instead of life. And since he had already served eighteen years and some time off for "good behavior," he was released. One year later, on December 31, 1971, Pruitt was arrested and charged with the murder of two men in Spartanburg, South Carolina. (Associated Press, 1972).

(e) A man convicted of murder in Oklahoma pleaded with the judge and jury to impose the death sentence, but was given a life sentence. He later killed a fellow inmate and was executed for this second murder in 1966. (Sellin, 1968).[1]

(f) On March 17, 1971, J. Edgar Hoover told a Congressional Subcommittee that nineteen of the killers responsible for the murder of policemen during the Sixties had been previously convicted of murder, (Hoover, 1971.)[2]

And the listing could go on and on of innocent Americans slain at the hands of murderers who, had they been executed for earlier killings of which they were convicted could not have murdered again.

Abolitionists would have Americans spend sleepless nights worrying about the possibility that our system of justice may misfire and execute an innocent man—a possibility for which there is no known precedent in all American jurisprudence. But they shed few tears for the many innocent people who die because of judicial leniency and erroneous psychiatric evaluation of murderers.

Another argument forwarded by opponents of capital punishment is that we are a more humane society today than ever before, so must reject taking even the lives of killers and rapists. It is interesting to note, however, that many leaders of the abolitionist movement who use this "humane" appeal are often leaders in the movement to kill the innocent unborn through abortion. It is a double standard that deserves more attention than it has received.[3] Certainly with abortion, crime, violence and sadism—both in real life and on the movie and television screens—more prevalent than ever before, the claim that we are more "humane" than in the past must be questioned.

It is also alleged that most Americans now oppose capital punishment. Usually, such an assertion is based on nothing more substantial than small-sample surveys conducted by such "Liberal" pollsters as George Gallup and Louis Harris. But such polls fly in the face of the hard fact that only nine of our states have abolished capital punishment completely, and at least eight states which had at one time abolished the death penalty later restored it. (U.S. Department of Justice, 1969). On at least four occasions within the past dozen years, the U.S. Congress, itself, has adopted legislation providing the death penalty for various monstrous crimes.

Another central issue of the debate over capital punishment is whether or not it is an effective deterrent to violent crime. It should be made clear, however, that deterrence is not to be considered the primary reason for administering the death penalty (nor, for that matter, any criminal penalty). It would be both immoral and unjust to punish one man merely as an example to frighten others. The basic consideration should be: Is the punishment deserved? If not, then it should not be administered, regardless of what its usefulness as a deterrent might be. After all, if deterrence supersedes justice as the basis for criminal sanctions, the guilt or innocence of the accused becomes largely irrelevant. Deterrence can be as effectively achieved by executing an innocent man as a guilty one, something which Communist leaders discovered long ago (Hoover, 1962). You simply have to be sure that those to be deterred are convinced by propaganda that the accused is guilty.

If a punishment administered to a guilty man deters another from committing a crime, all well and good. But such a result should be looked on as a bonus of justice properly applied, not as a purpose for the application of the penalty. The decisive consideration should be: Has the accused earned the penalty to be inflicted?

In at least one important respect, capital punishment is unquestionably an effective deterrent. It simply cannot be contested that a killer, once executed, is forever deterred from killing again.

The deterrent effect on others, however, depends largely on how consistently and surely the penalty is applied in those cases justifying it. Since capital punishment has not been used with any degree of consistency in recent decades, it is quite impossible statistically to evaluate its deterrent potential with any degree of accuracy. Abolitionists often claim that a lack of significant difference between the murder rates for states with and without capital punishment proves that the capital penalty does not deter murder. But that is nonsense. Even states with the death penalty have used it so little over the years as to preclude any meaningful comparison between states. Any punishment—even death—will cease to be an effective deterrent once it is recognized as mere bluff.

Although seldom considered during the last decade, there are some interesting, and perhaps significant, relationships between the murder rate and the extent to which the death penalty was used. For instance, the number of executions carried out in 1960, 1961, and 1962 were, respectively, fifty-six, forty-two and forty-seven (U.S. Dept. of Justice, 1969). The F.B.I.'s 1970 Uniform Crime Reports establishes that during those years both the number and rate of murders declined slightly. But in 1963, there was a record low of only twenty-one executions, and the murder statistics immediately escalated into an upward climb which continues to this day.[4] With no executions at all in 1971, there were 17,630 murders, compared to approximately 9,000 in 1960—a 96 percent increase! The population increased less than 16 percent during that same period (Federal Bureau of Investigation, 1971).

Opponents of the death penalty may perhaps rejoice that in 1971 there were fifty-six fewer court-ordered executions than in 1960 (U.S. Dept. of Justice, 1969); but what of the nearly nine thousand additional innocents who died at the hands of murderers in 1971 than was the case in 1960?

It is interesting to note the trouble England has been experiencing since abolishing the death penalty for murder. An article in the *Wall Street Journal* for June 6, 1972, noted: "There has been a sharp rise in the armed robberies and violent crime throughout Britain since 1965, when the death penalty was dropped, and more criminals seem to carry gus now" (Kessler, CONGRESSIONAL RECORD, June 8, 1972, p. 20215). According to a United Press dispatch on September 3, 1967, there were more murders, rapes, assaults, and robberies in London during 1968—the second year after the death penalty was abolished—than in any previous year of its 2,000-year history!

To allege that the death penalty, if enforced, would not be a deterrent to crime is, in essence, to say that people are not afraid of dying. If that is the case, as columnist Jenkin Lloyd Jones has observed, then warning signs reading "Slow Down," or "Bridge Out," or "Danger—40,000 Volts" are useless and futile relics of a day when men were fearful.

This is not to say that the death penalty could ever become a 100 percent deterrent to murder. Obviously it could not, because the fear of death varies among individuals.

Footnotes at end of article.

Some people will always tame lions, shoot rapids, or walk circus high-wires, despite the obvious risks involved. But, as attorney Bernard Cohen observes, "there are even more people who refrain from participating in . . . [such] activities mainly because risking their lives is not to their taste (1970, pp. 49–50).

Now consider the following:

(a) According to the Uniform Crime Reports during the period 1968–71 forty-nine policemen were slain from ambush in the United States. No such murders from ambush occurred during 1966 or 1967, the last two years during which the death penalty was actually used in this country. Seven police officers were murdered from ambush in 1968, three in 1969, nineteen in 1970, and twenty were murdered from abush in 1971.

(b) The Commissioner of Police in London reported a few years ago that when a member of a gang of armed robbers was apprehended and sentenced to death, but had this sentence commuted to life imprisonment, the gang continued its operations. But when, shortly thereafter, two other gang members were caught, convicted, and executed, the remainder of the gang promptly disbanded and disappeared. (Taylor 1963).

(c) In February of 1960, the Los Angeles Police Department submitted a report to the California Senate Judiciary Committee which revealed that at least thirteen robbery suspects had, during the previous year, told police they "(1) used toy guns; or (2) empty guns; or (3) simulated guns in robberies rather than take a chance on killing someone and getting the gas chamber." (Bedau, 1967, p. 267).

(d) In March of 1959, newspapers reported the escape of a convict who carried hostages to the state line, and then let them go. He was later apprehended, and told police he had freed the hostages because the neighboring state had the death penalty for kidnapping, and he didn't want to risk his life by transporting the hostages into that state (Bedau, 1967).

Let's consider this matter of deterrence on a far less serious level: The fine today for driving through a red light is around twenty-five dollars. Some motorists drive through red lights despite the threat of this relatively minor penalty, but most do not. Are we to assume that the threat of the fine has no influence on this reluctance of most drivers to run red lights? Should penalties for traffic violations be abolished because some people violate the law anyhow? The answers are obvious, and far more so when the possible penalty is death rather than a $25 fine.

Is life imprisonment an adequate substitute for the death penalty? As we have already noted, scores of innocent people have died at the hands of men previously convicted and jailed for murder. As the Reverend E.L.H. Taylor notes:

"The imprisoned murderer has everything to gain and nothing to lose by murdering his guards. Why should a murderer who has once been convicted of that offense be given the opportunity to add a second victim to his list?" (Taylor, 1963, p. 16).

Swift and certain punishment has long been recognized by law enforcement authorities as an essential element of crime deterrence (Allen, 1960; Hoover, 1960, 1970). But the severity of the punishment must match the seriousness of the crime if the interests of justice, the protection of society, and the maximum deterrent impact are to be realized. Suppose, for example, that a bank robber is very swiftly and surely sentenced to a month in the county jail, or a rapist swiftly and certainly given a $100 fine. Would such "punishment" deter either criminal? Very unlikely.

Related to this problem is the possible rise in vigilante activity if judges and juries continue to deal leniently with rapists, murderers, and other brutal criminals (Anonymous, 1974; Griffin, 1968). Though concurring in the Supreme Court's decision against capital punishment, Justice Potter Stewart nevertheless summarized this particular danger as follows:

"The instinct for retribution is part of the nature of man and channeling that instinct in the administration of criminal justice serves an important purpose in promoting the stability of a society governed by law. When people begin to believe that organized society is unwilling or unable to impose upon criminal offenders the punishment they "deserve," then there are sown the seeds of anarchy—of self-help, vigilante justice, and lynch law" (92 S.Ct. 2726 [1972]).

A tragic example confirming Justice Stewart's analysis was recently reported by United Press International in a dispatch which appeared in the Washington Star for June 15, 1972:

"Anthony Phillips, 60, heard a judge in New Castle, Pa., sentence a 19-year-old youth to six years in prison for killing Phillips' younger brother during a robbery attempt.

"Phillips quietly left the Lawrence County courtroom of Judge John F. Henderson, Tuesday, and walked downstairs to a rear door. He mingled with a small crowd until the youth, Gary Couch, emerged surrounded by sheriff's deputies.

"As Couch walked to a patrol car, Phillips pulled a snub-nose .38-caliber revolver from his pocket and fired four quick shots. Couch was struck once in the head and three times in the chest. He died an hour later.

"Phillips, taken to Western Penitentiary where Couch was to have been imprisoned, was charged with murder.

"He said he was displeased by the 'lenient judge' who sentenced Couch after he pleaded guilty to manslaughter in the Jan. 18 shooting death of Alex Phillips, 55."[5] (United Press International, 1972, p. A3).

Abolitionists often cite statistics which they claim indicate that capital punishment has been used in a discriminatory manner, so that the poor, black, friendless, etc., have suffered a disproportionate share of executions. This was a key argument used by the Supreme Court majority in reaching its decision. But, even if true, this is certainly not a valid reason for abandoning the death penalty, unless it can be shown that such alleged discrimination results in the punishment of innocent persons—a claim which none of the Justices made or implied.

All criminal laws in all countries have tended to be administered in an imperfect and uneven manner, with the result that some elements in society have been able to evade justice more consistently than others. But because one person escapes justice, is it right that all should escape justice? Since justice nowhere prevails perfectly, should we abandon the attempt to attain it? Police Chief Edward J. Allen of Santa Ana, California, helped put the problem in its proper perspective a few years ago when he observed:

"The deals which allow criminals to escape justice are consummated by courts and attorneys . . . Responsibility also devolves upon citizen jurors to return proper verdicts. If some citizens, courts and lawyers fail in their duty, is the law itself to blame? Rather it is their administration of it." (Allen, 1960, p. 138).

Another question which arises is the degree to which justice should be tempered by mercy in the case of killers. Some will ask, "Is it not the duty of Christians to forgive those who trespass against them?" But, in criminal cases, the two most responsible sources to extend mercy and forgiveness are (1) God, and (2) the victim of the injustice. This places the crime of murder in a unique category, because so far as the world is concerned the victim is no longer here to extend mercy and forgiveness. Does the state or any earthly party have the right or authority to intervene and offer mercy on behalf of a murder victim? The Reverend E. L. H. Taylor makes the point this way:

"Now it is quite natural and proper for a man to forgive something you do to him. Thus if somebody cheats me out of $20.00 it is quite possible and reasonable for me to say, "Well, I forgive him, we will say no more about it." But what would you say if somebody had done you out of $20.00 and I said, "That's all right, I forgive him on your behalf"?" (Taylor, 1963, p. 23).

There is simply no way, in this life, for a murderer to be reconciled to his victim, and secure the victim's forgiveness. This leaves civil authority with no other responsible alternative than to adopt justice as the standard for assigning punishment in such cases.

Sometimes those who defend the death penalty are pictured as being intolerant. But isn't it true that one of our real problems in America today is too much toleration of evil? Too many Americans accept acts of violence, cruelty, lying, fraud, and civil turmoil with all too little response in the way of righteous indignation. Intolerance of such destructive acts is simply a reflection that a person is seriously concerned with the question of right and wrong. Perhaps it is time for all Americans to begin taking right and wrong more seriously.

The exact status of capital punishment remains highly confused at present, and it may take months for state and federal officials to figure out what can or cannot be done as a result of the Court's ruling. Some observers (including Justice Powell) speculate that nothing short of a constitutional amendment can reverse the Court's judgment.

About the Author: Reed A. Benson, Washington, D.C., representative for the John Birch Society from 1965 to 1973. He is a former staff member of the Republican National Committee and the eldest son of Ezra Taft Benson, former U.S. Secretary of Agriculture. Robert W. Lee, Washington, D.C., representative for The John Birch Society. Mr. Lee is a contributing editor of Review of the News, a weekly news magazine affiliated with The John Birch Society.

[3] For specific examples, see The Review of the News for January 5, 1972, pages 33, 35.

[4] There were fifteen executions in 1964, seven in 1965, one in 1966, two in 1967, and none since.

[5] Another disgusting example of how "justice" is determined by some modern jurists was related by J. Edgar Hoover in the F.B.I. Law Enforcement Bulletin for January 1971: A young midwestern criminal who confessed beating to death a 75-year-old woman in a $5 street robbery was granted a 7-to-10 year term. Offered as an excuse for the light sentence was the advanced age of the victim, on the fanciful theory that, if the murdered woman had been younger, she might not have died from the brutual assault. (Hoover, 1971, p. 22).

BATAAN-CORREGIDOR DAY

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. PANETTA. Mr. Speaker, I am introducing today a joint resolution directing the President of the United States to proclaim April 9 of each year as Bataan-Corregidor Day in recognition of the anniversary of the fall of Bataan and Corregidor and in honor of the brave men of the Philippine Scouts who gallantly fought alongside American soldiers to preserve the principles of democracy.

For too long we have failed as a Nation to give due recognition to the sacrifices made by these people. The Filipino survivors of the Second World War who have become citizens of the Nation they fought so bravely to protect continue to be denied the full benefits entitled to every other American who fought in that war.

The joint resolution I am introducing today is one small step toward correcting this injustice. I invite the support of all Members of Congress in this important effort.

H.J. RES. 364

Joint resolution designating April 9 of each year as "Bataan-Corregidor Day"

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President shall annually issue a proclamation designating April 9 as "Bataan-Corregidor Day" in observance of the anniversary of the fall of Bataan and Corregidor and as a tribute to the gallant American and Philippine soldiers who fought, suffered, and died side by side defending the principles of freedom. Such proclamation shall call upon the people of the United States to observe each such day with a minute of silence at 11:00 ante meridiem and with other appropriate ceremonies and activities.

JOSEPH "REDS" VERNON

HON. GLADYS NOON SPELLMAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mrs. SPELLMAN. Mr. Speaker, I state the obvious when I say that the responsibility for the future prosperity of this Nation rests squarely on its youth. Regardless of our actions now and those of our predecessors, these attempts to insure long-range stability and security will be meaningless unless the succeeding generations possess the capabilities and convictions to "take the baton" when we, inevitably, must pass it to them.

Yet, the obvious goal is not always the easiest to achieve and this is especially true with developing and strengthening the character of our youth. Indeed, as a mother and grandmother, I am all too familiar with the difficulty and frustration which all parents experience during those formative years when the child, grudgingly and with loud protestations, is gently prodded into assuming the responsibilities and demeanor of an adult.

The parents of Prince Georges County, Md., however, may have an easier time of it than their peers in other communities. For we are blessed to have as a neighbor and assistant one of the most respected figures in the Nation in the field of youth development—Mr. Joseph "Reds" Vernon, executive director, since 1952, of the Prince Georges County Boys and Girls Clubs.

In this limited space, it would be all but impossible to fully document Mr. Vernon's accomplishments during his 20-year tenure as leader of the Boys and Girls Clubs. I would like to mention though, that in 1952, when "Reds" took the helm of this vital organization, it had 5,000 members. It now has a membership of 28,000 young people 18 years of age or younger. Its programs both encourage community involvement and concern, and emphasize the importance of physical fitness, all so vital to the future well-being of the individual and his environment. And, they are as successful as they are extensive. Indeed, just a partial list of the awards which Mr. Vernon has received during his career will give you some idea as to the degree of this success. Included among them are: The Governor of Maryland's Distinguished Citizen Award; Maryland Junior Chamber of Commerce Physical Fitness Leadership Award; Certificate of Public Service—County Executive Commission; State of Maryland Appreciation Award; Prince Georges County Advisory Youth Action Award; Certificate of Public Service—County Council; Governor's Commission on Physical Fitness Award; and the Brookland Boy's Club Man of the Year Award.

On March 31, the citizens of Prince Georges County will pay well-deserved tribute to "Reds" Vernon and the role he has played in guiding our county's youth toward meaningful and productive lives. But, his contributions to the welfare of these citizens undoubtedly will help strengthen the character of countless other individuals for years to come. With this in mind, I am sure my colleagues in the Congress will join me in extending congratulations and deep appreciation to Joseph "Reds" Vernon for his efforts to insure that when the baton is passed, it will be received by a generation anxiously waiting to continue the work their predecessors began.

CHILD PORNOGRAPHY

HON. LINDY BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mrs. BOGGS. Mr. Speaker, the Washington Post recently carried an article entitled "'Sexploiting' Kids—An Abuse of Power" by Ellen Goodman. I would like to call it to the attention of my colleagues as a direct address to what has become apparent as a significant national problem.

Until recently little, if anything, was known about child pornography. Now that we are becoming aware of the seriousness and the extent of this national operation we must take action to stop it. In the process, however, we must make sure not to lose sight of the major concern: the children.

I insert this article for the RECORD:

"SEXPLOITING" KIDS—AN ABUSE OF POWER

(By Ellen Goodman)

BOSTON.—There is almost a sense of relief in talking about it. At last, a simple matter of right and wrong. There is no "redeeming social value" for "Lollitots" with its sex shots of little girls. There is surely no "community standard" left unviolated by "Moppets" with its children posing in adult fantasies.

No. Finally there is an unequivocal villain. Finally a group we can pursue with a clear sense that "This, we know, is wrong."

After being force-fed the "heroics" of a creep like Larry Flynt, after pondering the defense of an obtuse sexual gymnast like

Harry Reems, the question of kidporn is refreshingly uncomplicated.

Our reaction is equally direct: Stop it! Already there are two federal bills and half a dozen pieces of state legislation designed to stop the use of children's bodies as sexual capital.

The speed with which child pornography has become a national concern says a great deal about our gut feelings about pornography in general. Kidporn is just a distillation of the worst of the genre: the perversion of the healthy, the rape of the natural, the sale of people.

But it has been dangerous and difficult to ban the trafficking among "consenting adults"—those who pose and those who peer The Supreme Court's notion—to determine what is pornographic by "community standards"—is so flexible and flaky that 12 jurors in a remote village could sentence Masters and Johnson to jail.

But the children cut through all of the murkiness. This is not a First Amendment issue. It is not a matter of legislating the sexual fantasies of adults. Its a matter of protecting the real lives of the young models.

We can take kidporn out of the realm of sex and into the realm of power, where it belongs. The children are victims, and kidporn is the exploitation of the powerless by the more powerful. That exploitation is as common to the history of adult-child relationships as is protection.

Children have always been the dependent subjects of adults. Until recently they were the objects as well. For centuries, parents simply owned them as property, and only gradually has society modified that power.

Now adults are not allowed to abuse their children, at least not badly, and not allowed to send them to work, at least not hard work or long work.

Yet it's estimated that thousands of children are killed every year by their "guardians" and that two million are "abused." In the home, the majority are merely "hit." In the schools, others are administered "corporal punishment." In the fields, thousands are put to work beside desperate migrant-worker parents.

Numerically, there are far, far fewer cases of sexploitation than of other forms of misuse. But now the federal legislation against kidporn will appear under two peculiarly appropriate categories. One has been filed under child abuse, the other under child labor statutes. These are the areas that already legislate restraint.

If we take this issue, and look at it as a matter of the abuse of power rather than of sexual deviance, we may begin to look at adult-child relationships more intently and more generally. We can continue to sort out and deal with our own confused notions of what is the appropriate use of power by adults over children. How should we use it and how should we further limit it?

At least on the kidporn question we are sure. As a Village Voice writer noted: Even Lolita, a teenage "seductress," was finally a powerless child. In the novel, after her mother dies, Lolita goes to the bed of the obsessed Humbert, who explains: "You see, she had absolutely nowhere else to go."

EXPORT-IMPORT BANK SUBSIDIES FOR NUCLEAR EXPORTS

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. LONG of Maryland. Mr. Speaker, I recently testified before the House Committee on Banking, Finance and Urban Affairs, the Subcommittee on International Trade, Investment and Monetary Policy, on the subject of Export-Import Bank subsidies for nuclear exports. I should like to make available the full text of my remarks to my colleagues, many of whom share my deep concern with the problem of nuclear proliferation and U.S. nuclear export policy:

STATEMENT OF REPRESENTATIVE CLARENCE D. LONG

(NOTE: Portions of this statement are excerpted from my forthcoming article in the spring 1977 issue of International Security.)

Mr. Chairman, distinguished members of the committee, I appreciate the opportunity to testify before this committee on a subject which I believe to be of the utmost importance to our country and to the world: nuclear proliferation. Specifically, I want to address the question of how the Export-Import Bank of the United States subsidizes nuclear exports, and why those subsidies should be stopped.

The Export-Import Bank has been the principal vehicle for U.S. Government promotion of nuclear power exports. Since 1959, the Export-Import Bank has provided loans and guarantees for almost $4.8 billion of exports of nuclear equipment and fuel through 68 loans totalling $3.2 billion and 34 financial guarantees of $1.6 billion in commercial bank lending.

Commercial banks, with Export-Import Bank guarantees, have provided a substantial portion of the funding—generally 40 to 45 percent, and typically are first to receive any repayment. In an industry-by-industry calculation for FY 1975, the Congressional Budget Office concluded that the Export-Import Bank loans for nuclear exports, when compared with 16 other industries, had the longest average terms and received the second highest proportion of subsidy.

The Export-Import Bank has financed 50 of the 60 nuclear reactor exports by the United States. Of the 10 reactors exported without Export-Import Bank financing, only three exports of small reactors for Europe in the 1960's were not accompanied by some financial subsidy. Subsidy has been critical to almost all American nuclear reactor exports.

Mr. Chairman, I should like to insert in the record a table which shows the value of Export-Import Bank authorizations for nuclear power exports by country, from inception through the end of 1976. The figures are those of the Export-Import Bank itself.

Let us examine more closely the question of why the Export-Import Bank loans and guarantees constitute a subsidy for nuclear exports. The Export-Import Bank has insisted that it gives no subsidy to nuclear exports because the Bank lends to foreign countries at a rate of interest higher than the rate at which the U.S. Government borrows its funds. But a more relevant comparison should be made: the Export-Import Bank's lending rate is less than the rate charged in the private market for a loan of comparable class and maturity.

Export-Import Bank interest rates of 5–6% in the late 1950's and the current rates of 8–8.5% for nuclear power projects are well below market rates in the U.S. and even further below those available in the less-developed countries. Public utilities in the U.S. today borrow for 20-year projects at the rate of about 11–13% (for debt and equity combined). In less-developed countries, the cost of capital for corresponding projects is 2–3% higher, given the greater economic and political risks and undeveloped financial markets.

One prominent analyst of nuclear exports, Albert Wohlstetter, calculates that the Bank's lower interest rates on a portion of the capital required has resulted in a reduction of the cost of capital for nuclear power projects in other countries by at least 4–7%. Indeed, many nuclear projects probably would not have been undertaken otherwise. For example, if the average cost of a 20-year loan for a nuclear project is 10.5% with Eximbank backing and it would be 15% without it, the total project investment cost is reduced by about 24% (in terms of present value).

The Office of Management and Budget (OMB) estimates that total Eximbank subsidies for FY 1978 will reach $430 million, assuming a 12% discount rate. A sizable portion of that amount, 24% according to the Congressional Budget Office, can be attributed to financing nuclear exports.

Another, and perhaps more critical, element of subsidy can be identified. Without Export-Import Bank financing, very few (if any) nuclear power plants would be exported, probably none to the less-developed countries. An official of the Bank testified before this very subcommittee last year that "nuclear power plants . . . are one of the most clear-cut examples where it is necessary for the Eximbank to provide financing because private export credit is not available in sufficient volume and on appropriate terms."

Because of what Eximbank delicately refers to as "imperfections in the capital market", private lenders are unwilling to lend large sums for long periods at great political and economic risk to finance nuclear power projects abroad. The Export-Import Bank's willingness to lend when nobody in the private market will do so represents a subsidy, even though it is difficult to measure in quantitative terms.

Further, the magnitude of the effect of this subsidy on the export of nuclear plants and technology is even greater than the value of the subsidy itself. This is because the full faith and credit of the United States Government backs every Eximbank loan or guarantee. Private credit markets are strongly influenced by this "signal" to come in and finance the rest. The result is that more financial and real resources are allocated to nuclear exports that would be without Eximbank financing.

To make matters worse, the Export-Import Bank finances not only the export of nuclear equipment, but also the fuel needed to run nuclear power reactors! Certainly Eximbank offers no comparable inducement for other countries to develop alternative energy sources. It does not finance oil or coal exports—for example.

How do Export-Import Bank (and other U.S. Government) subsidies for the export of nuclear power plants encourage the proliferation of nuclear weapons around the world?

A nuclear power plant is the major step to nuclear weaponry. The engineers and physicists needed to develop nuclear explosives would be available in a power program. So also would be the plutonium, since the standard size 1,000-megawatt power reactor of current design would produce annually spent fuel containing 200 kilograms of plutonium—or enough for forty small nuclear explosives. All that is required to separate the plutonium from the radioactive wastes is a reprocessing plant which, for a modest weapons program, would require as few as 8 engineers with standard training and would cost as little as $25 million (a small fraction of a power reactor's cost).

I have often heard the argument that the poor nations must have nuclear power to replace skyrocketing oil imports, to save foreign exchange, and to insure continuing economic development. This is a fraudulent argument, on several counts. Nuclear power offers the prospect not of relieving shortages of foreign exchange and capital in poor nations but of exacerbating them. Nuclear power requires enormous capital—approximately $1 billion in capital and construction costs of a 1,000 megawatt reactor, susbtantially more than for coal or oil-powered plants of that output. Reactor parts, highly skilled technicans, and nuclear fuel would have to be imported at additional foreign exchange cost; whereas more conventional power plants could use indigenous factors or production.

Furthermore, if the bill to develop nuclear power in the under-developed nation is paid by the U.S. it would be at the expense of aid to those nations for food production, irrigation, and fertilizer, roads, education, health, ports, and housing. To construct the projected nuclear capacity for urban India alone in 1990 (not counting annual fuel costs) would require about $20 billion, and this immense sum would do nothing for the energy needs of the rural poor who make up four-fifths of the Indian population and who represent the real reason for seeking economic development.

What about the argument that if the U.S. stops subsidizing nuclear exports, other nations will take over the nuclear market? The threat of abandoning the nuclear market to other suppliers would be more formidable if the nuclear market were lucrative. Those who claim it is profitable should be asked to substantiate their contention. Even the French may ultimately get the message that nuclear exports have a way of costing the taxpayers more than the industry earns in profits. If France, Germany, or any other nation chooses to lose money, or to give away its resources to other countries, this is hardly the reason for us to follow its example.

There is no little possibility that U.S. leadership combined with economic and political pressure could bring other countries to cooperate. There appears to be some movement towards restraint on the part of the major nuclear exporting nations, which the U.S. should seek to encourage. What evidence is there that the political and economic levers at our disposal cannot be made to work, if we use them in good faith? It is even possible that clear American leadership and example will be supplemented by the burgeoning opposition to nuclear power in many developed countries, including a number of the nuclear exporting nations.

On February 11, 1977, I sent a letter to President Carter outlining my recommendations to end U.S. subsidies of nuclear exports and to encourage what I call light capital energy technologies as a substitute for nuclear energy. I would like to insert a copy of that letter in the record at this point, Mr. Chairman.

In that letter to the President, the following recommendation appears at the top of the list: "Prohibit Export-Import Bank loans or guarantees for nuclear reactors, fuel, or technology." In view of the very clearly demonstrated importance of Export-Import Bank subsidies to nuclear exports, I believe such a prohibition would be a critical first step for the Congress to take in mandating a comprehensive non-proliferation policy for the U.S.

It is my conviction that the greatest danger confronting the balance of this century is nuclear weapons proliferation; that the major impetus to nuclear power and weaponry has been U.S. subsidy and promotion; that past Congresses abandoned leadership to the President and the now-defunct Joint Atomic Energy Committee; that the Congress can act during this session to stop subsidy and promotion; and that ending the subsidy of nuclear proliferation would be wise politically, economically, and environmentally.

NUCLEAR POWER VERSUS UNEMPLOYMENT

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. WEISS. Mr. Speaker, acceptance of nuclear powerplants in many parts of our country seems to occur because people believe that one of the attending results of its development is the promise of employment and prosperity. It is often difficult for persons who are in the construction crafts and trades which have been so hard hit by the recession to oppose further development of nuclear power in spite of any doubts which they may have about its relative safety or efficiency as a source of energy.

New York State Assemblyman Maurice Hinchey, in an article which appeared in the March 26, 1977, New York Times, addresses this problem which affects his 101st assembly district in upstate Ulster County. Mr. Hinchey tells us that his is not a prosperous area; that unemployment is a very serious problem. Also, he states that the Power Authority of the State of New York is conducting a campaign aimed at the people in his area which promotes the belief that many new jobs will be forthcoming with the development of nuclear plants in Ulster and surrounding communities in upstate New York. Yet, 60 percent of the respondents to Mr. Hinchey's recent questionnaire on the subject indicated that they were opposed to future nuclear development in their area.

Mr. Speaker, we are faced at this time with developing both an employment program and an energy plan which respects the rights of our people and the condition of our environment. I agree with Assemblyman Hinchey that nuclear power is not the answer for either energy or jobs. I would like to bring Mr. Hinchey's article to the attention of my colleagues and at this time insert it into the RECORD:

[From the New York Times, Mar. 26, 1977]

NUCLEAR POWER VERSUS UNEMPLOYMENT

(By Maurice Hinchey)

ALBANY.—I am an upstate Assemblyman faced with the possibility of having not one but as many as five nuclear-reactor plants built in my area. A substantial number of my constituents, although fortunately not a majority of them, are actually looking forward to this because it will mean more jobs.

We are situated in one of the less prosperous parts of the state, and our labor force has been particularly hard-hit by the current recession. Anything promising work therefore has to possess a powerful attraction.

The public-relations people working for the Power Authority of the State of New York are very much aware of this. They bombard the local newspapers with press releases describing the number and kinds of construction and other jobs that will be created.

Many of our construction workers have been out of work well over a year. You can easily imagine the hope that surges through them as the Power Authority unfurls its vision of coming prosperity: 189 carpenters, 493 pipefitters, 321 electricians, 35 cement finishers—all to be employed directly in the construction of only one of the plants, not to mention the indirect benefits as additional homes are built, highways improved, and new commercial enterprises started.

It is easy for people who are out of work to convince themselves that the technological problems connected with nuclear energy have been satisfactorily solved and that all who criticize are misguided crackpots.

Some of them have told me as much, very plainly and bluntly. Confronted with their desperate need for work, their real sense that the government has let them down, and their rising anger now that they fear they may be thwarted just when an opportunity has arisen at last to obtain a job, I do not find it easy to raise a cautionary hand against their hopes; and yet, the more I study the nuclear-power issue the more convinced I become that it is not the correct answer to our energy needs and that it may indeed become the single, irreversible technological blunder of our time.

But how do you tell this to a man who is out of work?

"I helped build the Indian Point plant," one unemployed construction worker told me angrily a few months ago. "I tell you it's absolutely safe!"

Such certitude was remarkable, especially since the Indian Point complex is built along the Ramapo Fault, vulnerable to earthquakes.

I had known the man a long time and I realized that despite his air of confidence he was deeply troubled. My questions regarding the safety of nuclear plants reminded him of the Faustian bargain he was willing to make in exchange for an opportunity to pay off his back debts and shine a little more brightly in the eyes of his wife and children. He could not afford to admit that there are still unanswered questions about nuclear power. Such an admission would have been the same as confessing that he was willing to gamble with the lives of his family.

At one time it was only the President of the United States who had to face the dilemma posed by atomic power. Then it became the responsibility of the Congress of the United States and the various regulatory agencies. Now, at last, it has become the responsibility of the average citizen.

I could scarcely blame the man if he buckled under the pressure. Certainly many others, at various levels of government, had already done so. But I was disheartened because I knew that what is happening to the mid-Hudson Valley cannot be stopped without the support of the general public.

But that was a few months ago. We have just completed tabulating the results of a recent questionnaire that I sent to all the households in my district. Of the approximately 10,000 or so respondents to the 35,365 questionaires, I am happy to say, 60 percent have taken a stand against nuclear plants in our area.

As I said, we are situated in one of the less prosperous parts of the state and our people need jobs. Happily, they are also willing to accept the responsibility of making difficult moral decisions.

RIGHT TO LIFE AMENDMENT

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. LUKEN. Mr. Speaker, I am today proposing an amendment to the Constitution of the United States, guaranteeing the right to life for all human beings, both born and unborn. This extraordinary step of a constitutional amendment is made necessary because the Supreme Court of the United States has attempted to define human beings in terms of "meaningful life," a situation which I, and a large number of the American people, find intolerable.

For any legal body to attempt to define human life, a decision upon which scientists and physicians widely disagree, is to threaten the moral and ethical principles on which our country was founded, and the progress of human rights over the past two centuries. Throughout our Nation's history more

and more groups were brought into full citizenship. Now we are asked to regress and deny the most fundamental right of all, the right to live.

Since the 1973 Supreme Court decision, there have been additional legal precedents attacking the sanctity of life and the integrity of the family. Respect for life, in our legal precedents and in our whole society, seems to be diminishing.

All the arguments for the court decision permitting abortion are overshadowed by the moral precept of protecting life. These problems cannot be solved by ignoring this basic moral tenet; solutions can be found, but only in the full knowledge that a human life is most precious.

My amendment recognizes that this moral principle is part of our heritage, contained in the spirit of the Bill of Rights and the 14th amendment to our Constitution. The amendment offered today would extend the basic rights of Americans to include the unborn.

The amendment follows:

H.J. RES. —

Joint resolution proposing an amendment to the Constitution of the United States with respect to the right of life

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date of final passage of this joint resolution:

"ARTICLE—

"SECTION 1. With respect to the right to life, the word 'person' as used in this article and in the fifth and fourteenth Articles of Amendment to the Constitution of the United States applies to all human beings irrespective of age, health, function or condition of dependency, including their unborn offspring at every stage of biological development.

"SEC. 2. No unborn person shall be deprived of life by any person: *Provided, however,* That nothing in this article shall prohibit a law permitting only those medical procedures required to prevent the death of the mother.

"SEC. 3. The Congress and the several States shall have power to enforce this article by appropriate legislation.".

CONCERN OVER CETA

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. EDGAR. Mr. Speaker, had there been a recorded vote on H.R. 2992, the Comprehensive Employment and Training Act, CETA, authorization, I would have risen in mild support. In the absence of such a vote, I would like to articulate some of my concerns about the way we are expanding and extending the CETA public service employment programs.

Last year Congress passed the Emergency Jobs Programs Extensions Act, providing authorization and adequate funds for maintaining 260,000 public service employment jobs under title VI of the CETA programs. This act required that new public service employment jobs, created above this level—plus one-half of the vacancies occurring within the level—be filled according to new standards focusing on the employment and training needs of the poor and the long-term unemployed. I applaud this attempt to direct our Federal manpower effort toward those who need the most help.

Unfortunately, last year's act did not provide any funds to expand the program so that these new job placement rules could be tested the way they should be tested.

On March 14, 1977, the House of Representatives passed the Economic Stimulus Appropriations Act, which provides funds adequate to extend the title VI program through September 30, 1978, expanding the program from 260,000 jobs to 600,000 jobs. Accordingly, CETA prime sponsors are going to be given a quick lesson in the new job placement requirements.

I believe that it is necessary to test requirements. However, it seems that we have gone overboard, to say the least, in providing funds adequate to make the test. I fear that what we had in mind was not a testing of this program's new requirements, but rather a massive priming of the program in response to the Nation's persistent unemployment problem.

I have serious doubts that public service employment is the best way to respond to that unemployment problem. Better we spend the funds building things: for instance, I am greatly concerned about the inadequacy of the Federal commitment toward public transportation.

Even if we do want to solve the unemployment program by creating hundreds of thousands of new public service employment jobs, I suggest that title VI may not be the place to do it. As I have said, new jobs under this title must be filled according to stringent new requirements. Based on my familiarity with the CETA prime sponsor in my congressional district, the seventh of Pennsylvania which includes most of Delaware County, I very much doubt that Delaware County will be able to fill its new title VI slots. Filling them within a reasonable period of time would require an on-line orientation toward the needs of the disadvantaged and the long-term unemployed, an orientation which the prime sponsor, the Delaware County government, lacks. It was not required to have this orientation under the old CETA guidelines; accordingly, its orientation has sadly been one of responding to the political needs of its county government.

Delaware County might not be typical; I hope it is not. In any event, I believe that we are putting too much money into a program whose benefits remain to be tested. I support the program because I want to see the test take place. If the results show that CETA continues to be lacking in meeting the real job experience and training needs of the poor and others, I shall not hesitate to vote against future extensions and authorizations of this program.

ENERGY CONSERVATION AND PRODUCTION IDEAS

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mrs. HOLT. Mr. Speaker, a number of my constituents have provided me with copies of their suggestions sent in response to the President's request for energy conservation and production ideas.

One of the most interesting proposals I have reviewed involved the use of solar energy to heat anaerobic digestors and produce methane gas. This proposal was submitted by Mr. Jess W. Malcolmn, president of Environmental Systems, Inc., of Annapolis, Md., and I would like to share it with my colleagues:

ENVIRONMENTAL SYSTEM, INC.,
Annapolis, Md., March 15, 1977.

Mr. JAMES R. SCHLESINGER,
Assistant to the President, National Energy Policy Recommendations, Washington, D.C.

DEAR MR. SCHLESINGER: We are happy to respond to President Carter's request for energy saving/production suggestions to help the Nation achieve energy self-sufficiency in the years ahead.

In June, 1974, this firm conceptualized a plan that appears to be one of the most sensible and efficient uses of solar (heat) energy available to the Nation today. A report entitled, "Use of Solar Energy to Maximize Anaerobic Digestion and Metnane Production Rates as a Means of Supplementing the National Energy Supply," was circulated among various federal agencies as a preproposal. A feasibility study, including plans and specifications for demonstrating the project at the old Annapolis waste water treatment plant, was funded by NERC/EPA, Cincinnati, Ohio on November 10, 1975 (Contract No. 68-03-2356). We were unsuccessful in obtaining funds for project demonstration at Annapolis. This study was followed by a second study funded by the Cincinnati office of EPA on September 30, 1976 to 'provide a research report detailing the most economic levels or means of utilizing solar energy for heating anaerobic digesters at any location in the United States" (Request No. 76-239; Requisition/Purchase Request No. M00249). Both studies were completed and are scheduled for later publication by EPA. We are now seeking funds to demonstrate the project at a suitable waste water treatment plant in this vicinity.

The technical requirements for both projects were strict in term of performance. They required digestion operating temperatures of 33° to 37°C±1° (91.4° to 98.6°F) year around, with supplemental heat limited to less than 10 percent. Despite the high performance requirement, both studies proved the technical and economic feasibility of the process at all locations in the United States, including Fairbanks, Alaska.

The economic attractiveness of solar energy to heat anaerobic digesters and the value of the methane gas produced is illustrated by the two graphs attached hereto. As pointed out in our preproposal, there are three distinct advantages to this concept. First, the source material (methane rich, biodegradables) can be conveyed to a single

location for processing via existing sewer collection systems. The source material need not be limited to sewage only, but could include other biodegradable materials such as solid wastes, algae, manure, etc. which would reach the treatment plant thoroughly mixed, "seeded" and ready for the digestion process. Second, the material can be converted to fuel gas economically through use of low cost (solar) energy sources. Third, the gas thus produced could be distributed to homes and industry through existing (pipe line) networks.

It takes little imagination to visualize many of the advantages, as well as the technical and economic spin-offs inherent in this plan. Some of the more obvious include:

1. Virtually every city in the United States has the potential to engage in the economical production of significant quantities of methane gas.

2. Most of the facilities required for raw material collection, gas production and distribution are already in existence.

3. Since most waste water treatment plants tend to be isolated and are already producing gaseous products, their conversion to methane gas production facilities would cause little additional environmental impact.

4. The conversion of waste water treatment plants into energy production facilities would supplant the now negative connotation of "waste" disposal with a more positive sense of resource utilization.

5. Conversion of costly "waste" water treatment plants into profitable energy production facilities would provide economic incentive for improving the efficiency of the treatment process generally in order to make it more cost effective.

Sewage sludge treatment, handling and disposal now represent about 50 percent of the cost of waste water treatment. Many of the more modern plants have installed incinerators to burn sludge as the choice of disposal methods. This process requires energy consuming dewatering devices, and supplemental fuel (often natural gas) to sustain ignition. Even so, a great number of incinerators fail to function properly, and are frequently environmentally objectionable because of inherent air pollution and odor problems. Not only is this technology costly in terms of construction and operating costs, but the potentially valuable methane the raw sludge contains is lost. Also lost is the residual sludge itself, which could (and should) be returned to the soil as an organic additive.

We are pleased to have had this opportunity to convey our ideas for energy saving/production methods to you. Also, we will continue our efforts to obtain funds for project demonstration purpcses. It is our sincere hope that you will share our enthusiasm for this project and will support our efforts to demonstrate it under field conditions.

Very truly yours,

JESS W. MALCOLM,
President.

ERDA ANNOUNCES PROGRAM FOR SAVING ENERGY AND MONEY WITH AUTOMATIC TEMPERATURE CONTROLS

HON. MIKE McCORMACK

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. McCORMACK. Mr. Speaker, on March 21, the Energy Research and Development Administration released a pamphlet designed to help inform the people of this country of methods for saving energy in residential heating and cooling systems, using automatic temperature control devices.

Because of the fact that about 12 percent of this Nation's total energy consumption is used for heating or cooling private residences, and because average citizens do not, without technical assistance and information, understand how to minimize energy consumption for home heating without undue hardship, this program, established by the ERDA, can be of great value.

Under this program, homeowners will be able, on an individual basis, to conserve energy without lowering their standard of living.

Of course, the entire Nation will benefit from the reduced consumption of energy.

I am including herewith a portion of the announcement by the Energy Research and Development Administration of this program. I want to call the Members' attention to the fact that citizens of this country may obtain free single copies of the instruction pamphlet by writing to the ERDA Technical Information Center, P.O. Box 62, Oak Ridge, Tenn., 37830.

The release from the ERDA reads in part, as follows:

NEW ERDA PAMPHLET TELLS HOW TO SAVE ENERGY AND MONEY WITH AUTOMATIC TEMPERATURE CONTROL DEVICES

During the unusually cold winter of 1977, homeowners were asked to turn down their thermostats to save fuel. As summer approaches, there will be a need to conserve electricity by turning air conditioning thermostats up.

You can do this, and reduce your heating and cooling bills substantially, with the help of an automatic temperature control device. These devices are described in a new pamphlet available from the Energy Research and Development Administration (ERDA).

"It is a common misconception that leaving your thermostat at one setting 24 hours a day is the most efficient way to heat or cool your home," said ERDA's Acting Assistant Administrator for Conservation, Dr. Gene G. Mannella. "You can save energy and money by turning down heat or air conditioning at night. An automatic temperature control device does this job for you after you're asleep and resets your thermostat before you begin the day," Mannella continued.

"You can purchase one for less than $40 and install it yourself, and it will save fuel and money year-round," Mannella added.

Single copies of the pamphlet are free and can be obtained by writing ERDA Technical Information Center, P.O. Box 62, Oak Ridge, Tennessee 37830."

CALLING OUR NATION BACK TO GOD

HON. LAMAR GUDGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. GUDGER. Mr. Speaker, on Sunday afternoon, March 27, Dr. Billy Graham, of Montreat, N.C., the evangelist whose worldwide fame as a soul winner for God, has carried him to the four corners of the Earth, brought his crusade team to his home community in western North Carolina where he addressed a capacity audience at the new Asneville Civic Center.

This was the last of a series of five evangelistic programs in Dr. Graham's western North Carolina crusade. It was a dramatic occasion and an exalting spiritual experience for everyone present. George Beverly Shea sang again the familiar hymn, a favorite of so many, "I'd Rather Have Jesus," and Evie Tournquist, of Sweden, sang with childlike innocence "Jesus Loves Me." Then every heart was stirred when the thousand-voice choir, composed of representatives from the various churches of western North Carolina, sang "Come Thou Almighty King."

Former Congressman Roy A. Taylor, Dr. Graham's neighbor from Black Mountain, was honorary chairman of the crusade. He called the crusade "a blessing" and applauded Dr. Graham. Taylor said:

This crusade is not as big as some of those held in football stadiums in larger cities but it is just as meaningful. Billy is calling the nation back to God.

In his closing crusade message, Dr. Graham compared the times in which we live today with those of Noah, a faithful servant of God who preached God's word for 120 years "without a convert." Noah was instructed of the the Lord to build the ark for a place of refuge from His impending judgment upon the evil of his day. And although Noah was looked upon by his neighbors as insane—building his ark in the middle of the desert—he nevertheless was obedient and fulfilled the task assigned him.

Dr. Graham referred to recent books and writings on new discoveries on Mt. Ararat suggesting the possible presence there of fragments of the ark. He also made comparison of the evil and wantonness of Noah's day and the times in which we live. He reminded his audience that God called to Noah to "come into the ark" and thus into his presence when the rain began to fall upon the Earth. He closed his message with the reminder that Christ said:

As in the days of Noe, so shall also the coming of the Son of Man be. (Matt. 24:37.)

And he implored his audience to live as Noah lived as though each day might be the day of flood and judgment.

His own visible personal emotions indicated that Dr. Graham realized that he was talking to thousands of persons, his neighbors and friends, who love him deeply, who look upon him as their inspiration and intercessor, and as one able to express their visions and dreams.

In the closing minutes of the crusade, Dr. Graham thanked his mountain neighbors for their friendship and their faith. He expressed gratitude to them for making his home at Montreat "a perfect place to live"; and he thanked them for sharing his testimony of the love of God by carrying their Bibles openly and by worshiping humbly together.

The people of North Carolina deeply respect Dr. Graham. They are aware that he has been an intimate friend and confidant of many Presidents, including Jimmy Carter. And they know what he

means when he says President Carter is setting a good example by walking to church and carrying a Bible. They also understand what he means when he says that he sees no inconsistency in his evangelical theology and his interest in government. And they believe him when he says that "society and the redemptive gospel are now going hand in hand."

In the final moments of his message, when he called for decisions for Christ, hundreds came forward. They received counseling and literature telling them how to continue their commitment. Then, after assuring the audience that he would not stop preaching "until the Lord retires me," Dr. Graham concluded his remarks by saying, "I am not going to say goodbye but au revoir—til we meet again."

Mr. Speaker, I am particularly pleased that this Extension of Remarks relates to one of my district's best known citizens, Dr. Billy Graham, and that the subject developed in his message last Sunday was—as described by your friend and mine, former Congressman Roy A. Taylor, "calling our Nation back to God."

COMMON SITE PICKETING

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. FISHER. Mr. Speaker, last week the House considered but failed to pass the common situs picketing bill, H.R. 4250. This issue has generated more heated debate than is warranted by the limited impact of the bill. However, the matter is of substantial interest to many so I offer the following comments.

Last year, when similar legislation was considered, I voted for the bill. In light of the controversy, I decided that before voting this year I should review my position. I have met with groups representing both sides of the issue, and after much deliberation and thought, I again cast my vote in support of the legislation. This was not an easy decision.

The situs picketing issue has been festering for many years; its roots may be found in the 1951 Denver Building Trades decision of the Supreme Court. In that case, the Court ruled that picketing on an entire construction site by a single craft union was in violation of the secondary boycott provisions of the Taft-Hartley Act.

Unions have felt that the Supreme Court wrongly defined secondary boycotts with respect to the construction industry by unfairly limiting the economic pressure which could be brought to bear on construction employers in order to bargain for employee benefits and wages. They argue that this leverage is available to unions in all other industries where employees working on a common site are employed by a single firm or group of firms in a joint venture. They claim that construction contractors and subcontractors on a single job site are, in fact, engaged in close business relationships and should also be regarded as a single venture for this purpose.

Two years ago during the Ford administration, then Secretary of Labor John Dunlop and others with a great deal of experience and knowledge in this area, fashioned a proposal, at that time supported by President Ford, designed to remedy the inequity the unions saw. They drafted legislation which I supported and which passed last session.

The bill before us last week, which President Carter had said he would agree to, was similar in all important respects. It set out specifically the proper uses of common situs picketing and made clear when it could not be used. It did not allow picketing at one site in furtherance of a dispute at a different site; it prohibited picketing at nonconstruction or industrial workplaces; it prohibited picketing if it was intended to discriminate against anyone with respect to union or nonunion membership; and it prohibited picketing in violation of existing collective bargaining agreements. It required that all interested parties be given 10 days advance notice and that the picketing be approved by the parent labor organization.

More than that, however, amendments which I voted for, were added to the bill that would have meant it would have had very little impact in the 10th District. One amendment exempted from the bill all residential construction other than high rise apartment buildings, another exempted all construction undertaken by a public agency or political subdivision such as a State or county, and a third confined picketing to construction workers only.

Instability within the construction industry remains with us in some part because of the highly fragmented structure of collective bargaining within the industry. Title II of the bill, an important part largely overlooked in the intense and symbolic concentration on the section dealing with picketing, would have established a Construction Industry Collective Bargaining Committee composed of both labor and management, with the Director of the Federal Mediation and Conciliation Service and the Secretary of Labor acting as ex officio members.

This committee was designed to create a more practical system of collective bargaining within the construction industry by establishing certain procedures for negotiations, including a provision requiring that the committee be given notice 60 days before the expiration of an agreement. If the committee decided to assume jurisdiction in the case, it could have required that any strike or lockout be deferred for up to 30 days after the agreement expired. In my opinion the most useful part of the whole bill was the new bargaining process contained in title II.

Whether or not one supports this legislation most people will agree that the construction industry has been extremely unstable for a number of years. Unemployment in the construction industry is very high. Some say that this instability has been due in part from the mistrust and struggle over the situs picketing issue. This has often resulted in higher costs and less attention to the safety and quality standards of the industry. Finally putting this issue to rest could have allowed both labor and management to work together to increase economic stability in this important industry.

Now that the House has made its decision, even though by a very close margin, I hope all sides will put the matter behind them and get on with the job of restoring the construction industry to the prosperous and stable condition necessary for the good health of the whole national economy.

PHILADELPHIA FEDERATION OF AMERICAN HELLENIC SOCIETIES

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. LEDERER. Mr. Speaker, I take a great deal of personal pleasure in sharing with my colleagues in the Congress remarks made by the distinguished Member from Pennsylvania, JOSHUA EILBERG, at a recent ceremony held by the Philadelphia Federation of American Hellenic Societies. Congressman EILBERG was the honored guest at the wreath-laying ceremony held at the Liberty Bell after which the Congressman delivered these remarks at the Judge Edwin O. Lewis Quadrangle at Independence Hall:

REMARKS BY CONGRESSMAN JOSHUA EILBERG

This is an especially joyful occasion, because it marks the 156th anniversary of Greek independence.

The attainment of their freedom by the Greek people should be a matter for rejoicing among all who love democracy; it should be especially treasured by Americans, because the struggle of both our countries for independence has been so closely intertwined.

And how wonderfully intricate that relationship has been.

The great concept of democratic self-government was handed down to mankind from ancient Greece.

In that cradle of democracy, Aristotle and Plato first enunciated the great and enduring principles of government based on the dignity of the individual and the supremacy of the state.

Here in the New World, when we achieved our own independence, America's Founding Fathers took their inspiration from these ancient Greek philosophers—and thus it was that men like Jefferson and Hancock, Adams and Franklin, shaped our democratic, representative government, firmly rooted in individual freedom.

For more than four decades, the American democratic experience shone like a beacon to all the world.

And when, in 1821, the Greeks finally achieved their own independence, among the first voices raised in praise were those of such noted American patriots as Henry Clay and Daniel Webster, James Monroe and James Madison.

It has been like that down through the generations since then—that Greece and America have been the great strongholds of democratic self-government, and that Greece and America have repeatedly stood shoulder

to shoulder whenever peace and freedom were imperilled—whether that peril came from totalitarianism of the Left or Right.

During World War Two, for example, the Greeks played a unique and invaluable role with us in helping defeat the Fascist dictatorships.

And, in the early postwar period, Americans and Greeks cooperated not only in nation-building but in battling the new totalitarian menace of Communism.

During that struggle against the Communist rebels, President Truman was lavish in his praise of "the valor of Greece."

When that battle against Communist totalitarianism was won, and the American Legion of Merit was conferred on King Paul, President Eisenhower saluted Greece for having waged "a battle that thrilled the hearts of all free men and free women everywhere."

The struggle for freedom and human rights is never over; it continues today, and nowhere is the joint American-Greek commitment to freedom more in evidence than in the issue of Cyprus.

For a quarter of a century—ever since Greece and Turkey entered NATO in 1952—those two countries have contended bitterly over Cyprus, and three times have moved to the brink of war.

The blatant Turkish military adventure in Cyprus in 1974—armed intervention mounted with arms and material which the United States had supplied to Turkey for defensive, not aggressive, purposes, brought an angry response from the United States Congress.

Presidents Nixon and Ford, and Secretary of State Kissinger, wanted to continue the flow of U.S. economic and military aid to Turkey, in spite of this open act of aggression in Cyprus.

It was the United States Congress which, banned the sale of arms to Turkey until genuine progress was made toward resolution of the Cyprus issue.

It was the United tSates Congress which, in nine major votes, castigated the aggression of the Turkish troops and supported the restoration of the political independence and territorial integrity of Cyprus consistent with U.N. resolutions.

And it is the United States Congress which already has voted over $50 million for the relief of the Cypriot refugees, and which has demanded their return to their homeland.

Now we have a new Administration in Washington.

President Carter, Secretary of State Vance, and my dear personal friend, U.N. Ambassador Young, have already made clear to the world America's commitment to the cause of human rights.

I suggest that one of the places to apply this principle of human rights is on Cyprus, where those rights have been so grossly violated by Turkey.

It is my hope that the White House will make the same clear commitment that the Congress has made to the independence of Cyprus and the withdrawal of the Turkish invaders.

Last year, the United States celebrated the 200th anniversary of our independence; today, Greece celebrates her 156th.

Both of our countries already have made monumental contributions to the history of western civilization.

But both of our countries know that freedom is never secure, and that the cause of human rights must be constantly defended against those who would destroy liberty.

I am confident that Greece and America are equal to the challenge; I believe that, together, our two great democratic nations will continue to write glorious new chapters reflecting the durability of our democratic institutions.

WELFARE REFORM

HON. DAN QUAYLE

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. QUAYLE. Mr. Speaker, recently the Secretary of Health, Education, and Welfare, Joseph Califano, extended an invitation to Members of Congress to testify before him on the subject of welfare reform. Several of my colleagues and I accepted this opportunity to advocate methods of reform consistent with the views of our constituents, and I am appreciative of the Secretary's efforts to incorporate us in his plans.

I am reprinting here the testimony which I gave because it does represent the views of the people of the Fourth District of Indiana. As such, I believe it also voices the opinions of the majority of American citizens, who would gladly help those in need but who nonetheless object strenuously to tax dollars wasted on welfare fraud.

I would strongly encourage my colleagues to take a personal interest in this problem during this session of Congress. The hour is late to effect real reform, before the tax burden becomes too great and our working citizens rebel. We must eliminate waste in our public assistance programs and insure that the truly needy are aided, as the theory behind the programs originally intended.

The testimony follows:

WELFARE REFORM

(Testimony of the Honorable DAN QUAYLE, Member of Congress, before the Secretary of Health, Education, and Welfare, March 10, 1977, Washington, D.C.)

Mr. Secretary, I am Congressman Dan Quayle, representing the Fourth District of Indiana. I am grateful for the opportunity to appear before you today and to convey a number of my concerns, and those of my constituents, concerning the subject of welfare reform.

Certainly, Mr. Secretary, as I am sure you realize, you have an opportunity of both great magnitude and historical significance to restructure our welfare programs so that they meet the purposes for which they were originally intended. You will be faced, as I am sure you have already encountered, with countless pressures from all directions: for of course many different individuals, groups, and entities have many different definitions of welfare reform. I would urge you, however, to resist the siren call to attempt to meet all of the numerous special interest requests and to keep your eye focused upon the historic purpose and role of public assistance in this country.

That role, Mr. Secretary, is in my opinion fundamentally this: to assist persons who through no fault of their own must rely—and I emphasize must rely—upon aid provided by the working men and women of America through a period of hardship. That period of hardship should—for almost all persons except the permanently handicapped—be as short as possible, so that every means available is used to return the individual, to self-sufficiency and self-support.

Public assistance should not be available to those who, in effect, elect its receipt. It should not be available to the voluntarily unemployed. It should not be so devoid of eligibility criteria that persons can have significant outside resources available to them and still qualify. It should not be so lacking in work requirements that persons can choose a relaxed life-style at taxpayers' expense.

Mr. Secretary, the working men and women of my District share a historic sense of compassion for the truly needy, the persons who have no other recourse but public assistance. They also, however, share a rising sense of indignation and outright rebellion at many of the defects, loopholes, and abuses which exist in the present welfare programs.

They ask, for example:

Is it appropriate to have no gross income ceiling in the Aid to Families with Dependent Children (AFDC) program? Or in the food stamp program?

Is it fair to permit persons to own expensive homes, cars, and send their children to private school, and have that actually assist—because many of these items are deductible—in establishing their welfare eligibility?

Should voluntarily unemployed persons—such as college students and strikers—be able to avail themselves of the various kinds of public programs that were intended for the nation's needy?

Should eligibility verification and quality control be so lax that error rates of 25% and even 50%, plague these programs?

Should caseloads have escalated as dramatically as they did in the late 1960's, a period of relatively prosperous times in the United States?

Should the system allow illegal aliens to become a continuing part of our nation's public assistance rolls?

Should earnings exemptions and work-related expense deductions be manipulated so high-income persons stay on welfare?

Should work requirements be so weak that "suitability of employment can be so defined to enable many persons to refuse work even when it is offered to them?

Should fathers—and other individuals associated with a welfare family—be permitted totally to escape a support responsibility?

These, Mr. Secretary, are only examples; but they illustrate the kinds of concerns that any thinking person has when he examines the defects and loopholes in our present public assistance programs.

As you set about the task of correcting them, or closing them, I would urge that you be guided by a series of fundamental questions, many corresponding to the problem areas that I have outlined above. Is the person's need legitimate or of his own creation? Does he have significant outside resources on which to rely? Is he subject to stringent and operationally effective work requirements? Is his application carefully completed and verified? Is he subject to frequent, periodic reverification and re-investigation? Must he use every resource at his command again to become self-sufficient?

Permit me, if you will, to go into some of these problem areas in somewhat greater detail. We have, as you know, the so-called "$30 and ⅓" provision in AFDC—the first $30, plus one-third of the remainder, of outside income is exempt from consideration: that is, it is not subtracted from the aid level to which the person would otherwise be entitled. Coupled with the absence of a gross income ceiling, this permits persons with relatively high incomes to continue to receive a welfare supplement.

Now, when this was first conceived, and this is still the case in the minds of many policy-makers, its entire purpose was to serve as a work-incentive: to encourage persons to go to work, and not have their welfare grants reduced $1 for $1. The problem is that it has a "boomerang" effect—persons stay on welfare for longer periods of time, collecting more in cumulative benefits than if, at some point, their welfare eligibility were termi-

nated. Your own Department has statistics which indicates that the "$30 and ⅓" costs us $10 for every $1 that it "saves"—that is, for every dollar in public assistance that is saved by persons responding to the work incentive, it costs us $10 to pay for all of the exempted income for those who remain.

Well, one might say, at least the amount being paid is less than what would otherwise be paid if the person stayed on welfare at the full grant level—i.e., if he chose not to pursue the work alternative and, instead, to receive public assistance. The answer to that is clear: he ought not to have that choice in the first place, if a job is available to him.

Thus, in these and other areas, Mr. Secretary, I would urge you to re-examine the kind of "conventional wisdom" that seems to permeate so many of our welfare accretions over the last thirty years. Does the work incentive work, or is it a costly failure? Do social services achieve what they set out to do—and what is it, exactly, that social services set out to do? Have they achieved their promised goals, set forth in 1962, of being a significant force for reducing caseloads and lessening dependency? Or are we simply spending $2.5 billion, perhaps soon to become over $3 billion, with no evidence of a cost/benefit analysis in our social services programs?

Test—examine—critically evaluate—and apply the test of common sense. Social theorists in Washington may have every conceivable solution for all of the problems which exist—and perhaps for some which do not exist—but the autoworker in Fort Wayne or the druggist in Angola often knows far better what works, and what doesn't, when it comes to the question of what motivates a man to support himself and his family.

And that leads to two final concerns. First, I would strongly urge you to resist the call for further federalization of these programs. That is not the answer: I know that, I suspect you must know that, and the nation's taxpayers certainly know that. Some State and local officials, in the desperate wish to rid themselves of the growing burden of welfare programs, wish to ship them over the horizon to Washington—forgetting that it was Washington which created them, mandates them, and often makes them infinitely worse; forgetting that federal taxpayers are no different than State or local taxpayers. Resist, if you will, Mr. Secretary, the shell game of "federalization, integration, and simplification"—surely these programs must be made more rational and orderly, but the place to do it, and to bring them under effective control, is at the State and local level: where both the problems, and the solutions, are understood often with far greater insight and perception than they are in Washington—much as you and I might not like to admit that.

Secondly, Mr. Secretary, in the same vein, listen to what the heart of America is saying on this issue. Listen to the pleas for restructuring public assistance so that only the legitimately needy consume what the taxpayer produces. The same social theorists who will urge you to federalize are urging you to relax the eligibility standards, to pursue a kind of guaranteed annual income, so that even more of the nation's population will become dependent upon the public dole. For the very sake of the future of this nation, for the ability of this economy to sustain and withstand the kinds of demands that are being placed upon it, you must resist that kind of non-solution, that kind of Trojan horse.

For the problem is critical and the hour is late: one of your predecessors pointed out quite correctly that, by the year 2000, if we have no new expansions and simply continue our present social program—50% of the American people will be living off the other 50%. Even if other governmental spending, including defense, were reduced—as we have been doing—to fund these escalating programs, these would not be enough left to meet their voracious appetites. We must bring them under control, not expand them. We must respond to the call for real, lasting, and meaningful welfare reform, not some kind of deceptive imagery which lulls the nation's taxpayers into hoped-for inattention to what is in fact being done to them. We must give the working men and women of America a legacy, and a promise, that we will bring the nation's welfare programs under control. For if we continue the way we are now, or if your solution worsens the economic impact which I assure you they feel, they will not be inattentive or apathetic. They will rise up and insist that government no longer take from them, in the name of income transfer and in increasingly larger amounts, what they have worked so hard to achieve and what, by every standard of justice and equity, is rightfully theirs.

ENERGY SHORTAGE

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. TEAGUE. Mr. Speaker, Dr. Richard Wainerdi of Texas A & M University, a gentleman for whom I have much admiration and respect appeared recently at a news conference, arranged by the Texas Electric Service Co., relating to our energy problems.

Under leave to extend my remarks in the RECORD I wish to place the following article which appeared in the Fort Worth Star Telegram for March 10, reporting on this conference:

EXPERTS PAINT GRIM PICTURE OF ENERGY SHORTAGE

(By Royce Yancey)

This country's potentially critical energy situation has been neglected so long that measures even more distasteful than rationing may be in store for Americans.

As unreal as it may seem, there is a definite possibility that by 1985 there will be "people coming around to check the temperature in your home," Dr. John McKetta, a nationally known energy expert and professor of chemical engineering at the University of Texas at Austin, predicted here Wednesday.

Although he did not spell out details of how such temperature checks in private homes would be made, it would obviously have to be some form of governmental inspection, his remarks suggested.

Dr. McKetta and Dr. Richard Wainerdi, director of the Center of Energy and Mineral Resources at Texas A&M University, appeared at a news conference arranged by Texas Electric Service Co.

They were among the speakers at an energy science symposium at Scott Theater Wednesday afternoon when TESCO offered senior high school students a broad look at the energy situation.

McKetta, former chairman of the National Energy Policy Committee, said "the saddest part of all" about the energy crisis "is that it is true. The people of Texas know this, but in other parts of the country the public has been hard to convince," he said.

"I suspect that real soon President Carter will get on TV and tell the people that the energy crisis is real," McKetta said. The nation has been hit hard by the energy problem and there will be no quick solution, he added.

"Great sacrifices are needed. Many have been lead to believe that the energy crisis will be solved by 1985 or 1990 or 1995, but this simply is not true. It's too late to bring the energy supply up. It will continue to decline at a rate of 3 per cent per year," McKetta warned.

It is wishful thinking to believe in a short-term solution, McKetta said. "There are many things an individual can do to save energy and help alleviate the problem." He cited car-pooling and heating only two rooms in a three-bedroom, two-bath home as examples.

He predicted "we will have to live this way" for the foreseeable future. If the nation does not learn to cope, and at the rate it is going now, its tab for imported oil will be $150 billion annually by 1985.

McKetta said he doubts any Fort Worth resident will have to do without natural gas, but that very little of the new gas supply will find its way into interstate markets.

He said that legislators who have promised energy at no economic impact, will continue to point the finger at energy producers but "the public is getting wise."

Wainerdi said Texas' energy sources "are being exploited," and worst of all "there is a treasure in petrochemicals which should be saved for the future."

He said the state of Ohio, which recently advertised for gas purchases in Texas, "should drill for its own gas, not drain Texas." He said there is plenty of gas to be found in Ohio and under Lake Erie, but if Ohio and Pennsylvania did it now, it would be eight years before it would be available.

Wainerdi said he believes offshore drilling does not impair beaches and cited Padre Island as an example of beaches that have not been hurt by offshore wells.

He said there must be alternative fuels to replace imported oil and that nuclear power plants offer the "quickest and safest" solution.

Wainerdi said the United States already has the technology and a 22-year safety record in the production of electricity from nuclear power plants, while other sources such as solar energy and hydrogen fusion, are years away.

"We don't have the technology yet and it will be too expensive to be developed by private industry alone," he said.

He said nuclear power plants generated 10.6 per cent of the nation's electricity in August 1976, and with a perfect safety record of 22 years there is no reason why "we should not follow the lead of France," which has limited all of its power plant construction to nuclear sources.

Wainerdi denounced the long delays for energy consumers, "with tons of paper work and the regulatory attitude of the government. He said it was "stupid" for an intervenor to be able to delay a nuclear power plant for four or five years, or longer, "generally for inadequate reasons."

He said there are two ways to measure the cost of electricity—by the kilowatt or "whether we have it at all. We must train ourselves on priorities. The dangers of technology have been overstated and we can cope."

He said he expects solar energy and fusion will continue to offer technical problems for another 50 years.

Asked if he expects Congress to decontrol oil and gas prices, McKetta said "No." He said the most "we can hope for is a two-tier system of pricing for new and old gas. He expects new gas to be highly sensitive to market demand, with prices ranging from $5 to $6 per million BTUs in the future.

"That will hurt," he said, but "it's the most we can hope for" McKetta said it is up to Texas, not Congress, to prevent the confiscation of Texas gas supplies for the benefit of other sections of the nation.

He noted that during a recent speaking tour in the North and East, he found that "Texas and Louisianians" were "the most

disliked. We have the oil and gas and they don't."

Wainerdi said he "is an optimist. We will come out of it (the energy crisis), but how long it will take is anybody's guess. We must have a comprehensive national energy policy. Our future demands it.

"There are a number of ways to make energy and we can cope, but the lack of government motivation is profound," Wainerdi concluded.

A TRIBUTE TO HAL SHEAN

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. ANDERSON of California. Mr. Speaker, this summer one of the truly illustrious careers in California organized labor will come to a close with the retirement of Harold W. Shean. After 37 years of full-time service with the International Association of Machinists, Hal—as he is known to his many friends—is stepping down from his current position as international representative in charge of safety-legislation-health-apprenticeships and new technology programs in California, Arizona, Nevada, New Mexico, and Hawaii.

A native of Chicago, Hal Shean was born on August 31, 1912. Educated in the public school system there, he came to California and like so many before him, soon became a worker in the growing aircraft industry of that day—in this case, in a McDonnell Douglas plant.

Hal Shean has devoted his intelligence, energy and enthusiasm on behalf of organized labor in many capacities. He has served as president of Machinists Union Lodge 727–I in Burbank, as well as the business representative and the research director for the International Association of Machinists in Burbank. In addition, Hal has served as the Machinists Union's educational director for California, Nevada, New Mexico, and Arizona; as national contract coordinator for General Dynamics, Douglas, Lockheed, and other companies; and as safety coordinator for Aerospace.

Hal Shean serves on a number of national assignments for the machinists as well. He is a member of the National Safety Council, which is headquartered in his hometown of Chicago. He has served as president or chairman of the National Council of Aircraft Unions for 6 years, and as chairman of the National Council on Electronics and New Technology for 12 years.

Within California, Hal Shean has been active on a number of fronts on behalf of the organized labor movement. He was appointed to the State technical services advisory board by Gov. Edmund G. Brown in 1963, and again in 1968 by Gov. Ronald Reagan. Governor Brown also appointed Hal Shean to the manpower, automation, and new technology commission in 1963. In 1972 he was appointed by Governor Reagan to the advisory board on safety.

Hal Shean has been a leader in California labor circles for many years, and as such has represented the working man and woman on many advisory boards in Government. He has also been extremely active in civic affairs, as an involved and concerned member of the community. Hal has served on the boards of San Fernando Valley Red Cross and medical group in Los Angeles; the Defense Manpower Board; and as vice president of the California State Federation of Labor. In addition, Hal Shean was a designee to the Industrial College of the Armed Forces from 1951 to 1952; served on the executive board, California Health Plans Alternatives.

Mr. Speaker, Harold Shean has devoted his career to the improvement of society for the working man and woman. His longstanding concern with safety, especially important among the membership of a union involved in heavy industry, has gone a long way toward improving working conditions for members of the Machinists Union and their fellow workers.

My wife, Lee, joins me at this time in congratulating Hal Shean on an outstanding career in organized labor, and in wishing him a healthy and productive retirement. His lovely wife, Madeline, and their sons, Fred, Bill, and Chris, must all be understandably proud of their father's fine career and many achievements.

THE LINE WAS BUSY

HON. ANDREW JACOBS, JR.

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. JACOBS. Mr. Speaker, the line was busy:

INDIANAPOLIS, IND., *March 8, 1977.*

DEAR MR. PRESIDENT: Since I did not get through on my call during the phone-in, I accept your invitation to write. I shall write of my situation not because I personally merit your consideration, but because I am typical of a class of senior citizens who are given no consideration in the very popular senior citizens' programs of the day.

I was in my early twenties when my father worked himself to death trying to hang on to his farm during the great depression. I worked my way through college by cleaning dormitories. With my first job in one of the lowest paying professions (teaching), I contributed to my mother's support and began a savings account for old age.

During World War II I became a naval officer purely and devotedly to help my country. I continued to support my mother rather than declare her a dependent and let the Navy support her. Although my husband died after twenty-three years of service to his country, the navy does not contribute to my support. It did contribute for a few years to my son. With my teaching and his work program, our son went through two of the best colleges in the country, and I have always managed to put something in savings. I have always paid my debts, contributed to charities (I no longer contribute to charities since the government taxes me for its charity programs), and abided by the law. I remember a speech I gave once at a political rally in which I said I was proud to pay my taxes. I meant it. Now, the only reason I don't cheat on my tax reports is fear. I was, indeed, a person who asked what he could do for his country, and I did not expect my country to do for me.

So now I have retired. I do not eat the free meals which are provided for the senior citizens, and which cost God only knows how much. I do not ride the buses for reduced rates. I do not live in government housing nor do I get the taxes on my house reduced. What does my country do TO me? It takes a big hunk out of the interest I get on those life savings so that instead of living in the comfort I have saved for, I live on the fringe of the economy. Who gets my husband's social security? Perhaps someone who was dining on steaks while I was frying eggs and potatoes and raising my own vegetables.

My patriotism has been profound. Any pupil I have had in my thirty-plus years of teaching would so testify. I no longer feel patriotic. I say this not to flaunt my lack of it. I say this with a confidential sadness: an emptiness. I miss the elation which our stars and stripes—even a presidential inauguration—formerly provided me.

I am not alone. There are many senior citizens like me out here. The details of their lives differ from mine, but their experiences have led them to similar situations. We are not permitted to work, but we must continue to pay income tax! We deserve the interest on the money we have been saving all these years while the rate of inflation was taking away more than the interest was bringing us.

Yours truly,

BERTHA C. STARKUS.

LIMITED CONGRESSIONAL TERMS

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. KASTEN. Mr. Speaker, after recent congressional scandals that have further undermined the faith of the people in their Government, it is time for us to reevaluate the role of our elected officials and determine how we can best attract and maintain a continuous flow of creative ideas and talent into Government.

To do that, we must insure that our elected officials are sensitive to the needs and aspirations of their constituents, and that they have not been in office so long that they have lost touch with the people they serve. Responsive Government demands leaders who reflect the public will, not professional politicians whose sole desire is to perpetuate themselves in office.

Today I am introducing legislation which would limit the terms of U.S. Congressmen and Senators. The constitutional amendment I propose would limit the terms of Congressmen to six 2-year terms, or 12 years, and would limit the terms of Senators to two 6-year terms, or 12 years.

As I travel throughout my district and visit with my constituents, I have learned much about their frustrations and anger with the "politicians" in Washington who no longer seem to hear their voices of outrage.

The people are tired of being hit by high taxes and inflation, while watching Congress approve budget deficits. The people are demanding an end to the constant barrage of Government regulations, and yet they see on a daily basis

the steady stream of paperwork pouring from various Federal agencies. The people said "no" to a $13,000 pay raise for Members of Congress, and yet watched that pay raise take effect without the accountability of a vote.

There is insufficient movement in and out of Congress, which needs new blood and fresh thoughts to revitalize it. Unlike local officials who are close to the people. Representatives far away in Washington often lose touch with the people after awhile. Too many have become professional officeholders rather than servants of the people.

By limiting terms, we encourage new persons to enter the political arena with fresh ideas and enthusiasm to represent the people.

Limited terms will give many more people the opportunity to trade private life for public service—and yet never be so far from the people that the concerns of middle-income taxpayers are forgotten.

More important, unless those who serve in public office return to private life, they will never fully know the impact of the laws they passed.

Mr. Speaker, the 95th Congress should spearhead the Nation's debate on limiting the terms of federally elected officials. Passage of a constitutional amendment would bring the issue before the 50 State legislatures, the governmental units much closer to the people than the Halls of Congress. It is there—where the people's voices cannot be ignored—that the issue should be resolved.

COMMUNITY SERVICE OF O. C. WHITE

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. REUSS. Mr. Speaker, I want to share with my colleagues the fine public service record of Mr. O. C. White of Milwaukee, who was honored recently in a special section published by the Milwaukee Community Journal.

Mr. White was a pioneer in black radio programming in Milwaukee, and he has used his prominence as a disc jockey to accomplish good in Milwaukee's black community.

He is the founder of the O. C. White Soul Club, which provides work and a home away from home for inner-city youngsters. Every summer members of the Soul Club work as painters and carpenters, fixing up homes in the central city.

And in the recent harsh winter, Soul Club members made emergency deliveries of fuel oil to families whose supplies had gone dry.

All his life, Mr. White has broken the barriers of race, and he has excelled in everything he tried. In the 1950's, he worked on road construction crews, and was one of the first black men around Milwaukee to drive heavy construction equipment.

At the same time he played organized football with the Racine Cardinals, and at one point had a chance to sign with what is now the Oakland Raider team.

He got his start on radio when Manny Mauldin, Jr., gave him a few minutes on his radio show.

Mr. White recalled recently:

Back then, there was just no way that a Black D.J. was going to be on the radio after 6 a.m. You had to be on and off before the white folks got up in the morning. That was the extent of Black programming. Manny was on from 5 until 6 a.m. back then. He gave me 15 minutes of that hour to do my thing.

In 1964, he and Hoyt "Dr. Bop" Locke started broadcasting together on radio station WAWA, and black programing finally saw the light of day on Milwaukee airwaves.

It was in those days that Mr. White began the grueling schedule that he still keeps today. At first, he kept his construction job, and would sandwich that work between his times on the air. He would broadcast from 5 to 8 a.m., then drive bulldozers until 5 p.m., when he would go back on the air for another 3 hours.

Today his schedule is just as rough. He is general manager of station WAWA, head of his Soul Club, and a candidate for a Ph. D. in policy studies. His day begins at 3:30 a.m. and ends around 11 p.m., and it is packed with work and study.

At the Soul Club, he stresses to his young friends that education is needed more than anything to put the black community on an equal footing in Milwaukee—and in the country.

"We have the greatest potential to make our own opportunities very productive in this city," he says. With education, he says, a young black can pull himself up—

Tell those kids who have a hole in their shoe and one sock, not to give up. It can be done . . . I was there too. When I was going to Lincoln High School . . . my shoes were so thin I could stand up and study agriculture and lay down to study astronomy.

The opportunities are nine times as great now as then. I tell children today not to depend on welfare for tomorrow. Welfare is a handout and that hand just might pull in.

You may not have much and may not be able to do big things, but you can do small things in such a big way.

RECOMPUTATION LEGISLATION

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. GONZALEZ. Mr. Speaker, I am again proposing recomputation legislation for retired members of the military. In the past Congresses my bills have called for complete recomputation for all retirees who were affected by the change in the retirement policy in 1958, but, in view of the economic realities of the military budget, I am today proposing a compromise measure.

The subject of recomputation is a complex one and there has been considerable debate on this subject ever since 1958 when the 100-year-old tradition of tying annuities directly to active pay scales was abandoned in favor of a cost-of-living increase system. However, the new system has not proved beneficial to the retirees and I feel we have broken faith with those who relied on a comfortable retirement after many years of dedicated service to our country.

The bill I am proposing, which has been passed by the Senate on several occasions provides for a one-time recomputation of military retired pay. Those who are covered under my proposal are disability retirees with a rating of 30 percent or more, military retirees who are 60 years of age or older, present retirees when they reach 60 based on the January 1, 1972 pay scales with any subsequent cost-of-living raises, and pre-1949 disability retirees, who would have the option to remain under the current retirement laws or to come under the new computation legislation at their actual degree of disability.

The opponents of recomputation, and there are many, continually emphasize that the cost of such legislation is prohibitive. I am not trying to minimize the cost because it is certainly a factor that will have to be considered, but if you take any program currently on the books and calculate the cost to the year 2000, as some have done to discredit recomputation, the figures would be just as staggering.

Mr. Speaker, it is no secret that all those living on a fixed income have had a difficult time in the past few years because of the soaring inflation our country has been experiencing, but those military retirees effected by the 1958 change in the law can only feel a sense of frustration and betrayal knowing that they would have been in a better financial position if Congress had not broken its promise and changed the retirement program after they had fulfilled their commitment.

The legislation I am proposing is long overdue and I hope we can have it enacted into law in this Congress in order to provide those retirees with the income they need and deserve for the service and dedication they provided our country in its time of need.

MANDATORY RETIREMENT: THE ALL-AMERICAN TRAGEDY

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. FINDLEY. Mr. Speaker, an article by Leo Branham, published a few months ago in the Moberly Monitor-Index of Moberly, Mo., recently came to my attention. It illustrates the injustice of mandatory retirement, the last major form of discrimination still allowed by law. After being forced to retire from the journalism profession, Mr. Branham

established a new and personally rewarding career in landscape gardening. But he did so only after near superhuman courage and perseverance which many might not be able to muster.

With his well-written article Mr. Branham demonstrates that, but for mandatory retirement, he could still be an excellent newspaperman. It is well past time we outlawed the cruel practice of forcing people into retirement merely because they reach an arbitrary age.

The article follows:

FORMER MOBERLYAN FINDS NEW LIFE IN RETIREMENT

From minor Associated Press executive (editorial and administrative supervisor, AP-World Service Division, which serves news to over 100 countries) to landscape-gardener.

That's the seven-league boot journey I've traveled the past three years. Downward, perhaps, from social and professional viewpoints. Maybe, I couldn't care less. It's been a lifesaver for me. Stimulated a new zest for life.

When AP's mandatory retirement caught up with me I wasn't ready for it. I shall never be ready—so long as health continues. I found retirement the most traumatic, painful and humiliating experience of my life.

Yes, even humiliating. For I felt ruthlessly kicked out of a beloved profession to which I had devoted my entire working life. Also, most of my AP colleagues, friends, and neighbors in my home town of Stanford, Conn., thought I was much younger than I am. Somehow, I had never got around to putting them straight. The unmasking via retirement was a bit embarrassing—and damaging to the ol' ego.

Mandatory retirement, in my opinion, is the all-American tragedy of our times. Most men reaching 65-year retirement are in good health, in the very prime of life, at the height of their mental powers and professional expertise. Dumping such men—unfairly branded unwanted, unneeded and useless—on a human scrap heap is barbaric. It's an awesome waste of skilled manpower. When will business and the professions evaluate a man first, of course, on merit, then on his functional age, not his chronological years?

I'll bet the functional age of most retirees is well below their calendar years. My own physical age is many years under my chronological figure. I think I have demonstrated that by the work I've done since "graduating" from AP in 1973.

I wrote the first of around 50 job application letters before my retirement date. Prospects for two government jobs in New York, one a Voice of America post, seemed good. These prospects evaporated when President Nixon announced budget cuts and staff reductions.

I sought work with various news media, magazines, publishing firms and public relations offices. Because of the recession it was a poor time to seek employment. Numerous concerns replied they had the same mandatory retirement rule as AP. My hopes soared when one of the largest PR firms in New York interviewed me three times. The fact that I was an ex-war correspondent and had worked abroad seemed to improve my chances. I was told two vice presidents recommended I be hired. However, top brass finally ruled me out because of my age.

Eventually, I got a part time job as a copy desk editor and headline writer on one of the Gannett papers in a nearby city. After several months, a 30-year-old editor succeeded the fiftyish one who had hired me. Young ed wanted only young faces around the copy rim. Out I went. First time in my life I was fired from a job.

I wrote more letters. Some brought interviews. But the age factor proved an insurmountable obstacle. My final interview had been a very encouraging one with a Stamford head office of a national concern. Prospects appeared good. But a week later came word a young man had applied since my interview and they had decided to hire him.

I gave up.

"If no one will hire me for my brains and know-how, maybe they will for my muscles," I told myself. For I had recalled that my son, Robbie, had worked two college summer vacations at a plush country club near Stamford.

I asked the club's greens superintendent for a job. Surprise! I was hired immediately. I was placed in charge of planting and caring for flower beds and the lawn around the clubhouse.

Over the years, I'd often "knocked myself out" working weekends with my wife, Milly, on our home grounds. On our place in Stamford we have besides towering maple, oak and evergreen trees, 60 kinds of flowers and shrubs, a big lawn, three rock gardens, a vegetable garden and a lovely hillside picnic area with a flat fieldstone patio and a big barbecue fireplace.

We'd made a beautiful place out of what once had been a wilderness of giant weeds, fallen trees and rocks. In the process, we had learned to become pretty good landscape gardeners.

After those weekend orgies of hard work I'd always had a week at the office to recuperate from aches and pains. But now, at the country club, I was pitted daily against 20 and 23-year-olds on the greens crew and expected to keep pace with them. I did, but oh, brother, it was one of the toughest ordeals I've ever experienced.

Many nights my bones and muscles ached so badly I literally dragged—and doubted I could report for work the next morning. But I did.

Gradually, I toughened up. Then, as now, I can push a heavy lawnmower, dig flower beds, plant anything, reseed and fertilize lawns, rake leaves or grass, shovel snow and perform other manual chores all day long with no more than normal fatigue. At the end of the day, then and now, after a shower, an hour's reading and relaxation and a pre-dinner cocktail I'm as chipper as ever.

Country club members sometimes stopped to chat with me about my flowers. Several asked if I would be interested in working for them when I finished at the club. That gave me an idea. Why not go into business for myself?

When my job ended last November the club manager phoned a New York business man he said had asked about me. The manager arranged an interview.

A year-around job resulted from that interview.

With Milly as partner, I formed my own landscape gardner service. Milly is also company bookkeeper. Her thumb is even greener than mine and she's proved invaluable in helping me design landscaping plans for my work projects. Together we case area nurseries for best buys and new ideas.

So far I've confined my work to two large estates in the affluent "Ridges" section of rural North Stamford. One is owned by the president of a multimillion dollar business in New York City. The other is owned by the treasurer of the same company. Both men are relatively new to "country" living in the Stamford area.

They've placed landscaping, plantings and care of their respective grounds in my hands. Milly and I have designed and I have planted rose and various other flower beds and borders. I made over an entire hillside adjoining a driveway on one estate with pachysandra, juniper, laurel, rhododendron, heather, and other kinds of ground cover greenery.

The lawn is so large at one estate I use a small tractor and a 3-unit gang lawnmower to cut the grass. A mechanized lawnsweeper and leaf blowers reduce much manual raking.

Winter before last I built large work benches in the basement of each estate and completely equipped them with all kinds of tools. I did home repairs, indoor painting, snow shoveling and other chores.

Thus goes my new "career," one I never dreamed I'd ever enter.

Landscape gardners are in demand in this area. I'm sure the same situation exists in many other parts of the country. I recommend my new kind of work to any other retiree with a green thumb who is bored with inactivity. I could work seven days a week if I wished.

But except for an occasional extra day, I hold my work week to four days, two at each estate. This leaves me three days a week to work on my own place and roam Long Island Sound in my 20-foot, 115 HP, cabin cruiser fishing for Blues, Striped Bass, Blackfish, Porgies and Flounders.

I have a medical checkup every three months. I am, my doctor says, in tip top condition. My consistent blood pressure readings of around 120 over 90 "can't be beaten for a man of my age," he adds.

Doc says the daily exercise and fresh air resulting from my job will "probably add years" to my life. Hope he's right.

VICENTE T. BLAZ, USMC BECOMES FIRST GUAMANIAN GENERAL

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. WON PAT. Mr. Speaker, today I wish to share with you and our fellow Members a matter which has brought me great personal pleasure and which represents a true milestone in the cultural development of my entire district of Guam and its Chamorro people.

Recently I was privileged to take part in ceremonies in the office of the Commandant of the U.S. Marine Corps when one of my constituents, Vicente T. Blaz was promoted to brigadier general.

I am well aware that in the districts of most of my colleagues such an occasion would be a notable one but hardly a milestone. However, in this instance, General Blaz is the forerunner of entirely new generations of Guamanians and as such is the first Guamanian to reach general rank in any of the U.S. military services.

We of Guam are very proud of the fact that Guamanians serve in our armed services on a per capita rate approximately six times the national average. However, it was somewhat an accident of birth that General Blaz was even eligible to become a U.S. military commissioned officer. He graduated from the University of Notre Dame in 1951 and received his commission. Only the previous year did he, and all other Guamanians, become U.S. citizens.

Thus, Brigadier General Blaz was the first native of Guam to receive a commission. He has continued to be first in his military and academic endeavors since.

In receiving his promotion and one star flag from Marine Commandant Gen.

Lewis Wilson, Brigadier General Blaz credited his family, the people of Guam, the Nation, and the Marine Corps for his being able to seek and attain his present success. However, in most instances of this nature, it was the personal motivation and performance of the individual himself who, despite immense handicaps, made the primary contributions to his success.

One of his major handicaps was early education. Vicente Blaz was born on Guam, one of eight children of Rita Blaz and the late Vicente C. Blaz. Educational opportunities on Guam at that time were very limited. During his teenage years Brigadier General Blaz remained on Guam during almost 3 years of Japanese occupation during World War II.

Despite these learning setbacks, Vicente Blaz had set his own goals and through personal striving qualified for a scholarship and for admission to the University of Notre Dame in 1947.

Since then he has received a master's degree in personnel management from George Washington University, an honorary doctor of laws degree from the University of Guam and was a "distinguished graduate" of the College of Naval Warfare at Newport, R.I.

His military career has been equally noteworthy. Among other duties, he has served as a base legal officer, an infantry company commander in Korea, operations officer of the 9th Marine Regiment during combat operations in Vietnam, and represented the Joint Chiefs of Staff on three delegations to multinational negotiations in Europe.

As a sidelight, Brigadier General Blaz' life has been uniquely tied to the 9th Marine Regment. Not only did he serve as its operations officer in Vietnam, it was his first unit as a junior officer in Japan and was later its commanding officer. He now has received his general's stars and flag personally from General Wilson who was awarded the Congressional Medal of Honor while a company commander in the 9th Marines for actions during the 1944 liberation of Guam.

Mr. Speaker, I am personally very proud to bring this matter to the attention of the House. Brig. Gen. Vicente T. Blaz represents the first generation of Guamanians to reach adulthood as U.S. citizens. We of Guam are exceedingly proud of him and his accomplishments. Moreover, he is a credit not only to our island but also to the U.S. Marine Corps and our Nation.

MRS. CHERYLE WILLIS HONORED BY CLEVELAND JAYCEES

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. STOKES. Mr. Speaker, Mrs. Cheryle Wills, an outstanding young woman in my district in Cleveland, Ohio, has recently been named as this year's recipient of the Cleveland Jaycees Distinguished Service Award. I would like to add, Mr. Speaker, that this is the first time that a woman has received this honor which has been presented annually since 1938 for outstanding contributions to the community.

It is an understatement to say that Mrs. Wills is deserving of this award. She has been at the forefront of numerous projects and organizations for civic and social betterment and has served her community with unusual commitment and zeal.

Mr. Speaker, so that you and my colleagues in the House can familiarize yourselves with Mrs. Wills' community service record, I would like to take this opportunity to give you a brief biographical sketch of her work in Cleveland.

Currently, Mrs. Wills' career ranges from mother, to housewife, to business director, to civic activist. She is a licensed funeral director and was the first woman officer of Goodwill industries in its 58-year history. Her affiliations are many, but I believe that it is important for us to hear them in order to assess the extent of her impact on the city of Cleveland.

CIVIC ORGANIZATIONS

Phillis Wheatley Association, trustee, immediate past president, and cochairperson of the membership drive.

Greater Cleveland Neighborhood Centers, trustee.

Central Multi-Service Center, trustee, chairman finance committee.

Y.W.C.A., trustee, co-chairperson personnel committee, member financial development committee.

Community Services Center, chairman of the board.

Karamu, trustee, member of finance committee.

United Torch Services, trustee, vice president, administration, member health allocation panel, member priorities determination committee.

Cleveland Public Library, trustee, chairman of personnel committee, secretary of the board.

Catholic Family Services, trustee, member of adoptions committee.

Golden Age Centers of Cleveland, trustee, secretary board of directors, chairperson, King Kennedy Golden Age Center.

Goodwill Industries, trustee, secretary board of directors, member public relations committee.

National Black Caucus on Aging, trustee, State chairperson of membership.

NAACP, trustee.

Woman Space, trustee.

Friendly Town, trustee.

Buckeye Health Plan, trustee, member of marketing committee.

Cleveland Arts Council, trustee.

Dyke College, corporation trustee.

Martin Luther King Plaza, corporate trustee.

Central Businessmen Alliance, convener.

Lake Front Forum, convener.

Mr. Speaker, Mrs. Wills is also a member of the Community Planning Youth Commission, Junior Women's Committee of the Cleveland Orchestra, the Delta Sigma Theta Sorority, and the Urban League of Cleveland. May I add, Mr. Speaker, that Mrs. Wills has been of enormous assistance to me as a consultant and tireless campaign worker.

Mr. Speaker, I have spoken of Mrs. Wills' professional and civic responsibilities but I would be remiss if I did not make reference to her wonderful family. She is married to Guy A. Wills and is the mother of Jae, age 13 and Duane, age 8.

At this time, I would like to ask my colleagues to join me in congratulating Mrs. Wills for her outstanding service to Cleveland. She is one of those committed individuals who never passes along the responsibilities to others. When there is a job to be done, Mrs. Wills is always on the case. I know that I speak for my constituents and all socially responsive citizens in Greater Cleveland when I say thank you Cheryle Wills for a job magnificently done.

HUMAN LIFE AMENDMENT

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. YOUNG of Missouri. Mr. Speaker, last week I introduced the following constitutional amendment with respect to the right to life:

SECTION 1. With respect to the right to life, the word "person" as used in this Article and in the Fifth and Fourteenth Articles of Amendment to the Constitution of the United States applies to all human beings, including their unborn offspring at every stage of their biological development, irrespective of age, health, function, or condition of dependency.

SECTION 2. Nothing in this Article shall prohibit medical procedures which physically verificable facts establish as necessary to prevent the death of a pregnant woman.

SECTION 3. The Congress and the several States shall have power to enforce this Article through appropriate legislation.

At that time I asked permission to extend my remarks; I would like to take that opportunity now.

As a society, we are attempting to establish world food reserves to feed all people and support human rights recognized by every government. We want the world to look upon us as moral leaders—the compassionate, the caring, the generous. Yet, as a society, we daily destroy our Nation's greatest potential—people.

I have heard the argument that some children are unwanted, and therefore should be aborted. Have we as a nation truly decided that it is better to be unborn than unwanted? That in the long haul, for financial reasons, it is better to abort a child than feed and clothe it?

Unfortunately, the answer appears to be yes. Our society through the courts has sanctioned the viewpoint that life is secondary to convenience, and that some individuals have the right to deny existence to others, simply because those individuals have decided a child would inconvenience them.

The decisions of the Supreme Court

can be changed by law. This national disgrace of our attitude toward life can be changed. I have introduced a constitutional amendment with respect to life in a spirit of optimism that life is worth living.

I would like to submit two articles dealing with this vital and basic issue. I urge all Members to review these writings and offer comments of their own.

The first article is a recent editorial by KMOX-Radio, the CBS station in St. Louis. The editorial, entitled "Abortion: A Growth Industry?" was presented by Robert Hyland, regional vice president of the CBS Radio Division. The editorial follows:

We Americans are fascinated by facts and figures that reflect growth: a higher gross national product; a record harvest; increases in sales; housing starts; exports to other nations. We regard these growth figures as an index of our national vitality.

But there is one set of growth figures that should not give us a feeling of pride. In fact, they should appall us. These are the statistics on abortion. In 1970, there were 193,000 legal abortions in our nation. Last year there were 1,300,000. The 1980 forecast is for 2,800,000 abortions. That a staggering ten-year growth rate of 1,451 percent.

Look at the figures another way. In the last five years, there were five million abortions. That's ten times the number of Americans killed in all wars in our nation's 200 years and over a thousand times the number of deaths in the Vietnam war.

We know that many sincere, dedicated people believe in legalized abortion. They regard a woman's decision to bear—or not to bear—an unborn child as a private matter—between her and her doctor—not a social issue. These spokesmen cite the number of unwanted, neglected and abused children as one justification for the legal right to end the life of the unborn.

We do not deny the tragedy of the unwanted baby, but as we have stated many times, we believe there are alternatives. Adoption is one. Counseling and aiding the mother in keeping her baby is another.

We urge those who favor legalized abortion to consider the shocking increase in its usage. Surely our just, democratic and compassionate nation can find alternatives to killing millions of innocent infants. Do we really want to turn abortion into a growth industry?

The second article is by Ed Raterman, a Midwestern farmer and prominent member of Missouri Citizens for Life. The following article, entitled "A Non-Expert's Rejoinder to Abortion," is reprinted from the National Pro-Life Journal and follows:

As a farmer, I find it unnecessary to agonize when life begins, or the kind of life to anticipate if the source is known. Having sown many acres of wheat that within seven days of planting is visible to the naked eye, very much alive, and undergoing constant change, I have long been convinced that germination was almost immediate upon contact of seed with soil and moisture. The same is true of any seed, be it corn, sorghum, milo, or maize. Germination is but the beginning of a progression that is continuous until harvest, a harvest that will reap and reflect only that which was initially deposited into the ground. This is a fact undeniable and without need of proof. This is a fact wherever biological activity takes place, and yet, the amassed and awesome intelligence of the Supreme Court simply ignored what every realist truly knows and appreciates.

The above determination is no less apparent or expected, if one mates a cow or heifer to a bull, the only known resulting progeny is always a calf. A hog-raiser who breeds his sows or gilts to a boar, would be a fool to think his fortune to be increased by anything different from pigs. And so with humans, when a man and woman cohabitate, and beget new life, the results are similar and equally conclusive. Before a woman is possibly sure she is pregnant, vital organs of her progeny function, progress is continuous, life is in existence, and it can be only human.

The living end-product of any gestation has to be alive from its inception, and ultimately can only bear the same qualities and characteristics of its origin.

Abortion on demand is now perceived as good, intelligent, and legal, and the determination of ages has been reversed, but only, for so long as prevails the apathy of individuals, who are unwilling to undergo the fatigue of changing the crass and corrupt verdict of the Supreme Court.

I suffer no illusions about my ability to impress people or to markedly influence my community. However I call upon the wheat growers of Kansas and North Dakota, the corn and hog producers of Iowa, Indiana, and Illinois, the ranchers and cattlemen of the West, every farmer across this land, every craftsman, laborer, miner and clerk, all those who know what life is, those who value it's dignity because of the instinctive sense of morality and justice that is theirs, the competent and educated doctors, lawyers, and philosophers, who can best articulate the sanctity of life; I call upon them to mobilize for a battle that must be won, if we are to forestall the proliferation of ever lower standards of human behavior.

Like murder, abortion is brutally wrong and intolerable. To permit it by law is inconceivable in a nation, which under God, proclaims liberty and justice for all. It represents maximal discrimination and zero responsibility in the last and greatest perversion of sex.

The right to life is a Civil and more importantly a Human Right, that is both intrinsic and inalienable, a right that must be loudly proclaimed, faithfully and forever defended, and constitutionally guaranteed for all, because the natural law, the best of civilized tradition, and the law of God so demand.

To do less, is to invite for this and future generations, sure passage through the most cruel vale of tears the world, this nation, and society, has ever seen or yet endured.

VICTORY FOR THE FAMILY FARM

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. PANETTA, Mr. Speaker, a few days ago Continental Illinois Bank and Trust Co. withdrew its application to the Internal Revenue Service requesting tax-exempt status for its ag land fund I proposal. Marking a major victory for family farmers in their efforts to halt the invasion of nonfarm interests into the agricultural sector, this action effectively scuttles plans for the $50 million plan to invest pension funds in the purchase of working farms on prime farmland throughout the country.

The strong opposition to the ag land fund proposal voiced by family farmers, consumers, and the press indicates the seriousness of the issues raised by this type of investment scheme. Although ag land fund I has now been withdrawn from consideration, the public testimony before the House Agriculture Subcommittee on Family Farms and Rural Development illustrated the need for new legislation which will further guarantee the survival of the family farm in America.

In the last 25 years, the number of farms in America has decreased from 5.4 million to 2.9 million, with predictions that another 1 million will cease production by 1980, unless current trends are halted. These declines in the numbers of farms, along with the growth in the size of the average farm, points out that the small farmer simply cannot make it under current economic conditions. With the rapidly rising costs of production, and increasing competition from agribusiness, farmers are doing all they can just to stay in business. In light of the unstable situation for small farmers and the present trends of skyrocketing land values, new nonfarm investment proposals will continue to surface. It is my fear that, unlike ag land fund I, these new schemes will go unnoticed and therefore unimpaired if new legislation is not passed. It is essential that farmers and consumers fully understand the dangers that corporate investment proposals pose to this country's philosophic as well as economic foundations. All of us must continue to be on the lookout for new projects which offer similar threats to their survival.

All plans for corporate investment in farming raise the following philosophical questions regarding the future of agriculture in America. What happens to the land and lifestyle in our rural communities when profit becomes the basis for farming? What are the consequences of making many of our farmers into tenant operators? And, more practically speaking, what will corporate ownership and absentee investment do to land values, consumer prices, and the economy as a whole?

I am convinced that the encroachment of corporate investment into farming can only lead to escalated land values, the decline of competition and further concentration in the food industry, spiraling consumer prices, and the destruction of rural America as we know it. In addition, as the capital base accumulates in fewer and fewer hands cutside of our agricultural communities, opportunities for our young farmers to enter farming will be greatly diminished.

In the effort to implement my support of family farms, I am cosponsoring two bills which would restrict the trend toward absentee corporate ownership and investment in farming. The Family Farm Antitrust Act of 1977, H.R. 941, would prohibit persons or businesses with an excess of $3 million in nonfarm assets from engaging in agricultural production. Further, businesses with close ties to farming such as packinghouses, feed manufacturers, chemical and fertilizer manufacturers and farm machinery suppliers, having more than $1 million in assets, would be prohibited

from engaging in agricultural production. Farm cooperatives would be exempted from the act as would charitable, educational and nonprofit institutions.

The other bill I am sponsoring, entitled the Family Farm Preservation Act, would simply amend the Federal Deposit Insurance Act to prevent federally insured banks from investing collectively pooled trust funds in farmland.

It is evident from the testimony presented at the recent hearings on the Ag land fund proposal that the Federal Government is failing to restrict the corporate move into rural America, or to offer much assistance to those who are being forced out of farming. Although the family farm scored a significant victory this time against a serious threat to its existence, public awareness must be heightened and legislative action must proceed. Corporations are expanding into the agricultural sector because it is profitable and because there is no national policy to prevent or regulate such action. Now is the time for Congress to reaffirm its dedication to the survival of the family farm and our rural communities before new corporate investment schemes proceed to turn all of our farmers into tenant operators. The passage of the Family Farm Act and the Family Farm Preservation Act would mark the beginning of that reaffirmation.

WATER PROJECTS

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. RUDD. Mr. Speaker, President Carter's arbitrary decision to delete from the Federal budget numerous water projects has generated controversy throughout the land. One of these projects, the central Arizona project, is a source of great concern to the people of my State. We find it extremely difficult to comprehend why any administration would choose to remove from the budget a project of such vital importance to so many people and one that is 30 percent completed.

In a highly incisive article which was published on March 26 by the Washington Post, my distinguished colleague from Arizona, House Minority Leader JOHN RHODES, suggests that most of the criticism leveled against the water projects appear to be coming from individuals who may not understand fully the importance of water to the Western States. Mr. RHODES' column should be read by all who need to gain a proper perspective on this major issue.

The column follows:

. . . AND FROM THE DESERT

(By John J. Rhodes)

In the Southwest of this land of ours
In the Valley of the Sun
Phoenix, Arizona
Our growing just begun.
Change desert to fertile valley
Get a tan on Christmas Day
Phoenix, Arizona
With a touch of yesterday.

—Theme Song, Phoenix TV Station KTAR.

For the benefit of my Eastern friends I would like to point out something about that part of the nation I represent in Congress, Arizona's Maricopa County.

It's a desert.

It's also a well-populated desert, one of the fastest growing areas in America. People migrate there from all over because they are attracted to both our climate and our standard of living.

I have the suspicion that many people have trouble understanding what it means to live in a desert. I am sure that it's difficult for President Jimmy Carter, who grew up about 30 minutes from the Chattahoochee and Flint Rivers, to realize that the Salt River that cuts across metropolitan Phoenix is nothing more than a barren, rock-filled ditch.

How else to explain the President's sudden and arbitrary decision to delete from the budget some 30 water projects around the country, among them the Central Arizona Project? For the question is this: If the Central Arizona Project—or some alternate means of transporting large amounts of water into the central areas of the state—is not built, then what is to be done to provide for the many people who live there?

Unlike most Eastern communities, the people of central Arizona must live with the reality that their water supplies are limited. Our water tables have been diminishing over the years at an alarming rate, and it is only a matter of time before we go to turn on our water faucets and find that nothing comes out.

To its credit, Arizona had the foresight to recognize the problem of finite water reserves and the intelligence to plan accordingly. The Central Arizona Project was designed. It is a frankly ambitious plan to take water from the Colorado River at Lake Havasu, lift it over the mountains through a series of pumping plants and aqueducts and allow it to flow by gravity into the central valleys of the state.

After a lengthy series of complex legal battles (which went all the way to the Supreme Court), Congress passed and President Johnson signed into law in 1968 the bill authorizing construction of the CAP. Since that time Congress has appropriated over $400 million for the project, which is now almost 30 percent complete.

In a column printed in the March 14 Post, Colman McCarthy (who incidentally was born and raised on Long Island) dismisses the CAP as a prime example of "pork barrel politics" and takes off after Morris Udall (D-Ariz.), who is chairman of the House Interior Committee, for opposing wasteful spending on the one hand and supporting strongly the CAP on the other. What Rep. Udall (who, above all else, is no hypocrite) knows that Mr. McCarthy evidently does not is that over 80 percent of the funds required for construction of the Central Arizona Project will be paid back to the U.S. Treasury by the state of Arizona. The project will be mainly paid for by the water users themselves, a fact that, in my opinion, hardly qualifies the project as "pork barrel."

The issue is not cost, nor even cost-effectiveness, since the administration is already committed to the concept of public works projects (the CAP is responsible for approximately 4,300 new jobs per year). Neither should the issue be environmental, since the project has been the subject of numerous environmental impact statements at every stage of its development.

As I see it, the Central Arizona Project and other similar projects are at the vortex of a fundamental issue confronting America. It is the issue of growth versus non-growth.

Opponents of the CAP make the argument that it is fundamentally wrong for man to challenge nature to the extent that a viable community is erected in a desert. Colman McCarthy alluded to this attitude in his column (to wit: "By trying to improve on God's design of the Colorado River . . ."). In other words, if God had intended for people to inhabit Maricopa County, He would have put more water in the Salt River.

Perhaps. But what about the hard fact that our nation and the world is becoming an increasingly crowded place in which to live? The no-growth people have no answer to this unavoidable question.

In my opinion it is the responsibility and challenge of 20th-century man to use his God-given intelligence to devise innovative ways for the human race to exist comfortably on this crowded planet of ours.

That is what we have done in Arizona. We have transformed a desert into fertile land. People from the congested East and elsewhere are attracted to Arizona. They like what they find there, and they stay. There is no way that Arizona could keep them out, even if it wanted to. Americans have a right to live wherever they want. They have a right to seek a better way of life.

Unless the Central Arizona Project is built as planned, central Arizona will dry up eventually into a giant dust-bowl. The lifestyle that people find so attractive will be gone. People now living there will be forced to re-locate.

We cannot let this happen.

TANKER SAFETY

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. LENT. Mr. Speaker, the administration's recently announced change in U.S. policy on oil tanker pollution is welcome, but I doubt whether the shift in policy will do much to reduce tanker accidents.

On the whole, the new proposals should be effective in reducing oil pollution which results from tanker operations. In particular, the commitment to implement stricter tanker construction standards should help curb the amount of oil which gets dumped overboard each and every day. Such discharges account for 85 percent of all marine pollution.

Unfortunately, the administration's proposals do not adequately address the problem of accident-caused pollution. The administration's plans to require double bottoms on all new tankers, and to require sophisticated navigational equipment on ships calling at American ports, may reduce the incidence of accidents marginally, at best. But the core issue here is that of how effectively a tanker's crew performs.

The administration's approach to this issue is, unfortunately, a cautious one, though it need not be so. Beefing up standards for crews on American ships is probably a step in the right direction, but American ships carry only 15 to 20 percent of the oil entering our ports. Taking the issue of tanker crewing standards before international forums, with an eye toward a treaty, may be effective in the long run, but the long run may be as much as 10 years, if we may judge from similar negotiations in the past.

The administration's approach to this problem is even more perplexing because an immediate and effective solution is right under our noses.

I have introduced legislation, H.R. 2427, with my friend and colleague from

Maine, DAVE EMERY, and 27 cosponsors to extend U.S. jurisdiction under the Ports and Waterways Safety Act to 200 miles.

Our bill differs from the administration's action in only one respect: It would allow extension of American vessel traffic control systems into deep water.

The administration's proposals already involve considerable unilateral actions which will undoubtedly result in increased operating costs to foreign shipping firms wishing to enter U.S. waters. Furthermore, the administration's decision to require periodic inspection and certification of foreign vessels trading at U.S. ports is a clear assertion of U.S. jurisdiction over the trade which enters our ports. That it doesn't carry a 200-mile tag is significant only in symbolic terms.

Yet, the proposal my colleagues and I are making—extension of U.S. vessel traffic control to 200 miles—offers a clear way of avoiding the considerable difficulties involved in either a unilateral imposition of crewing standards, or in negotiating the issue multilaterally.

Under a comprehensive guidance system, similar to current air traffic control systems, U.S. shore-based nagivators would be able to "pick up" vessels entering the U.S. 200-mile zone while they were still in deep water, and guide these ships safely into port. Such a system would augment on-vessel navigation, and allow for timely corrective actions in the event a ship strayed from its course.

While international agreement on standards of training and competence in oil tanker operations are clearly needed, the outlook for quick agreement is not good. It seems to me that we should use the viable options which are open to us.

GRAND JURY REFORM—COLORADO SENATE PROPOSALS PARALLEL H.R. 94 REFORMS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. EILBERG. Mr. Speaker, Dale Tooley, the district attorney of Denver, Colo., has recently forwarded to me Colorado Senate bill 186 proposing reforms in that State's grand jury procedures. These reforms are almost identical to those I have proposed in H.R. 94 for our Federal grand jury system. Specifically, the provisions of the Colorado bill, which match my bill—

Would provide for a right to counsel in the grand jury room, free if the witness is indigent. Counsel would only advise, and could not make objections, arguments, or addresses to the grand jury. The court would maintain the power to remove any disruptive counsel;

Would require the grand jury to be informed of its duties, rights, and responsibilities prior to hearing the testimony of witnesses or reviewing documentary evidence;

Would permit any person to request to testify before the grand jury and allow denial of such a request to testify only for good reasons;

Would require witnesses to be informed of their rights before the grand jury and prohibit calling any witness if they indicate that they will exercise their privilege against self-incrimination;

Would allow subpenas to be challenged if they are unreasonable, oppressive, or for harassment purposes;

Would require all grand jury proceedings to be recorded and permit transcripts of a witness' testimony to then be made available to the witness prior to trial;

Would grant witnesses the right to review any prior statements in the prosecutor's possession prior to his testimony before the grand jury;

Would allow witnesses to be held in contempt only after a hearing with counsel and allow confinement only for the term of the grand jury or 6 months, whichever is less;

Would prohibit reiterative contempt, that is, prohibit witnesses imprisoned or fined for refusal to testify from being subsequently imprisoned or fined for refusal to testify as to the same matter;

Would prohibit repeated jeopardy, that is, once a grand jury has refused to issue an indictment, prohibit a new inquiry on the same matter from being initiated unless there is a finding that additional evidence has been discovered.

As District Attorney Tooley and others have indicated, the reforms proposed by H.R. 94—and the Colorado Senate bill—would not in any way interfere with legitimate investigations by grand juries. Rather, they would insure that such investigations are fair, thorough, and productive.

I would like at this point to insert in the RECORD the forwarding letter of District Attorney Tooley and the full text of Colorado Senate bill 186:

STATE OF COLORADO,
Denver, March 16, 1977.

HON. JOSHUA EILBERG,
Chairman, Subcommittee on Immigration, Citizenship and International Law, Committee on the Judiciary, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN EILBERG: Thank you for your letter of January 25, 1977, and for the information which you enclosed.

I thought you might be interested in S.B. 186 concerning grand jury reform, pending before the Colorado legislature. Enclosed is a copy of this legislation, in the form in which it was approved by the Senate Judiciary Committee. It was approved on second reading, and we expect it will clear the Senate within the next two weeks. There will be two amendments to it, [one which will leave to the discretion of the prosecutor the form of the subpoena and any required notice thereon, and the other restricting grand jury reports]. That restriction will probably require that a subject of a report have an opportunity to appear and to testify and that in no event could a report be issued without the approval of a judge who determines that public release of a report is important to the public interest.

Because so many of these changes encompass elements of the legislation which you are proposing, and which Dade County State's Attorney Richard Gerstein advocates, I am sending this information to you and to Mr. Gerstein.

Yours truly,

DALE TOOLEY.

The committee recommends that S.B. No. 186 be amended as follows and, as so amended, be referred to the Committee of the Whole with favorable recommendation:

Amend printed bill, page 1, strike everything below the enacting clause, and substitute the following:

"Section 1. 16-5-204, Colorado Revised Statutes 1973, is repealed and reenacted, with amendments, to read:

16-5-204. Witnesses before a grand jury—procedure (1)(a) Whenever a witness in any proceeding before any grand jury refuses, without just cause shown, to comply with an order of the court to testify or provide other information, including any book, paper, document, record, recording, or other material, the prosecuting attorney may submit an application to the court for an order directing the witness to show why the witness should not be held in contempt After submission of such application and (a hearing at which the witness may be represented by counsel, the court may, if the court finds that such refusal was without just cause, hold the witness in contempt and order the witness to be confined). Such confinement shall continue until such time as the witness is willing to give such testimony or provide such information; however, (the court may release the witness from confinement if the court determines that further confinement will not cause the witness) to give such testimony or provide such information. No period of such confinement shall exceed the term of the grand jury, including extensions, before which such refusal to comply with the court order occurred, and in no event shall such confinement exceed six months.

(b) If a witness has been confirmed in accordance with paragraph (a) of this subsection (1), he may, upon petition filed with the court, request a hearing to be held within ten days to review the contempt order at which hearing he shall have the right to be represented by counsel. The court, at the hearing, may rescind, modify, or affirm the order.

(c) In any proceeding, conducted under this section, counsel may be appointed for a person financially unable to obtain adequate assistance.

(2) No person who has been imprisoned or fined by a court for refusal to testify or provide other information concerning any transaction, set of transactions, event, or events in any proceeding before a grand jury impaneled before any district court shall again be imprisoned or fined for a subsequent refusal to testify or provide other information concerning the same transaction, set of transactions, event, or events before any grand jury.

(3) Upon impanelment of each grand jury, the court shall give to such grand jury adequate and reasonable written notice of and shall assure that the grand jury reasonably understands the nature of:

(a) Its duty to inquire into offenses against the criminal laws of the state of Colorado alleged to have been committed;

(b) Its right to call and interrogate witnesses;

(c) Its right to request the production of documents or other evidence;

(d) The subject matter of the investigation and the criminal statutes or other statutes involved, if these are known at the time the grand jury is impaneled;

(e) The duty of the grand jury by an affirmative vote of nine or more members of the grand jury to determine, based on the evidence presented before it, whether or not there is probable cause for finding indictments and to determine the violations to be included in any such indictments; and

(f) The requirement that the grand jury may not find an indictment in cases of perjury unless at least two witnesses to the

same fact present evidence establishing probable cause to find such an indictment.

(4)(a) Each grand jury subpoena shall contain the following advisement prominently displayed on the front of the subpoena:

NOTICE

(I) You have the right to retain an attorney to represent you and to advise you regarding your grand jury appearance.

(II) Anything you say to the grand jury may be used against you in a court of law.

(III) You have the right to refuse to answer questions if you feel the answers would tend to incriminate you or to implicate you in any illegal activity.

(IV) If you cannot afford or obtain an attorney, you may consult with the public defender's office, or request the court to appoint an attorney to represent you.

(b) Any witness who is not advised of his rights pursuant to paragraph (a) of this subsection (4) shall not be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he testifies or any evidence he produces, nor shall any such testimony or evidence be used as evidence in any criminal proceeding, except for purjury, against him in any court.

(c) In any proceeding before the grand jury, if the prosecuting attorney has written notice in advance of the appearance of a witness that such witness intends to exercise his privilege against self-incrimination, such witness shall not be compelled to appear before the grand jury unless a grant of immunity has been obtained.

(d) Any witness subpoenaed to appear and testify before a grand jury or to produce books, papers, documents, or other objects before such grand jury shall be entitled to assistance of counsel during any time that such witness is being questioned in the presence of such grand jury, and counsel may be present, in the grand jury room with his client during such questioning. However, counsel for the witness shall be permitted only to counsel with the witness and shall not make objections, arguments, or address the grand jury. Such counsel may be retained by the witness or may, for any person financially unable to obtain adequate assistance, be appointed in the same manner as if that person were eligible for appointed counsel. An attorney present in the grand jury room shall take an oath of secrecy. If the court, at an in camera hearing, determines that counsel was disruptive, then the court may order counsel to remain outside the courtroom when advising his client.

(e) Once a grand jury has returned a no true bill based upon a transaction, set of transactions, event, or events, a grand jury inquiry into the same transaction or events shall not be initiated unless the court finds, upon a proper showing by the prosecuting attorney, that the prosecuting attorney has discovered additional evidence relevant to such inquiry.

(f) A certified or authorized reporter shall be present at all grand jury sessions. All grand jury proceedings and testimony from commencement to adjournment shall be reported. The reporter's notes and any transcripts which may be prepared shall be preserved, sealed, and filed with the court. No release or destruction of the notes or transcripts shall occur without prior court approval.

(g) Upon application by the prosecutor, or by any witness after notice to the prosecutor, the court, for good cause, may enter an order to furnish to that witness a transcript of his own grand jury testimony, or minutes, reports, or exhibits relating to them.

(h) Any witness summoned to testify before a grand jury, or an attorney for such witness with the witness's written approval, shall be entitled, prior to testifying, to examine and copy at the witness's expense any statement in the possession of the prosecuting attorney or the grand jury which such witness has made that relates to the subject matter under inquiry by the grand jury. If a witness is proceeding in forma pauperis, he shall be furnished, upon request, a copy of such transcript and shall not pay a fee.

(i) No person subpoenaed to testify or to produce books, papers, documents, or other objects in any proceeding before any grand jury shall be required to testify or to produce such objects, or be confined as provided in this section, for his failure to so testify or produce such objects, if upon filing a motion and, upon an evidentiary hearing before the court which issued such subpoena or a court having jurisdiction under this section, the court finds that:

(I) A primary purpose or effect of requiring such a person to so testify or to produce such objects before the grand jury is or will be to secure testimony for trial for which the defendant has already been charged by information, indictment, or criminal complaint.

(II) Compliance with a subpoena would be unreasonable or oppressive;

(III) A primary purpose of the issuance of the subpoena is to harass the witness;

(IV) The witness has already been confined, imprisoned, or fined under this section for his refusal to testify before any grand jury investigating the same transaction, set of transactions, event, or events; or

(V) The witness has not been advised of his rights as specified in paragraph (a) of this subsection (4).

(j) Any grand jury may indict a person for an offense when the evidence before such grand jury provides probable cause to believe that such person committed such offense.

(k) The district court before which the indicted defendant is to be tried shall dismiss any indictment of the grand jury if such district court finds, upon the filing of a motion by the indicted defendant based upon the grand jury record without argument or further evidence, that the grand jury finding of probable cause is not supported by the record.

(l) Any person may approach the prosecuting attorney or the grand jury and request to testify or retestify in an inquiry before a grand jury or to appear before a grand jury. The prosecuting attorney or the grand jury shall keep a record of all denials of such requests to that prosecuting attorney or grand jury, including the reasons for not allowing such person to testify or appear. If the person making such request is dissatisfied with the decision of the prosecuting attorney or the grand jury, such person may petition the court for hearing on the denial by the prosecuting attorney or the grand jury. If the court grants the hearing, then the court may permit the person to testify or appear before the grand jury, if the court finds that such testimony or appearance would serve the interests of justice.

(m) The foreman, or acting foreman when designated by the court, of the grand jury may swear or affirm all witnesses who come before the grand jury.

(n) Any other motions testing the validity of the indictment may be heard by the court based only on the record and argument of counsel, unless there is cause shown for the need for additional evidence.

Section 2. Safety clause. The general assembly hereby finds, determines, and declares that this act is necessary for the immediate preservation of the public peace, health, and safety.".

MINIMUM WAGE INCREASE HURTS YOUNG PEOPLE

HON. SAMUEL L. DEVINE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. DEVINE. Mr. Speaker, much has been said over the years as the big labor union bosses beat the drum for continuous increases in minimum wage under the fancy title of Fair Labor Standards Act. Our colleague, JOHN DENT of Pennsylvania, again is masterminding this bill, which, unfortunately, will create unemployment among our young people and will be used as a base to launch a whole series of increases at the higher levels of those receiving $10 and $12 per hour now.

The executive vice president of the Ohio Hotel and Motel Association directed a letter to Congressman DENT relative to the problems in the industry, compounded by the periodic increase in the base, which I feel should be read by every Member of Congress prior to voting on this issue.

The following information was contained in a March 7 letter:

Member hotels and motels of our association, ranging in size from 25 to 500 rooms, are concerned deeply about your H.R. 3744. In it you propcse:

To increase the federal minimum wage base by approximately 25 percent 30 days after enactment.

To repeal the tip credit, which will increase the employer's wage costs by more than a dollar an hour for service employees who are required by law to report $20 a month or more in gratuities they receive in the course of their employment, and

To create automatic annual wage increases every Jan. 1, based on 60 percent of the average earnings of employees in one of the biggest industries—manufacturing—so this would provide built-in increases for years ad infinitum.

Equitable legislation usually is proposed to right an existing wrong, or to create a need. There probably isn't an employer anywhere today who exploits labor, simply because employees won't be exploited and this poses the question: What and where is the wrong you propose to right? And what is the need for such a burden upon business and employers?

Your pension reform act examples legislation that righted many wrongs you found existing in that field—(and you probably never received due credit for that major legislative accomplishment.)

As exacting as your proposals are, they become more so because:

The social security tax base has been increased,

The unemployment compensation tax base has been increased, and

The workmen's compensation premium base will be increased again July 1; it was increased 20 percent last July 1.

Our tax-paying member hotels and motels plead for some relief. They hope you can find a way to modify your proposals down to:

1—a tolerable minimum wage increase to become effective in 1978,

2—to retain the tip credit,

3—to eliminate from H.R. 3744 the 60

percent of the average manufacturing industry wage.

As you doubtless realize, service businesses—hotels, motels, inns and restaurants—employ minors, they employ marginal and unskilled workers. Many of the minors are part-time workers who go to school and work only 24 hours a week so they have time for their school requirements.

It is foreseeable that the burdensome standards you propose in H.R. 3744 will prevent employment of deserving workers who find work and responsibility and enjoy it; they prefer being on payrolls, instead of welfare rolls.

Co-incidentally, on March 3, last week, when we were reading your H.R. 3744, owners of the Fort Hayes Hotel here in Columbus closed the hotel, which had served the public for 50 years. When I asked the owners why, they explained they simply couldn't cover the losses any longer.

They emphasized their increases in operating costs, among them

(a) increased labor contract requirements;

(b) an electric current bill for $21,000 a month;

(c) a natural gas bill in excess of $4,000 a month; a ruling of the Public Utilities Commission of Ohio that prohibited the Ohio Bell Telephone Co. paying hotels a commission on telephone business that originated in hotels and motels;

(d) an increase in its county real estate tax;

(e) and the impossibility of passing all these increases along to the customers by increasing its room rates, because the necessary increase would exceed the value to the customer.

You aren't impervious to conditions today.

For examples:

Three major downtown hotels in Cleveland are in receivership and two others are "hanging on" to 30–to–40 percent occupancies.

Two inns in the Columbus area are for sale and if a prospective buyer makes an offer and tried to withdraw it, he'll risk a broken arm.

Two hotels in Toledo with attractive modern and adequate facilities are experiencing business volumes far below the break-even figure and one of them with a labor union contract recently renewed the contract, with a 20 percent wage increase across the board.

In a 400-room hotel in Columbus, the four utilities—water and sewer service, telephone, electricity and natural gas—have been increased to a total of $1,000 a day. That racks up to $365,000 for the year 1977 It's the equivalent of 365,000 Scotches-and-soda at $1 each.

These example economic conditions. They're mentioned to assure you the hospitality business in Ohio has enough economic problems and state laws and requirements to live by. They really could get along tolerably well without H.R. 3744.

BLACK PRESS HONORS W. O. WALKER, CLEVELAND NEWSPAPER PIONEER

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. STOKES. Mr. Speaker, on Friday, March 18, 1977, I had the distinct honor to be present at the sesquicentennial banquet of the National Newspaper Publishers Association. On hand were distinguished publishers and journalists from the Nation's black newspapers and magazines.

Since 1827, the black press has been at the cutting edge of the struggle for freedom and survival of black Americans. It is fitting then that one of America's oldest and most respected newspapers should be cited on this auspicious occasion. The Cleveland Call and Post, under the able pen of W. O. Walker, has fought for human rights and equality since 1913.

Mr. Speaker, Mr. Walker's colleagues cited him for his role in establishing the joint Howard University-NNPA Archives and Gallery of Distinguished Newspaper Publishers. The archives are expected to become the No. 1 repository of black newspapers, press photos, editorial background reference material, and memorabilia.

In recognition of this honor, Mr. Speaker, I would like to submit an article to you which appeared in the Saturday, March 10, 1977, Cleveland Call and Post. The article gives a brief history of Mr. Walker's unparalleled career in journalism. It reads as follows:

FOUR BLACK WOMEN BREAK CONGRESSIONAL GROUND

Four black women hold seats in the U.S. House of Representatives and all four have broken ground as "firsts" in a variety of areas.

The distinction of being the first black woman elected to Congress goes to Shirley Anita Chisholm, Dem.-N.Y., elected in 1969.

Barbara C. Jordan, Dem.-Tex., was the first black woman elected to Congress from the deep south and the first black woman ever to give the keynote address at a Democratic national convention.

Yvonne Brathwaite Burke, Dem-Cal., is the first congresswoman ever to have given birth while in office. She was the first woman elected to Congress from California in 20 years and the first black woman ever elected to the House from her state.

Cardiss Collins, Dem.-Ill., is the first black to hold the office of whip-at-large, to which she was appointed by the House majority leader.

The four are included in a new publication "Women in Congress, 1917 to 1976," released by the Joint Committee on Arrangements for Commemoration of the Bicentennial.

Shirley Chisholm, a native of Brooklyn, N.Y., began her political career as a clubhouse worker before being elected to the New York State Assembly. Before that, she was a teacher and director of a day nursery.

Elected to Congress from the Bedford-Styvesant section of Brooklyn in 1969, she campaigned with the slogan "Unbought and Unbossed," the title of her autobiography.

Under Chisholm's leadership, Congress enacted legislation to include domestic workers under the protection of the minimum wage law.

She also sponsored legislation dealing with environmental health, food stamps, day care, national home health care, school lunches, comprehensive supplemental security income reform, full employment and women's rights.

Chisholm is a member of the Education and Labor Committee. In 1972, she was a candidate for President of the United States, and received 152 delegate votes.

Barbara Jordan received a three-minute ovation after being introduced to keynote the 1976 Democratic convention.

"There is something different and special about this opening night," she told the convention. "I, Barbara Jordan, am a keynote speaker, and notwithstanding the past, my presence here before you is one additional bit of evidence that the American dream need not forever be deferred."

An attorney, Jordan ran for the Texas state legislature and lost shortly after graduation from law school. After two losses, she ran for the State Senate and won. She was elected to the U.S. House of Representatives in 1972.

Jordan was supported in her Congressional campaign by President Lyndon B. Johnson, who also helped her get a seat on the Judiciary Committee after her election.

It was on the Judiciary Committee during the impeachment hearings of President Nixon, that she became known for her brilliant oratory and judicious manner.

"My faith in the Constitution is whole, it is complete, it is total," she stated. "I am not going to sit here and be an idle spectator to the diminution, the subversion and the destruction of the constitution."

Among the bills Jordan has introduced are: the civil rights amendments to the Law Enforcement Assistance Administration authorization; amendments to the Voting Rights Act of 1965; a bill repealing Federal authorization for state "fair trade" laws; and legislation that strengthened civil rights enforcement procedures for General Revenue Sharing and LEAA.

She has also cosponsored legislation guaranteeing equal credit; food commodities for school lunch and child nutrition; freedom of information; emergency public service jobs; home rule for the District of Columbia; tax credits for low income workers and health programs.

Burke, an attorney from Los Angeles, has introduced over 20 bills and major amendments since assuming office in 1973. These have included legislation to: provide funds for planning a comprehensive west coast mass transit system; Federal aid for the mentally retarded and the autistic; equal opportunity in the construction of the Trans-Alaskan pipeline; Federal part-time employment for homemakers and the elderly; improved out-patient care facilities in under-supervised areas; and the establishment of a National Center for the Prevention and Control of Rape.

She introduced an amendment to the 1976 appropriations bill for the Department of Labor and HEW restoring previously eliminated funds for programs that provided services for senior citizens, emergency food and medical care.

Burke serves on the House Appropriations Committee. She was elected to chair the Congressional Black Caucus in 1976 and served as vice chairman of the 1972 Democratic National Convention in Miami Beach.

Cardiss Collins, a resident of Chicago, Ill., began her career as a stenographer in State government, where she rose to become revenue auditor of the Illinois Department of Revenue.

At the time she ran for the seat left vacant by the untimely death of her husband, George, she was committeewoman of Chicago's 24th ward. She won the (1973) election with 87.9 percent of the vote.

Collins serves on the International Relations Committee and the Government Operations Committee. She has sponsored over 25 bills, including the National Condominium Act; Economic Disaster Community Assistance Act; and the Elementary and Secondary Education Act. Other areas of legislative interest involve bills to help the aged, consumer credit, Medicare and water pollution.

Mr. Speaker, I am certain that my colleagues here assembled will join me in extending congressional recognition to

Mr. W. O. Walker for his outstanding career and service to Cleveland and the Nation. As one of his avid readers, I can only hope that his great newspaper continues to fight on in the struggle for racial equality and human dignity.

PUBLIC ATTITUDES TOWARD ENERGY: LOU HARRIS POLL

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. WIRTH. Mr. Speaker, as we all await President Carter's energy message of April 20, I hope we wait with the understanding that his message must be tough. Our bolts have to tighten; we must stop wasting energy; and our previously inexpensive energy resources are going to go up in price.

Now we manage these changes in behavior and cost will be the public policy test. And hopefully President Carter's message will do what has to be done in such difficult areas as cost and conservation.

And hopefully these steps will be outlined without fear of political retribution. Too often over the last months I have heard many of my colleagues, the press, and others say that we won't be able to have the tough energy policy we need, because the American people do not believe that we have an energy crisis, or would not make the sacrifices needed.

This kind of thinking sells our constituents short—the American people are prepared for, and willing to support, a tough policy that will be effective and fair. The best evidence I have seen of this willingness is the following summary of the Lou Harris poll, recently completed for ABC News. I am including this poll's results, as I think it points out to my colleagues how ready Americans are. And I hope the strong public attitudes outlined here are reflected in President Carter's energy message:

THE ABC NEWS/LOU HARRIS POLL ON ENERGY

THE MAGNITUDE OF THE SHORTAGE

A sizable 81 percent of the American people are convinced that there is a serious shortage of energy in this country. Even more significant, 73 percent estimate that this shortage will be just as acute 10 years from now, sharply up from 64 percent who felt that way last summer and from the 53 percent who saw a long-term shortage back in 1975.

Gnawing at the American people is a sense that as a nation we have been wasteful in our use of energy and that we now also find ourselves at the mercy of foreign sources for oil, thus putting our energy destiny beyond our control.

On the issue of waste, by 92–6 percent most Americans think the public has been wasteful on the use of energy, 59 percent thinking we have been highly wasteful. A majority of 86 percent think people have been wasteful in the use of gasoline, 54 percent highly wasteful. A majority of 81 percent feel most people are wasteful on the use of home heating fuel, 36 percent highly wasteful. And 78 percent think industry has been wasteful in its use of energy, 41 percent highly wasteful.

By a nearly unanimous 88–9 percent, most people think it important that the country learn how to cut back on its use of energy. By 57–27 percent, a majority favor having President Carter "impose" a tough program of conservation on both consumers and industry.

VOLUNTARISM VS. CMPULSION ON CONSERVATION

By a narrow 52–46 percent, people believe that voluntary conservation of energy by the public would be effective. By 51–45 percent, a slender majority think that such voluntary approaches would work with industry. By contrast, a much larger 61–34 percent think that a compulsory conservation program would work with the people and an even higher 67–28 percent think the compulsory approach would be effective with industry.

The nationwide cross-section of 1517 adults, interviewed in their homes between March 1st and 7th, was then asked to estimate which approach would be more effective generally: voluntarism or compulsion on energy conservation. The result: by 55–38 percent, a clear majority opted for a compulsory approach.

However, when asked which approach they preferred to see taken, by an overwhelming 75–20 percent, a majority favored a voluntary way to solve the problem.

This study shed some light on the degree to which voluntarism is now working. Each interviewer was given a thermometer to take into each home surveyed. The temperature outside the door and then inside the house was recorded. President Carter had asked the American people during the natural gas shortage in January to turn down their thermostats to 65 degrees during the day and down to 60 degrees at night. In 84 percent of the communities surveyed, the outside temperature averaged under 65 degrees, thus necessitating some kind of home heating.

Among the 84 percent whose outside temperatures were below the 65 degree mark, here are the inside the house temperatures recorded:

Only 8 percent of the homes had an inside the house temperature of 65 degrees or less.

No more than 28 percent of the homes had an inside temperature of 68 degrees or less.

In 64 percent of the homes, the temperature was 70 degrees or above.

Despite the fact that some regions of the country have been harder hit than others during the cold winter, the median temperatures on a regional basis were remarkably uniform; in the East 70 degrees, in the Midwest 71 degrees, in the South 70 degrees, and in the West 71 degrees. By any measure, the temperatures in the living rooms of the country, where the interviews were conducted, were a full five degrees above the level requested by the President.

The study probed in considerable depth about a whole host of both voluntary and compulsory steps that might be taken on energy conservation.

Basically, it should be pointed out that by 71–16 percent, a majority of the public agrees with the estimate of top Carter energy officials that as much as 30 percent of the total energy used in the country can be saved through the application of tough conservation measures. And by 54–27 percent, a majority clearly expects the President to come up with just such a tough program on April 20th.

In the area of voluntarism, the public still believes that a number of steps can be effective and sizable majorities favor taking these approaches:

Urging people to put their thermostats down to 65 degrees during the day and to 60 degrees at night is felt by 67 percent to be an effective approach and by 78–18 percent, they favor such exhortation by the President. (Obviously, however, most Americans are not aware of the average 70 degree temperature in most homes of this country).

A substantial 74 percent think it would be effective to "urge people to use less electricity during the day when it is more expensive and to use washers and dryers and other utilities at night when it is cheaper," and a 75–15 percent majority supports such appeals.

By 87–10 percent, the public also thinks that urging more people to use car pooling would be effective, and by 88–10 percent a majority wants to see such a voluntary approach.

In the area of compulsion, there are fewer majorities and they are clearly harder to come by. Nonetheless, mainly in the areas of compelling key institutions to change their ways, the public does opt for compulsion:

An 81 percent majority feels that we could effectively conserve gasoline if the 55-mile-an-hour speed limit were strictly enforced. A lopsided 79–17 percent majority would favor such a tightening of enforcement of that speed limit.

A high 80 percent of the public believes that a compulsory policy of allowing "only the buildings of new housing which uses the most efficient heating methods" would be effective and a 73–19 percent majority opts for such a move.

A big 78 percent thinks it would be effective to "prohibit the use of outdoor lighting on signs outside buildings, restaurants, and other places, although keeping street lights lit," and by 68–25 percent they would favor adoption of this rule.

A substantial 87 percent think it would be effective to "compel business to turn off unnecessary lights in halls and in other places," and by 85–11 percent, most people favor mandating this rule.

Nearly two out of every three people, 65 percent, think it would be effective to "require employers to set up special bonus arrangements for employees who form car pools in driving to work, with the employer being given a tax credit on the bonuses paid," and by 60–28 percent most people favor adopting such a regulation.

A majority of 56 percent of the public feels that it would be effective "to have the federal government help pay for vans that companies would loan to employees to drive car pools to and from work," and by a narrow 49–43 percent, a plurality would like to see that policy adopted.

Some 57 percent of the public thinks that a policy of "compelling older plants and factories to convert to coal from natural gas and oil" would work and by 48–34 percent the public favors such a new rule.

One area to emerge from this study indicates the American people might well be willing to change their car buying habits. While a substantial 61–24 percent majority opposes simply mandating that no more medium-sized or large cars will be produced, it is more than apparent that people are willing to bend on the issue of bigger cars. A substantial 70 percent think it would be effective to "prohibit the sale of new cars that don't get 20 miles to the gallon," and by 61–29 percent, a majority would favor adopting that regulation now. A sizable 64 percent think it would be effective to "prohibit the sale of new cars that don't get 22.5 miles to the gallon," and by 50–38 percent most would like to see that regulation put into effect. Finally, 60 percent of the public feels that it would be effective to "prohibit the sale of new cars that don't get 25 miles to the gallon," and by a razor thin 44–43 percent, most would opt for the immediate passage of such a regulation.

Clearly, people are willing to put an acid test on the ability of manufacturers to produce new cars that yield a high number of miles to the gallon. The implication of this finding surely must be that people would respond to a regulation that meant they would have to buy smaller automobiles.

Another major program under consideration is mandatory insulation of homes Thirty percent of homes are now estimated to be improperly insulated nationwide. A substantial 64 percent of the public feels it

would be effective to "require local gas and electric power companies to insulate homes with added insulation materials, storm windows, and weather stripping, with customers paying for it themselves on an instalment basis over a year's time on their gas and electric bills." However, by a narrow 49–42 percent, a plurality would oppose such compulsion on insulation. Nevertheless, the survey also found that such insulation might be acceptable if people were allowed to deduct the charges for insulation from the federal income taxes, a step 75 percent thought would be effective and favored by a 67–25 percent margin.

In four areas, the public is both unimpressed with the effectiveness of compulsory measures and also clearly opposes them:

A system of rationing home heating fuel, with each family allotted an amount equal to the amount used the previous year, is thought to be effective by only 50 percent of the public and would be opposed by 61–30 percent.

Rationing gasoline is viewed as an effective measure by only 51 percent and is overwhelmingly opposed by a margin of 66–24 percent.

Only 38 percent of the public feel it would be effective to make employers pay a tax on each car where company parking facilities are provided, and by 66–24 percent, a majority opposes such a step to discourage the use of cars in driving to work.

A tax on public parking facilities to discourage people from driving is believed to be effective by only 36 percent and is opposed by 69–21 percent.

THE DIMENSION OF HIGHER PRICES

When the public was asked to estimate what they think will happen to the price of energy they will have to pay in the next few years, the median estimate was that energy will go up 50 percent. This means that most people hold the view that gasoline prices, for example, are headed toward $1.00 a gallon.

In order to see just how much give there might be on the part of the American people to pay higher prices for energy, a series of trade-off questions were asked:

When forced to choose between a 50 cents a gallon increase in the price of gasoline or to go to a system of permanent rationing, by a narrow 43–38 percent, a plurality opted for permanent rationing.

When forced to choose between a gasoline price hike of 50 cents a gallon or prohibiting the manufacture and sale of medium and large cars, a 45–35 percent plurality came down in favor of stopping the sale of bigger cars. This finding reinforces previous results that show there is considerable give in the American penchant for bigger autos.

When forced to make a choice between paying 100 percent more for home heating fuels next winter or running the risk of not having enough home heating fuel, 45 percent opt for a 100 percent fuel price increase, only 29 percent are willing to run the risk of inadequate supply, and 9 percent say the issue is not applicable to them.

THE OTHER SIDE OF THE COIN: HOW TO INCREASE THE SUPPLY OF ENERGY

Clearly, as reported earlier, 73 percent of the public think there is a real energy shortage here and now, and that it will continue to plague this country for the next decade.

The public was asked whom they thought was to blame for the shortage that now exists:

71 percent think "Arab oil-producing countries playing politics" are very much to blame;

68 percent pin very much of the blame on "the failure of this country to come up with new sources of energy closer to home;"

65 percent feel the "way major oil companies have behaved" deserves a major share of the blame;

63 percent believe that "the tactics of foreign oil-producing countries in raising the price of oil and natural gas" are very much to blame;

52 percent pin much of the blame on "continued waste of energy by industry;"

51 percent attribute much blame to "continued waste by the American people;"

48 percent put very much of the blame on "the lack of an energy policy by the federal government."

It is evident that the American people are deeply distressed that they are 51 percent dependent on foreign oil to meet their national needs. The survey asked them about it and found by an overwhelming 89–9 percent that they feel "it is bad for this country to be that dependent on foreign sources of oil." They see national security overtones in this condition: by 74–17 percent, they believe "with so much of our oil coming from the Middle East, we place our whole system of military security in danger in case of war." Yet, the public also firmly rejects the notion of "making political and economic concessions to the oil-producing countries so we can be sure we keep getting their oil," held by a 62–26 percent majority.

The public instead wants the Carter Administration to "get tough with the oil-producing countries on such matters as food, equipment needed for industrial development, and on the use of our know-how in getting their oil out of the ground, processing and transporting it," a position favored by a 72–15 percent majority. This result indicates strong public backing for the stand President Carter took during the campaign in which he said he would use tough measures short of war to bargain with the oil-producing cartel.

The other side of the coin, of course, to public worry over too much dependence on foreign oil sources is just how to develop new sources of added supply of energy at home. A central pivot in the debate over this question is the matter of deregulating oil prices:

By 66–17 percent, a majority favors the powers already given the President to deregulate natural gas on a temporary basis in order to distribute available supply across state lines.

The much debated proposal for a "federal law which would gradually deregulate the price of all oil and natural gas over a 26 month period" is favored by a 44–34 percent plurality of the public. When the price decontrol issue has added to it "deregulation of oil and natural gas supplies in this country to encourage companies to explore for and develop new oil and natural gas," support rises to a 55–27 percent majority.

However, public support for decontrol may only be viable if an additional provision is added to any such legislation: by 72–14 percent, the people say they favor "a plan under which prices would be deregulated but most of the profits which oil companies make would be required to be put back into exploration and development of new sources of energy to relieve the energy shortage."

Specifically, the public opts for giving a green light to these activities to generate more energy supply here at home:

77 percent feel it is very important to "expand work on solar energy."

68 percent feel it is highly important to "build more and better public transportation systems of commuter trains, buses, subways, and other means besides highways and freeways." (This result marks the first time that such backing has emerged for mass transit in this country.)

68 percent opt as very important "allowing more drilling for oil and natural gas on government-owned lands."

64 percent feel it very important to "build plants that can convert coal to gas and oil."

62 percent give a priority to drilling for oil and natural gas off the Atlantic, Pacific and Gulf coasts."

58 percent think it highly important to "build more nuclear power plants to generate electricity."

52 percent believe it highly important to "expand underground mining for coal."

51 percent give major importance to work on nuclear power that uses hydrogen instead of uranium" (nuclear fusion).

However, several proposed approaches to increasing energy supply come up with less than 50 percent who feel they are very important:

Only 42 percent attach high importance to "expanding strip mining."

No more than 42 percent feel it highly important to "convert oil shale to synthetic crude oil."

Only 36 percent give high priority to "relaxing auto emission rules and standards to save gasoline."

And no more than 32 percent say it is very important to "relax emission standards for power plants so they can burn higher sulfur content fuels."

Finally, only 22 percent attach a high priority to "importing more oil and natural gas from overseas."

Underlying these specific measures people favor is a sense that current sources of energy are either running out or cannot be relied on over the next 10 to 25 years:

24 percent of the public reports that it now depends mainly on oil for their electric power energy, but a much smaller 5 percent think they still will in 10 years, and a small 1 percent think they will still be highly dependent on oil in 25 years.

In the case of hydro-electric power, 19 percent report being dependent on it today, only 10 percent think they will in 10 years, and no more than 4 percent think they will in 25 years.

19 percent say they are mainly dependent on coal today for electric power energy, 15 percent in 10 years, and a smaller 8 percent in 25 years. However, recent talk of greater use of coal has increased the number who see themselves dependent on it in 10 years from 7 percent to 15 percent just in the past six months.

Only 2 percent of the public are now mainly dependent on nuclear power, but a much higher 26 percent think they will be in 10 years, with 20 percent viewing it as the major electric power supply 25 years from now.

Less than one-half of one percent now are mainly dependent on solar energy, but 12 percent think it will be their main source of electric power in 10 years and a high 30 percent see it as their major source of energy in 25 years.

Coal shows signs of coming back as an alternate source to many people, but coal is felt by a 75–18 percent margin to be too great a polluter of the environment. Oil is thought to be environmentally unsound by a 59–33 percent margin. By contrast, nuclear power is thought to be non-polluting by 51–26 percent and solar energy by an even larger 77–12 percent.

Clearly, the public sees solar energy as a long-term hope, with nuclear filling in much of the gap left by the prospective decline of dependence on oil. Not only do the American people feel uneasy about foreign oil dependence today, but they feel it will be disappearing as a major resource for their energy needs over the next 25 years.

THE 156TH ANNIVERSARY OF THE INDEPENDENCE OF GREECE

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. FARY. Mr. Speaker, March 25 marks a significant day, a historic date

for the people of Greece for March 25, 1977, is the 156th anniversary of the independence of the Greek people.

The Greek Independence Day must be a significant day for all peoples everywhere who love human freedom and cherish democratic political institutions.

It was on the 25th of March 1821 that the Greek patriots began a revolt against the Ottoman Empire which, for centuries, ruled the people of Greece with an oppressive and tyranical hand.

The people of Greece, however, inspired by the prospect of independence, and supported by champions of freedom in Europe and America succeeded in breaking the yoke of the Ottoman domination.

We all know that the concept of democracy was spawned by the remarkable leaders and thinkers of ancient Greece, and we realize as well that their teachings inspired the Founding Fathers of our country, as well as of other democratic nations.

Mr. Speaker, I should like to recall that in the year 1821 our own Republic was young and, therefore, the cause of Greek independence won the sympathies of many leaders of the United States. It was in 1882 that President James Monroe wrote words that are on this day often quoted, but nonetheless deserve repetition:

> The mention of Greece fills the mind with the most exalted sentiments, and arouses in our bosoms the best feelings of which our nature is susceptible. That such a country should have been overwhelmed, and so long hidden, as it were, from the world under a gloomy despotism, has been a cause of unceasing and deep regret to generous minds for ages past. . . . A strong hope is entertained that these people will recover their independence, and resume their equal station among the nations of the earth.

The idea of democracy, born in ancient Greece over 2,000 years ago has prevailed and has inspired other nations in their struggle against oppression. In fact, possibly no other people since their beginnings have given more to the world in the fields of thought and beauty and practicality than the Greeks. Modern philosophy was born of the reasoning and logic of Socrates, Plato, and Aristotle. Medicine is indebted to Galen and Hippocrates, mathematics to Euclid and Archimedes, law to Nestorius, the arts to Aeschylus, Sophocles, and Euripides, and politicians emulate Demosthenes.

I extend with great pleasure greetings to Americans of Greek descent in my congressional district, as well as those in Chicago and across our Nation on the occasion of their independence and to recall with great pride a century and a half of genuine friendship between the people of America and the people of Greece.

PRESIDENTIAL PAPERS—PUBLIC OR PRIVATE?

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. VENTO. Mr. Speaker, the question of who owns the proprietary and legal rights to Presidential papers has been an issue for nearly 200 years, starting with George Washington's papers and continuing through our recent 37th and 38th Presidents.

The continuing and thorny issue—pressuring Members of Congress, pressuring publishers, pressuring librarians and, yes, pressuring Presidents themselves—is "What is public and what is private where Presidential papers are concerned?"

As we recall, the problem came to a climax in 1974 when President Nixon left office and Congress decided to take custody of his documents. The question of who owns these papers and where they should go is still unsettled. Sometime the U.S. Supreme Court will decide.

Mr. Speaker, a determined effort to explore this 200-year-old issue and to point the directions in which a solution may be found has been made by a distinguished Washington author and publisher. M. B. Schnapper, the owner of a small publishing firm here on Capitol Hill, publishes books of a serious, and often scholarly, historical, political, economic, and social concern.

His book, "Public Trust, Public Property and Private Property," will come from the presses in a few weeks. It should be of interest to all students of the subject. I place in the RECORD a comprehensive discussion of our 200-year-old problem that appeared in yesterday's Washington Star:

USE AND ABUSE OF WASHINGTON'S PAPERS

(By William Delaney)

The papers of George Washington, which he consdered "a species of public property, sacred in my hands," instead became an instrument of private profit and partisan politics in the hands of his favorite nephew, Supreme Court Justice Bushrod Washington, and the debt-ridden Chief Justice John Marshall, according to a forthcoming book.

The tangled tale of the Washington papers, as researched by author M. B. Schnapper, reveals those justices' efforts—bold even by today's publishing and ethical standards—to turn them into a bestseller.

And it reveals that a colleague of theirs on the Supreme Court, whose ruling on the private nature of Washington's papers is being cited in Richard Nixon's current effort to gain control of his White House tapes, was a promoter of the edition of Washington's documents that profited from his decision.

Schnapper, editor of Public Affairs Press here and a crusader against the private profiteering of government-produced materials by public officials, has released to leading newspapers the Washington-papers chapter of "Public Trust, Public Property, and Private Profit," to be published by his press in late spring.

In it, he cites a 1782 letter from Washington to a New England clergyman-historian, William Gordon—a letter disregarded by most historians and archivists, Schnapper says—in which the general called his Revolutionary War records "a species of public property, sacred in my hands."

While Washington said he would be happy eventually to comply with Gordon's request to see his war documents, he pointed out that the war had not yet been concluded by treaty:

"When Congress then shall open their registers, and say it is proper for the servants of the public to do so, it will give me much pleasure to afford all the aid to your labors . . . which my papers can give."

Years later, when he left the presidency, Congress had still neglected to say anything about the proper thing to do with the military and White House documents. So he took them home to Mount Vernon, voicing concern about their security in letters to the Treasury and War departments.

Shortly after his death, with their fate left in his will to his nephew-executor, Washington's papers were seized upon by the nephew and his colleague, Chief Justice Marshall, as a vehicle for enriching themselves personally and politically, as well as paying homage to the late president.

Envisioning a huge bestseller that would firmly link the heroic Washington to their Jefferson-defeated Federalist party, the pair sought an unprecedented $150,000 advance from a Philadelphia publisher for the biography which Marshall would write with exclusive access to the papers. The justices (Marshall and his brother, for example, then owed $31,500 on a newly acquired Virginia estate) would split the proceeds 50–50.

According to Schnapper, the astounded publisher wrote back that no one had ever got more than $30,000 for a copyrighted work.

The justices reduced their demand to $100,000. Finally they settled on an installment package totaling $70,000, with the publisher suggesting that Marshall not depict the British so unfavorably that sales in England would suffer.

As work on his five-volumne "Life of Washington" progressed, however, Marshall got skittish about the appearance of his role in the whole undertaking.

He sent his son to Philadelphia to try to prevent the use of his name on the work. The publisher, of course, refused. (Imagine, for example, a publisher today agreeing to an anonymous biography of Jimmy Carter by Jody Powell.) Eventually it was agreed that Marshall's name would appear on the title page, in relatively small type and without mention of his Supreme Court title.

Meanwhile, President Jefferson was so angered by reports of what he called Marshall's "evil labor" that he forbade postmasters to take orders for the books.

"It is intended to come out just in time to influence the next (1804) presidential election," Jefferson told the celebrated poet Joel Barlow, urging him to write a counter-history from the anti-Federalist viewpoint.

When the volumes appeared, beginning in 1804, Marshall's "Life of Washington" drew predictably mixed reviews. But even former President John Adams, himself a Federalist, privately described it as a "mausoleum" principally designed to make money. While successful commercially, it was never quite the smash hit the two justices hoped for.

Joseph Story of Massachusetts, the third justice in Schnapper's account of the Washington papers, enters in the 1820s when his friend, House chaplain Jared Sparks (later an important historian and president of Harvard College), enlisted his warm support for a Sparks-edited publication of all of Washington's writings.

At first Bushrod Washington was uninterested in helping someone else make a buck from his uncle's papers.

Sparks complained to Story, arguing that "Washington's public letters and papers are the property of the nation" and as such should be laid before the people.

Meanwhile, Sparks began assembling copies of Washington's letters from other sources—so many that we wrote Justice Washington he was going ahead with the project in any case, but would agree "to divide with you equally the property of copyright and the profits of sale" if he could use the papers in the justice's possession.

Sparks turned to Marshall, whom he had met socially through Story.

Marshall's intercession with Justice Washington was "apparently decisive," Schnapper believes. In fact, the 1827 contract called for a three-way split of the profits, cutting Marshall in.

Story, who offered his "affectionate friend" Sparks all manner of encouragement about

the project, lent his name to newspaper letters promoting Sparks' undertaking—letters which were used in a brochure soliciting prepaid orders for the 12-volume Washington papers.

Following the deaths of Justices Washington in 1829 and Marshall in 1835, Story found himself in 1841 sitting as a circuit judge in a case brought by Sparks' publisher. The publisher complained that a new biography of Washington contained excerpts from the Sparks edition of the papers, thus infringing on the Sparks-Marshall-Washington copyright.

The opposing publisher claimed the papers were public property, not copyrightable.

Story, in what Schnapper calls "a puzzling lapse" for "one of the early giants" of the court, did not disqualify himself, despite his personal promotion of the Sparks series and multiple other apparent conflicts of interest (the publisher, whom Story knew, was Harvard's librarian; Story taught there part-time, Sparks full-time).

In his ruling, he held that the papers were Washington's private property, had been deemed such by the president himself, and were in the same boat as letters by British literary figures.

Schapper contends that Story ignored the failure of Congress to sanction the private ownership of presidential documents, and other basic constitutional issues involved, including its ban on extra presidential income apart from salary.

As a result of Story's opinion—which Schnapper says was practically unnoticed at the time—the new biography was withdrawn from circulation.

Washington's personal opinion as to the nature of his papers as commander-in-chief and as president seems to have been ambiguous.

"A species of public property," he told Gordon. In his letter to the Treasury he referred to "my papers of a public nature." His letter to the War Department made mention of "my military, civil and private papers." But it remained a potentially bothersome issue for officialdom, and by the time of his death nothing was resolved.

"Thus," Schnapper concludes, "records of great historical importance came to be treated as private property because of official negligence."

Not until 1934 did Congress authorize a National Archives.

Not until 1955 did it authorize a system of government-maintained libraries to house the records of recent presidents.

And not until 1974, after Nixon left office, did Congress take custody of a president's documents, leaving the question of ownership to the courts. Nixon's personal claim to his tapes and papers is pending before the Supreme Court.

At the same time it seized the controversial Nixon materials, Congress created a Public Documents Commission to study the question of how the records generated by a wide variety of officials—judges and congressmen and agency chiefs, as well as presidents—should be treated. What is public? What is private? And what meant Washington by his cryptic phrase, "a species of public property?"

That commission meets here today to discuss its recommendations, which are due on Capitol Hill next Thursday.

LITHUANIAN INDEPENDENCE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 29, 1977

Mr. FORD of Michigan. Mr. Speaker, I am extremely proud today to join many of my colleagues in the commemoration of the 59th anniversary of the Declaration of Independence of Lithuania.

It was on February 16, 1918, that Lithuania declared its independence after surviving a long period of Russian domination followed by a brief German occupation during World War I. Every freedom-loving American must admire the determination and perseverance of the Lithuanians that allowed them to realize, if only briefly, their goal of independence.

In 1795, when Lithuania was annexed by Russia, Lithuanians banded together against their enemy. Their resentment of their Russian overlords grew in strength as the Russians tried to suppress what Lithuanians cherish most—their language, religion, and traditions. Each attempt of the brave Lithuanians to overthrow Russian domination brought more intensified efforts to convert the Lithuanians to Russian ideology. But with unmatched determination the Lithuanians resisted and remained true to their traditions.

The Lithuanians' determination finally led to their independence on that special day in February 1916. Ironically, Lithuania's independence was short lived. No sooner had the Lithuanians proclaimed their independence than the Red Army entered the country and installed a Communist government. The Lithuanians, having struggled for centuries for their precious independence, joined forces with the Polish Army and drove the Russians from their native land. A treaty was signed with the Russians on July 12, 1920, recognizing Lithuania as an independent nation. Once again her proud people stood tall.

Despite some internal problems, typical of any young country, Lithuania and her culture began to flourish with newly acquired independence. In 1939 Lithuania felt the brunt of Nazi and Soviet aggression. Despite her policy of neutrality in World War II, Lithuania was forced into many concessions by the Russians and Germans. Then, on August 3, 1940, Lithuania was declared a constituent republic of the U.S.S.R. by the Supreme Soviet in Moscow.

Soviet domination did not end with World War II and anti-Soviet Lithuanian partisans fought for freedom against the military occupation at the cost of about 50,000 lives. In addition about 75,000 were able to escape to the West.

Mr. Speaker, we cannot let the struggles of these proud and brave people be forgotten. I strongly support the continuing policy of our country toward Lithuania. We have refused to recognize the seizure and forced "incorporation" of Lithuania and her neighbors, Latvia and Estonia, by the Soviet Union.

I do hope that in the not too distant future these proud people can once again regain their independence.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Wednesday, March 30, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

MEETINGS SCHEDULED

MARCH 31

9:00 a.m.

Agriculture, Nutrition, and Forestry

To resume hearings on proposed legislation to amend and extend the Agriculture and Consumer Protection Act.

332 Russell Building

Foreign Relations

Foreign Assistance Subcommittee

To mark up legislation on international financial institutions and bilateral development assistance.

4221 Dirksen Building

9:30 a.m.

Appropriations

Interior Subcommittee

To resume hearings on proposed budget estimates for fiscal year 1978 for the Bureau of Outdoor Recreation and the Land and Water Conservation Fund.

1318 Dirksen Building

Commerce, Science, and Transportation

Subcommittee on Aviation

To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.

5110 Dirksen Building

Energy and Natural Resources

Business meeting, to consider the nominations of Guy Richard Martin, of Alaska, and Robert L. Herbst, of Minnesota, each to be an Assistant Secretary of the Interior.

3110 Dirksen Building

Human Resources

Handicapped Subcommittee

To resume oversight hearings on the implementation of the Developmentally Disabled Assistance and Bill of Rights Act (Public Law 94–103).

Until 1 p.m. 6202 Dirksen Building

Human Resources

Health and Scientific Research Subcommittee

To hold hearings in connection with the protection of human subjects used in experimental research.

Until: 12:30 p.m. 6226 Dirksen Building

Select Small Business

To hold hearings on the nomination of Arthur Vernon Weaver, Jr., of Arkansas, to be Administrator of the Small Business Administration.

424 Russell Building

10:00 a.m.

Appropriations

Defense Subcommittee

To continue hearings on proposed budget estimates for fiscal year 1978 for the defense establishment, to hear public witnesses.

1223 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the National Highway Traffic Safety Administration.
1224 Dirksen Building

Banking, Housing, and Urban Affairs
To hold hearings on S. 664, to provide for the insurance of graduated payment mortgages, and S. 1078, to revise the experimental mortgage insurance program.
5302 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Energy and Natural Resources
Subcommittee on Public Lands and Resources
To consider S. 7, to establish in the Department of the Interior an Office of Surface Mining Reclamation and Enforcement to administer programs to control surface coal mining operations.
3110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on national water policy in light of current drought situations.
4200 Dirksen Building

Governmental Affairs
To continue hearings on S. 591 and S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
3302 Dirksen Building

Human Resources
Subcommittee on Labor
To continue hearings on S. 717, to promote safety and health in the mining industry.
Until 1:00 p.m. 3232 Dirksen Building

Select Intelligence
Subcommittee on Budget Authorization
To continue closed hearings on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

Select Nutrition and Human Needs
To continue hearings to examine the relationship between diet and health, to receive testimony on the need for fiber in diet.
Until 1 p.m. 1202 Dirksen Building

11:00 a.m.
Foreign Relations
Subcommittee on Arms Control, Oceans and International Environment
To hold hearings on S. Res. 49, favoring international agreement to a treaty requiring the propagation of an international environmental impact statement for any major project expected to have significant adverse effect on the physical environment.
4221 Dirksen Building

2:00 p.m.
Appropriations
Labor-HEW Subcommittee
To continue hearings on proposed budget estimates for the fiscal year 1978 for the Office of Civil Rights, Inspector General, Policy Research, and General Management.
S-128, Capitol

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for the fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Appropriations
Defense Subcommittee
To continue hearings on proposed budget estimates for the fiscal year 1978 the Defense establishment, to hear public witnesses.
S-126, Capitol

Appropriations
Legislative Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the legislative branch, on items under the Office of the Secretary of the Senate.
S-146, Capitol

Select Intelligence
Subcommittee on Budget Authorization
To continue closed hearings on proposed fiscal year 1978 authorizations for Government Intelligence activities.
S-407, Capitol

3:30 p.m.
Foreign Relations
To receive a briefing (in closed session) from officials of the Central Intelligence Agency on the general world situation.
S-116, Capitol

APRIL 1

9:00 a.m.
Agriculture, Nutrition, and Forestry
To resume hearings on the administration's proposals relative to the food stamp program.
322 Russell Building

9:30 a.m.
Commerce, Science, and Transportation
Subcommittee on Aviation
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To hold hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.
4200 Dirksen Building

Foreign Relations
Subcommittee on Western Hemisphere Affairs
To meet in closed session to receive a briefing from Ambassadors Ellsworth Bunker and Sol Linowitz on Panama Canal negotiations.
S-116, Capitol

Human Resources
Health and Scientific Research Subcommittee
To continue hearings in connection with the protection of human subjects used in experimental research.
Until 12:30 p.m. 6226 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on S. 664, to provide for the insurance of graduated payment mortgages, and S. 1078, to revise the experimental mortgage insurance program.
5302 Dirksen Building

Budget
To markup proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Commerce, Science, and Transportation
To hold hearings on the nominations of Charles Linn Haslam, of North Carolina, to be General Counsel, and Frank Alan Well, of New York, to be an Assistant Secretary, both of the Department of Commerce.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To hold hearings on S. 419, to test the commercial, environmental, and social viability of various oil-shale technologies.
3110 Dirksen Building

Environmental and Public Works
Nuclear Regulation Subcommittee
To hold hearings on proposed fiscal year 1978 authorizations for the Nuclear Regulatory Commission.
457 Russell Building

Governmental Affairs
Energy Subcommittee
To hold hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

Human Resources
Subcommittee on Labor
To continue hearings on S. 717, to promote safety and health in the mining industry.
Until: 1:00 p.m. 4232 Dirksen Building

11:00 a.m.
Foreign Relations
International Operations Subcommittee
To hold hearings on proposed fiscal year 1978 authorizations for the International Broadcasting Board.
4221 Dirksen Building

Joint Economic
To hold hearings on the employment/unemployment situation.
1202 Dirksen Building

2:30 p.m.
Foreign Relations
To receive a briefing by Leonard Woodcock on his delegation's recent trip to Vietnam and Laos.
4221 Dirksen Building

APRIL 4

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To resume hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Treasury, on funds for New York City financing.
1318 Dirksen Building

Appropriations
